WAR SPIRIT OF THE COLUMBIANS IS GROWING, MAY FIGHT PANAMA

A DIPLOMAT SAYS COLUMBIA WILL FIGHT TO SAVE HER HONOR

A Very Bitter Feeling Exists and General Reyes Is Fearful That He Will Not Be Able to Stem the Tide--War Between the Two Countries Probable

Washington, Jan. 4—"To save her face Colombia must fight. Her people will never be satisfied until they have made a demonstration against Panama."

This statement, made last night by a South American diplomat, confirms advices which the Washington Government is receiving regarding the warlike intentions of Colombia. Added to these is the admission of General Rafael Reyes, the Colombian special envoy, that he fears that the failure of his mission here may furnish the spark which will cause a general conflagration throughout Colombia of the smouldering indignation against Panama and the United States.

Although expecting an attempt at hostilities by Colombia, the officials of the administration say the popular pulse in that country is so sensitive to influence that the emphatic despatches which General Reyes is daily sending to Bogota of the futility of the fighting, may yet avail and bring the Colombians to see the the situation as their minister sees it.

WILL TAKE NO CHANCES.

In the meantime the administration has practically have been completed for the dispatch of troops to the isthmus on short notice in case Colombia attemps to attack Colombia, however, must give unmistakable evidence of her intention to fight before movements of troops from this country to the isthmus will be authorized. It is the intention of the administration to saddle Colombia with the burden of a hostile initiative.

Secretary Root probably will complete to-morrow the reply of the Washington Government to the note of General Reyes, and it will be delivered to the Colombian envoy without delay. No excuses will be offered for the conduct of the United States, nor will any promises be made of concessions to Colombia. The reply is a refutation of Colombia's charges of bad faith and a firm refusal to open the Panama question.

RECOGNIZED BY JAPAN.

The Japanese Minister notified Acting Secretary of State Loomis that his government yesterday formally extended recognition to the government of Panama.

Senor Calvo, the Costa Rican Minister, informed Acting Secretary Loomis that his government formally extended recognition to the Government of Panama.

Word was received at the Navy Department today from San Francisco that the gunboat Pennington and the destroyers Preble and Paul Jones had sailed for Panama.

WAR SHIPS AT KINGSTON.

Kingston, Jamaica, Jan 4—The cruiser Topeka and the torpedo boats Truxton and Stewart arrived here today from Key West. The vessels are coaling, and will proceed as soon as possible to Colon.

PROMINENT MEN ELECTED

Panama, Jan 4—Among those who have been elected to the constitutional convention the most prominent are Dr. Amador, Pablo, Arosemona, Domingo, Osadola, Beltmario, Porras and Luis Beroux.

The Indians on the isthmus of Darien are in favor of Panama and have sent spies throughout the coast and into the interior. The government of Panama has furnished the Indians with guns and ammunition.

CANAL COMPANY MEETS.

Paris Jan 4—The annual meeting of the Panama Canal Company begna this afternoon, developed unusual interest and excitement. The management submitted a report on the recent events of the isthmus and the course taken by the company. The report set forth that the Republic of Panama today exercised sovereignty over the isthmus, displacing Colombia's former sovereignty, that the United States, France, Russia, Great Britain, Germany and other countries had recognized Panama's supremacy and added

In view of the accomplished fact and in face of superior force we can only maintain and continue the existing engagements with the United States.

The report also explained that the fact that the United States Senate had not ratified the treaty with Panama deferred the execution of the company's engagements with the United States, continuing

It is under these circumstances that we convoke you to give to our agreement with the United States your definitive approval.

COLUMBIA'S COURSE NOTED.

The report further disclosed Columbia's recent vain efforts to induce the company to continue dealing with the old government of the isthmus, saying

Prior to the Panama uprising the committee of the Columbian congress recommended action which would have extinguished the company's rights. It proposed to insert an item of $1,000,000 in the Columbian budget to reimburse the company for its losses. The agent of the at Bogota resisted and the French government gave assurances that it would do all possible to prevent the sacrifice of French property and interests.

Following the Panama outbreak Columbia notified the company, Nov. 28, that it would maintain the company's rights, but would oppose the transfer of the concession to any government whatever.

On Dec. 5, Columbia's agent here M. Samper notified the company that while Columbia was ready loyally to uphold the company's rights, yet if the company entered into relations with the separatist government or transferred its rights to another government Columbia would construe such action as a voluntary abandonment of the concession, which would therefore lapse.

The company replied Dec. 5 that it recognized the existing conditions on the isthmus, and that if Columbia resumed possession of the isthmus the company would be glad to resume relations with Columbia.

RESOLUTIONS ARE ADOPTED.

The unaffected element hooted and cat-called, causing much disorder.

Two resolutions were adopted, the first approving the accounts and the second re-electing the old officers. The vote on the first resolution was 9,239 in favor to 119 against it, showing the insignificance of the opposition to the United States.

The exclusion of the Columbian representatives from the meeting caused further disorder.

The question of approving the sale of the company's property to the United States was postponed to a subsequent meeting.

AMERICAN WAR CERTAIN

American Cabinet Takes Action on Columbia's Demand

Washington, Jan. 1.—The United States will not entertain Colombia's demand for the restoration of Panama to the Colombian union. Neither will the government consent to submit to The Hague any question of financial damages which Colombia may now or hereafter assume she has sustained through the secession of Panama and the establishment of an independent republic on the isthmus. The policy of the administration will be to stand by the treaty with Panama and observe all of its provisions, including the one guaranteeing the independence of that republic, build the canal and, if war follows, fight until Colombia asks for peace.

Briefly, this is the program that was decided upon at this afternoon's Cabinet meeting, which lasted from 4 until 7 o'clock. Secretary Root, who has been designated by the President to conduct the negotiations during the illness of Secretary Hay, will communicate the Cabinet's decision to General Reyes, the Colombian peace commissioner, in the form of a note that will stand as an answer to his own, submitted to the Secretary of State last week.

Thinks War Sure to Follow.

General Reyes will leave Washington immediately, accompanied by Dr. Herran, and proceed to Bogota, by the shortest route available. What will follow is made clear by certain dispatches contained in the pamphlet presenting the correspondence on the Panama revolution, which was made public today. That there will be war is undoubted.

The administration is prepared for any emergency. Five transports are waiting at New York and San Francisco with steam up to take on board two brigades of regular soldiers and sail for Panama in a few hours notice.

General Reyes is aware of the character of the preparations that have been made to forestall an attempted invasion of the isthmus, but it is known that he greatly fears that it will be impossible to restrain his countrymen, who are demanding war with the United States.

The Cabinet was a unit in indorsing the President's course in the Panama matter and also the course he has mapped out for his future guidance.

Translator's Illness Causes Delay.

The reason why the Reyes note was not considered before today was because a translation of it was not ready for submission to the Cabinet until 3 o'clock this afternoon. When General Reyes delivered the note to Secretary Hay at the latter's home last week it was immediately sent to the State Department with an order that it be translated forthwith. The note was in Spanish. Professor Thomas, the official translator, was ill, and the note was put away to await his recovery. It was regarded as such an important document that Secretary Hay deemed it more prudent to secure a translation from Thomas rather than from his assistant. Thomas died yesterday.

Immediately the note was turned over to his former assistant, and that official had a copy in English ready this afternoon. When President Roosevelt was informed that the copy would be ready about 3 o'clock he instructed Secretary Loeb to issue a call for the Cabinet to meet at 4. The session lasted for three hours, and during that time every conceivable feature of the Panama matter was discussed.

LOSES HOPE OF PEACE

No Word From Japan Means That Press Censorship Has Been Established

RUSSIANS ORDERED TO SEA

Minister Informed that Russia Has Determined Not to Grant Demands of Japan

London, Jan. 4—Foreign Secretary Lansdowne informed one of the Foreign Ambassadors yesterday that he has practically given up all hopes of peace in the far East.

No further news has developed up to an early hour Saturday morning but the fact that not a single telegram from Japan has been received by any London newspaper since Thursday night in itself creates alarm. The telegraph company is not aware of any delay in the transit of messages, and it therefore is supposed that the Japanese Government is stopping despatches.

The London Daily Mail's Malta correspondent reports that five Russian torpedo boat destroyers which are undergoing repairs there have suddenly been ordered to sea in an unfinished condition.

Russia Refuses.

Baron Hayashi, the Japanese Minister here, has been informed from Paris that Russia has decided not to grant the Japanese proposals. This is the first intimation anyone here admits having received anent the Russian reply. The Baron said: "If my information from Paris is borne out by the wording of the Russian reply, and if the Japanese Government adheres to the present determination, there seems be small possibility of averting war. My information from Paris," said the Minister of Japan, "is not official, but in connection with information imparted to me by the British Government, it is possibly only too correct. If the German Chancellor's statement that Russia's reply will be framed in a manner intended to satisfy Japan turns out to be correct, it will be better news than I have dared to hope for."

NOTHING YET DONE.

St. Petersburg, Jan. 3—The Foreign Office yesterday stated that nothing had been done in connection with a reply to Japan. "The Japanese Minister here is unable to confirm or deny the advices received from Paris by Baron Hayashi, the Japanese Minister to Great Britain, that Russia had decided not to grant the Japanese proposals. He says an answer to these proposals has not yet been made. It is generally accepted in diplomatic circles here as unlikely that an answer will soon be delivered, and attention is now mainly directed to the Japanese war preparations.

NOTHING IS KNOWN.

Paris, Jan. 3—At the Japanese Legation here Minister Montono denied a report that advices had been sent from the Legation at Paris to the Japanese Minister at London that Russia had decided not to grant the Japanese proposals.

Absolutely nothing is known in French official circles of the advices sent from Paris to the Japanese Minister in London that Russia had decided not to grant the Japanese proposals. Moreover, it is pointed out that Foreign Minister Delcasse left Paris to-night for Nice, which it is thought he would not have done if serious news had been received.

SHIP FLOUR TO JAPAN

Orders for Nearly 100,000 Barrels Booked by Minneapolis Mills

Minneapolis, Minn., Jan. 4—Within the past eight business days Minneapolis mills have booked almost 100,00 barrels of flour for export to Japan. Further enquiry was reported today, and it is not unlikely more business will result.

For some time Japan has been a heavy buyer of American flour. The millers are reticent about the matter, but admit that the orders are still coming. and one large company alone is known to have booked close to 50,000 barrels within a day or two. "The Japanese government has bought no flour direct.

San Francisco, Jan. 4—Getz Bros & Co., have contracted with the Russian government to supply the latter with 2,000,000 pounds of beef. The firm is making demands upon all the big packers in the west, having already placed an order for 1,000,000 pounds with Cudahy & Co, to be delivered in this city.

STANDS BY AN ANARCHIST

Central Union of New York Urges General Action in Turner Case

New York, January 4 —All the unions throughout the country will be urged to stand by an anarchist now awaiting deportation at Ellis Island. A resolution has been adopted by the Central Federated Union to call a mass meeting for the purpose of protesting against the deportation of John Turner, an English anarchist who is now held at the island All central labor unions in the country are to be appealed to for support in the matter, and will be asked to aid in an effort to secure the repeal of the law under which Turner is being held by the immigration officials. Delegates who addressed the meeting declared that the law, in its present form, has the opposite effect of that desired.

CHINA TO RATIFY TREATY

Government has Promised to Send Its Copy to Washington

Pekin, Jan 4—The Chinese government has promised United States Minister Conger to forward soon the Chinese copy of the treaty to Washington for the exchange of ratifications. After the treaty is ratified the opening of Mukden and Shantung to the commerce of the world can be granted.

MAYOR HAS CLOSED THEATRES

Houses Without Asbestos Curtains Cannot Be Used

Chicago, Jan. 3—As a result of an investigation made on Mayor Harrison's orders, nineteen theatres and museums were ordered closed, some of them being among the leading and most popular play-houses of the city. The principal reason was because these houses did not have asbestos curtains, every one being burlap or linen. Other defects as to exits, etc., were noted in some of the houses, and these will have to be remedied. The latest, and it is believed, the most correct list, of the dead, totals 612.

Carrying Daughter's Body.

A pathetic incident occurred yesterday on the Cottage Grove avenue cable line. This passes within a half square of Rolston's Morgue. Late in the day, a man, haggard and worn, walked up to a Cottage Grove avenue car and climbed aboard, carrying in his arms the body of a little golden-haired girl. The form was partially wrapped in a canvas cloth, but not sufficiently to conceal it. As the father took his seat, the conductor touched him on the shoulder saying, "I am sorry but the rules of the company do no permit the carrying of bodies in this manner. I must ask you to leave the car."

Without changing his expression in the slightest, without showing a trace of excitement or irritation, the man rose to his feet, still holding on one arm the body of his child. With his free hand he thrust into the face of the conductor a revolver, and said in a tone which betokened utter weariness and almost lack of interest in the proceedings

Now Go On.

"This is my daughter. I have looked for her all of last night and all day. I have tried in vain to obtain a carriage or a cab, and I can get none. I am taking my baby home to her mother and I intend to take her on this car. Now go on!"

Other men on the car interceded with the conductor, and the later, realizing the situation, gave way, and in the crowded car the father sat and carried the corpse of his child to her home.

Detectives on Thursday, arrested Wm. Plunkett, assistant stage manager of the theater, and four members of the "Moonlight Chorus." Plunkett was charged with manslaughter, and the members of the chorus with a violation of a part of the Municipal Code of Chicago. Archibald Bernard, chief electrician of the Iroquois Theater, was also taken into custody, and formally charged with manslaughter.

Bonds were placed at $5,000 in each case. The attorney told the court that many of the theatrical people were destitute and lacking clothing and would have to go to their homes.

PRIEST QUITS CHURCH TO WED

Quietly Marries Member of Parish and Both Disappear

New Britain, Conn., Jan. 5—Peter O. Rielly, aged 25 years, formerly an assistant priest in St. Mary's Roman Catholic parish in this city, and Miss Mary O'Donnell of the same parish, were married a week ago in Hartford by City Attorney Joseph Tuttle as justice of the peace. The marriage became public today, when the record of the marriage was found at the office of the board of health in Hartford. O'Rielly came to New Britain from Fort Wayne, Ind., a year ago. The bride and bridegroom have gone away. Their whereabouts are unknown.

CORRECTING A BLUNDER

How a Clerk Changed the Addresses on Two Letters

The following story was given The Times, the truth of which is vouched for:

A certain clerk in a George street store was given two very important letters to mail a day or two ago. One was addressed to a citizen in town, and the other to a Toronto wholesale house. As he was about to place them in the receptacle in the postoffice, the clerk's eagle eye detected that his employer had made a slight mistake. He had placed the 2-cent stamp required for out of town postage on the city letter and the 1-cent one on the Toronto missive. The clerk was, of course, equal to the emergency and soon had the matter adjusted all right. Then he fairly flew back to the store to report the mistake that had been made to his employer.

"You're a brick, my boy," said the busy man, "and you don't know how much I appreciate you. How did you fix it?"

"Oh, easily enough," he replied, "I just changed the addresses."

Church Organ Silent

Yesterday during the morning service at St. Paul's church, the organ was not used, there not being water power sufficient to drive the bellows. There was much disappointment in consequence, as the usual solo be Miss Davies had to be omitted. There is no excuse for not keeping up the required pressure in the water mains. It would be well if the Water Commissioners would use another kind of pressure with the man at the pump to compel him to do his duty.

G T R Issues a Writ

There is trouble in view for the promoters of the Lindsay, Bobcaygeon, and Pontypool Railway. Friday morning at Osgoode Hall, a writ was issued by the Grand Trunk Railway Company, asking for an injunction restraining the L., B. & P. Railway Company from taking any further proceedings in connection with the expropriation of lands for the purposes of the railway for a declaration that they are not entitled to expropriate land.

HOCKEY

The Peterborough Juniors were up against it Saturday night, when they met the Waverleys of Toronto, on the Brock street rink. The boys put up a stiff game but were worsted by a score of 7 to 2.

A splendid game was put up by both sides, but owing to one of the Waverley's playing out in the first half, Peterborough lost a good man in McFarlane who went off to even up, and which helped to decide the game against the home team. Mr. Geo. Lynch gave the best of satisfaction as referee.

JAPAN IS STRIPPED FOR BATTLE WHICH IS NOW CLOSE AT HAND

AMERICANS WANT TO VOLUNTEER FOR SERVICE IN CASE OF TROUBLE

Powers Have Been Told By Japan That The Situation is Grave and That She Is Ready For The Work---Hostilities May Occur at Any Moment Now.

Washington, Jan. 3.—The powers are being notified through the various Japanese legations that the situation in the far East is most critical and that Japan is preparing for the worst. Mr Takahira, the Japanese minister, called at the State Department to-day with the above information, and, while he hopes that Russia will reconsider her first answer to Japan's request, he is fearful she will not do so. Count Cassini, the Russian ambassador, admits that the situation is in a critical stage, but takes a more hopeful view than that taken by the Japanese minister.

Count Cassini is of the opinion that the situation may yet be saved without recourse to arms, but the ambassador has no official advices on which to base this belief, and it is only his personal view of the matter. Mr Takahira takes a more pessimistic view of the case.

OFFERS OF ASSISTANCE.

Russia and Japan are receiving numerous letters from Americans from all over the country offering their services in the event of war. The Russian Ambassador and the Japanese minister are declining all offers of assistance.

At the Japanese legation the announcement is authorized that for days Mr. Takahira's mail has contained many letters from Americans wishing to enlist in the Japanese army or navy. The minister is sending a personal letter to each writer expressing the profound appreciation of the Japanese people for this evidence of sympathy and support on the part of the citizens of the United States but saying that even if assistance were needed. the laws of Japan preclude the employment of any foreign troops. Furthermore, Japan's army and navy are adequate to meet the emergency. Mr. Takahira has advised his government by cable of these offers, and the Japanese embassies and legations throughout Europe will be made aware of this demonstration of American sympathy.

Count Cassini, in declining the offers which his government is receiving, also is expressing his appreciation of the spirit which prompts them. He is likewise advising St. Petersburg of the fact that the Russian Government may know of the sympathy felt for Russia in the present crisis.

EVANS MAY GO TO NAGASAKI.

Although Rear Admiral Evans, of the United States, left Honolulu, with orders to proceed direct to Cavite, he may get supplementary instructions upon arrival at Guam to take his fleet northward in the neighborhood of Nagasaki.

While the rear admiral will be instructed to observe absolute neutrality in the event of war between Russian and Japan, there is a desire in naval circles that the Asiatic fleet be given the opportunity to observe the conflict between these two naval powers, and pressure is being brought to bear on the department to send the fleet from Guam to Japanese waters.

Secretary Moody has not yet decided whether he will change Admiral Evans' orders In case the fleet is ordered North it is said that it will be solely for the purpose of observation, and cannot be construed as indicating the sympathy of the United States for Japan.

SITUATION IS DESPERATE.

Paris, Jan. 4—It is learned in diplomatic circles that the Japanese government has informed the foreign diplomats that the situation with respect of Russia is desperate but not hopeless

It is believed this information was communicated to the French government for presentation at St. Petersburg.

REV. A. J. WILSON REMEMBERED

The Popular Assistant Pastor of St. Paul's Honored

Rev. J. A. Wilson, was presented with a handsome fur-lined coat by the members of the senior Bible class of St. Paul's. The presentation took place on New Year's Day. Accompanying the gift was the following address, read by Mr R. G. Williamson, the presentation being made by Mrs. Mein.—

Rev J. A. Wilson, B.A,

Assistant Pastor St. Paul's Presbyterian Church, Peterborough, Ont.

Dear Mr. Wilson,—We, as members of the Senior Bible Class, in connection with St. Paul's church, desire to extend to you the heartiest compliments of the season. Another year has rolled around with its changes, and the season of general good wishes and grateful remembrance is with us.

As a class, we cannot allow the opportunity to pass without extending to you our appreciation, in some measure, of your work among us as teacher.

You have by your bright manner and instructive teaching from Sabbath to Sabbath, brought together a large number of Bible students,—a class of which we are all justly proud,—we are endeavoring to profit and live better lives by your teaching; and the lessons taught from God's word cannot fail but leave impressions when illuminated by the Spirit of God, which will never fade away, but shall shine throughout eternity.

You have been most faithful, encouraging and sympathetic in all your work, not only among us as a Bible class, but in all the different organizations of the church, and we all join in hoping that you may feel it your duty to remain among us, and continue the good work, which shall resound to the glory of God, and the salvation of immortal souls May we pray that we shall all receive an abundant blessing during the year, just opening before us.

In conclusion, we respectfully ask you to accept this overcoat, and our earnest prayer is that you may be spared in health and strength to wear it, and that your work may be abundantly blessed by our Father in Heaven.

Signed on behalf of the class.

Committee;

Annie W. Cameron, Adeline Lee, J. Robertson, Eliz. O. Simpson, Etta Thompson, A. J. Grant, Mrs. Mein D. Baptie, Alice Dawson, R. G. Williamson, Secretary.

Peterborough, Ont., Dec. 31st, 1903

A NEW YEAR'S WEDDING.

Nuptials of Miss Mabel A. Metheral and Dr. Weston Milburn

A very pretty home wedding was celebrated on New Year's day, at the residence of the bride's parents, 146 Murray street, when Miss Mabel Alberta, youngest daughter of Mr. John P. Metheral, was united in marriage to Dr. Weston Milburn, of McLeod. The ceremony was performed by Rev. J. P. Wilson, B.A., in the presence of about thirty guests. The bride was charmingly attired in a gown of crepe de chene over taffeta, and carried a bouquet of bridal roses. Miss Marion Moscrip, of Erie, Penn., neice of the bride, made a very pretty flower girl. Miss Sanderson played Mendelssohn's Wedding March.

At the conclusion of the ceremony, a dainty wedding breakfast was served, Mr. H. Long, being the caterer.

The bride, who is one of Peterborough's most popular young ladies, was the recipient of a large number of beautiful and costly presents. She will be greatly missed in social and musical circles, particularly by the choir of the George street church, of which she was a valuable and talented member.

Dr. and Mrs. Milburn left on the 7.35 C.P.R. train for a wedding trip, and will reside in future at McLeod, Alberta.

Among the guests present were Miss Henderson, Collingwood; Mrs. Moscrip, Erie, Penn; Mr. F. J. Metheral, Midland.

The Times joins their many friends in wishing Mr. and Mrs. Milburn long and happy lives.

NEW YEAR'S RECEPTION

Large Number of Visitors at Y M C A on Friday

The New Year's reception at the Y.M.C.A. on New Years day was a grand success and was very largely attended. Among the visitors present were many from other cities and also the directors of the Association.

Much credit is due Miss Dobbin and Mr. MaGuire, for the excellent music provided, while Mr. Galley, chairman of the social committee and his able staff of assistants looked admirably after the affairs of the afternoon.

Mr. Richardson and Mr. Doobin had charge of the refreshments, while Mr. Might looked after the parlor amusements. The affairs in the kitchen were in charge of Messrs. Harry and McCorry who served the best coffee to be had in town.

The thanks of the directors and members generally are due the ladies for the excellent refreshments provided.

TO-DAY'S ELECTIONS

How and Where Ratepayers May Vote

List of Candidates for Municipal Honors—The Vote on the By-Laws

The following information may help the voter today.

There are 18 names on the ballot and each ratepayer will be entitled to vote for not more than 12 candidates. They may vote for a lesser number if they so desire. The following is the list,

ADAMS, FRANK,
BATTEN, JOSEPH,
BEST, HENRY,
BRAUND, R. C.,
CLINKSCALE, ROBERT,
EDGCUMBE, JAS.,
FINNIE JAMES,
GIBBS, WILLIAM,
HICKS, ROBERT,
JOHNSTON, WM. J.,
KYLIE, JOHN,
MASON, E. F.,
MORRISON, M. A.,
McWILLIAMS, R. F.,
QUINLAN, M. H.,
RUSH, HENRY,
SAWERS, JOHN,
SCOTT, WILLIAM,

Every elector, whether property holder or otherwise, may vote on the street lighting and street railway by-laws. The submission of these questions to the electors is merely in the form of a referendum, and is taken for the guidance of the new council and is not legally binding.

In Ward Three the electors may vote on one candidate for School Trustee. Those who are in the field for this office are

W. S. ROBINSON,
R. P. BOUCHER,
JAS. STEVENSON,

All property holders may vote on the by-law to raise $10,000 to purchase the Hilliard farm. This applies to property holders in the new fifth ward, as well as in older Peterborough.

The polling places will be as follows—

Ward No. 1.

Polling Sub-division No. 1—At M. H. Halpin's shop, No. 30 George street, Angus McWilliams to be Deputy Returning Officer.

Polling Sub-division No. 2—At Lewis Spry's shop, No. 216 Stewart street, Jas. Lundy to be Deputy Returning Officer.

Ward No. 2.

Polling Sub-division No. 3—At the Town Council Chamber, Charles Cameron to be Deputy Returning Officer.

Polling Sub-division No. 4—At Greene Bros store, No. 253 Charlotte street, J. M Greene to be Deputy Returning Officer.

Ward No. 3.

Polling Sub-division No. 5—At J. & W. Metheral's shop, No. 464 Aylmer st. Jos. Metheral to be Deputy Returning Officer.

Polling Sub-division No. 6—At Wm. McCall's shop, No. 339 McDonel street. John Irwin to be Deputy Returning Officer.

Ward No. 4.

Polling Sub-division No. 7—At Wm. Lee's shop, Smith street, John Kincaid to be Deputy Returning Officer.

Ward No. 5.

Polling Sub-division No. 8—At the Village Council Chamber, John T. Wright to be Deputy Returning Officer.

Polling Sub-division No. 9—At the Village Market Building. Thos. Q. Quartermaine to be Deputy Returning Officer.

The polls will be open on Monday, January 4th at nine o'clock in the morning, and will be kept open until five o'clock in the afternoon and no longer.

DAUGHTERS OF ENGLAND

Installation of Officers of Lady Lansdowne Lodge for 1904

Lady Lansdowne Lodge of the Daughters of England met on Wednesday night in their hall, when the following officers for the coming year were installed by Sister Mitchell, District Deputy.

Past P.—Sister Bunnin.
W. P.—Sister Booth.
V. P.—Sister Oliver.
W. S.—Sister Mitchell.
W. Treasurer—Sister G. Bunnin.
Chaplin—Sister J. Nabine.
Physician—T. W. Young.
Committee 1—Sister Evans.
Committee 2—Sister Simmons.
Committee 3—Sister Wilkins.
Committee 4—Sister Pitman.
Inner Guard—Bro. Booth.
Outer Guard—Bro. Taylor.
Hall Trust—Sisters Gaskins and Shaw.
Auditors—Sisters Booth and Wilkins.

Mr. W. J. Johnston an Old Resident

Mr. William J. Johnston, who is running for Alderman for the town, is "Billy" Johnston the carpenter and builder, son of James Johnston, Dublin street. There is some doubt as to who this Johnston is, and some of his supporters are anxious that he should be as well known to the electors as possible. He was born and raised in this town and is familiar with it from all its boundaries to the north, south, east, and west. He lived for 14 years in the village of Ashburnham, and was for five years a member of that council, when he sold his property and moved over to Peterborough. His record across the river was all right, and he is just as anxious for the welfare of the fifth ward as any councillor who is living in it, and is running for the office of alderman. His policy for the town is Progression, and he will see that, as far as lies in his power, that everything is carried forward to a straightforward issue. His friends are anxious to see that "Billy" is a member of the council board for at least 1904.—Com.

To Protect Hotelkeepers

The hotel managers of the Province intend to ask the Legislature for some changes in the law in order to protect themselves from hotel "beats" At a meeting of the Toronto Hotelkeepers Association, Mr. T. M. Bayne, presiding, a committee consisting of Messrs. H. Winnett, of the Queen's, T. M. Bayne, A. Nelson, Rossin, and G. A. Graham, Iroquois, was appointed to have a bill prepared. They desire some legislation to enable them to have a guest promptly arrested when it is discovered that he is a "beat." At present the only remedy is to expel the guest. The law in several of the United States now provides that where a guest has been obtaining accommodation by false pretences, he may be arrested for fraud. The hotelmen claim that such legislation would enable them also to protect shopkeepers from many who claim credit on the ground that they are guests at prominent hotels.

Elgin, Ill., Jan. 4—Mrs. Rebecca Bogyman gave birth to triplets, two boys and a girl this morning. She was already the mother of sixteen children, who are with the father at his home in Carpentersville.

FERROZONE

Furnishes in a convenient form, a Tonic-Laxative which cures Constipation and a host of other diseases more or less common

The entire length of the intestinal canal can be gently and thoroughly cleansed of all foul decaying matter, by taking Ferrozone after each meal.

Ferrozone helps the kidneys and liver to their work, and by preventing the pores of the skin from being clogged up, it clears and beautifies the complexion. Ferrozone relieves irritation and pressure on the tissues of the brain and nerve centres, and insures a healthy vigorous condition of mind and body.

The great merit of Ferrozone is that it instantly relieves constipation, and permanently cures it without interference with business or pleasure, and never causes inconvenience or distress. It keeps all the bodily functions regular, and is the only medicine for constipation that acts gently, acts quickly, acts surely, without grip or grippe.

Ferrozone will keep the entire family in perfect health. It regulates the bowels, cures headache and stomach troubles, and effectually cleanses the blood from all impurities. It builds up muscle and sinew, strengthens debilitated constitutions, and permanently remedies all manner of skin blemishes.

Ferrozone is especially efficacious in cases of over-work, headache, brain fag, torpid liver, weak memory, and melancholia. It relieves that "tired feeling," and puts elasticity into every movement. Ferrozone gives strength to the regenerative organs, and for the relief of nervous prostration, nervous debility, or decline of mental or physical power, is certainly superior to any curative agent the world has ever seen.

The range of adaptability of Ferrozone is simply wonderful. It is entirely vegetable in composition, and quite free from any possibility of injurious effect even under long continued use. It is prepared in the form of a chocolate coated tablet, and no uncertainty or mistake as to the proper quantity or dose can ever arise.

Ferrozone is recommended and sold by all druggists, price 50 cts. a box, or three boxes for $1.25. Remember the name and see that the genuine Ferrozone is supplied. Refuse a substitute. Sent safely by mail if price is forwarded to N. C. Polson & Co., Kingston, Ont.

Morning Times

[illegible] paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at [illegible] per month, and to outside points at $3 per year strictly in advance.

PETERBOROUGH, JANUARY 1, 1904

CHICAGO A HOUSE OF WOE

In the presence of the Iroquois calamity there is room only for the word of pity. Investigation which shall make for greater safety will come in due time, and it ought to come. This is the right not only of the public but of the managers who believed they had done everything within the range of modern mechanical and architectural ingenuity to provide playgoers with a safe place of entertainment.

The great city of Chicago, given to celebrating the coming of the New Year with merry clamor, must now surrender the holiday period to the office of sorrow. Over 600 members of the community have met death in its most agonizing form. Hundreds more have been cruelly maimed and burned.

In the presence of this overwhelming disaster Chicago becomes a house of woe. From end to end of the city there are sorrowing families. Children are gone and with them fond elders, who, in the spirit of holiday cheer, had accompanied them to an entertainment of music, spectacle and comedy particularly appropriate to the season.

The fate of those who are gone and the grief of those who are bereaved compel the tenderest utterance of sympathy. It is the hour for the gently spoken word and the loving ministration.

THE FATE OF A MAHDI

A month ago news was received in England that a new Mahdi had risen in the Soudan. Ten days later another telegram came announcing that the Mahdi had been captured, tried and hanged. The interval was so brief that no excitement had been aroused over the trouble, but, nevertheless the conditions in the Sudan had been such that a little delay in action or a little ill-luck to the British expedition, would have been enough for the Mahdi to get such headway that it might have taken years or months to suppress him. He had been working on exactly the same lines as the original Mahdi.

Mahomed El Amin was the Mahdi's name, and the Tagalla mountains in southern Kordofan, near the White Nile, was the district in which he proclaimed himself. He had twice made the pilgrimage to Mecca, and his reputation for holiness was sufficient to gather him a large following in a very few days. Moreover, evidence was found later that he had been in correspondence with most of the leading sheikhs in the Soudan.

The Briton who proved more than a match for him was Colonel Bryan T. Mahon, Deputy Lieutenant-Governor of the Sudan. Colonel Mahon was at Khartum on his way to England when the news reached him. In no more time than it took to issue the orders he had two forces of 300 men each en route to the scene of trouble. His own force, after disembarking at Fache Showe, on the Nile, made a swift march of 300 miles in five days across a desert country, which was rendered more difficult owing to rains. He learned where the Mahdi was, made a forced night march with his tired out soldiers, commanded the Mahdi's position and captured him at daybreak. Then came the trial and a swift punishment at El Obeid. When Colonel Mahon got back to the Nile most of his horses had succumbed to grass poison, while 4 of the men in his force were dead of sunstroke and 75 per cent. of the remainder were down with fever.

It is a vivid story that this little picture gives us, of the white man, his burden and his power, and of the dark man, his dreams and his fate.

CIGARETTES IN THE BRITISH ARMY

The anti-cigarette crusaders will get fresh inspiration for their work in the news from the British army in South Africa. South Africa is a great training school for the raw recruits that are to be made into good soldiers for the British army. News comes from General Lyttleton, commanding the forces there, that the cigarette is playing havoc in the army, and that unless something is done soon to check the cigarette habit Great Britain will be defended by a collection of weak-minded and weak-bodied youths, capable of no real effort of any kind.

It is averred by one of the officers in command that it will require three years of feeding and training to bring most of the recruits up to a point where they will be capable of doing a day's work without breaking down. Under the impression that the army is a soft berth, thousands of habitual cigarette smokers are enlisting for service. After months of drilling, says one of the commanding officers, the chief disposition of many of these recruits seems to be "to hunt some place to lie down for a rest."

Of course young men who are bent upon finding "a place to lie down for a rest," are very poor material out of which to build up the great fighting machine known as the army. Indeed, they would seem to be utterly useless to the commanding officer, who must constantly recruit his forces with men who have in them the stuff out of which soldiers can be made. When General Lyttleton attributes this bodily and mental deter- attributes the bodily and mental deterioration of young recruits to the cigarette it is to be presumed that his statements are based upon knowledge of actual facts. He is not controlled by any prejudices or notions. It is his business to develop strong and sturdy bodies in the recruits who are sent to him, and if they cannot be built into good soldiers he is very certain to ascertain the cause.

The statements of General Lyttleton merely affirm the overwhelming testimony already adduced in many quarters to the effect that the cigarette habit results in positive impairment of both body and mind.

The Boer prisoners remaining in India and Bermuda must be having a grand time at the expense of the British Empire. They refuse to take the oath, and they also refuse to leave Bermuda. We would wager ten to one that if they were made to work for their living, they would leave in a month.

HERE AND THERE

The light of the body is the eye.

In 1816 it cost 25 cents to send a single sheet by mail a distance of 400 miles. To-day a letter containing several sheets may go as many thousand miles for two cents.

Nearly 100,000 pounds of snails are sold daily in the Paris markets, to be eaten by dwellers in that city. They are carefully reared for the purpose in extensive snail gardens in the provinces, and fed on aromatic herbs to make their flavor finer.

A publishing house in St. Paul has leased a club building for its 450 employes. The dues are 10 cents a month, entitling a member to all the privileges of the club. Refreshments are furnished at cost, and storage for bicycles is provided.

The largest grape-growing region in the world is not the champagne district of France nor the sunny valley of southern California, for western New York owns the title by virtue of fifty thousand acres now given over to grape culture.

A Chicago scientist predicts that the method of living will be so improved during the twentieth century that people will be considered young when they are 100 years old.

A number of Scottish grouse have been imported by the Canadian government from the highlands of Scotland for the purpose of stocking the provincial parks.

The Chicago Journal says: "When Sheridan road is completed it will be the only 25 mile driveway in the world that does not cross a railroad or a bridge.

The Medical Record says nothing will improve a woman's health like sweeping, baking, bed-making, dish washing, and polishing the silver.

The heaviest man whose weight is recorded authentically was Miles Darden, of Tennessee. He weighed a little less than 1,000 pounds.

The oldest bonnet was found upon an Egyptian mummy, that of a princess who was interred about 2,000 years before Christ.

BOBBY-BRIGHT-EYES.

True Story of a Smart Little Squirrel That Lived in a Hotel.

PERHAPS one of the great big trees in Winona Lake park could tell just where Bobby-Bright-Eyes first came from; in what warm nest and in what particular tree he was born. Still, they kept the secret, though Alice had gone from tree to tree and asked them time and again.

One morning, after a heavy wind and rain-storm she found Bobby-Bright-Eyes on the steps that led up to the long, wide porch, where all the girls liked to play so well. What a tiny, helpless, wet little squirrel baby he was. Glad to be cuddled up, too, he seemed in Alice's warm, red jacket. So Alice ran in and showed him to her papa, who owned the hotel, and papa had a little box made for Bobby-Bright-Eyes, who took it all as a matter of course, and did not try, as many a squirrel would, to get away.

He seemed perfectly happy, and in a few days he was so tame he would go in and out of the cage, run over the balustrades of the long porch and even come to the cook's kitchen door, where he was fed dainties that were rich enough to kill Sir Bobby-Bright-Eyes. Instead of getting sick, he grew fat and saucy. If strange children tried to catch him he would keep still until they could almost touch his pretty striped back; then away he would dash up to the top of the very highest tree then he would begin to chatter and scold, as much as to say: "You didn't catch me did you?"

Bobby-Bright-Eyes liked the sunny corners of the hotel porch, and once the captain of the steamer Welcome, who often brought Bobby nuts from town, found the squirrel in his pocket when he was steering the boat across the lake. He seemed to be frightened at the noise of the engine and kept very still.

Every one laughed when the captain found him and perched him up on his shoulder.—Cincinnati Commercial Tribune.

The Grandmother Daisy.

'Let's make a daisy grandmamma,"
The children cried one day,
And to the meadow off they sped
To have a merry play.

They chose a daisy tall and fair,
And snipped and pressed, until
They shaped her snowy petals to
A dainty cap and frill.

Upon the velvet centre, next
They traced a kindly face
And draped a kerchief round the stem,
With sweet, old-fashioned grace.

When tired of play, they homeward ran,
What did that daisy do?
She nodded on her slender stalk
And made believe t'was true.

Then all the daisies laughed with glee,
"How human like we are!
And what a lovely thing it is
To have a grandmamma!"
—Jean Moulton, in the Brown Book of Boston.

The New Baby.

She is a very little girl, only five years old, but in the short period of her few years she has enjoyed a large experience of life with dolls of all kinds and descriptions, who, in the course of their existence under her loving but not always kind administrations, have undergone many vicissitudes, says the New York Times. So the little five-year-old, when there came a real live baby into the house, felt herself to be something of a connoisseur in children. When it was put into her arms, this real live baby, she regarded it with a critical air. "Isn't that a nice baby?" cried the nurse with the joyous pride with which a nurse always regards a new baby, in which she feels that she has a proprietary interest. "Yes," replied the little girl hesitatingly, "it's nice, but its head's loose."

What Hurt Him.

Little Frank was playing in the kitchen garden, when he was stung on the toe by a bee. He raised a perfect warwhoop as he ran to his mamma.

"Oh, mamma! oh, mamma! my toe! my toe!"

"Why, what in the world is the matter with your toe, Frank."

"Oh, it's bit! It's stung!"

"Bitten! stung! How?" cried his mother. "What stung you?"

"A drate big fly wid a splinter in his tail!"—Exchange.

Literary Prescriptions.

For clearness read Macaulay.
For logic read Burke and Bacon.
For action read Homer and Scott.
For conciseness read Bacon and Pope.
For sublimity of conception read Milton.
For common sense read Benjamin Franklin.
For vivacity read Stevenson and Kipling.
For imagination read Shakespeare and Job.
For elegance read Virgil, Milton and Arnold.
For simplicity read Burns, Whittier and Bunyan.
For smoothness read Addison and Hawthorne.
For interest in common things read Jane Austen.
For humor read Chaucer, Cervantes and Mark Twain.
For choice of individual words read Keats, Tennyson and Emerson.
For the study of human nature read Shakespeare and George Eliot.
For loving and patient observation of nature read Thoreau and Walton.

Children's frocks are often discolored by grass stains. Wash the spots in alcohol. If there are still traces of the green left soak in alcohol for several hours, and rub again as in washing. Then put the article through the usual process of washing with soap and water.

The Latest Humor.

"Why does Amelia hate Cholly so?"

"Why, when she told him she could never learn to love him, he insisted that one was never too old to learn."—Puck.

Nell—Yes. we're engaged, but I took my time about accepting him.

Belle—Indeed? Waited until he actually proposed, did you?—Philadelphia Public Ledger.

"Willie, is your brother back at college?" asked the girl who is deeply interested in the subject of her inquiry.

"Naw, he's quarter-back," proudly answered the youngster.—New York Times.

Tommy—When you want to call a person selfish you always say he's looking out for number one, don't you

Pa—Unless you're speaking of a widow, my son. She's looking out for number two.—Philadelphia Press.

"Pardon me, gentlemen," said the individual who had just moved into the little town as he entered the grocery store, "but is there a chicken-raiser here?"

"Why don't you take an axe?" asked the village Talleyrand. "A razor will lose its edge if you use it on a chicken."—Judge.

"Madam," began the agent as Mrs. Short opened the door, "have you a piano?"

"Yes," she answered.

"Well," he continued. "I am introducing a new automatic attachment for pianos, and if you"—

"Don't want it," interrupted Mrs. S. "Our piano has a sheriff's attachment, and I guess that will hold it for a while."—Chicago News.

A Philadelphia photographer tell this as having actually happened. A woman entered his studio.

"Are you the photographer?"

"Yes, madam."

"Do you take children's pictures?"

"Yes, certainly."

"How much do you charge."

"Three dollars a dozen."

"Well," said the woman sorrowfully, "I'll have to see you again. I've only got eleven."—Philadelphia Ledger.

"What do you know about women?" asked the thin young man.

"Nothing," said the fat man with the bald head.

"I guess I don't either, and I have been married three months, too. Yesterday my wife asked me how I liked the dinner. She does the cooking, you know."

The fat man didn't know, but he nodded.

"And when I began to praise the dinner she began to cry, and said she feared I loved her only for her cooking."

"Oh," said the fat man, "she had a cry coming. That was all."—New York Times.

"Why don't you eat your pie, Uncle Reuben? Don't you like pumpkin pie?" "Yes, I like it all right, but that young woman you've got helpin' you around here took my knife away."—Chicago "Record-Herald."

SINFUL HABITS IN YOUTH

MAKE NERVOUS, WEAK, DISEASED MEN.

THE RESULT of ignorance and folly in youth, overexertion of mind and body induced by lust and exposure are constantly wrecking the lives and future happiness of thousands of promising young men. Some fade and wither at an early age, at the blossom of manhood, while others are forced to drag out a weary, fruitless and melancholy existence. Others reach matrimony but find no solace or comfort there. The victims are found in all stations of life—the farm, the office, the workshop, the pulpit, the trades and the professions. Nervous Debility and Seminal Weakness are guaranteed cured by our New Method Treatment or No Pay. You run no risk. 25 years in Detroit. Bank security.

CURES WHEN ALL ELSE FAILED. No names used without written consent.

"I am 33 years of age and married. When young I led a gay life. Early indiscretions and later excesses made trouble for me. I became weak and nervous. My kidneys became affected and I feared Bright's Disease. Married Life was unsatisfactory and my home unhappy. I tried everything—all failed till I took treatment from Drs. Kennedy & Kergan. Their New Method built me up mentally, physically and sexually. I feel and act like a man in every respect. They treated me six years ago. They are honest, skillful and responsible financially, so why patronize Quacks and Fakirs when you can be cured by reliable doctors."—W. A. Belton.

CURES GUARANTEED OR NO PAY. Consultation Free—Books Free—Question Blank Free for Home Treatment.

K&K K&K K&K K&K K&K K&K

$400,000 was Produced from the Properties now owned by the

NEW YORK-GRASS VALLEY GOLD MINING CO.

above the 400 foot level, under the old management. During the last year the mine has been thoroughly opened up. New and richer ore bodies discovered. Large reserves now in sight.

Large and thoroughly complete Merralls mill now working. Besides this, six quadruple discharge stamps are now being installed. Each stamp will increase the present output at least 20 tons daily. The mine is now producing steadily and increasing output daily. As soon as the new stamps, now being installed, are running, the output will reach at least 125 tons daily. At a moderate estimate the monthly income should exceed

FORTY THOUSAND DOLLARS

During the coming year it is the intention of the management to install more stamps so that the output can be brought up to FIVE HUNDRED TONS DAILY.

Quick dividends are positively assured, and will most surely be large and continuous. The present Board of Directors is composed of competent business and mining men, who are giving their personal attention to the affairs of the Company.

The price of Stock will be advanced to 75 cents per Share almost immediately.

This is your last chance to purchase into this producing mine at 30 CENTS PER SHARE for cash or instalments. We have only a limited amount left at this figure, therefore send your orders in early.

REMEMBER IN BUYING THIS STOCK YOU ARE BUYING

INTO

A present producing property.
A mine that will pay large and handsome dividends, as the reserves of ore on hand warrant.
A property that has 600 acres, only a small area of which has been mined.
A proposition that can mine its ore cheaper than almost any other mine in the world, owing to free water power. Cost of mining and milling not being over $1.00 per ton

We have just received the following telegram, under date of November 24th:

KAYE, DE WOLF & CO, New York City. Grass Valley, Cal., Nov. 24th.

Mill now running on medium grade ore from reserves. Latest mill returns forty ounces amalgam from batteries since sixteenth. The Perrin ore chute on fifth level has been reached. Expect the ore on this level will pay much better than any yet opened up. The bottom of the shaft is also in good ore. Recent developments fully justify the expectations that have been formed. All who visit property report a large dividend payer soon. J. W. [illegible], Secretary.

Send for prospectus and full information to KAYE, DE WOLF & CO., 39 Cortlandt St., New York, or to PETERBOROUGH BROKERAGE CO., Canadian Fiscal Agents.

Dont Miss this Opportunity to Make

An investment in the Preferred Treasury stock of a Company that is now, and has been for the past fourteen months, paying a dividend of 36 per cent. on the present price of 30 cents per share, from ore treated at custom mill. This dividend will be largely increased in the near future as the Company is about ready to start a twenty stamp mill, located near their property, which has been leased.

A FEW THOUSAND LEFT

Take advantage of the opportunity as only a few thousand shares are yet for sale, and then the stock will be withdrawn from the market without further notice.

SATISFIED STOCKHOLDERS

There has not been a share of stock transferred since the Company started, fourteen months ago, showing the stockholders are well pleased with their holdings.

TREASURY STOCK RESERVE 600,000 SHARES

being ample for all reserve purposes. Management first class.

IT WILL PAY YOU

To write or call on us for full information regarding this stock.

A BUSINESS MAN'S LETTER.

Wm. Thomson, Esq., of Orillia, Vice-President Standard Chemical Company of Toronto, Tells of a Visit to the Muskoka Free Hospital for Consumptives.

GREATLY IMPRESSED WITH WORK BEING DONE.

Personally Raises Several Hundred Dollars to Help Lessen the Load of Debt.

There can be little doubt that the National Sanitarium Association is handicapped in its great work for Consumptives in the fact that its two institutions in Muskoka are far away from any large centre of population. Few people have an opportunity to see for themselves the magnificent work that is being done.

These hospitals are away from the public eye. Any, however, who do visit them, are united in their commendation of the splendid appointments of the place, and, best of all, of the real joy and hope that is being brought to many suffering ones.

We are glad to have the opportunity of publishing the following letter from Mr. Wm. Thomson, of Orillia, one of Canada's best known lumbermen, which tells what he has seen himself. It reads:

ORILLIA, Ont., November 2, 1903.

W. J. GAGE, Esq.,
Chairman Executive Committee
National Sanitarium Association,
Toronto, Ont.

My Dear Mr. Gage,—

I have much pleasure in enclosing herewith cheque for One Hundred Dollars ($100.00) from the Tudhope Carriage Company of Orillia, a donation to the Free Hospital for Consumptives at Gravenhurst. Please acknowledge this to the Tudhope Carriage Company in the usual way.

I have written to a number of my friends, to try and get them interested in this good work. I hope to be able to send you further donations. I have written my friends a personal letter, something similar to the following:

"Last week I paid a visit to the Free Hospital for Consumptives at Gravenhurst. I met some of the management there, and promised to try and interest some of my friends in this work.

"I might say there were 49 patients there last week, all poor people, most of them without a dollar in the world, and suffering from the dreadful disease, Consumption. There are many sad stories, and I know I have thought a great deal about the work of the institution ever since my visit there. I do believe it is worthy of assistance, and we who have health and the necessaries of life should encourage this work along.

"I understand the expenses lately have been double the income, and unless the management meet with more encouragement, I am afraid the work will have to be curtailed. I know you have many calls, but I do wish you would give this matter a thought, and, if possible, assist. I have written to two or three confidentially, and hope to be able to collect some more for this work. Should you not feel like contributing a donation, remember this request, and your reply is just between you and me, and strictly confidential.

"I might mention, to show that I have confidence in the work, I have already given a donation of $100.00 and two row boats to the Free Hospital this year, and intend to give another $100.00 before the end of the year."

Sincerely yours,

Wm Thomson

Sir Wm. R. Meredith, Kt., or Mr. W. J. Gage, Toronto, will receive and acknowledge any contributions made.

Don't Put Off
STOVE BUYING

and when you decide to buy, be sure to buy stoves with a record at Adam Hall's. CHILDREN'S QUESTIONING.

Wide Range of Thought Covered by Children in Reasoning for Themselves.

Remember that many of a child's questions cannot be connected with his reading, but appear to result from reasoning or a recognized analogy. "How do plants make themselves bigger when they grow?" he asked when we were talking about planting his garden. I heard him saying to himself, "Wildless, wildless." I asked him what he was talking about, and he replied: "About plants that are not wild. What are they called?" "Garden or cultivated plants," I answered. "What made you say wildless?" "Why," said he, "I know that harmless meant something that wouldn't do any harm, and so wildness means plants that are not wild." He mentioned the fall, and I asked him what he meant by fall. He replied: "The winter at first, the first of it. Do they call it fall because everything is falling?" There was some talk about dressing him or putting on his dress, and, reasoning from analogy, he asked, "When God put the skin on people is that skinning them?" I once read of the people in the moon being like grasshoppers, and told him about it. When I had finished the story he said: "When we look up in the sky we see the moon rolling on above us, and when the people in the moon look up in the sky they see the earth rolling along above them. What is the strange puzzle about that?" I told him that his specimen of mica was silicate of potash, and he asked, "Why is mica silicate of potash? Because they put ashes in a pot?"

These questions have been recorded to represent an innumerable number unrecorded, and to show the wide range of thought and the variety of reasonings that a child under six years of age may have. They show his natural method of acquiring knowledge, but they can only suggest the ceaseless activity of his mind during all his waking hours.—Henry L. Clapp, in Popular Science Monthly.

The Game of Tema.

A new lawn game has been invented in London, and as it can be played with equal enjoyment by both boys and girls, it possesses many claims to popular favor.

It can be followed in any season, and by as few as four or as many as fourteen persons at once. Skill, agility and a good eye are far more requisite than mere physical strength, and the proper manipulation of the wand by means of quick wrist turns develops and renders flexible the muscles of the arms and wrist.

A screen of wood or canvas, fixed on a light frame, and having in the centre a circular aperture eighteen inches in diameter, is erected. Behind the hole is fixed a bag net, and the main object of the players, who stand some distance away, is to throw a number of colored balls, by means of the wand, into this bag.

The wand has at one end a peculiarly shaped crook for holding the ball, but some little skill is necessary to retain the ball in it for the purpose of making the throw.

The number of "pot balls" to be scored by each side before it can complete the first stage of the game corresponds with the number of players on each side. When either side has scored the number of "pot balls" agreed upon, it enters upon the second stage, and it at once obtains a single "zoned" ball. Whichever side then first succeeds in scoring its "zoned ball" wins the game.

A Day Makes No Difference.

The reasoning of the average boy is not very sound, as a rule, but occasionally he advances arguments that have considerable force. A Texas judge has a son who is very bright, but rather lazy. The judge thinks the boy has a judicial turn of mind, and intends to make him a lawyer. "My dear boy," he said, one day, "why don't you study more industriously? I want you to become a famous jurist. You have not touched your books to-day." "I am not going to study to-day: I am going fishing," replied the indolent boy. "I don't see that it makes any difference, father, whether I become a famous jurist a day sooner or a few days later."

Our Forest Trees.

It is stated on good authority that North America has about 412 species of forest trees. The distribution is as follows: Atlantic region, 176; Pacific region, 106; common to both, 10; Rocky Mountain region, 46; Florida tropical species, 74. Europe has only 158 species. At least six of the North American species are also indigenous in Europe.

A Windfall.

The origin of "windfall," in the sense of "good luck," dates from the time of William the Conqueror. It was then a criminal offense to cut timber in the forests. Only such could be gathered as the wind had blown down; hence, a heavy wind-storm was hailed by the peasants as so much good luck, and from this comes the modern application of the expression.

Celestial Boots.

To the Celestials no relics are more valuable than the boots that have been worn by a magistrate. If he resigns and leaves the city, we are told, a crowd accompanies him from his residence to the gates, where his boots are drawn off with great ceremony, to be preserved in the Hall of Justice.

Albinos in a Kentucky Garden.

The Park City (Ky.) Times reports that in a cave near Chameleon Spring, in Edmonson County, two men found a pool in which were innumerable white frogs. The cave, which is absolutely dark, was alive with insects, all perfectly white. Frogs and insects were blind, as were also the fish in the pools.

Little, But Oh My!

The latest thing in elopement is the running away in Allegheny, Pa., the other day, of a three-year-old boy and a girl just six months his senior. When handed over to a policeman by a woman they were headed for a minister's house and calmly announced that they were going to get married.

KILLED IN WIFE'S PRESENCE

Springfield, Mass., Dec. 31—Dr. William H. A. Young, one of the best known physicians in this city, was shot through the heart today by a bullet from a rifle which he was packing in his carriage, previous to going hunting. The accident was witnessed by his wife and several

New Zealand's Man-Killing Geyser.

The Australian "Review of Reviews," for September, just to hand, contains a vivid account of a remarkable disaster which occurred recently in New Zealand:

Waimangu geyser, Rotorua, New Zealand, is one of the most remarkable geysers in the world: a lake of boiling water, black and threatening, that, at irregular intervals, shoots up into space a vast column of water, mud and stones to a height sometimes of over 1,000 feet. It is simply one of the wonders of the world. It is situated on a crater chain, which was formed by the great Tarawera eruption rift. One photograph taken while it was playing shows liquid mud rising to a height estimated at 1,800 feet. The immense stone, shot up hundreds of feet, as shown on the photograph, was afterwards found to measure 12 feet by 8 feet. The steam cloud from the geyser can be seen thirty miles away. One feature is the echelon discharge of many of the shots. The first might send stones and mud perpendicularly, so that they all fall back into the crater. The second might come at an angle, and bombard the bank where the victims stood. On Sunday afternoon, August 30 a group of tourists were waiting to secure a snapshot of the next eruption, when a dreadful discharge of boiling water and mud took place, and four persons—two of them young ladies, and one of them a well-known guide—were caught in the watery cyclone, swept away in a moment and destroyed; the mother of the two girls, only a few feet distant, being a shrieking spectator of the tragedy. Here is a description of the incident by an eye-witness:

"My sister and myself had been staying at Rotorua since Monday last. Our first view of the giant geyser at Waimangu was obtained on Tuesday. There was then not a ripple on it. We made up our minds that we would visit it again, and we did so on Sunday, accompanying a fairly large party, consisting for the most part of tourists. The geyser was then playing gently. We took up a position near the shelter shed and watched the jets of water shoot upwards. About 12.30 a shot went up to a height of 400 feet or thereabouts. After crossing to the far side and inspecting the display from numerous positions, we came back, passed over the bridge, and stood on a slight projection. Looking over the edge of the geyser, we were rewarded by seeing an outburst from the geyser reach a height of 800 feet. Other shots went higher still. It was a stupendous spectacle. About 3 p.m. I noticed a party of ladies and gentlemen, who had arrived at Waimangu about 2.30 or 2.45. They included the Misses Nicholls, Joseph Warbrick and Mr. McNaughton. The ladies and gentlemen took up a position some forty or fifty yards in front of where I was standing. They had cameras with them, and were evidently bent on getting snapshots of Waimangu in action.

"At twenty minutes past three the geyser sent up a huge column of boiling mud and scalding water that spread out over a wide area. For perhaps rather more than a minute the entire scene was enveloped in darkness, made all the more terrifying by reverberations as of thunder and a vibration that filled the atmosphere and caused the ground under our feet to tremble. I called out to my sister to run for her life, and I fled after her. Fortunately, we had a clear path in front of us, and we got away just in time, a huge fragment of rock falling within a yard of us. The eruption lasted for about two minutes.

"The disappearance of Misses Nicholls, Mr. J. Warbrick and Mr. McNaughton caused the utmost consternation. They had apparently attempted to reach the path, but without success, the boiling torrent sweeping them into the seething cauldron below. Search was at once made for the victims. Warbrick, the guide, assisted by a number of others, including myself, took part in this painful task. The first body recovered was that of Mr. McNaughton. This was found about half a mile from the bridge in about twelve feet of water. It was terribly disfigured, the head in particular being badly cut. Some distance further on the body of Joseph Warbrick was found, also shockingly distorted. The bodies of the ladies were recovered at a distance of about a mile from the spot where they were standing when the eruption took place. Their jackets and shoes had been washed off them, and they were greatly disfigured. Mrs. Nicholls, mother of the unfortunate young ladies, was dazed and heart-broken. It was pitiable to witness her grief.

"You will form some idea of the force of the explosion when I tell you that a stone weighing not less than a hundredweight was projected through the air for well nigh a mile, and ere it buried itself almost out of sight in the earth split a huge rock into fragments. Hundreds of tons of mud and stones were thrown up from the mouth of the geyser."

German Anti-Tipping League.

A movement has just been started in Berlin to abate, if possible, the practice of tipping in cafes and restaurants. An anti-tipping league has been founded in Berlin, with branches in the principal cities of Germany. The members of the league sign a pledge to frequent only those restaurants and cafes in which tipping is strictly prohibited. The proprietors of the establishments which abolish the tipping will be supplied gratis with a big sign bearing the letters "O. T." (Ohne trinkgeld) meaning "no tips," printed in large type. The waiters themselves profess to be in favor of the innovation as long as their employers pay them a wage sufficiently large to enable them to dispense with tips. It would be a great relief to the traveling public, and particularly to American tourists, who at home are not accustomed to be taxed at every turn, if the league should become a success.

Just So.

Little Elmer (who has an enquiring mind)—Papa, which bone was it that was taken from Adam to make a woman of?

Professor Broadhead—The bone of contention, my son.—"The Smiler."

"What a queer fad Mrs. Dashington has started since returning from her latest visit to South Dakota."

"Do you mean the popular society favorite who has had so many divorces?"

"Yes. She has had her wedding-rings put on a chain and is wearing them as a necklace. It is awfully fetching, too."—New York "Herald."

Ran Away.

The young lady who made seven hundred words out of "conservatory" last summer has run away from home. Her mother wanted her to make three loaves of bread out of flour.

A St. Bernard.

One dog of the Convent of St. Bernard is said to have saved more than forty human lives.

EDUCATED CATS.

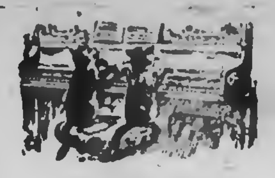
One of Their Greatest Tricks is Playing the Piano.

San Francisco has a newspaper known as the Call. The Call has an assistant city editor named L. D. Adam. Mr. Adam has a wife. Mrs. Adam has two cats. This story deals with those cats, and the story must be true, because Mr. Adam printed it in the Call.

The cats are brothers, and are black as any cats ever were. One is named Cuffy and the other was christened Svengali, but it has been shortened by usage to Sven. Each feline knows his own name, and will quickly respond when called by Mrs. Adam.

Chuffy is the smarter cat of the two, and has a number of tricks in his repertoire which Sven does not attempt. One of them is to eat with a napkin tied around his neck. When thus fitted out Chuffy will sit sedately in a chair and carry bits of meat to his mouth, one piece at a time, with his paw. If the napkin is taken away the cat gobbles his food, using both paws to get it to his mouth as rapidly as possible.

But it is as musicians that the cats are principally renowned. Here again Chuffy leads. He will sit on a stool and pound the piano keys with a vigor that arouses the neighbors and with a lack of melody that would please a devotee of Wagner. Sven can be induced to assist Chuffy in playing a duet, but it takes a deal of coaxing and numerous morsels of meat. He never plays a solo, and for this the neighbors are thankful.



The Musical Cats.

Mrs. Adam has a bird's wing which she throws and Chuffy retrieves it. No matter where it goes the cat goes after it and brings it back. If a chicken wing is used instead of the wing of a bird the cat refuses to engage in the sport.

Sven is of a clownish disposition, and is also a glutton. When sent after the wing he secures it, and then retreats to the further corner under the bed and stays there with the wing until he receives a bit of meat as pay for coming out.

Mr. Adam was justified in reprinting the pictures of his wife's cats in his paper, and he is correct when he declares that they are the prettiest and best educated cats that ever aspired to histrionic fame. Cats that pound out imitations of operatic airs on the piano deserve to see their names and counterfeit forms in print.

New York, Dec. 31—Pneumonia has become so prevalent in this city that the health department has decided to amend the sanitary code by classifying that ailment with measles, scarlet fever, and smallpox, and making it compulsory on physicians to report every case of pneumonia promptly. This is said to be without precedent in America or Europe.

In the last five weeks, according to the health department, there have been 830 cases of pneumonia reported, an increase of 43 per cent over last year.

TO THE AFFLICTED.

Dear Reader,—Are you a sufferer from any of the following ills: Lack of ambition, nervous exhaustion, ideas easily confused, irritability of temper, impairment of memory, despondency, general debility, liver not right, kidneys out of order, rheumatism, dyspepsia or indigestion, dizzy or fainting spells? Does your heart palpitate? Do you have smothering or sinking sensations, pimples, or eruptions of the skin, etc, etc.

If you are troubled as above, you can be cured by the use of Dr. Clarke's Wonderful Little Red Pills. A trial order of three boxes for $1.00 will convince anyone that these pills are truly wonderful. We are daily in receipt of letters bearing the highest testimony. We have not space to tell you all about them here, but will answer any enquiries as to their merits. Mrs. John Macdonald, Durham, N.S., writes us, "After taking two boxes of Dr. Clarke's Little Red Pills for indigestion, which I had been troubled with for a number of years, I am now perfectly well. I followed the directions carefully.

To every one sending for a trial order and finding good results we ask to observe our special offer enclosed with every box. It is of special interest to every one.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 35c. per box, or 3 boxes for $1.00.

Dr. Clarke's Sure Cure for Catarrh and Dr. Clarke's Sure Cure for Eczema, same price. $500 will be paid for any case that it will not permanently cure.

135 Church St., Toronto

Equitable Gold Mining Co.

R. C. LANE, President. M. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the little winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 555 feet of tunnels, and at least 800 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefor to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $4.25 per ton as cost of mining and milling. One-half of all over and above this $4.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 265-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

THE PETERBOROUGH BROKERAGE CO.
FISCAL AGENTS

Rio Colorado Gold and Copper Co.

THE BEST INVESTMENT EVER OFFERED

INVESTIGATE and you will buy this stock at FIVE CENTS

IT WILL BE WORTH PAR INSIDE OF SIX MONTHS

Clients of ours have acquired twelve claims in the richest mineral section of California, on the Colorado River. We have had this property examined, and it is said that it will make a mine equal to any of the large producers.

It carries Gold, Silver, Lead, Copper and Iron, and has abundance of shipping ore in sight. The vein is large and rich.

We have 20,000 shares to sell at 5 cents per share, and then the stock will be placed on the market at par. Guaranteed with five million of securities behind it to protect the investor from loss.

This 20,000 shares is to pay for the annual assessment work on the property, and must be sold at once.

The Company absolutely owns its property, and WE propose to make a paying proposition out of it. DON'T DELAY OR YOU WILL BE TOO LATE FOR THIS STOCK at Ground Floor prices. Remit to,

WESTERN BROKERAGE COMPANY, Incorporated
396 Henne Block, LOS ANGELES, CAL.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price that will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

REFERENCES—The Governor of the State, and any bank in Boise, Idaho. Write the Company for particulars. Address.

Dry Placer Miner, formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 200 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine—Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

'Henry Fielding's Dream'

By CORTLAND MYERS.

"There is a labor question—a burning question at the very heart of society. It is traitorous to deny it. The gospel of the Carpenter of Nazareth for the labor union of which He would be a member is:

"Justice for the worker.

"Liberty for society.

"Salvation for the man.

"Justice is the supreme word in all demands of the labor unions. They have been misunderstood and misrepresented. A labor union has been supposed to be another word for organized anarchy and socialism and nihilism.

"Labor unions believe in law. One of their most righteous efforts has been to secure right legislation. That is one of their first objects.

"They do not ask for sympathy. No kingly man takes the attitude of a creeping beggar. They are not crying at the door of society for sympathy. Nor are they organized efforts to secure charity.

"Labor unions do not ask for the rich man's money, or any other man's money, but make just demands for the workingman's money. They say: 'Give us justice in the hours of work and the remuneration for service and the respect which every honest man deserves. We are not cattle, nor are we machines. We are men.'

"And they have knocked at the doors of legislative halls and demanded laws to control factories and mines and every place where men are compelled to work, so that life shall not be imperilled nor health sacrificed.

"Wonderful laws have they wrought out in this respect. It was only a few years ago that all the laws were made by employers, and no one can question their partiality. Now, labor unions, by virtue of their organized force, have been and are able to claim attention and respect and representation.

"I congratulate them upon their attainment, and also upon the day in which they are living. The workingman was never so well off in the history of the world as he is to-day.

"He has better wages, better hours, better homes, better opportunities, better everything. No thoughtful, honest man who has been a student of history can question that statement. Nevertheless much remains to be done in his interest, and I bid him god-speed in the securing of complete justice.

"Justice is the word—do you hear me? Mistake it not. Define it. Understand it, believe it. Live it.

"It has the greatest circumference of any word in your vocabulary.

"'Give each man his just share,' is the battle cry of the labor union. And they ought to shout it and fight it until the last enemy of labor lies dead on the battlefield, and the last victory for right is won.

"The Christian employer will always meet them on their level, explain the condition of his business and ask their judgment concerning their just proportion. And it has always resulted in the same blessing of harmony and mutual love and respect. This is not a dream nor even an ideal.

"It is a magnificent reality.

"There is a gentleman in America who employs one thousand hands. He was asked some time ago when there was great trouble in the labor market:

"'How are you getting on with your men?

"'Oh,' he said, 'I have no trouble.'

"'Why,' he was asked, 'have you not had any strikes?

"'No,' he said, "in all these years I have not had even the shadow of trouble with my men.'

"The cry at the heart of every good labor organization is not a selfish, grasping, greedy yelp. It is the soul's cry for simple justice.

"The employer must learn to recognize it, and see in every man some remnant of the image and likeness of God which commands his respect, or there can be and there will be no peace.

"But there is another element which is closely allied to this. If not bound to it by the bonds of a holy wedlock, that is, liberty for employer and employe, member of corporation and member of labor unions, and every man, woman and child in the society where unions and corporations exist.

"One of the perils of the day in which we are living is that that priceless treasure for which our ancestors fought and died shall be taken away from us, even in the times which are called peaceful.

"That which we fought to give the black man, in Heaven's name, do not allow to be snatched away from our grasp. Patrick Henry's cry might be uttered to-day with just as much pathos and necessity in it as the day when it echoed along the Eastern shores of a new world and re-echoed through the corridors of heaven: 'Give liberty or give me death!

"You are free men. This is the snap of the slave lash again. If a man wants to belong to a labor organization let him belong. If he does not let him stay out. As you value your life keep your liberty to say 'no.' You are king yourself. Let no man put a manacle upon your hand or foot or head or heart.

"Society also has interests, and sacred ones, which must be taken into account. The old blunder of preferring force to moral agency is the secret of failure. Men have the right not to work, but have no right to prevent other men from taking their places.

"The public will not tolerate this barbarous method. Under no conditions will they allow the liberties of those who desire to work to be destroyed. Neither will they allow the perpetration of outrages upon their own rights.

"This is not the day when the obstinacy of a railroad president or the dissatisfaction of a few hundred workmen can hurl injustice and inconvenience and risk of life into the center of millions of people.

"Every question which concerns the world of labor is of vital interest to Christ and the church and society. Christ came to save the individual man and everything of value to his life. He came to save him for time as well as eternity. Anything which helps in this great work of mankind and the redemption of the world would have His assistance and blessing. He would say again upon earth, and whisper it in the soul of every man: 'Come unto Me all ye that labor and are heavy laden and I will give you rest.'"

As he finished, Henry anxiously settled back in his seat. He had been holding himself slightly forward, and did not know it. He looked down at the back of the seat in front of him, and Elsie could not help but look toward him and wonder.

She breathed a silent prayer that he might be pleased with the sermon, and that something might come into his life that very moment to change it.

He sat like a statue until they arose for the benediction.

When they reached the street, each one waited for the other to break the silence.

Elsie could hardly hold back the query: "How did you like it?" But this was a peculiar occasion and she must wait.

At last Richard said:

"Well, Henry, what did you think of that?"

"I am glad I went," replied Henry.

"That is not enough," said Richard. "How did you like the answer to your question?"

"If I must be honest," said Henry, "it was a revelation to me. The Church may not be as far away from us and our interest as we think it is. One preacher, anyway, is fair and courageous and sympathetic. I believe that if the workingmen could hear that kind of truth, the most of them would be in the Church very soon. He did not go as far as I wish he had, but it was a pretty long step."

Elsie's heart almost beat its way through the wall of its prison.

Richard walked on, waiting for some one to ask him what he thought, but no one seemed very anxious to know, so at last he ventured to say.

"He has a great deal of magnetism and oratory in him, hasn't he? You cannot help but listen."

"Yes," said Elsie, "I don't believe it was all in the subject."

"That was not my special interest, but I would like to hear him every Sunday."

"Yes," said Henry, "he was so honest and earnest that everybody would be drawn toward him. I confess that I had lost some of my prejudice before he had began his sermon."

"Will you go again?" asked Elsie.

"I will not make any more promises now," said Henry, "but Dick and I may get the same notion again some day. Give this time to digest."

Richard said: "There is unquestionably a vast amount of misrepresentation of the Church and misunderstanding concerning it, and yet most

(To be continued.)

NEW LORD'S DAY ACT

Lord's Day Alliance is Opposed to Sunday Canals

Ottawa, January 1 — Rev. Dr. Potts, president, and Rev. J. G. Shearer, Field, secretary of the Lord's Day Alliance, interviewed the Department of Justice yesterday in reference to the proposed Lord's Day observance legislation owing to the Privy Council quashing the provincial legislation. An act drafted by the Alliance was submitted to the Deputy Minister of Justice and in the main won his entire approval, but he has to give it more mature deliberation to consider the question of jurisdiction. The bill as drafted aims to preserve the Lord's Day and to make it a day of rest from all labor except in works of actual necessity and mercy. Trains loaded with dead freight and merely local passengers, and all excursions for pleasure are carefully covered by prohibitory clauses. Ice cream, soda water, cigars, etc, are on the prohibited list.

An interview was had with the Minister of Railways and Canals opposing the proposal to open the canals on Sunday.

PATENT MEDICINES TO SOAR

New York, Dec. 31—Soon after Jan. 1 some of the largest manufacturers of patent medicines will put into effect in this city a new plan to stop the cutting of prices on such articles by druggists and department stores. It is the intention to have a fixed price list, below which the manufacturers will not allow their goods to be sold at retail.

SENTENCED TO HANG

Bennington, Vt., December 31 — Mrs. Mary A. Rogers, convicted of the murder of her husband, Marcus H. Rogers, was sentenced to be hanged to-day, the first Friday in February, 1905.

Leon Perham, the self-confessed accomplice of Mrs. Rogers, was sentenced to life imprisonment.

At the Franklin Inn Club of Philadelphia a poet told the other day of a young man who once called on William Dean Howells without so much as a letter of introduction. This young man thought himself a sonneteer. He had two sonnets with him, and he said he would read them both and then he would ask Mr. Howells to tell him which of them was the better. Mr. Howells is always gracious, and always particularly gracious to young men who love letters. Therefore he listened patiently to the first sonnet. It was execrable. The writer of such doggerel could not but be hopeless. "The second sonnet is the better of the two," Mr. Howells said firmly, and he refused to listen to it. Pleading an engagement, he asked the young man to excuse him. "The second sonnet is the better, I assure you," he repeated.

Rev. Cyrus Townsend Brady was talking about the itinerant preachers of the past. "These men," he said, "were rugged and sincere. Their minds, if they were coarse, were also strong. Their eloquence was sometimes powerful; sometimes it was amazing. There was a notable itinerant who once preached on the 'Glory of the Saints,' and the description of a saint's glory that he gave in this sermon deserves, I think, to be perpetuated. This is it, word for word: 'Who, my brethren, can describe the glory of a saint? Why, nothing on earth can liken it. If you drill a hole through the sun and put it on your head for a crown, and split the moon in sunder and put the pieces on your shoulders for epaulets; if you tear down the starry curtain of the skies and wrap it round your body for a robe, and ride to heaven on the lightning wings of the tempest, this would be nothing to the glory of the saints.'"

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest in another vein upon which there are two claims known as the Jennie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.66 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jennie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $1 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.60. This being a general sample taken from the dump. The other two assays are $62.66 and $79.06 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet further it will on the present course intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

STORY TELLER'S CLUB.

The Story of the Prize Bee—A Little o' What Happened.

This is what happened, and it is a true story: One morning last May a bee set out among the flowers on a honey hunt. Perhaps it would be more true to say that the bee set out to hunt for the sweet stuff of which honey is made, for while this sweet stuff is still in the flower cup it is not honey any more than the wheat growing in the field is bread. The wheat becomes bread later, after it has been cut and gathered and threshed and ground and brought into the kitchen and there changed into bread, and the sweet stuff becomes honey only after the bees have carried it home and worked it.

As the bee left home this particular morning it made up its mind that it would devote itself to the apple blossoms, for did you know that when a bee goes flower visiting usually it gives all its attention to one kind of flower till it has finished that special round of visits?

So off the bee flew, and in a few moments it saw hundreds of little pink and white handkerchiefs waving at it from the apple orchard.

What do you suppose they were, these gay little handkerchiefs? They were the flower leaves of the apple blossoms. I call them handkerchiefs because, just as boys and girls sometimes wave their handkerchiefs when they wish to signal other boys and girls, so the apple tree uses its gay flower leaves to attract the attention of the bee and persuade it to visit the flowers.

Of course, really, they are not handkerchiefs at all. They would hardly be large enough for any but fairy noses, would they?

When the bee saw so many bright handkerchiefs waving it welcome, along it hurried, for it knew this was a signal that material for honey making was at hand in another minute, and it had settled upon a freshly opened flower and was eagerly stealing the precious sweet.

You children know that when you are given permission to go to the closet for a piece of candy or cake you are not apt to set about it very gently. You are in too much of a hurry for that. Often you come very near knocking everything over in your haste to get hold of what you want

And bees are quite as greedy as any boy or girl could be. So our friend dived right into the pretty flower, brushing rudely against the little dust boxes. These being full to overflowing with golden dust, spilled their contents and powdered the bee quite yellow.

Having made sure that nothing more was to be found just there, off flew the dusty bee to the next blossom. Into this it pushed its way, and in so doing struck those pins which have no dust boxes, and upon their broad, flat tips fell some of the yellow dust grains with which its body was powdered.

Now there began to happen a strange thing. But before I tell you more I must stop one moment to remind you that these pins without dust boxes are joined below into one piece, and that this piece is set deep into the green cup which holds the rest of the flower, and I must tell you that if you should cut open this cup you would find a number of little round objects looking like tiny green eggs. The strange thing that began to happen was this: Soon after the yellow dust from the bee fell upon flat tips of the pins without dust boxes, the little green objects deep within the green cup became full of life and began to get larger. And not only this, the green cup also seemed to feel new life, for it, too, grew bigger and bigger and juicier and juicier, until it became the fine juicy apple we have before us this morning.

Nig and the Clock.

Nig is a fine large black cat owned by auntie, who often says he is more like a monkey than a cat he is so very mischievous. One day my uncle was repairing a clock. After he was through he started the clock striking the hours until he got the correct time. The cat sat on the table watching him. Lifting his paw, he raised the little hammer and made the clock strike one. We all thought it was very cute of him. Christmas he climbed the Christmas tree and knocked off a lot of the balls. He would tap them with his paws till they would fall. Auntie could not think what it was till she went close to the tree and saw his little black head and eyes. He is very fond of oysters, and whenever they have them Nig has to be shut up in the cellar, as he does not give them any peace, but goes from one to the other and taps them with his paw as though he would say, "Why don't you give me some?" He hides everything he gets hold of. He hides corks up the rainspout and spools of cotton and all such things under the sideboard. He is not afraid of anything but the iceman, and he scampers off as fast as he can go when he hears him coming.

CONFESSORS WENT ON STRIKE

Berlin, Dec. 31.—All kinds of curious strikes have taken place in Germany during the past year, including a strike of physicians and that of the students at the University of Wurzburg. The oddest, however, is reported from Munich. All the Father Confessors in the City Hospital and Sanatoria ceased their occupation yesterday because the municipal authorities discharged one of their number. The authorities declare that they were compelled to do so, because the priest in question used to ply patients in the confessional and on the sick bed with indiscreet questions.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
AND
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000.00.
Par value $1.00. Full Paid and Non-Assessable

At 50 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 1000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received

Investigate
to your heart's content,
and quickly, then let us
hear from you.

The Black Queen Gold Mining Co.

1,000,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 20c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 116 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 600 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*

C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not A Gamble
but a
Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY, GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO.,

FISCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.

Cured in Ten Minutes by Simply Inhaling

CATARRHOZONE

THIS SIMPLE INHALER is a most wonderful cure for colds, coughs and catarrhal diseases. Simply inhale the medicated air at the mouth and nostrils. It spreads through every air cell and passage of the breathing organs, clears away mucous discharges, heals sore spots, and relieves congestion. It is pleasant, simple and effective.

ORDINARY COLDS last just about ten minutes when Catarrhozone is breathed deeply into the lungs and exhaled through the nostrils.

COLD ON THE CHEST is relieved quickly and cured with absolute certainty in half a day if Catarrhozone is inhaled ten minutes every hour.

ASTHMA AND BRONCHITIS are relieved right away, and cured to stay cured by the persistent use of Catarrhozone.

CATARRH and DEAFNESS are almost instantly relieved and thoroughly eradicated by inhaling Catarrhozone.

A GUARANTEE is given with every complete Catarrhozone outfit to give satisfactory results, and a trial will convince the most sceptical of its merits. Price $1.00. Sample size 25c. Sold by all druggists and N. C. Polson & Co., Kingston, Ont.

OUR LETTER-BOX

NOTE—The Times does not hold itself in any way responsible for the opinions expressed by its correspondents.—Ed. Times.

Opposed to the Bylaws

To the Editor of The Times.

Sir,—I hope the ratepayers by this time have had their eyes opened to the fact that the franchise which the town proposes to present to Mr. Stuart is a most valuable one. His anxiety as shown by the efforts of his solicitor to secure it, is ample evidence of this fact. The giving of the street lighting contract to the Peterborough Light and Power Company for ten years will cost the ratepayers twenty-five thousand dollars over and above the Otonabee Company's price, taking into consideration the extra lights that will be required as the town grows.

We don't want the street railway at the price—the handing over of all the streets in town to Mr. Stuart and his friends for thirty years, and keeping them clear of snow—which will cost many thousands of dollars. I am satisfied the franchise would bring ten or twenty thousand dollars in the near future. Indeed, I happen to know of capitalists who are anxious to get it, and who are willing to give the towns percentage of profits, the same as Toronto. The ratepayers need not worry about this. I hope they will record their votes against the proposed deal, which I regard as opposed to the best interests of the town.

WM SNOWDEN.

Hilliard Property By-law

To the Editor of The Times.

Sir,—I have no desire to trespass on your space unnecessarily at the eleventh hour, but I have thought the electory would expect a few last words from me, before voting on the by-law for the purchase of the Hilliard property.

No one will accuse me of doing anything but fairly representing my views and opinions on this scheme.

I have expressed myself in as conscientious and straightforward a manner and in as few practical words, as I could. I now reiterate my opinion that I consider the purchase of this 65 acres of the Hilliard estate, in the north end of the town, as one of the best investments the town can make in its own interests, looking at it from every point of view, as one who has had some knowledge of the needs of the town for some years past.

This property is not being pushed on the town by any means, as since I received the option on it, other parties, apparently anxious to secure it for some special purpose, have doubtless influenced Mr. Hilliard to say to me in a recent letter, that he "hopes the town will not buy it." Personally, I have no interest in the transaction other than securing for the town a source of supply for stone, gravel, sand, etc., at a nominal price—as in future a large quantity will be required for sidewalks, roadbeds, etc.

It is now in the electors' hands, and if they think well of the scheme by voting in favor of it, well and good, if not, turn it down. If the scheme goes through and is properly handled, it will, I am sure, become a very valuable asset of the town.

Yours truly,

H. RUSH.

Street Railway and Lighting Contract

To the Editor of The Times:

Sir,—The Street Railway and Street lighting questions are now out of the hands of the Council, and in the hands of the people, who on Monday will be asked by ballot to express themselves for or against the by-laws passed by the Council. Mr. Robert Stuart's direct statement that he is behind these propositions and is prepared to carry them out removes all the apprehensions heretofore existing upon this point; and will enable the people to vote upon these questions solely on their merits.

The Street Railway by-law provides for the construction and operation of five miles of Street Railway within the limits of the Town in the most modern and efficient manner by 1st July next, including extensions to Jackson Park and to the River. If the people want this, they now have the opportunity to secure it; if, on the other hand, they allow themselves to be further hoodwinked, they have only themselves to blame if opportunity to obtain a Street Railway under the most favorable auspices is permanently lost to them.

In addition to his pledged word, the Town holds as security Mr. Stuart's marked cheque for $5000 in the hands of the Town Treasurer, and the street lighting contract which he can only obtain as a condition of his making good his statements as to the building of the Street Railway.

The light by-law provides for a minimum of twenty-five more lights than we have at the present time, of equal efficiency, at a cost of $60 per lamp, being the lowest price paid for street lights in Canada to-day, or in the world, so far as we know.

I would ask the people to remember also what is due to our newly annexed Ward of Ashburnham, and to generously vote for a fair proportion of the candidates for Council from that Ward, so that they may be assured of fair representation in the first Council of the united municipality. The candidates are Messrs. Frank Adams, the Reeve, and Messrs. Wm. Scott and Gibbs, all good men and members of the present Ashburnham Council, two at least of whom should be elected.

The people are also asked and should be prepared to vote on the by-law for the purchase of the Hilliard farm of 65 acres for $10,000. This was one of the few matters which the Council unanimously favored. It is estimated that there is enough stone and gravel on this property to last the Town for many years and more than enough topsy for the property, and that after it has been removed the property will still be worth the original purchase price. The property rents for about enough to carry itself and is an admirable site for a contagious disease hospital; it should therefore be an economical purchase for the Town.

Yours truly,

G. M. ROGER, Mayor.

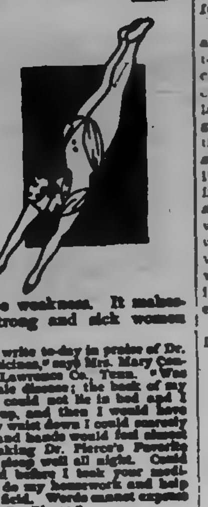
A WOMAN'S RISK

As a trapeze performer is greater than a man's. She must have a man's courage and a man's muscle to succeed. But she must also work under conditions of which a man knows nothing. Many an accident to women acrobats must be attributed to the sudden weakness to which all women are subject at certain times.



Dr. Pierce's Favorite Prescription heals the womanly diseases which cause weakness. It establishes regularity, dries weakening drains, heals inflammation and ulceration, and cures female weakness. It makes weak women strong and sick women well.

"With pleasure I write to-day in praise of Dr. Pierce and his medicines," says Mrs. Mary Conway, of Appleton, Lawrence Co., Tenn. "Was troubled with female disease; the back of my head hurt me so I could not lie in bed and I would have to sit up, and then I would have such pains from my waist down I could scarcely make up. My feet and hands would feel almost like ice. Since taking Dr. Pierce's Favorite Prescription I can sleep well all night. Could hardly drag around before I took your medicine, and now can do my housework and help my husband in the field. Words cannot express the thanks I owe to Dr. Pierce."

Weak and sick women are invited to consult Dr. Pierce, by letter, *free*. All correspondence is held as strictly private and sacredly confidential. Address Dr. R. V. Pierce, Buffalo, N. Y.

Dr. Pierce's Common Sense Medical Adviser, containing over a thousand large pages, is sent *free* on receipt of stamps to pay expense of customs and mailing *only*. Send 50 one-cent stamps for the cloth-bound volume, or only 31 stamps for book in paper covers. Address Dr. R. V. Pierce, Buffalo, N. Y.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. Fred Hall is visiting friends in town.

—Mr. Andrew Mercer, Montreal, is the guest of his sister, Mrs. R. Neill.

—Mrs. Chas. M. Blois, of Toronto, is visiting Mrs. T. J. Blois, 249 Stewart street.

—Mrs. McNeven, Lindsay, is the guest of her brother, Mr. John Nugent, Brock street.

—Mr. Mimms, and Mr. Botsford, of Toronto, are the guests of their cousins, Messrs. Jack and Howard Hopkins.

—Mrs. A. W. Cressman and her two sons, Masters Harry and Fred, and her little daughter, Jessie, have returned from Norwich, where they were visiting Mrs. Cressman's parents.

—Miss Eva Weir, entertained a number of her friends to afternoon tea on Wednesday in honor of her brother and his wife, Mr. and Mrs. T. Fred Weir, of Toronto, who are in town for a few days.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporters on Their Rounds

—This is leap year.

—Did you swear off?

—Vote early and vote for the best men.

—Schools reopen today after the Christmas vacation.

—The annual meeting of the Albany Club will take place tonight.

—The regular Board meeting of the Y.W.C.A. will be held at 3.30 this afternoon.

—The Young Men's Bible Class of the George street Methodist church was pleasantly entertained by their teacher, Mr. R. H. Armstrong and Mrs. Armstrong on New Year's eve.

—Lindsay Watchman-Warder: Members of the local minstrel company complain that they were led by the promoters to believe that the proceeds of the recent performance would be given to charity or as a benefit. Since, these members say, it has not been used for either but pocketed by the two promoters, the rank and file are saying things because they have not got their share.

—Mr. Clarence W. Fitzgerald, son of Mr. George E. Fitzgerald, of town, and Miss Edna Hannah, daughter of Mr. Jackson Hannah, of Smith, were married on Wednesday at the home of the bride's father, by Rev. Mr. Dunner, of Bridgenorth. Mr. and Mrs. Fitzgerald have taken up residence at 226 Water street.

—Lindsay Watchman-Warder: Messrs. S. E. Ferguson, of Cavan; H. H. Wiglow of Port Hope, Joseph Thorndyke, of Millbrook, and Engineer Belcher, of Peterborough, representing the united counties of Northumberland and Durham, inspected the boundary bridge between Manvers and Cartwright last week, and Contractor D. Conroy, of Peterborough, is now a happy man.

Do not fail to mark your ballot for R. C. Braund for Alderman.

Mr. Gibbs Confident

In the municipal contest today, Mr. Wm. Gibbs, who is a candidate for Alderman, is confident of success. He has had experience at the Council Board having been a member of Ashburnham council, and feels himself well qualified for the position of Alderman. Mr. Gibbs promises, if elected, to do everything in his power to advance the best interests of the city.

Sugar Factories and Farmers

It will be interesting to many in Peterborough to learn the result to the farmers of the operations of one Michigan beet sugar factory for last year; The values of beet sugar factories to the communities in which they are situated is well illustrated in the case of the new plant at Menominee. The following facts are interesting; Capacity, 1,000 tons of beets every twenty-four hours; cost of plant, $1,000,000; manufactures 800 barrels of granulated sugar every twenty-four hours; employs 300 men; beet shed capacity, 1,200 tons; can manufacture into sugar each season the beets from 12,000 acres; storage capacity, 30,000 barrels of sugar; uses every year 6,000 tons of limestone, 15,000 tons of coal, 1,000 tons of coke, 75 tons of sulphur, 60,000 barrels, 8,000 bags, 25,000 yards of filter cloth; will annually pay farmers for beets, $500,000.

TO THE ELECTORS

of the Town of Peterborough, including Ashburnham, now part of Peterborough.

Ladies and Gentlemen:

Having received nomination as Alderman for our prosperous Town, I respectfully solicit your votes and influence.

It will be impossible for me to make a personal canvass and therefore I wish to state that I am opposed to giving the contract for lighting to the Peterborough Light and Power Co., at $60.00 per lamp as long as the Town can get as good lighting for $35.00 per lamp from the Otonabee Power Co., which has done so much to bring down the price of lighting, and whose tender shows a saving of over $14,000.00 in ten years. I am also opposed to the present street railway by-law but will support and vote for a good up-to-date street railway operated by good business men but without a bonus, and I will do my best, if elected, to advance the general interests of our prosperous town.

Wishing you all a Happy New Year, I am,

Your obedient servant,

JOHN SAWERS.

29th December, 1903.

To the Electors

OF PETERBOROUGH.

Your vote and influence is respectfully solicited for

FRANK ADAMS.

for Alderman for 1904.

TO THE ELECTORS

Having received nomination as alderman for the town of Peterborough, I respectfully solicit your vote and influence, and if elected will use my best endeavors to advance the interests of the town. It will be impossible for me to make a personal canvas, but as I have had an experience of four years in the Ashburnham Council, I am willing that I should be judged thereby.

Yours faithfully,

W. J. JOHNSTON,

571 Aylmer street.

TO THE ELECTORS

OF UNITED PETERBOROUGH

Having been requested to stand for election as Alderman, and having been duly nominated for that office, I respectfully solicit your liberal support and influence. If elected, I shall endeavor to look after the interests of the town in a straightforward manner, and in honoring me with your confidence, you can rely upon my faithfully representing you on the Board of Aldermen for 1904.

Yours respectfully,

R. C. BRAUND.

To the Ratepayers

OF PETERBOROUGH

Ladies and Gentlemen;

I solicit your votes and assistance to ensure my return as a member of the municipal council for 1904.

With the larger responsibilities devolving on the town and the administration of its affairs, I can promise if elected, to do all that careful judgment, earnest work, and the very best intentions can do to further your interests.

I hope to have your support,

E. F. MASON.

To the Municipal Electors

OF

PETERBORO AND ASHBURNHAM

Ladies and Gentlemen,

As I have been honored with the nomination for alderman for 1904, I have accepted the same, and respectfully solicit your vote and influence.

Should you elect me to assist in the management of your affairs, I will use my best judgment in the interests of Peterborough and Ashburnham.

I have been a workingman all my life, and have had a good schooling in economy, which I think can be used to a greater extent in the management of our municipal affairs.

If the question of street lighting is reopened, as the result of the appeal now before the courts, I shall, if elected, give that matter that serious consideration which its importance deserves.

Wishing you, ladies and gentlemen, a very happy new year, I remain,

Your obedient servant,

JOHN KYLIE.

Peterborough, Dec. 30, 1903.

TO THE ELECTORS

OF THE MUNICIPALITY OF PETERBOROUGH.

Your vote and influence is earnestly solicited for Alderman.

WM. SCOTT.

Coal Merchant.

To the Municipal Electors

OF

PETERBORO AND ASHBURAHAM

Ladies and Gentlemen.

In deference to the numerous representations made to me since my nomination, I have decided to place myself at your disposal as a candidate for Alderman for 1904.

While I cannot lay claim to all of the qualifications which an alderman should possess, such business capacity for the office as I do possess, is cheerfully placed at your service. I therefore ask your support in the effort to assist in maintaining the position and standing, as well as to advance, the welfare of our already progressive city.

As regards the street railway by-law, that, I understand, is definitely disposed of—the contract having been signed—and the people are only asked to express an opinion on the subject, and the result can only affect the action of the old Council.

In regard to the street-lighting by-law, if the appeal against the judgment quashing it should not be sustained and the question is re-opened, I shall favor the making of a contract for street lighting which will be in the best interests of the town, both as regards quality of light and cost of service.

The union of the municipalities of Peterborough and Ashburnham adds to the responsibility of an alderman; and the new ward of the town—No. 5—deserves at the initial stage of our municipal partnership, special attention to its interests, which, if elected, I am prepared to give, believing, as I do, that to make the union successful and in the interests of both parties, justice and fair play, irrespective of locality, should be the watchword of every alderman, irrespective of residence.

As I do not approve of canvassing for votes I ask the electors to accord me their voluntary support at the polls.

Respectfully yours,

R. HICKS.

Peterborough, Dec. 30, 1903.

VOTE FOR GIBBS

To the Municipal Electors of Peterborough and Ashburnham:

Ladies and Gentlemen,—At the request of many ratepayers I have decided to offer myself a candidate for Alderman for 1904. I have been a member of the Ashburnham Council and am familiar with the live questions before the electors of the village as well as the important questions engaging the attention of the Town of Peterborough. If elected I will give these and all other matters that may come before the Council my careful consideration. As a workingman I will be particularly anxious to keep down taxation and curtail all useless expenditure of the people's money.

Hoping to receive your cordial support at the polls.

I remain, yours truly,

WILLIAM GIBBS.

December 21, 1903.

Election of Aldermen.

To the Municipal Electors of Peterborough;

Having been favoured with the nomination for Alderman for our new city, I have consented to become a candidate. I think I can, with confidence, look to you for a continuance of your kind support. My record in the Council for the past four years is before you. Should you do me the honour of electing me for another term, I will continue to aim at the general welfare and progress of the municipality as a whole.

With thanks for your confidence in the past, and wishing all the Compliments of the Season I remain,

Yours truly,

R. CLINKSCALE

Peterborough, Dec. 29th, 1903.

ST. RAILWAY AND ST. LIGHTING AGREEMENT CARRIED

By a Majority of 522--The Hilliard Estate By-Law Carried by a Majority of 215---Result of Elections for Aldermen

Considering the severity of the weather yesterday, a fairly good vote was polled at the elections for Aldermen and on the bylaws. The by-law for the purchase of the Hilliard estate for town purposes was carried by a majority of 215, and the Street Railway and Street Lighting agreements were endorsed by a majority of 522. While this public endorsation does not make the Street Lighting and Street Railway agreements law, it being merely a referendum vote which was taken on these questions, it indicates that the people are willing that a bonus should be given Mr. Stuart and his associates for resuscitating and operating the present defunct street railway, and that that bonus shall be provided for in awarding the contract for street lighting to the Peterborough Light and Power Company at a much higher figure than tendered for by the Otonabee Power Company.

As to the Hilliard Estate By-law, Ald. Rush fathered the scheme and the Council were a unit in giving him their unqualified support. Ald. Rush is to be congratulated that the time and attention he has given to this matter in the Town's interests, has been substantially appreciated by the ratepayers at the polls.

A peculiar feature of yesterday's voting is that in only one polling sub-division, No. 1, were the by-laws voted down, and only by the small majorities of 5 and 10.

ALDERMEN ELECT.

As the result of yesterday's election of Aldermen for 1904, Greater Peterborough will start on its career with a strong Civic Board. Three of nineteen hundred and three's Aldermen, Messrs. Shortly, O'Connell and Corkery, retired from the field of nominees, and only one of the remaining eight, ex-Ald. Finnie, was defeated at the polls. The new men are Messrs. Hicks, Frank Adams, Scott, Johnston and E. Mason; the four former have all had municipal experience on the Council Boards of the Village of Ashburnham, while Mr. E. Mason, as an extremely successful business man, will undoubtedly prove a valuable acquisition to the City Fathers.

The Times, from the first, urged that it would be a graceful act, to say the least, for the Town to return two men from Ashburnham, and it is gratifying to see that that suggestion has been liberally accepted in the election of Messrs. Adams and Scott, two exceptionally strong men. Messrs. Scott and Gibbs polled the strongest vote in the Village of Ashburnham candidates, and while the latter was not elected, his vote polled across the river generally testified to his popularity in that section of Greater Peterborough.

Mr. Ald. Finnie suffered defeat by but 31 votes, and many of his colleagues last night expressed their sorrow at his loss from their Council and Committee deliberations. But Mr. Finnie says he does not mind the defeat, now that the by-law and the light and railway agreements are carried.

McWILLIAMS LEADS.

From the result of yesterday's voting for Aldermen the electorate are apparently falling in line with the idea that not only new, but young blood, is a very desirable factor to have in the Town Council. A start was made last year in this direction when Alderman R. F. McWilliams was not only elected, but returned by the largest vote polled, 822; this was a majority of 136 over the next highest vote polled, by Ald. Batten; and of 134 over the third highest by the father of the Council, Ald. Best. For a very young man, with no previous municipal experience, this was considered a remarkable achievement. This year, however, when Ald. McWilliams again appealed to the people, he did so not only as a young man of energy and marked ability, but as an Alderman with a record of 12 months' labor in the town's interest, by which to be judged. The result of that appeal has been a substantial endorsation of his attitude and work at the City Hall, at the hands of an appreciative public, who once again returned him, at the head of the poll, but with an increased total—that of 1142 against 822 of last year. Yesterday's voting gave the youngest member of the Council a majority of 142 over the second highest vote polled, and 366 over the third highest; he has also an increase of 113 votes in town, and he headed the poll in No. 6 Ward (Ashburnham) with a total of 110, which gave him a majority over Ashburnham's own men. Ald. McWilliams is certainly to be congratulated on his splendid showing at the polls yesterday, and his growing popularity, especially so when we consider that he had the strongest of opposition fighting against him. He attributes the labor vote, both in town and village, as being no mean factor in securing his election in so gratifying a manner.

Young blood for municipal honors is evidently gaining favor with the public, as evidenced yesterday in the return of Mr. R. Hicks as Alderman for 1904. Mr. Hicks is a pushing and enterprising young business man, and will undoubtedly do good work on the Civic Board. As a new man he made an exceedingly creditable run, which will encourage him to put forth his best efforts.

Ald. Best must also be congratulated on his grand total of 1000 votes, which puts him in second place; he was third last year, and his having gone up one in spite of the street railway and lighting contracts being endorsed, shows that he enjoys the confidence of a big majority of the electorate.

COUNCIL OF 1904.

The following are the successful Twelve (with the total number of votes polled by each) who will, with Mayor G. M. Roger, compose the Council of 1904:—

MAYOR G. M. ROGER	Acclamation
ALD. McWILLIAMS	1142
ALD. BEST	1000
ALD. ADAMS	940
ALD. BATTEN	930

The Water Commissioners Report About $3,000 Ahead

It will be gratifying to the ratepayers to learn that the waterworks, under capable municipal management, is a decided success. The commissioners are paying interest, sinking fund and handing over a surplus to the town, besides giving cheaper water rates than were in vogue under the Company's regime. The number of services are rapidly increasing, and this in itself is an assurance of greater profit. The following statement contains some very interesting and extremely creditable figures respecting the sytem and its management:—

Peterborough, Dec. 31, 1903.

Net cash, receipts, water rates only, 1903	$ 22,096 92
Net cash receipts, water rates only, 1902	24,000 00
Increase for 1903	$1,093 06
Cash discounts allowed, 1903	770 41
Cash discounts allowed, 1902	2,282 77
Increase for 1903	$1,512 86
Paid over to Town as surplus revenue, 1903	2,964 27
Mains laid in Peterborough to date	19 46-100 miles
Mains laid in Ashburnham to date	2 21-100 miles
Total length of mains	21 66-100 miles
Services laid in Peterborough in 1903	117
Services laid in Peterborough to date	1,307
Services laid in Ashburnham in 1903	18
Services laid in Ashburnham to date	77

Services laid in Peterborough, 142; Ashburnham, 18; on private property 17; total 173

General Sports

The Keene hockey team were unable to get up last night, consequently the game was postponed.

Toronto Star.

The opening game in Group No. 3 intermediate series, will be played at the Picton Arena on Wednesday night between the "Peterboro Cracks" and the "Picton Pirates." It is described on the bills as the "first big gun fired in the O. H. A." Manager F. E. B. Boulter's Picton team has the following unequalled slogan—

Ala Vevo, Ala Vivo, Ala Vevo, Ala Vivo Vum;
Vum, skin a rat trap bigger than a cat tray, Vum, Vum, Vum;
Cannibals, Cannibals, Bum a-like-a-bah
Picton! Picton! Rah! Rah, Rah!

Patrons of O.H.A. games will have no cause for complaint. All games will start promptly on advertised time, there will be no delays for injuries to players, and all games, except in two-club groups, must be played to a finish.

Official notice was received today by Secretary W. A. Hewitt that the Senior Frontenacs of Kingston, had decided to drop out of the O.H.A. competition, owing to their inability to get a strong enough team together to represent the club.

Manager James T. Sutherland writes as follows—

"The Frontenacs have decided that under the present condition of affairs in Kingston we cannot, in justice to our past good reputation, go any farther in the schedule. We do not intend to injure the chances of our junior team for the purposes of placing a half-and-half senior team in the district. Our chances for a good team some time ago were very good but unfortunately they leaked away."

The Perth Crescents were scheduled to play the Frontenacs in Kingston on Wednesday night, but Mr. Sutherland has notified them not to go, as the Frontenacs have disbanded.

Montreal, Jan. 5— The Victorias, who were beaten by the St. Georges at Toronto the week before, had an easy thing in the opening match of the C.A.H.L. series last night, defeating the Shamrocks 18 to 2 after a rather slow match.

—The 14th A.R. hockey team defeated Lakefield last night at the latter place, by a score of 7 to 3.

About 30 horses have been entered for the races which take place on the 6th and 7th of this month.

CHINA TO RATIFY TREATY

Government has Promised to Send Its Copy to Washington

Pekin, Jan 4—The Chinese government has promised United States Minister Conger to forward soon the Chinese copy of the treaty to Washington for the exchange of ratifications. After the treaty is ratified the opening of Mukden and Shantung to the commerce of the world can be pressed.

FOUND IN ROOM WITH THROAT CUT

Tragic Death of Mr. R. Mativier at Savoy Hotel

Montreal, Jan 4—Lying bathed in his own blood, and with a razor by his side, where it had fallen from his hand, Mr. R. Mativier, a wealthy wine merchant and importer, of Paris, France, was found in his room at the Savoy Hotel, with his throat cut from ear to ear.

Mr. Mativier reached the hotel on the 31st of December last and was shown a room. Nothing much was seen of him by the hotel people, and it was not until yesterday morning, when the door of the room was found locked and no answer could be obtained to repeated knockings, that access to the room was obtained, when Mr. Mativier was found cold in death. Medical man were summoned immediately, but it was evident that life had been extinct for some time, and the body was removed to the Morgue.

The deceased was a middle aged man, and when he registered was apparently in the best of health. The hotel authorities beyond stating the fact that a suicide had occurred in the hotel, would not make any statement, and the Coroner ordered the immediate removal of the body to the Morgue.

Mr. Mativier received no callers and kept himself shut up in his room all day, and it would appear from the condition in which the body was found that the deed was done early last evening.

OTHER CANADIANS PERISHED IN CHICAGO

Three Former Belleville People Are Among The Dead

Belleville, Ont., January 5—The wife and child of a former Bellevillian, M. E. Davey, were lost in the great Chicago holocaust, also Mr. Ellis Benjamin, their cousin, a former resident of this city, who accompanied them to the theatre. Great regret is felt in this city, where the victims had many relatives and friends.

St. John, N.B., January 5— Wm T. Carleton, stage manager for the "Mr. Bluebeard" Company, performing at the Iroquois Theatre, when the fire of Wednesday occurred, is a St. John man, son of Wm. Carleton, of the Customs, and brother of John L. Carleton, K.C., a prominent lawyer and politician, and Rev. C. P. Carleton, of St. John. Mrs Carleton's daughter who was making her debut on the stage at the Iroquois, was saved.

"What are you feeding to those hogs, my friend?" the professor asked.

"Corn, professor," the grizzled old farmer, who knew the learned gentleman by sight, replied.

"Are you feeding it wet or dry?"

"Dry."

"Don't you know if you feed it wet the hogs can digest it in half the time?"

The farmer gave him a quizzical look. "Now, see here, professor," he said, "how much do you calculate a hog's time is worth?"—Lippincott's.

Mrs. Browne—Oh, what lovely wedding presents! Such beautiful silverware and such rare china! Wasn't it nice to get such presents?

Mrs. Greene—Yes, it was; but we are now beginning to pay for them on the installment plan.

Mrs. Browne—Pay for them? On the installment plan? Why, Mrs. Greene, what do you mean?

Mrs. Greene—Why, the young people who gave us wedding presents are getting married, and we have to send them wedding presents.—Lippincott's.

At a meeting held in a town in Ireland two speakers who had come from the United States contributed the following sentences in the course of their speeches:

One of them, in giving some details of personal history, informed his hearers that "he had left Ireland fifty-three years before, a naked little boy without a penny in his pocket."

Said the other:

"Until last week I never set foot in the land of my birth."—Chums.

The following story of the Pope is told in the Italian papers. A deputation of the monks of some order had obtained an interview with him. According to the etiquette of the Vatican, only Cardinals are allowed to sit in the Pope's presence, and an invitation from him to do so is deemed equivalent to the promise of a Cardinalate. Pope Pius X. is a plain man, utterly indifferent to the etiquette of the Papal Court. He, therefore, begged the monks to take seats. They hardly knew whether they could venture to do so, and while they stood hesitating he said to them, "You do not, I suppose, expect me to draw your chairs forward for you?"

As one of the very few occasions when the wit of Rufus Choate was foiled, an incident is recalled when that brilliant lawyer was examining one Dick Barton, chief mate of the ship Challenge. Choate had cross-examined him for over an hour, hurling questions with the speed of a rapid-fire gun.

"Was there a moon that night?"

"Yes, sir."

"Did you see it?"

"No, sir."

"Then how did you know there was a moon?"

"The 'Nautical Almanac' said so, and I'll believe that sooner than any lawyer in the world."

"Be civil, sir. And now tell me in what latitude and longitude you crossed the equator?"

"Ah, you are joking."

"No, sir, I'm in earnest and I desire an answer."

"That's more than I can give."

"Indeed. You a chief mate and unable to answer a simple question!"

"Yes, the simplest question I ever was asked. I thought even a fool of a lawyer knew there's no latitude at the equator."—Success.

SLIPS OF THE TONGUE

An embarrassed minister gave out the first line of an old hymn in this way:

"This world is all a floating shoe."

Realizing that he had made a mistake he tried to correct the same and said:

"This world is all a shouting foe."

The congregation laughed. The dominie, reddening in the face, nearly shouted:

"This world is all a shooting flow."

Another preacher read a notice of a church supper, of which "new doughnuts will be given." He meant due notice.

It was an English curate who said:

"Here beginneth the fifth chapter of the Duke of Routeronomy."

WEATHER NOTES

Tuesday—Moderating.

JAPAN'S ADVANTAGE OVER RUSSIA IS DISAPPEARING VERY RAPIDLY

Reinforcements to Russia's Navy in Chinese Waters Now Being Made--The War Scare Continues

London, Jan. 5.—The recently issued British Government report of last year's naval manoeuvres contains much important data, but perhaps the most instructive lesson is the importance of the engines in a modern war vessel. The combined fleets of the two forces taking part in the mimic warfare amounted to 26 battleships and 42 cruisers. Of these twelve broke down, owing to defects or failures in the machinery.

The speed of the fleets was seriously hampered by the failure of several of the vessels to even approach their official records.

The Illustrious, five years old, although credited with 17 1-2 knots on official trial, could not keep up at 16 knots an hour. This was also the case with another 17 1-2 knot ship, the Caesar. The King Alfred, a new armored cruiser, with an official record of 23 1-2 knots, first broke down, and when repairs were completed only attained 18 knots per hour. The Formidable, Venerable, and London, all 18 knot ships, could not do better than 15 knots.

London, Jan. 5.—The relative position of Russia and Japan has changed considerably since war first appeared possible as two powerful and modern Russian ships, the Tzarevitch and Bayan, have reached the Far East in the past fortnight. The forces of the two Powers are to-day, giving only the important ships:

Russia (Admiral Starck)—
- 7 modern battleships.
- 7 modern armoured cruisers.
- 9 protected cruisers.
- 25 torpedo craft.

Japan (Admiral Togo)—
- 6 battleships, not so modern as the Russian.
- 6 modern armoured cruisers.
- 14 protected cruisers.
- 70 torpedo craft.

The Japanese fleet will receive no reinforcements in the immediate future, whereas recent telegrams announce that one battleship, two cruisers and six torpedo vessels are in their Mediterranean on their way to join the Russian forces. Moreover, one additional Russian battleship and one cruiser with six more torpedo boats are nearly ready to sail from the Baltic, and will leave early in January if not before.

The naval force of the two sides will be the determining factor in any conflict and it is superfluous to discuss the military strength till a naval battle has been fought. Japan has the advantage of numerous dock-yards, which never freeze, with an ample number of docks, and every facility for executing repairs. Russia is as yet badly off in this direction: she has insufficient dock accommodation at Port Arthur and Vladivostock, and both these harbours freeze in a severe winter.

On the whole Japan is slightly superior in naval force, but her preponderance is now small, and it will certainly be lost next year, when further Russian reinforcements arrive.

CZAR MOVES TO WAR.

Washington, Jan. 5.—Press dispatches from London stating that the Japanese Ambassador at that capital had received answer to Japan's last note will be a repudiation of Japan's demands caused the gravest apprehension among the government officials today. No confirmation of the dispatches was received from any source, but they were believed to be accurate. An official of the State Department, who remained on duty all day, said to the press correspondent that the Department had momentarily been expecting news of this sort for several days. When it came in official or even unofficial form it would be accepted as the first step in the war between Russia and Japan.

That war is inevitable is now regarded as certain. The government, owing to its own complications in Panama, must play the part of a disinterested spectator. In order to maintain that role with absolute impartiality summary instructions have been cabled to Rear Admiral Evans, commanding the Asiatic squadron, to keep his vessels outside of the zone that is likely to become the theater of naval hostilities. The younger officers of the American fleet desired to be spectators to all the fighting, but Rear Admiral Taylor, chief of the Bureau of Navigation, with the consent of the President, vetoed their petitions.

Recalling the complications that arose from the presence of German ships in Manila Bay after the battle in which Dewey won his spurs, it was deemed inadvisable to have United States ships at any point where their presence might excite suspicion. This attitude betrays some anxiety on the part of the Administration to prove the good faith of its neutrality. So long as we have an international complication of our own, even though the party of the second part is a bankrupt helpless little South American Republic, it will not be wise to meddle in other nation's wars.

STORMS ON ATLANTIC

Two Schooners Wrecked on the Coast of Newfoundland

St. John's, Nfld, Jan. 5.—The schooner Clara Mason, laden with codfish and bound for Europe, was driven ashore at Bonavista in a gale and became a total wreck. The crew was rescued.

North Sydney, C.B., Jan. 5.—The captain and crew of 16 men of the French fishing schooner Sapho reached here to-day from Newfoundland, after having abandoned their craft, which had been nearly wrecked by the winter gales. The men rowed 14 miles from the land, and when near the shore of Red Island all their dories were capsized in the surf. No one was lost.

10,000 SCHOOLS CLOSED

The Crusade in France Against Religious Teaching

Paris, Jan. 5.—The plan of the Combes government for the secularization of education is now ripe. During the last eighteen months 10,049 schools depending on religious congregations have been closed. The number of boys establishments belonging to the Christian Brothers to be suppressed shortly is 1,068, while the girls' schools affected number 1,832. M. Combes has signed a decree nominating a commission to draft a bill and study the measures to be adopted in the way of extra school buildings for the children taken over by the state.

POLICE COURT

Several Cases Come Before P. M. Dumble Yesterday

W. Lloyd claimed $8 wages from Jas. Flynn. The case was enlarged one week.

Mr. B. Laster, the Simcoe street general merchant, was fined $10 and costs for violation of the early closing by-law.

Edward Leclaire was charged with allowing gambling to be carried on with cards or dice in his shop on New Year's Day. He pleaded not guilty. There was no evidence and the case discharged.

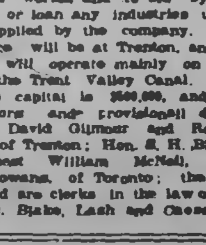
F. Hutchinson was charged with assault. He was discharged.

CANADIAN DEAD IN NEW JERSEY

New York, January 4.—Jos. Eagan, twenty-seven years old, said to be the son of a wealthy lumbermann in Canada, was found dead yesterday in his room at 371 Broadway, Union Hill, N. J. He had been asphyxiated by gas. It is supposed he had turned it off and then accidentally turned it on again.

Big Power Company

The Trent Power Co., Limited, is the title of a corporation which has just received a provincial charter, empowering it to acquire, construct and operate power works, and to aid by way of bonus or loan any industries using power supplied by the company. The head office will be at Trenton, and the company will operate mainly on the line of the Trent Valley Canal. The company's capital is $500,000, and the incorporators and provisional directors are David Gilmour and Robert Weddell, of Trenton; Hon. S. H. Blake, K.C., Ernest William McNeil, and Robert Gowans, of Toronto; the two last named are clerks in the law office of Messrs. Blake, Lash and Cassels.



The housewife who
judges her baking powder by the food that
comes from the oven,
will always use Cleveland's.
It never fails.

RUSSIA WILL REPLY TO JAPAN'S NOTE IN FEW DAYS

Russia is Arming But Japanese Minister is Now Becoming Confident of Peace

St. Petersburg, Jan. 4— The Foreign Office states that The Russian reply will be transmitted to Japan in a day or two. The reply will not be merely "yes" or "no" but will be made up of reasoned propositions. The general basis of this communication is already complete, but the details are being elaborated.

RUSSIANS ARMING.

Moscow, Jan. 4—The Russian cruiser, Saratoff of the volunteer fleet has been ordered to Sebastopol to receive her armament and thence proceed with all haste to Port Arthur.

The Russian cruiser Orel has been ordered to remain at Odessa until she receives her armament.

THE LATE MRS. O'TOOLE

Sudden Demise of a Well Known Citizen on Sunday Last

A very sudden death occurred about 10 o'clock on Sunday morning, when Mrs. Catharine O'Toole, widow of the late Thomas O'Toole died from heart failure. She was in her usual good health on Saturday night, but was unwell on Sunday morning. A physician was called, but her symptoms were not considered serious. She died a few hours later. She was 72 years of age and had been living in Peterborough, at the residence of her son, Mr. John O'Toole, the well known contractor, for about two years.

The funeral will leave 704 George st., this morning at 9 o'clock and proceed to St. Peter's cathedral, thence to the C.P.R. station, whence the remains will be conveyed to Ottawa on the 11.35 train. The late Mrs. O'Toole's home was formerly in Ottawa.

MR. J. C. FROST
A Victim
of
Severe Headaches
and
Billous Attacks.

Mr. John C. Frost, Toronto, Ont., a sufferer for fifteen years writes thus—"I have been subject to severe headaches and billous attacks for the past fifteen years. During that time I have been doctoring, and have also tried different patent medicines, but nothing seemed to give me relief. Last winter, after suffering with neuralgia for about two months I started to take Paine's Celery Compound, and before the first bottle was finished my neuralgia was completely cured. I have now taken six bottles, and am very pleased to inform you that my old complaints have also entirely disappeared, and I feel like a new person."

—The Lindsay and Bobcaygeon Railway fixed one hundred dollars an acre as the value of farm lands expropriated for railway purposes, but quite a number of owners deem the offer insufficient and will take the matter to arbitration. Several of these cases are booked to be heard on the 7th of January before the County Judge.

A MODERN FACTORY

Best Equipped Cordage Works on American Continent

Mr. M. J. Smith, the New York representative of Messrs. O. Molina & Co., of Merida Yucatan, the largest sisal hemp exporters in the world, spent Saturday last in town. He came around by Peterborough on his way to Chicago, to see the Canadian Cordage Company's plant. He says while it is not the largest, it certainly is the most modern and best equipped cordage factory on the American continent, in which to economically and efficiently manufacture binder twine, rope and lath yarn.

He was very much impressed with the cheap electric power the company enjoys. He says it gives the company an advantage over its competitors in Canada and the United States of thousands of dollars a year. The plant is equipped with all the modern labor saving conveniences, from the time the raw material is received from the Company's railway siding at the doors of the warehouse until it is again loaded on to the cars in finished goods. The very fact that the company have such a low rate of premium on their fire insurance is the best evidence that no detail is lacking in the construction of the plant. Its Sturtevant system of heating is the safest and most economical to operate, and gives the best results of any that could be installed.

Mr. Smith was much impressed with the excellent factories that are located in Peterborough and with the splendid opportunities the town can offer to anyone who desires to enter upon the manufacturing business. The shipping facilities of having both railways radiating in all directions, the invaluable waterway and its many valuable water-powers from which electric power is being developed, and can be still more largely developed, offer facilities which few cities and towns on this continent possess.

PRIEST QUITS CHURCH TO WED

Quietly Marries Member of Parish and Both Disappear

New Britain, Conn., Jan. 4—Peter O'Rielly aged 28 years, formerly an assistant priest in St. Mary's Roman Catholic parish in this city, and Miss Mary O'Donnell of the same parish, were married a week ago in Hartford by City Attorney Joseph Tuttle as justice of the peace. The marriage became public today, when the record of the marriage was found at the office of the board of health in Hartford. O'Rielly came to New Britain from Fort Wayne, Ind., a year ago. The bride and bridegroom have gone away. Their whereabouts are unknown.

EVERYBODY READS THE TIMES.

NEURALGIA

THIS DISTRESSING COMPLAINT IS DUE TO IMPOVERISHED BLOOD

When the blood becomes thin and watery, as a matter of course, you become weak, vitality gets down low, and there is but little power in the system to ward off disease and pain.

Neuralgia hunts out a weak spot, and makes a home there, so secure that it is only by the use of proper remedies it can be driven from the system, never to return. To obtain immediate relief, first apply to the painful parts, a good quantity of Polson's Nerviline, and then bind on a hot flannel cloth.

This local treatment will be found very efficacious, but must be followed by a course of Ferrozone treatment. Ferrozone is a blood food, and a blood purifier, and quickly strengthens the system so that further attacks may never be feared. It makes the rich red kind of blood, that gives strength and vigor to weak constitutions and puts them in good shape to resist neuralgic attacks.

This combined treatment of Nerviline and Ferrozone in Neuralgia, Sciatica, and Rheumatism, is marvelously effective and cures after all else has failed. Because of the unique success of these remedies we have no hesitancy in endorsing their use to our readers. All druggists sell them.

Morning Times

paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Canada.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 10c per month, and to outside points at $3 per year strictly in advance.

ENGLISH OFFICE 30 Fleet St., London E. C.

TIMES PRINTING COMPANY,

ers and Proprietors - Peterborough, Ont.

UNION LABEL

PETERBOROUGH, JANUARY 5, 1904

NEWFOUNDLAND AND CANADA

They have had an election in St. Pierre, Miquelon for a representative in France. One of the issues brought in was whether the island should go over to the States or remain a French possession. The question was a purely academic one, inasmuch as it is in other hands to settle, but an expression of opinion was thought useful in view of the failure of the fishery the past season, and the resulting poverty among the people. The sentiment was against annexation, and in favor of union with Canada, if any change is to be made.

The prevailing unrest may open a way for the settlement of the whole French problem in the Gulf of St. Lawrence, by the cession of French rights on the mainland and of the island to Great Britain. The French fishery, like the American, is dependent on the Newfoundlanders for bait fishes. This year's catch was largely hindered by the withholding of bait supplies. Present conditions have created a mood for change, and the time is fit for fresh overtures looking to the union of Canada and Newfoundland with this French question as a make-weight in negotiations. The conference of 1895 was unfruitful, because the position was immovable and also because the demands of the delegates were regarded by the Government of the time as excessive. The proposition then submitted by Newfoundland may serve as a fair indication of its attitude at the present time. Its delegates submitted an offer to the following effect:

1.—Newfoundland to receive 80 cents per head of its population.

2.—One hundred and fifty thousand dollars to be paid in bounties to Newfoundland fishermen.

3.—Canada to take over the debt of the colony in proportion to the debt of the Dominion, and if the indebtedness of the colony is less than the proportion the Dominion to pay the local legislature five per cent. on the excess.

4.—The Dominion to pay subsidies to the amount of $362,356, including the salary of the Lieutenant-Governor, interest on public debt, etc.

6.—Dominion to pay for railway and other large public works, and the colony to provide for roads, bridges and education.

7.—Dominion to pay $150,000 annually for the Crown lands of the colony.

8.—Dominion to protect the fisheries.

9.—Weekly steamship service between Canada and Newfoundland, completion of a line of railway to Port Aux Basques, first class steamer to connect that port with nearest railway port in the Dominion, direct steamship connection between St. John's and Liverpool, and local steamship facilities.

10. Newfoundland fishermen to be exempted from payment of any license fee for fishing or use of cod traps.

11.—Compensation to industries established by protection, for a limited period for on account of injury they might suffer.

12.—Establishment of a naval training ship.

13.—Precious metals to be reserved to the colony.

14.—Payment of $50,000 to the colony for legislature.

The Newfoundland delegates maintained that under clause 3 of their propositions an annual amount of $395,000 would be payable to Newfoundland and that Canada should assume $10,250,000 of Newfoundland's debt. The Canadian delegates proposed that Canada should assume $2,250,000 of the debt, and pay $100,000 annually or five per cent. on an excess of debt over $2,250,000 or $3,000,000. Newfoundland in the course of the negotiations proposed that $850,000 be paid to it annually for the maintenance of local charges. The Canadians offered $465,000, afterwards increased to $500,000. These were the substantial grounds of disagreement between the delegates, and neither party being willing to make further concessions the conference was unable to reach a basis of agreement.

THE STORM KING

A Proposition Worthy the Attention of Investors

The Peterborough Brokerage Company has secured the local agency of the Forest Mining Company's splendid properties, and is prepared to furnish full particulars to investors. It is a proposition that is worthy of the attention of all who have capital to invest.

The Forest Mining Company's properties, consisting of seven full claims each 15 x 600 feet, are situated in Cable Cove Mining District, Eastern Oregon, a district known throughout the length and width of the United States as one of the most promising mining sections yet discovered. This district covers an area of more than one hundred miles in length by fifty in width. This entire scope of territory has been proven, by persistent prospectors, to contain a great avriety of the precious metal, gold being the foremost quantity, as the issue proves with successful methods.

The "Storm King," by which appellation the Forest Mining Company's property is known, is situated about fifteen miles north of the City of Sumpter; a town that is making its mark felt in the mining circles of the world. Representatives of many of our most wealthy men are constantly moving among us, ever ready and eager to pick up bargains. They have been very successful in the past, as note the following holdings: Rockefeller owns the Bonanza, Mountain Belle, and a number of flattering prospects. Baring Brothers, of London, England, bought the famous North Pole mine for $10,000; it is now worth $10,000,000. We could continue to citate to you a number of other moneyed men who have placed their money to advantage to themselves. Now, to return to the "Storm King," this property is being swiftly, and economically developed by adits, and cross cut tunnels. An adit has been started on the the "Eureka" ledge this winter; it is now in 150 feet in ore all the way. This ore will average $15.00 per ton, and as the ledge has been proven for 1500 feet; and the highest values found at the greatest distance from the adit it is fair to presume that a strike will be made during the winter. The ledge in the face of the adit is now six feet wide, the whole structure being strongly mineralized, and considering the scant depth of thirty feet, the showing is remarkable, and as the ledge is widening everything indicates the making of a mine.

The "Storm King" ledge has been opened by an adit one hundred and eighty-five feet long. This drift shows a three foot ledge which assays up to $30.00 gold values. A tunnel has been started lower down the mountain which will strike that edge at one hundred and fifty greater depth. This will undoubtedly open a large chute of ore. This ledge is proven 1600 feet.

The "Golden Rule" ledge has been proven for at least 1500 feet. This ledge is very wide, at one point it is over fifty feet, but only surface work has been done, and at no place has a depth of more than ten feet been secured, still $3.00 assays has been found. The management intends to start an adit at the most practical point early in the spring.

It will be seen from the following assays taken from samples secured from a personal examination by Professor W. S. Eberman, Mineralogist, that the values are in the "Storm King" group and, as every ledge can be opened and worked economically and advantageously by adits and tunnels, that not a great sum will be required to make the "Storm King" group a self sustaining property.

From the "Eureka"—No. 1 sample, gold $79.00; silver $2.20; total $81.28. No. 2 sample, gold $8.40; silver $1.00; total $9.40. No. 3 sample, gold $9.76; silver 75c.; total $10.51. No. 4 sample, gold $48.00; silver $1.25; total 49.25.

From the "Storm King"—No. 5 sample, gold $12.40; silver $3.50; total 15.90. No. 6 sample, gold $70.28; Trace; total, $70.28. No. 7 sample, gold $62.08; silver $1.25; total $63.33.

From the "Golden Rule"—No. 8 sample, gold $4.48; silver 65c.; total $5.08.

One can readily see by the foregoing facts that the "Storm King" group will soon be numbered among the producers of the Sumpter District; this is assuredly the truth, for these reasons;

First—We have high class assays from average samples.

Second—Our three ledges have been proven for many hundreds of feet.

Third—We will not have to sink expensive shafts—all the ore bodies can be worked by adits and tunnels; consequently, only a nominal sum will be required to place the "Storm King" in the dividend number.

Fourth—We can secure an average depth of 400 feet on each ledge. This fact alone is of the most vital importance, as it shows how economically this great property can be operated; and as all the claims are contiguous, a discerning person can easily comprehend the great possibilities offered to the man or woman who becomes a stockholder in this safe property.

STANDS BY AN ANARCHIST

Central Union of New York Urges General Action in Turner Case

New York, January 4.—All the unions throughout the country will be urged to stand by an anarchist now awaiting deportation at Ellis Island. A resolution has been adopted by the Central Federated Union to call a mass meeting for the purpose of protesting against the deportation of John Turner, an English anarchist who is now held at the island. All central labor unions in the country are to be appealed to for support in the matter, and will be asked to aid in an effort to secure the repeal of the law under which Turner is being held by the immigration officials. Delegates who addressed the meeting declared that the law, in its present form, has the opposite effect of that desired.

PRIEST QUITS CHURCH TO WED

Quietly Marries Member of Parish and Book Keeper

New Britain, Conn., Jan. 5—Peter O. Rielly aged 26 years, formerly an assistant priest in St. Mary's Roman Catholic parish in this city, and Miss Mary O'Donnell of the same parish, were married a week ago in Hartford by City Attorney Joseph Tuttle as justice of the peace. The marriage became public today, when the record of the marriage was found at the office of the board of health in Hartford. O'Rielly came to New Britain from Fort Wayne, Ind., a year ago. The bride and bridegroom have gone away. Their whereabouts are unknown.

AMERICAN WAR CERTAIN

American Cabinet Takes Action on Columbia's Demand

Washington, Jan. 1.—The United States will not entertain Colombia's demand for the restoration of Panama to the Colombian union. Neither will the government consent to submit to The Hague any question of financial damages which Colombia may now or hereafter assume she has sustained through the secession of Panama and the establishment of an independent republic on the isthmus. The policy of the administration will be to stand by the treaty with Panama and observe all of its provisions, including the one guaranteeing the independence of that republic, build the canal and, if war follows, fight until Colombia asks for peace.

Briefly, this is the program that was decided upon at this afternoon's Cabinet meeting, which lasted from 4 until 7 o'clock. Thursday Secretary Root, who has been designated by the President to conduct the negotiations during the illness of Secretary Hay, will communicate the Cabinet's decision to General Reyes, the Colombian peace commissioner, in the form of a note that will stand as an answer to his own, submitted to the Secretary of State last week.

Thinks War Sure to Follow.

General Reyes will leave Washington immediately, accompanied by Dr. Herran, and proceed to Bogota, by the shortest route available. What will follow is made clear by certain dispatches contained in the pamphlet presenting the correspondence on the Panama revolution, which was made public today. That there will be war is undoubted.

The administration is prepared for any emergency. Five transports are waiting at New York and San Francisco with steam up to take on board two brigades of regular soldiers and sail for Panama in a few hours notice.

General Reyes is aware of the character of the preparations that have been made to forestall an attempted invasion of the isthmus, but it is known that he greatly fears that it will be impossible to restrain his countrymen, who are demanding war with the United States.

The Cabinet was a unit in indorsing the President's course in the Panama matter and also the course he has mapped out for his future guidance.

Translator's Illness Causes Delay.

The reason why the Reyes note was not condiered before today was because a translation of it was not ready for submission to the Cabinet until 3 o'clock this afternoon. When General Reyes delivered the note to Secretary Hay at the latter's home last week it was immediately sent to the State Department with an order that it be translated forthwith. The note was in Spanish. Professor Thomas the official translator, was ill, and the note was put away to await his recovery. It was ergarded as such an important document that Secretary Hay deemed it more prudent to secure a translation from Thomas rather than from his assistant. Thomas died yesterday.

Immediately the note was turned over to his former assistant, and that official had a copy in English ready this afternoon. When President Roosevelt was informed that the copy would be ready about 3 o'clock he instructed Secretary Loeb to issue a call for the Cabinet to meet at 4. The session lasted for three hours, and during that time every conceivable feature of the Panama matter was discussed.

SNOWSHOE COSTUMES
MADE NEW BY
DIAMOND DYES.

If your blanket costume, sash, tuque and stockings worn last year are now faded, soiled or spotted, you can, at a cost of from 10 to 30 cents make them as good as new by using DIAMOND DYES. The work is easy and simple. Diamond Dyes are money savers.

SHIP FLOUR TO JAPAN

Orders for Nearly 100,000 Barrels Booked by Minneapolis Mills

Minneapolis, Minn., Jan. 4—Within the past eight business days Minneapolis mills have booked almost 100,00 barrels of flour for export to Japan. Further enquiry was reported today, and it is not unlikely more business will result.

For some time Japan has been a heavy buyer of American flour. The millers are reticent about the matter, but admit that the orders are still coming, and one large company alone is known to have booked close to 50,000 barrels within a day or two. The Japanese government has bought no flour direct.

San Francisco, Jan. 4—Getz Bros & Co., have contracted with the Russian government to supply the latter with 2,000,000 pounds of beef. The firm is making demands upon all the big packers in the west, having already placed an order for 1,000,000 pounds with Cudahy & Co, to be delivered in this city.

CHINA TO RATIFY TREATY

Government has Promised to Send its Copy to Washington

Pekin, Jan 4—The Chinese government has promised United States Minister Conger to forward soon the Chinese copy of the treaty to Washington for the exchange of ratifications. After the treaty is ratified the opening of Mukden and Antung to the commerce of the world can be proclaimed.

THE HIRED MOTHER-IN-LAW

Will Be the Honored Guest at the Wedding Soon to Take Place.

That ugly old women might prevent the institution of suits for damages for breach of promise is suggested, though not proven, by the following serio-comic true story just reported from Vienna, Austria:

A poor workingman sitting one evening with some cronies in a tavern, drinking cheap wine, confessed himself in great trouble. His sweetheart, a poor cook, neither young nor beautiful, threatened him with court proceedings if he refused to make good his promise of marrying her. He shook his head at every suggestion made by his friends. "I know of only one thing," he sighed, "that might induce the girl to relinquish her hold on me, and that is if I can show her that her prospective mother-in-law has hair on her teeth and is possessed of an evil eye."

"Whoop!" cried one of his sympathizers, "my own mother-in-law would suit exactly! If you ain't afraid of her, and will pay me for it, I will loan her to you. The girl will be sure to run away as soon as she sees her."

Pepi, the betrothed, went at once to look at the old woman, and found her as repulsive looking as described. On condition that he pay her $2 she agreed to play the role of his mother at a meeting soon to take place between herself, her "son" and the girl. Then the faithless lover informed his affianced that on a given day his mother would come to Vienna for a meeting at a certain hotel.

At the appointed day and hour the trio met, and Mary, the poor girl, nearly fainted when Pepi introduced the ugly old woman as his mother. But she soon composed herself and tried to get on friendly terms with this supposed mother-in-law. Pepi grew impatient, and slyly reminded his "mamma" that according to contract she must make herself as disagreeable as possible. She did. She began by consuming an astonishing quantity of wine, and would not leave off kissing and embracing her "dear boy" until the latter, in desperation, trod viciously on her corns to show her his disapproval of her tactics.

"Miss Mary," she said, "I have made inquiries about you, and find you deserving of a happy future. I will not lend a hand to parting those belonging together. I have entered into this joke understanding the real intention of your betrothed; he only wanted to find out if you would marry him, even if his mother was such a hag as I am. Isn't it so, Pepi?" What else could Pepi do but murmur "Aye?" Mary was touched, and embraced the ugly, but good natured old woman. Then came full pardon, complete reconciliation, and at the wedding soon to take place the hired mother-in-law will be the most honored guest.

Moody's Vote of Thanks.

Possibly the most novel response ever made to a request to return a vote of thanks to a chairman was made by Mr. Moody during his first visit to England.

He had attended a meeting at which the Earl of Shaftesbury was chairman. The duty of proposing a vote of thanks was assigned to him, and the announcement made.

"Our American cousin, the Rev. Mr. Moody, of Chicago, will now move a vote of thanks to the noble earl who has presided on this occasion."

The whole thing was quite out of Mr. Moody's line. English formalities might or might not have come gracefully from his lips had he attempted them, but he did not. With an utter disregard of conventionality he burst upon the audience with the bold announcement:

"The speaker has made two mistakes. To begin with, I'm not the Rev. Mr. Moody at all. I'm plain Dwight L. Moody, a Sunday school worker. And then I'm not your American cousin; by the grace of God, I'm your brother, interested with you in our Father's work for His children.

"And now about this vote of thanks to the 'noble earl for being our chairman this evening.' I don't see why we should thank him any more than he should thank us. When at one time they offered to thank our Mr. Lincoln for presiding over a meeting in Illinois he stopped it. He said he'd tried to do his duty, and they'd tried to do theirs. He thought it was about an even thing all around."

That opening fairly took the breath away from Mr. Moody's hearers. Such a talk could not be gauged by any known standard. Mr. Moody carried his English audience with him from that beginning to his latest labors.

Why Willie Walks With a Tired Feeling.

"Hoo, hoo, hoo," rang through the house at 2 a. m.

"Great Governor! What is that?" and the head of the house sat up in bed and blinked at an electric light shining through the window.

"John, stay right where you are; I'll not let you go down stairs to be killed. Did you ever hear such a noise?"

"Mama, what is it?" came in an agitated whisper from the next room, and then the daughter rushed wildly into the parental bedchamber.

"Keep cool, now. Don't go into no highstrikes. I'm going down to see what that is," and he dug up an old muzzle-loading pistol he had carried in the civil war and that had been loaded since 1873. "I'll show 'em. Every man's house is his own cast—"

"Hoo, hoo, hoo."

The father dropped the gun and it blew a whole corner off the bureau. The daughter dived under the bed and the mother yelled "Murder!" at the top of her lungs.

"Shut up!" ordered the veteran, as he reached for his artillery. "Stay right where you are. I'll fight my way to the telephone and get the police. If they get to shooting down there don't show a light. I know the house and they don't."

"Hoo, hoo, hoo," just as the old gentleman reached the top of the stairs. He went down like a cartwheel and shot a hole in the ceiling as big as the bottom of a tub.

"Did you hear my owl?" shouted Willie, as he dashed from the third story. "Got him in the country yesterday and hung him in the dining room when I got home last night. Hain't he a dandy?"

Poor Willie! He walks like a boy with inflammatory rheumatism, and the last he saw of his owl it was flying over the barn toward Redfield.—Detroit Free Press.

The examiner wished to get the children to express moral reprobation of lazy people, and he led up to it by asking them who were the persons who got all they could and did nothing in return. For some time there was silence, but at last a little girl who had obviously reasoned out the answer inductively from her own home experience exclaimed, with a good deal of confidence:

"Please, sir, it's the baby."—Boston Transcript.

NERVOUS DEBILITY
CURED.

If you have transgressed against the laws of nature, you must suffer. Self abuse, later excesses and private diseases have wrecked thousands of promising lives. Treat with scientific physicians and be cured. Avoid quacks. E. A. Sidney, of Toledo, says: "At the age of 14, I learned a bad habit and at 19 contracted a serious disease. I treated with a dozen doctors, who all promised to cure me. They got my money and I still had the disease. I had given up hope when a friend advised me to consult Drs. K. & K., who had cured him. Without any confidence I called on them, and Dr. Kennedy agreed to cure me or no pay. After taking the New Method Treatment for six weeks I felt like a new man. The drains ceased, wormy veins disappeared, nerves grew stronger, hair stopped falling out, urine became clear and my sexual organs vitalized. I was entirely cured by Dr. Kennedy and recommend him from the bottom of my heart."

K&K K&K K&K K&K K&K K&K

$400,000 was Produced from the Properties
now owned by the
NEW YORK-GRASS VALLEY GOLD MINING CO.

above the 400 foot level, under the old management. During the last year the mine has been thoroughly opened up. New and richer ore bodies discovered. Large reserves now in sight.

Large and thoroughly complete Merralls mill now working. Besides this, six quadruple discharge stamps are now being installed. Each stamp will increase the present output at least 20 tons daily. The mine is now producing steadily and increasing output daily. As soon as the new stamps, now being installed, are running, the output will reach at least 125 tons daily. At a moderate estimate the monthly income should exceed

FORTY THOUSAND DOLLARS

During the coming year it is the intention of the management to install more stamps so that the output can be brought up to FIVE HUNDRED TONS DAILY.

Quick dividends are positively assured, and will most surely be large and continuous. The present Board of Directors is composed of competent business and mining men, who are giving their personal attention to the affairs of the Company.

The price of Stock will be advanced to 75 cents per Share almost immediately.

This is your last chance to purchase into this producing mine at 30 CENTS PER SHARE for cash or instalments. We have only a limited amount left at this figure, therefore send your orders in early.

REMEMBER IN BUYING THIS STOCK YOU ARE BUYING

INTO
- A present producing property.
- A mine that will pay large and handsome dividends, as the reserves of ore on hand warrant.
- A property that has 600 acres, only a small area of which has been mined.
- A proposition that can mine its ore cheaper than almost any other mine in the world, owing to free water power. Cost of mining and milling not being over $1.00 per ton.

We have just received the following telegram, under date of November 24th:

KAYE, DE WOLF & CO., New York City. Grass Valley, Cal., Nov. 24th.

Mill now running on medium grade ore from reserves. Latest mill returns forty ounces amalgam from batteries a one since sixteenth. The Ferris ore chute on fifth level has been reached. Expect the ore on this level will pay much better than any yet opened up. The bottom of the shaft is also in good ore. Recent developments fully justify the expectations that have been formed. All who visit property report a large dividend payer soon.
J. W. [illegible], Secretary.

Send for prospectus and full information to KAYE, DE WOLF & CO., 39 Cortlandt St., New York, or to PETERBOROUGH BROKERAGE CO., Canadian Fiscal Agents.

Dont Miss this Opportunity to Make

An investment in the Preferred Treasury stock of a Company that is now, and has been for the past fourteen months, paying a dividend of 30 per cent. on the present price of 30 cents per share, from ore treated at custom mill. This dividend will be largely increased in the near future as the Company is about ready to start a twenty stamp mill, located near their property, which has been leased.

A FEW THOUSAND LEFT

Take advantage of the opportunity as only a few thousand shares are yet for sale, and then the stock will be withdrawn from the market without further notice.

SATISFIED STOCKHOLDERS

There has not been a share of stock transferred since the Company started, fourteen months ago, showing the stockholders are well pleased with their holdings.

TREASURY STOCK RESERVE 600,000 SHARES

being ample for all reserve purposes. Management first class.

IT WILL PAY YOU

To write or call on us forfull information regarding this stock.

Dry Placer Miner, formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. W invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 200 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

'Henry Fielding's Dream'

By CORTLAND MYERS.

of them are as indifferent as the stones in their walls to the wrongs of society and the needs of man. Why don't they all discuss these burning questions, and in the name of the Gospel they preach bring in the liberty and justice and salvation of which he spoke this morning?"

"Yes," said Henry, "this is the opportunity of the Church. The working men are not so far away from its doors, if the Church people and preachers will only bridge the little chasm. Sympathy, interest, fearlessness, truth are the stones and steel for that bridge."

"Here we are already," said Elsie, "but you will both have to go again with me."

"You don't need to urge me very hard," said Richard, as he extended his hand to them and said 'Goodby.'"

CHAPTER III.

A Rich Girl's Sacrifice.

As soon as her work was finished that afternoon Elsie hastily made preparation to go out.

Henry did not ask any questions, because he knew where she was going.

It was often a part of her Sunday to attend the service at the mission in Ninth street.

She was deeply interested in the work they were doing, but had gone more as a listener than a helper.

She wished to-day that she dared ask Henry to go with her, but thought better not to go too far in one day.

That is often the mistake of heart desire and anxiety.

Zeal needs the bridle of tact, and love is better in the companionship of wisdom.

In her delight over the morning's experience she almost stepped upon the jewel and crushed it.

An unseen angel clasped her hand and led her the right way.

It was a quick farewell and a look of affection, and she was gone.

Henry called after her.

"If I am not here when you come back, I will be safe. I expect Richard, and we will be out somewhere this fine day."

After a musical "all right," had sounded back, Henry said to himself and almost aloud.

"What a sweet, simple, sincere girl she is. I am glad I had her come and give me the chance to sacrifice for her. She has her own temptations and burdens, but knows how to meet them and carry them. Her Christianity is real. It means something in her life."

He arose, and with hands behind his head, gave a Sunday afternoon yawn, and said:

"If there is no other proof on earth, here is one bit of logic that stands the test. Yes, if it is good for her, perhaps it is all my own [illegible] has lost its power over me. [illegible] nnot make a garden [illegible] e was of this ir[illegible] ce over her brother, [illegible] is the method of influence and the way of real Christian character everywhere.

Elsie had reached the mission and taken her usual place near the door, waiting to be of any service in teaching a class or as a listener in the Bible class, when, to her astonishment, who should walk past her and up toward the front of the small room but the Rev. David Dowling.

She wondered what brought him there, what relation he had with the work, and a whole chain of questions.

She had been there several times, but never saw him before.

He walked to the platform, and sat down in a vacant chair by the side of the superintendent.

She noticed how he smiled to this one and nodded to another near him, and also, as he passed through the room, how he touched with his hand of love a little curly headed boy, and thus created another smile in the world.

The recognition was instant, and a child's heart enlarged to welcome new joy.

Elsie thought "he is just like his sermon; he is a practicing preacher. If Henry could only meet him and know him."

She whispered to some one who sat near her, and asked if Mr. Dowling came there very often.

"Oh, yes," was the reply. "You know this is a mission of his church."

Elsie gave a look of surprise and a nod of thanks.

She almost forgot to give her attention to what was going on about her, so absorbed was she with her own thoughts.

"Isn't this strange; what a peculiar coincidence, though I am just as glad as I can be. I want to meet him, and perhaps this is the opportunity."

Just then some one approached her, and asked if she would not teach a class of boys only for this afternoon.

It was but a momentary hesitation on her part when the consent was given.

She sat down right in the centre of the unattractive group and tried to win their attention and their hearts.

She could win almost anybody, but an angel direct from heaven and commissioned to secure the attention and affection of a class of boys in a mission school might have to go back and report failure.

It was a tension upon her nerves, and a strain upon her patience.

She never had such a time as this afternoon. She had tried it before, and with some measure of success.

There was one boy with unwashed hands and even some remnants of last week upon his face. His hair was uncombed and uncut. His clothing was not ragged, but might have been even that with improvement. He seemed to be just possessed with an evil desire, and almost determination. He would not listen, nor would he sit still; more than that, he and one or two others were pinching and pushing the ones next to them, and even went so far as to make paper balls out of their lesson leaflets and throw them across the room.

In her heart she kept saying, "What shall I do?" and she might as well have said it in audible language, for they knew what she was saying, and only increased her trouble.

She was wishing and almost praying that no one would see her and the class, and that the bell would soon ring for the lesson to close, but the minutes were so long, and still she talked on.

She tried to tell them stories outside of the day's lesson to interest and attract attention, but without avail.

Some one was a witness of her task and the tax upon her courage. Mr. Dowling stood at her side.

"I want to meet you and know you. I don't think I have seen you here before, but I am so glad that you are in this noble service."

She told him she had been there before, but not a regular attendant. She added that she had been anxious to meet him.

"Before the school is over," said he, "I want your name and address, and now I would like to see one of your boys for a moment."

While he was saying it he took the very one by the hand who had been the cause of most of the trouble, and led him to a side seat and sat down by him, placed his arm around him and began whispering to him.

Elsie could not hear what he was saying, but she knew.

He was making it easier for her or somebody else the next time.

What a holy mission that is on earth, preparing the way for Christ or one of Christ's followers.

The superintendent had done a different work that afternoon.

He had taken two of the scholars in another class right out of their chairs and pushed them through the doorway, as he said

"When you can behave come back, and not before."

Perhaps both ways were right and accomplished the object, but the first method seemed the most like Christ, and to have the greatest saving force in it. It was harder, but that is a part of Calvary.

Just at the close of the school the superintendent said.

"We are always glad to hear from our pastor and I wonder if he has not something to say to-day."

There was silence as he arose, as there always was. He said:

"I was reading this last week of a beautiful Christian young lady who wanted to teach in Sunday school, and there was no class for her. The

(To be continued.)

HEAD REDUCED TO PULP

Walter Rainard Was Killed in a Tool Company's Works

London, Ont., Jan. 2—An accident occurred in the London Tool Company's shops, Bathurst street, Thursday, afternoon, which cost a machinist named Walter R. Rainard, his life. The first intimation any of his shopmates had of the fatal occurrence was when an apprentice named Michael, discovered Rainard lying on the floor beside the plane, dead.

A doctor found the skull terribly crushed, the top of the head being reduced to a pulp. From marks from the big plane it would seem that Rainard, in leaning over the plane, had been caught in the head by a moving knob, and an upright post, and when the machine finally released its victim, he fell to the floor. The din of machinery drowned the sound of the falling body, or any outcry, if the unfortunate man uttered such.

Deceased was 22 years of age, belonged to Glanworth, and had been employed in the shops a couple of years. No inquest will be held.

BURIED SATURDAY

Coroner's Jury Decides that Deceased Was Temporarily Insane

London, Jan. 2—At the inquest on the body of Mr. Andrew Pattullo, M.P.P., held yesterday, the deceased's nephew, Mr. George Pattullo, testified that his uncle was in good health, but had been subject to fits of depression, since the death of his wife, and had frequently complained of loneliness. He described the finding of his uncle's body on Tuesday last in the latter's bedroom, deceased having committed suicide by cutting his throat with a razor.

The jury brought in a verdict of suicide while temporarily insane. The remains were buried in Finchley Cemetery today at 2 o'clock.

Messages of condolence from all over Canada have been received.

A NECESSARY CHANGE

It is denied by those in a position to know, at the headquarters of the C.P.R. that the recent elevation of Mr. William Whyte, the assistant to the President, over lines West, will involve any extended reorganization of the heads of the departments in the Western divisions.

It is pointed out that the policy of the railways has always been to make no changes except those which had been proven to be absolutely necessary by circumstances.

The change in the West, it is said, was necessitated owing to the fact that that section of the country was too far away from the head offices to make reference to headquarters either practicable or satisfactory.

It does not matter whether you preach in Westminster Abbey or teach a ragged class you are faithful. The faithfulness is all.—George McDonald.

Write on your doors the saying wise
and bold,
"Be bold! be bold!" and everywhere
"Be bold!
Be not too bold." Yet better the excess
Than the defect; better the more than
less;
Better like Hector on the field to
die,
Than like perfumed Paris turn and
fly.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jennie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.00 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.75 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jennie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $62.65 and $17.00 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on its present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group, is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

HOW TO LIVE WELL

FOR THE LEAST MONEY AT LAST TO BE SOLVED

Professor Atwater, as Special Agent of the Department of Agriculture is Conducting a Series of Food Investigations With That End in View.

Uncle Sam is looking into his housekeeping. He has a big and varied family, of many tastes and several colors, and he is at present engaged in spending $17,500 in finding out what this big family eats.

He is going about his investigation in a systematic way, looking into family larders, state by state and section by section, and jotting down in his notebook item by item what these people of these United States eat.

Not only what they eat, but what they waste; how much they pay for their food, how much nourishment they get from it, and how much energy; how much they overeat and how much they undereat; and all with the purpose of bettering the condition of the people.

Professor H. O. Atwater, as special agent of the department of agriculture is with this sum conducting a series of food investigations in this country.

He has already made studies of the dietaries of the people of nine states and one territory, and he has so far discovered, among other things that:

The people of the United States are the most abundantly fed and the most wasteful.

That they have the greatest variety of food.

That, as a rule, it is poorly cooked and worse served.

That palate and convenience are considered in the selection of food before wholesomeness, nourishment and economy.

That the dietary that most nearly approaches the scientific standard of a man's food requirements is the dietary of the most isolated, the most hated, the most barbarous foreigners in the United States—the Chinese.

That the smallest sum any man has been actually found living on in this country is three and one-half cents per day.

Professor Atwater's investigations have a range that swings from the dietaries of university students' clubs to the dietary of the cotton field negroes and the tortilla frying natives of New Mexico, from families who live on $100 a month to families who live on $100 a year.

Strangely enough he found families living on $100 a year better fed—from the scientific point of view—than families who have $100 a month.

A man, says science, requires so much of carbohydrates in order to live and work.

The protein, or nitrogenous portion of food, is the muscle-forming constituent and of it all the working machinery of the body is composed.

The fat and carbohydrates are necessary to supply the heat and energy, and a certain amount of fat is necessary for storage against the rainy day of illness or other overdraft.

The physical equilibrium depends upon the proper proportions of these food constituents taken into the system.

By investigation and comparison science has determined that the average normal man requires these constituents in his daily food in these proportions:

Th man with little physical exercise requires 3.20 ounces of protein, the same amount of fat, and 10.56 ounces of carbohydrates, which together have a fuel value of 2,450 calories.

The calorie is the unit of heat or energy.

The man with active work requires 6.22 ounces of protein, the same of fat, 17.00 ounces of carbohydrates, and receives 4,000 calories in fuel value.

For improvidence and ignorance and uninvitingness of food the palm goes to the tenement districts of Chicago and New York.

The families in the congested districts of these cities live with a certain similarity. The same improvident feature is characteristic of both—that of buying food in small amounts, sending out just before a meal for only enough for a meal, and considering the taste and convenience only.

The Bohemians, who manage to live on an average of 11 cents per man per day, are conspicuous for their judicious marketing, buying food in which there is the least waste and which there is the least waste and most nourishment, and, until they get accustomed to the prodigality of the new country, squandering very little on such luxuries as green vegetables and fruits.

The Italians, Uncle Sam finds, are very conservative in their diet, sticking to the chestnuts cheese wine and macaroni of their own country, and even refusing to go to hospitals or other public institutions for fear of the strange foods. In spite of the prices they must pay for their imported foods, the Italians manage to live and find sufficient nourishment on a fraction of what the American mechanic or laborer can.

The happy-go-lucky darky of the Alabama cotton fields has perhaps the least variety and the meagrest supply of food of any human being in the United States.

The darky who lives in a little log cabin on a one-mule or two-mule or three-mule farm, who has nothing to cover him but a hickory shirt and a pair of blue jeans trousers, whose offspring gambol in the light and inexpensive attire afforded by a gunnysack, can live contentedly on a dietary that includes not more than three or four articles of food and that costs per man per day but three cents.

A pair of eyes to see the beautiful, the good and the true—God's fingerprint in flower and field and snowflake.—Boston Herald.

CONFESSORS WENT ON STRIKE

Berlin, Dec. 31.—All kinds of curious strikes have taken place in Germany during the past year, including a strike of physicians and that of the students at the University of Wurzburg. The oddest, however, is reported from Munich. All the Father Confessors in the City Hospital and Sanatoria ceased their occupation yesterday because the municipal authorities discharged one of their number. The authorities declare that they were compelled to do so, because the priest in question used to ply patients in the confessional and on the sick bed with indiscreet questions.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
AND
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000.00. Par value $1.00. Full Paid and Non-Assessable

At 50 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 900 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $16 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 20c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 150 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*
C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado
ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not A Gamble
but a
Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY, GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO.,
FISCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.

The Peterborough Brokerage Co., Local Agents.

WANTED—GOOD AGENTS IN EVERY CITY.

A Dangerous Disease

Owing to its tendency to spread to all parts of the system, Catarrh should be checked in its incipient stages

Catarrh commences generally with a slight cold, and because slight, it is often neglected. But the seed that has been sown brings forth a dangerous harvest,—perhaps it is the harvest of consumption, which is the harvest of death.

Better spend a few moments each day inhaling Catarrhozone, an aromatic, antiseptic remedy that is breathed in through the mouth, and, after permeating all the respiratory organs, is slowly exhaled through the nostrils.

The immediate effect of Catarrhozone is magical—so prompt and efficient. Relief is instantaneous, throat and nose cleared in a few moments by the penetrating vapor from the Inhaler. Ferrozone, taken in conjunction with Catarrhozone, purifies the blood, cleanses it of all poisons, and builds up the system so that Catarrh cannot exist.

You are sure to receive lasting benefit from Catarrhozone if bothered by Catarrh in any part of the system. It is highly recommended for Bronchitis, Asthma, and Lung Trouble, and used for Coughs and Colds in the head it has no equal.

Remember that Catarrhozone is both a local and constitutional treatment, and is warranted under all circumstances to give satisfaction. Money refunded if it fails.

DEATH'S BUSY WORK

Several Well Known Citizens Pass Away During the Past Few Days

The Late Edward J. Allen

There passed away at Nassau on Saturday last Edward John Allen, son of Mr. John Allen, after a lingering illness. He was only 18 years of age. Interment took place yesterday at the Douro cemetery.

The Late Mrs. Pacey

News has been received in town of the death at Pasadena, California, on December 24, 1903, of Mary Scott Mitchell Pacey, wife of Mr. William Pacey. Mrs. Pacey, who was 62 years old, died of dysentery. She left Peterborough four or five years ago, having resided here with her husband for a number of years, and having made many friends among our people. She was an active member of St. Andrew's Presbyterian church. Mrs. Pacey leaves a husband to mourn her loss, but no family.

The Late Mr. W. J. Green

It is our sad duty to chronicle the death of Mr. William John Green, 300 Park street, after a lingering illness of over two years caused by consumption. Deceased was 34 years of age, and leaves a wife and one child of eight years to mourn his loss. For some years he held the position of foreman in the George Matthews Packing Company, the employes of which attended the funeral in a body, showing their respect for the deceased.

The funeral took place yesterday afternoon, and proceeded to the Little Lake Cemetery.

The Late Jeremiah Moore

We regret to record the death of Mr. Jeremiah Moore, on New Year's afternoon, at the General Hospital, Toronto, after a prolonged illness of about a year. Deceased was well known in Peterborough, having been born in Smith, where he spent many years. For the past few years he has resided in Toronto. A wife and three children are left to mourn his demise. He also leaves three brothers, John, of Crookston, Minn., Thomas and Harry of town, and two sisters, Mrs. W. Donnell, Toronto and Mrs. W. Belleghem, town.

The remains were brought to town yesterday morning to Mr. D. Belleghem's and interment took place yesterday afternoon at Lakefield cemetery.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporters on Their Rounds

—There are vacancies for two or three girls at The Times' bindery.

—Frozen water pipes have caused residents much inconvenience during the past week.

—Circumstances seem to indicate that most of the municipal candidates were merely running to keep themselves warm.

—There will be no meeting of St. John's Girls' Guild this evening owing to the annual Sunday School entertainment in the School House.

—The fire brigade had a run yesterday afternoon, caused by a blaze in the cellar of the George street school. Little damage was done.

—The Times has to thank Messrs. Lindsay and Might for a very handsome calendar gotten out by the Economical Fire Insurance Co., of which they are the local representatives.

—Lindsay Post—The grading on the L. B. and P. Railway has been completed, Mr. Guy Campbell finishing at Cross Creeks on Thursday. The bridge at the creek will not be constructed until the summer. The ties are being got out now and delivered along the line, and the rails will be laid as early in the spring as possible.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. Ira Snelgrove, of Toronto, is visiting in town.

—Messrs. J. A. Fox, and H. Edwards, of Port Hope are visiting friends in Peterborough.

—Mrs. Fred. Duggan, of Toronto, is visiting Mrs. J. Harris McClellan, 19 Gilmour street.

—Mr. Percy Campbell has returned to Toronto to assume his studies at Victoria University.

—Mrs. McNeeven, Emily, who was a guest of her brother, Mr. John Nugent, Brock street, returned home yesterday morning.

—Miss Mattie B. Robertson returned home last night, after spending the holidays with her grandmother, Mrs. Brandon, Fenelon Falls.

Globe—The marriage of Miss Eloise Glover, youngest daughter of Mr. and Mrs. Peter Glover, Peterborough, to Mr. John Leigh Wood, Toronto, is announced for Tuesday, January 12, 1904.

DOCTOR'S SHIFT

Now Gets Along Without It

A physician says: "Until last fall I used to eat meat for my breakfast and suffered with indigestion until the meat had passed from the stomach.

"Last fall I began the use of Grape-Nuts for breakfast and very soon found I could do without meat, for my body got all the nourishment necessary from the Grape-Nuts and since then I have not had any indigestion and am feeling better and have increased in weight.

"Since finding the benefit I derived from Grape-Nuts I have prescribed the food for all of my patients suffering from indigestion or over-feeding and also for those recovering from disease where I want a food easy to take and certain to digest and that will not overtax the stomach.

"I always find the results I look for when I prescribe Grape-Nuts. For ethical reasons please omit my name." Name given by mail by Postum Co., Battle Creek, Mich.

The reason for the wonderful amount of nutriment, and the easy digestion of Grape-Nuts is not hard to find.

In the first place, the starchy part of the wheat and barley goes through various processes of cooking, to perfectly change the starch into Dextrose or Post Sugar, in which state it is ready to be easily absorbed by the blood. The little parts in the wheat and barley which Nature can make use of for rebuilding brain and nerve centres are retained in this remarkable food, and thus the human body is supplied with the powerful strength producers so easily noticed after one has eaten Grape-Nuts each day for a week or 10 days. "There's a reason."

Get a little book, "The Road to Wellville" in the pkg.

EVERYBODY READS THE TIMES.

BACHELOR'S REFLECTIONS

All's fair in love and the millinery business.

There is no man who knows how he is going to act when he falls in love, and no woman who doesn't.

When a woman goes away from home the letters she writes her husband are half to make him jealous of her and half to make him think she is jealous of him.

Women are awfully foolish. I was telling four or five of them last night about a dress I saw that was white, with a little dash of lavender, and they all laughed. I wonder why they laughed.

Women aren't angels, and it's mighty lucky for the women.

Political opinion is like a mustache; it never looks well on a girl's lip unless there is a man hitched to it.

Probably the first thing Jonah's wife said after he told her the whale story was that she needed a lot of new clothes.

A woman's foot is two sizes bigger than the shoe she wears to be stylish and two sizes smaller than the ones he wears to be comfortable.

If the average woman could have her choice of the way she would like to be "won," she would probably choose the man that would knock her down with a club and then sit on her.

A woman can always find some flaw in a man's story—unless it isn't true.

For the first three weeks after it gets born a baby looks most as red and uncomfortable as its father.

It takes a smart woman to make a man out of a fool, but any fool woman can make a fool out of a man.

No girl over 16 can be expected to be satisfied with the idea of kissing that she gets out of Sunday school books.

A girl's way of flattering a new man is to insinuate that she has heard the other women talking a lot about him.

It is much more likely that women are angels than it is that angels are women.

Marriage is a great thing for a man; it makes him ashamed to talk about his small troubles.

If the men got up a "Fathers' Club" and talked nothing but baby-talk, all the women would believe they did nothing but drink cocktails.

A woman can get engaged and have the wedding all talked over in less time than she can decide with another woman what is the best kind of canary seed.

It is easier for a woman to find a reason than it is for her to find a hairpin, and harder for a man to find any reason in it than it is for him to find her pocket.

POINTED PARAGRAPHS

Anger is a stone cast into a hornet's nest.

The harbor buoy is a child of the sea.

Keeping out of debt is a first class life policy.

Some people are so cheerful they make other folks weary.

The man who walks wires may be skillful, but he isn't in it with the politician who pulls them.

A man can always manage to attract attention by either raising whiskers or having them shaved off.

Let a fireman play on your piano with his hose for a few minutes if you want to get all the music possible out of it.

The letter "I" is always in visible, yet it is never out of sight.

Trying to cut your own hair is shear nonsense.

In Zululand the women fill their mouths with water in order to keep silent. In America they fill their mouths with tea—and gossip more than ever.—Chicago News.

A full purse is the best pocket companion.

The dull man bores you and the sharp one skins you.

A matchless story is a novel that ends without a wedding.

About the only force some people have is the force of habit.

Knife wounds heal quicker than those caused by a sharp tongue.

When a man offers you something for nothing it will pay you to walk around it by the furthest possible route.

It is far better to have large feet than a small understanding.

The house of a tidy woman and a motion to adjourn are always in order.

The actual weight of a ton of coal as sold by some dealers is a dark secret.

Gall and wormwood are both used in making imported wine in this country. The man who labels it supplies the gall.

When you see a girl with only one glove on it's a sign that she has a new ring on the other hand.

MENTAL GEOGRAPHY

The most populous country is Oblivion; many go there, few return.

The largest river is Time.

The deepest ocean is Death.

The region where no living thing hath habitation is called Yesterday.

The most highly civilised country is To-day.

The highest mountain is called Success. Few reach the top save those who watch sharply for the passing spirit of the mountain, Opportunity, who carries upward all those who seize hold on him.

The region where no man hath ever set foot is called To-morrow.

"You remember that bank teller who made himself so solid with the officials by suggesting that the bank employes should wear clothes without pockets during banking hours?"

"Yes. What about him?"

"He got away with $60,000 by throwing it out of the window to a confederate."—Cleveland Plain Dealer.

Minneapolis, Minn., Jan. 4—Within the past eight business days Minneapolis mills have booked almost 160,00 barrels of flour for export to Japan. Further enquiry was reported today, and it is not unlikely more business will result.

THE PRISONER

Who escapes from jail is by no means free. He is under the ban of the law and punishment is written over against his name. Soon or late he will be caught again and bear added punishment for his short escape from his cell.

Those who by the use of palliative powders and tablets escape for a time from the sufferings of dyspepsia are in the same condition as the escaped prisoner. Soon or late they will go back to the old condition and pay an added penalty for temporary release.

Dr. Pierce's Golden Medical Discovery cures dyspepsia and other diseases of the stomach and organs of digestion and nutrition. Its cures are lasting.

"For about two years I suffered from a very obstinate case of dyspepsia," writes R. E. Secord, Esq., of 13 [illegible] Ave., Toronto, Ontario. "I tried a great number of remedies without success. I finally lost faith in them all. I was so far gone that I could not bear any solid food on my stomach for a long time; felt melancholy and depressed. Could not sleep or follow my occupation (tinsmith). Some four months ago a friend recommended your 'Golden Medical Discovery.' After a week's treatment I had derived so much benefit that I continued the medicine. I have taken three bottles and am convinced it has in my case accomplished a permanent cure. I can conscientiously recommend it to the thousands of dyspeptics throughout the land."

Accept no substitute for "Golden Medical Discovery." There is nothing "just as good" for diseases of the stomach, blood and lungs.

Dr. Pierce's Pleasant Pellets stimulate the liver

He Was in a Cage.

He was a dissipated looking individual, though dressed in the latest style. He paid his fare and sat in the car quietly for a while. Then he opened his lips and suddenly carolled:

"I'm only a bird in a gilded cage,
A beautiful sight to see."

All the passengers turned and looked at him inquiringly. The dissipated individual paused and looked at the passengers and smiled.

"I beg par'on," he said. "I beg par'on. All ri. No sharm done. I ain't no bird. Bir's got wings. I hain't got no wings. I'm camel. Thash what I am:"

He lifted his voice and sang again:

"I'm only a camel in a gishled cage."

He paused again. "No' I ain't no camel. Par'on me ladies, pleash par'on me. I ain't no camel. Camel can go sheven days without drinkin'. I couldn't go sheven minutes wishout drinkin'. I'm hippopotamus. Thash what I am."

"I'm only hip'pot-mus in gishled cage,
A beau'ful thing shee."

"No, ain't no hip'posh-mus. Hip'poshmus lives in water. I couldn't live in water. Don't like water. Ish all rite to wash clothes in. Ain't no good to live in. I gesh I'm a bird after all. For if I'm bird, then I can fly to shicoo. I'm goin' fly now." And he got off the car and disappeared, singing:

"I'm just an ostrich in a gishled

"He's a bird, all right," said the conductor.

She Understood It.

Mrs. Sparks—I do wish, John, that you would explain this Chinese question to me.

Mr. Sparks—It's very simple, Maria. You see, the Russians don't want an open door, but desire to keep a slice of China for themselves. Now, the Japanese want an open door and wish to keep Russia from keeping a slice of the country. On the other hand, Germany is trying to keep Japan from keeping Russia from closing the door, and also wants to keep her from keeping Russia's keeping a slice of China. Now, America only has a trade interest, but if she can keep Germany from keeping a slice of territory, the door can be kept open. See?

Mrs. Sparks—Oh! yes. Anyhow, the weather's so warm there that the Chinese will find it more comfortable to keep their doors open. Still, I can't see why the Powers are making such a fuss over a little thing like that.—Philadelphia Enquirer.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.00 to $90 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.75 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $61.65 and $17.06 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group, is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

HOW TO LIVE WELL

FOR THE LEAST MONEY AT LAST TO BE SOLVED.

Professor Atwater, as Special Agent of the Department of Agriculture is Conducting a Series of Food Investigations With That End in View.

Uncle Sam is looking into his housekeeping. He has a big and varied family, of many tastes and several colors, and he is at present engaged in spending $17,500 in finding out what this big family eats.

He is going about his investigation in a systematic way, looking into family larders, state by state and section by section, and jotting down in his notebook item by item what these people of these United States eat.

Not only what they eat, but what they waste; how much they pay for their food, how much nourishment they get from it, and how much energy; how much they overeat and how much they undereat; and all with the purpose of bettering the condition of the people.

Professor H. O. Atwater, as special agent of the department of agriculture is with this sum conducting a series of food investigations in this country.

He has already made studies of the dietaries of the people of nine states and one territory, and he has so far discovered, among other things that:

The people of the United States are the most abundantly fed and the most wasteful.

That they have the greatest variety of food.

That, as a rule, it is poorly cooked and worse served.

That palate and convenience are considered in the selection of food before wholesomeness, nourishment and economy.

That the dietary that most nearly approaches the scientific standard of a man's food requirements is the dietary of the most isolated, the most hated, the most barbarous foreigners in the United States—the Chinese.

That the smallest sum any man has been actually found living on in this country is three and one-half cents per day.

Professor Atwater's investigations have a range that swings from the dietaries of university students' clubs to the dietary of the cotton field negroes and the tortilla frying natives of New Mexico, from families who live on $100 a month to families who live on $100 a year.

Strangely enough he found families living on $100 a year better fed—from the scientific point of view—than families who have $100 a month.

A man, says science, requires so much of carbohydrates in order to live and work.

The protein, or nitrogenous portion of food, is the muscle-forming constituent and of it all the working machinery of the body is composed.

The fat and carbohydrates are necessary to supply the heat and energy, and a certain amount of fat is necessary for storage against the rainy day of illness or other overdraft.

The physical equilibrium depends upon the proper proportions of these food constituents taken into the system.

By investigation and comparison science has determined that the average normal man requires these constituents in his daily food in these proportions:

The man with little physical exercise requires 3.20 ounces of protein, the same amount of fat, and 10.56 ounces of carbohydrates, which together have a fuel value of 2,450 calories.

The calorie is the unit of heat or energy.

The man with active work requires 6.38 ounces of protein, the same of fat, 17.60 ounces of carbohydrates, and receives 4,060 calories in fuel value.

For improvidence and ignorance and unlavishness of food the palm goes to the tenement districts of Chicago and New York.

The families in the congested districts of these cities live with a certain similarity. The same improvident feature is characteristic of both—that of buying food in small amounts, sending out just before a meal for only enough for a meal, and considering the taste and convenience only.

The Bohemians, who manage to live on an average of 11 cents per man per day, are conspicuous for their judicious marketing, buying food in which there is the least waste and which there is the least waste and most nourishment, and, until they get accustomed to the prodigality of the new country, squandering very little on such luxuries as green vegetables and fruits.

The Italians, Uncle Sam finds, are very conservative in their diet, sticking to the chestnuts cheese wine and macaroni of their own country, and even refusing to go to hospitals or other public institutions for fear of the strange foods. In spite of the prices they must pay for their imported foods, the Italians manage to live and find sufficient nourishment on a fraction of what the American mechanic or laborer can.

The happy-go-lucky darky of the Alabama cotton fields has perhaps the least variety and the meagerest supply of food of any human being in the United States.

The darky who lives in a little log cabin on a one-mule or two-mule or three-mule farm, who has nothing to cover him but a hickory shirt and a pair of blue jeans trousers, whose offspring gambol in the light and inexpensive attire afforded by a gunnysack, can live contentedly on a dietary that includes not more than three or four articles of food and that costs per man per day but three cents.

A pair of eyes to see the beautiful, the good and the true—God's fingerprint in flower and field and snowflake.—Boston Herald.

CONFESSORS WENT ON STRIKE

Berlin, Dec. 31.—All kinds of curious strikes have taken place in Germany during the past year, including a strike of physicians and that of the students at the University of Wurzburg. The oddest, however, is reported from Munich. All the Father Confessors in the City Hospital and Sanatoria ceased their occupation yesterday because the municipal authorities discharged one of their number. The authorities declare that they were compelled to do so, because the priest in question used to ply patients in the confessional and on the sick bed with indiscreet questions.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
AND
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00.
Par value $1.00. Full Paid and Non-Assessable

At 50 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 900 feet in addition to other claims approximating a total acreage of 200 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate
to your heart's content,
and quickly, then let us
hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 20c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 115 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 800 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*
C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado
ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not A Gamble
but a
Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock *only* for sale, and *only sufficient stock will be sold to supply* machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY, GIVEN

This proposition is better than that of mady companies selling stock at 50 cents a share, and will stand a thorough investigation.

MAY CLOSE ALL PUBLIC HALLS IN CHICAGO

Theatre Managers Will Apply to the Council for Power to Partially Re-open

Toronto, Ont., Jan. 6— A former resident of Toronto, who died in the Chicago fire, was Mrs. Inez Spring, wife of W. H. Spring, of Chicago, and daughter of Mr. and Mrs. G. Scovil, of this city. A telegram was received by Mr. Scovel. Tuesday, stating his daughter had been killed in the fire. Mr. Scovel then thought it was a case of mistaken identity, as Mr. Spring was very seriously ill in his home in Chicago. However, though the sad news was not confirmed, Mrs. Scovell left Friday for Chicago. Since then no word has been received in Toronto, and Mr. Scovell anxiously awaits the results of Mrs. Scovell's attempt to identify the body the husband being too ill in Chicago to undertake the task.

SWOONED ON THE STAGE.

Miss Edith Williams, whose family lives at 66 Adelaide street east, was one of the principals in the "Moonlight Song," the feature that had been on the stage when the fire broke out in the Iroquois Theatre, Chicago, and by fainting under the heavy strain, Miss Williams undoubtedly was the indirect means of saving the lives of many members of the company, according to a letter received by her mother.

FORMERLY OF WHITBY.

Whitby, Ont., January 6— The Chicago theatre disaster has brought gloom to many in this town, as the Mrs. E. A. Davey, represented as having lost her life, together with her daughter, is an old Whitbyite, who subsequently moved to Belleville and from there went to Chicago. She was formerly a Miss Lizzie Adams, born and brought up in Whitby, and visited her friends here nearly every summer. They have received a telegram from Mr. Davy, confirming the loss of his wife and daughter. The bodies have not yet been recovered.

PERISHED IN BALCONY.

Kingston, January 6 — News from Chicago intimates that Miss Catharine Middleton, granddaughter of Mrs. Middleton of this city, killed in the Chicago theatre horror, had gone to the matinee as the guest of Mrs. Foltz, at whose home she was visiting. Mrs. Foltz had three others with her, and the entire party perished. They had occupied seats in the balcony, where so many met death.

FIRE INSPECTOR PUSHES INVESTIGATION.

Chicago, January 6— The investigation to fix the responsibility for the cause of the Iroquois fire horror was taken up yesterday by Fire Inspector Monroe Fulkerson, who has the assistance of the Chief of Police and of Coroner Traeger. Every employe of the theatre, on the stage and in the auditorium are on the list summoned for examination. Sixty-five witnesses will be examined.

Uupon Treasurer John J. Noonan, of the Iroquois Theatre, Chief O'Neill has made a demand for the pay-rolls of the house, giving the names of the employes. From union officials other data concerning these employes has been sought.

Although the police interposed no objection when the members of the "Mr. Bluebeard" company left for the East, some of the actors may be brought back to add their testimony to that of the sixteen members who have been arrested.

Inspector Fulkerson said: "The fire originated from the contact of a lin y curtain with an intensely hot and inadequately protected flood light. The curtain stuck because a piece of stage machinery was directly in the path of the descent of the fire shield. The fire was driven under the suspended the stage when some one opened the rear doors. The automatic sky lights over the stage did not open as they should have done and create a flue through which the flame, smoke and heated air on the burning stake could have found a vent. It is apparent that the exits was not adequate. The next step is fixing the responsibility."

MAY CLOSE PUBLIC HALLS.

Fire traps in the shape of public halls will be the next assembly places to shut by the authorities. Mayor Harrison announces that the cases of minor entertainment halls will be taken up as expeditiously as possible. A force of building inspectors will be detailed at once on the lesser halls, and as fast as violations are reported, the closing orders will go out. The buildings against which the next edict will go forth are scattered throughout Chicago and in few instances come up to ordinance requirements. In the directory, 324 are scheduled, and according to an estimate made by the building officials last summer, when the agitation against fire trap theatres was aken up, over 200 are constructed in violation of the ordinances.

APPEAL TO COUNCIL.

Representatives of the theatre managers of the city will appear before the city council to-night to ask for permission to open the various play-houses in order to give employment to the 16,000 men and women, who, by their closing, are thrown out of employment, and who, in many instances, are left comparatively destitute. The plan includes the opening of only the lower floors of theatres, however, the prices to be graduated from 25 or 50 cents to $1 or $1.50.

FEDERATION WILL INVESTIGATE.

Claiming that an attempt is being made to make organized labour the "scapegoat" for the Iroquois theatre horror, the Chicago Federation of Labour has voted to investigate the causes of the fire through a special committee composed of representatives of the unions concerned in the constructions of the building. Delegates demand that the committee make an entirely independent examination and report to the federation rather than to the mayor.

A SENATOR IS MISSING.

Friends of State Senator S. A. Mann, of Florida, who was in Chicago at the time of the Iroquois Theatre fire, have become alarmed and searched the hospitals without securing a trace of him. Inquiries also are reported to have come from New York and from Talahasse. Mr. Mann is the father-in-law of Governor Jennings, of Florida.

SOME BIG THEATRE FIRES.

The Chicago Holocaust Holds Record For the Number of Dead

The theater fire in Chicago is the worst disaster of the kind on record, so far as the western world is concerned, although in China and Japan there have been cases wherein greater loss of life has occurred in the burning of wooden theaters or temples. In the past century there are recorded 1,115 theater fires, distributed as follows:

EUROPE.

Great Britain	139
Germany	161
France	98
Russia	66
Italy	47
Austria-Hungary	36
Spain and Portugal	53
Netherlands	25
Other European countries	41
	684

AMERICA.

United States	462
Canada	21
South America	30
Other countries	18
	531

In America such fires have been more frequent than in Europe, because of the fact that many of them were of wood, and built hurriedly in new towns. But in New York in the past century there were 41 theater fires in twenty seven different establishments. Of all the theater fires in which the actual time of occurrence is recorded 13.5 per cent. occurred during the presence of the audience, and another 20 per cent. just before or just after performance. The origin of fire has in 56 per cent. of the cases been on or about the stage. Here we subjoin the records of some notable theater fires:

May, 1872—Tientsin, China, theater burnt during performance, 600 persons killed, many women.

Dec. 5, 1876—Brooklyn, Mrs. Conway's theater burnt at 11 p.m., during performance, [illegible] persons killed and many severely injured.

March 23, 1881—Nice, Italy, Municipal Theater burnt at commencement of performance, 150 to 200 killed, and many injured.

Dec. 8, 1881—Vienna, Ring Theater, burnt just before performance, lights went out and audience could not find exits. In the panic the people were killed and many injured.

April 16, 1882—Schwerin, Court Theater, burnt during performance. Grand Duke was in his box, and ordered people to move out quietly, which they did under his direction. No panic and nobody injured, although theater was totally destroyed.

June 1, 1882—Montevideo, during performance, theater, small fire on stage and panic ensued, 21 persons killed and 168 injured.

Dec. 24, 1882—Taberingow, Russia, theater burnt during performance, several killed and over 100 injured.

Jan. 12, 1883—Berditshew, Russia, fire under stage during performance, panic ensued, 235 persons killed, mostly women and children, and 32 others subsequently died.

Aug. 26, 1883—Kotamotomura, Japan, fire panic during performance, 75 killed, 100 injured.

April 17, 1885—Richmond, Circus Klasburg, fire panic during performance, nearly 100 killed, many injured.

Sept. 5, 1887—Exeter, Eng., new Theater Royal, fire in upper part of stage during performance, panic ensued, 186 persons killed, many injured.

Dec. 17, 1895—Baltimore, Front Street Theater, panic caused by glare of gas in auditorium during performance, damage to property slight, but 23 killed and 46 injured.

Sept. 30, 1896—Aberdeen, Scotland, theater burnt at 7.30 p.m., house partly filled, 5 killed and 30 injured in panic.

May 4, 1897—Paris, Charity Bazaar burnt, in panic 134 killed and many injured.

A RECORD BREAKER

C.P.R. Has Sold 20,000 More Acres of Land Than Last Year

Montreal, Jan. 6.—Mr. Wm. Toole, district land agent of the Canadian Pacific Railway in Alberta, was interviewed in Winnipeg recently on the facts contained in his annual report. He said,

"We have sold 20,000 acres more land than last year, when our land sales totalled about 656,000 acres, despite the fact that prices this year ranged considerably higher. Crops were good and up to the average, and the tide of settlers still flock westward," he said.

"I think the most remarkable feature about this year is the large increase in the land sales to actual settlers. The total sales give no indication of this important feature. There has been a particularly large influx from the Old Country, and of the best class of settlers from Washington, Oregon and the Pacific Coast States.

"These are the choicest class of settlers, men who have experienced, who have sold their farms down South for anything from $35 to $80 an acre, and after looking over Canadian lands, have bought in Alberta at from $4 to $6 an acre. They bring their whole outfit with them, buy a good deal more land than ever they have farmed in the States, and all the members of the family, young as well as old, settle down together to make a new home.

"It is the chance of settling the younger members of their families on good farms adjoining them that induces many of the United States farmers to come to Alberta.

"Our towns are growing rapidly. Calgary has a population of about 8,000, and many Winnipeg wholesalers are starting branches there. Yes, the West is growing fast, and next year will, I believe, beat the record."

BRITISH POLITICAL VIEW PESSIMISTIC

Outlook in the Far East is One of the Unsettling Factors

CRITICISM OF THE CABINET

Sympathy in Great Britain is With Japan as Against Russia—Chamberlain's Position

London, January 6. — It cannot truthfully be said that Englishmen are watching the turn of the year with any general satisfaction. At home politics are in chaos. No man can count even three months ahead. Abroad there are Somaliland, Nigeria, Tibet, and above all, Korea and Manchuria. To many cautious observers, war in the far east now seems almost inevitable, and once they have been started no man knows where the flames will end.

Consols, the premier security of the world, the mainstay of all institutions which aim at safety and permanence have already fallen below the most pessimistic prophecies of a few years back. War in the Far East, with its grave risk of British entanglement, would carry them down further still, with possible consequences here in England, which are not pleasant to contemplate, for the root of England's disquietude lies in her want of faith in the men at the helm.

The attitude of the Ministers in every crisis has been inconstant and irresolute.

Lord Lansdowne, upon whose word as Foreign Secretary, depends Great Britain's peace or war, was the admitted Ministerial cause of the failure of the South African conflict, and there is no Duke of Devonshire, Sir Michael Hicks-Beach or Lord Goschen now in the Cabinet to act as a steadying factor. In sympathy Great Britain is heartily with Japan, and if the early fortunes of war should go against Japan British public opinion might easily sweep a weak ministry into a conflict, for Japan's victory in diplomacy or war means Great Britain's gain and the gain of the open door for every nation's commerce. Her defeat means one more future market closed to British goods.

For that very reason Russia's victory, war or no war, would most certainly bring many adherents to Chamberlainism. As it is, even the radical papers are little disposed to deny that 1903 has been Mr. Chamberlain's year. He has only one rival in that respect, and that rival is the King. As the Westminster Gazette truthfully says:

"The King has done great things in inducing inter-nationa amity. His tact and good feeling have done what was quite beyond the power of the present Ministers acting alone. If peace is maintained in the Far East, it will be chiefly thanks to France, and that France is peacefully disposed, the world has to thank King Edward's friendly initiative."

While eagerly awaiting Herbert Spencer's autobiography, his admirers are being treated to casual reminiscences. One friend remembers Mr. Spencer rejoicing that he never was married, because so many of his married friends came at length only to tolerate their wives. He reduced all questions to this sort of calculation.

Another friend relates that when Mrs. Spencer was stopping in her English home, which was the manse, he surprised her by requesting permission to join in the household morning prayers. He sat out the Bible reading patiently enough, but when the little congregation turned to kneel, he rose, placed himself on the hearth rug, and tucking up his coattails, stood warming himself at the fire, curiously surveying the worshippers till the close of the service.

Bargains in Pianos

There are some first class bargains to be had in some new and second hand pianos and organs, at W. G. Landrum's, 199 Charlotte street, agent for Heintzman & Co., Toronto. Call and see for yourself.

JAPAN DETERMINED TO AVOID ARMED CONFLICT BUT HUGE WAR PREPARATIONS STILL CONTINUE

Lack of Docks in East to Repair Fleet Has Weighed Heavily with Russia

London, Jan. 6— The Times' correspondent at Paris says the situation for the moment in the Far East corresponds with the optimism of diplomacy rather than the pessimism of the press. The grouping of the powers and the present aspect of international relations is not conducive to the desire of either power for armed conflict. Some of the considerations that led Britain to contract an alliance with Japan, and France to do the same with Russia, no longer exist, or exist to a much less degree. What has taken place meanwhile, and, foremost of all, the Anglo-French and the French-Italian ententes, would alone suffice to impose upon England and France modifications of their general policy, and make them disposed to strain every nerve to avert war involving the remote possibility of their being dragged into it. Indeed, all that has been done in this direction, both by France and England, probably never will be known.

RUSSIA AFRAID.

London, Jan. 6— The Berlin correspondent of the Times says that, according to the views in various well informed quarters, the situation in the Far East warrants the hope that peace will be preserved.

According to a telegram from Shanghai, a Tokio journal learns that Admiral Alexieff in a recent address to his officers declared that Russia would not mind fighting Japan if she had three docks at Port Arthur, and three at Dalny. At present Japan possessed by far the most adequate accommodation for the repair of vessels in the event of an unfavorable engagement than Russia could command. This deficiency the admiral regarded as weighty ground for avoiding war.

CZAR GROWS MORE RELIGIOUS

Death of Princess Elizabeth Has Great Effect on Ruler

St. Petersburg, Jan. 6.—Since the sudden and pathetic death in his arms of little Princess Elizabeth of Hesse-Darmstadt the Czar has been more than ever devoted to his religious duties. He always has been religious, but now he spends hours at his private devotions and in writing prayers in Russ and Slavonic for the imperial family.

A strange rumor is current in both Moscow and St. Petersburg that if the child expected next June be a son the Czar will abdicate in favor of his brother, who will become regent until the Czar's son comes of age.

FLEEING GERMAN YOKE

Great Throngs Leaving the Fatherland for United States

Berlin, Jan. 6.—During the year just closed 47,000 emigrants left Germany for the United States. In 1900 the number was 30,000. Since 1901 it has steadily risen. Only German subjects are included in that total, the Russians and Austrians being left out of the account. The emigration agents expects that during 1904 the steam of emigration will exceed that of all former years from Germany. It is estimated that more than 60,000 will emigrate. In Galicia and Moravia the number appearing for passes to leave the country is extraordinary. Among the Slovaks of the western Carpathians entire districts are becoming depopulated. A similar story comes from Lithuania.

The German government is building still more extensive barracks for the thousands who pour through Berlin to Hamburg and Bremen, while the great Atlantic companies are doing the same thing at the ports. The North German Lloyds and the Hamburg-American lines expect to ship nearly 250,000 emigrants during March, April and May.

BLAMES UNION FOR FIRE

Chicago Holocaust Said to be Due to Labor Unions

Chicago, Jan. 6.—William A. Brady, owner and manager of "The Pit," last night indirectly attributed the Iroquois theater disaster to the labor unions. "If the man who had charge of the spotlight had known his business there would have been no disaster," said Mr. Brady, "an dit is the system of substituting that makes it possible to have a man in charge of the calcium lights who does not know his business. The manager of a theater is not to blame, for the very simple reason that he has no voice in selecting the substitutes. They are furnished by the unions. I have seen many accidents, some of which might have been as serious as that of yesterday. They were caused by lights who does not know his business. They were furnished by labor unions who represented a man to be an electrician or an electrical worker when he did not know a calcium light from a beefsteak.

"As I say, the manager is helpless. I have trained men in my productions to manipulate the lights. I have paid them to attend the rehearsals and familiarize themselves with the work. Perhaps they reported for one or two nights. Then a man whom I had never seen before would come on. He had been substituted without my knowledge or consent by the union."

—This is the week of prayer. Why shouldn't the meeting be crowded? We have all much to be thankful for and lots to be sorry for, most of the latter our own fault.

BIRTH

GRAHAM—At Peterborough, on Sunday 3rd inst., Mrs. Ed. Graham, of a daughter.

EVERYBODY READS THE TIMES.

Tokio, January 6 —War preparations continue, but the Government seems determined to avoid the initiation of any conflict. The note sent the powers was intended to show that the responsibility rested upon Russia should the negotiations fail. The Government is proceeding cautiously, and unless Russia gives undue provocation peace may continue for some time. The preparations are, however, sufficient to convince the populace of Japan's determination to fight if necessary. The popular clamor has somewhat subsided, although many support the proposition to seize and declare a protectorate over Corea.

RUSSIAN TORPEDO BOATS.

Malta, Jan. 6—Five Russian torpedo-boat destroyers have sailed from here yesterday in an easterly direction.

GERMANY AS MEDIATOR.

Rome, Jan. 6—There is a persistent rumor that Germany will interpose between Japan and Russia and proffer her good offices as mediator.

DELCASSE IS CONFIDENT.

Nice, Jan. 6.—In a private conversation here M. Delcasse, the French Minister of Foreign Affairs, said he was fully satisfied that the difficulties in the Far East would be settled without any disturbance.

Russia Climbs off High Horse--Rays Of Peace

St. Petersburg, Jan. 6—In her reply to Japan Russia has made great concessions and hopes her proposals will prove acceptable to Japan.

DECIDED ON SUNDAY

Cologne, Germany, Jan. 6— According to advices received by the Cologne Gazette from St. Petersburg, the terms of the Russian reply to Japan were decided upon at a council on Sunday, presided over by the Czar, and attended by the Grand Dukes Vladimir and Alexis, and Foreign, War and Marine Ministers, and M. Witte, President of the Council of Ministers. This correspondent, like others, understands that the reply renders a peaceful issue possible.

CHURCH ANNIVERSARY

Springville Presbyterian Church Held Services

The first anniversary of the Presbyterian church at Springville, since it became a self-sustaining congregation was celebrated on Sunday and Monday. Sunday special sermons were preached by Rev. Mr. Whitelaw, of Omemee. The services were largely attended, and the offerings, which were to be applied to the manse fund, amounted to $216.

On Monday evening a tea was held in the Orange Hall, followed by an entertainment in the church. The chair was ably filled by Rev. Mr. Yule, the popular pastor of the church, and addresses were delivered by Rev. Mr. Whitelaw, of Omemee, Rev. Mr. McIntosh, of Centreville; Rev. J. N. Drew, of Fraserville, and Rev. J. A. Wilson of St Paul's church, Peterborough. A very interesting musical entertainment was provided, contributed to by Mr. J. Crane, Prof. Davies, Miss Davies and Mr. J. Laurence. Miss White, a talented elocutionist of Peterborough, also gave a number of readings. There were quite a number present from town.

General Sports

OPENING DAY OF THE PETERBOROUGH RACES

The T.A.S. team will play the Keene hockey seven on Friday night.

The Juniors will play their first O.H.A. game of the season on the Brock street rink to-night with the Cobourg hockeyists.

The following team will represent the seniors in their opening game of the O.H.A. intermediate series at Picton—Mercer, Howell, Cavanagh, H. Armstrong, R. Armstrong, Morgan, Whitcroft.

THE RACES.

The winter races of the Turf Club open today at the Driving Park, and everything indicates that they will be a huge success. Today's programme consists of the 2.40 class, for which there are ten entries and the 2.22 class, for which six horses are entered.

The track is in excellent shape for fast time being made, and the management have made great efforts to make everything as comfortable as possible for the spectators.

BELLEVILLE WON EASILY

Belleville, Jan. 6 —Belleville's intermediate team had its last workout to night before the opening of the O.H.A. schedule, when, in an exhibition game, the boys trimmed the Kingston Frontenacs 9 to 2 in a hard-checking game, marked by quite a few brilliant features.

"Dick" Mills, Kingston's goal keeper, got hid on the head by the puck and badly cut. The local team showed up in good shape, and the difference in the score nearly indicates the strength of the teams. "Ernie" Ford was referee.

WHAT QUEEN'S WILL DO

Kingston, Jan. 6.— Queen's is particular about keeping free from professionalism, and if the O. H. A. puts the Varsity team under the ban, as it must if it is to be consistent with its action against the R.M.C. seven some years ago, when the latter went to Pittsburg, Pa., there will be no fear of Queen's playing against those so outlawed. In such a case, Varsity would have to put another seven on the ice or appeal to the Inter-Collegiate Hockey Union for recognition as amateurs, if the latter took them in as pure, then open war would result between the two unions.

THE STANLEY CUP.

	Ottawa.	Winnipeg.
First game	9	1
Second game	2	6
Third game	2	0

Ottawa, Jan. 6—By a score of 2 to 0 the Ottawa hockey team defeated the Winnipeg Rowing Club team this evening at Aberdeen Pavilion, before 3,000 spectators, in a match, considered by many to be about the swiftest seen on local ice for years. There was no score in the first half. It was a spectacular struggle, and the audience that braved the 25 degrees below zero weather, was standing cheering frantically and endeavoring to urge their respective favorites on to victory.

The forward line of the locals was greatly strengthened by "Billy" Gilmour of last year's champions. He replaced Alf Smith and proved to be a star of the first water. He was not in the best of condition, but clearly demonstrated his right to a permanent position.

BARRIE IS A SENIOR CLUB.

The O.H.A. sub-committee yesterday considered the application of the Barrie club for admission to the senior series in Group No. 3 with the St. Georges and Marlboros of Toronto.

Action was deferred to obtain the views of the Collingwood club, which was grouped with Barrie in the intermediate series, and of the local senior clubs.

Subsequently it was learned that Collingwood would be willing to take a bye in section A of Group 7 intermediate, if Barrie would consent to give them home and home exhibition games. There is little doubt but Barrie will consent to this proposition, as it will give them much-needed practice games.

GREAT GAME AT LINDSAY.

Lindsay, Ont., Jan 6 —Lindsay won from Stouffville last night in the most stubborn fight ever put up on Lindsay ice. It was goal and goal all the way and ended at full time five all. It took 20 minutes extra play to finish, which came Lindsay's way. Stouffville were much the heavier team. The cold was intense, the gloves freezing to the players' hands. There was a good crowd, and a great many ladies in attendance. Uxbridge will play at Lindsay next.

HORRORS FOR 1094

French Astrologers Predict Many Disasters

DISASTER TO OLD BRITAIN

Crimes of Passion and Dire Happenings Everywhere

Paris, Jan. 6.—The papers here are commenting gravely on the unanimity of the astrologers, magicians, clairvoyants and trance mediums in predicting a year of horrors for 1904. A leading astrologer named Jacob sizes up the situation as follows, and the others agree more or less as to detail;

"Here is the horoscope for 1904, made at the moment the sun entered the sign of Capricorn. It indicates a year of great immortality in London. The Viceroy of India abdicates. The United States have grave quarrels with Russia and Germany. Roosevelt falls sick and a conspiracy is hatched against against him. Serious financial disasters in America.

"The Emperor of Japan has a grave accident.

"An attempt on the life of the Emperor of China.

"Volcanic shocks in Constantinople, Chili and Philippines.

"A fear of unhealthy literature and unlimited materialism.

"The French Cabinet falls between April 7 and 19.

"A panic in a music hall, grave accidents and popular disturbances in Russia. An attempt to poison the Czar. Serious dissensions betwen Russia and Austria.

"England loses prestige, the campaign in Thibet falls through

"Tremendous failures in Calcutta and the Transvaal.

"Anarchist troubles in Spain, the Government threatened.

"In China women massacre.

"Everywhere crimes of passion, mysterious deaths and strange phenomena.

"Nineteen hundred and four is an anagram of 1409, the date of the birth of Joan of Arc. This year a wonderful child will be born with a high destiny. Showing its power in 1924, an anagram of 1429, the date of the apogee of Joan of Arc."

Post-Nuptial—He (whose wife has been reading some of his old love letters to her)—What is the use of keeping all those old things?

She—Lest we forget—lest we forget.
—Brooklyn Life.

It is said that charcoal is a very valuable hygienic agent for pigs. It is a corrective, and acts as a preventive against various diseases arising from disordered digestive organs. If some charcoal, or even ashes, are put in the pigsty the pigs will soon show they like it.

Made Great Concessions and Hopes Proposals will be Accepted

Paris, Jan. 6— An official despatch sent from Tokio late last evening says the Minister for Foreign Affairs had not received the Russian reply up to that time. The officials here conclude from this that Viceroy Alexieff is awaiting an opportune moment to present it.

The most significant feature of the despatch from Tokio is the statement that Japan is hastening final preparations for a far more extensive despatch of troops to Corea than at first contemplated. The Government has now decided to send an army of 15,000 men organized as two divisions to Corea. This is more than double the strength of the expedition first contemplated, and requires a large fleet of transports, and extensive arrangements, which are proceeding rapidly towards completion. The destination of this army is expected to be Southern Corea.

Rumors are in circulation at Marseilles that a French naval division is about to receive orders to sail for the Far East.

PLUMBERS ON THE JUMP

Many Frozen Pipes and Many Burst Cisterns in Hurry for Relief

The cold snap of the past few days produced an epidemic of frozen water and gas services and the plumbers are as busy as bees. Every man available is out on the warpath with his thawing apparatus, and the telephones in the plumbers shops are busy. Every unfortunate householder wants his pipes thawed out early in the morning, and when the plumber is not on the spot in a brace of shakes, he rushes to the 'phone and says warm things to those at the shops. Many of the pipes burst under the strain and flooded things generally. Those in this predicament were relieved first.

So far the street mains have not suffered from the frost, doubtless due to the mantle of snow that covers the ground.

Notes Sent to Teacher.

These notes are declared by the Chicago "Inter-Ocean" to be authentic:

Teacher—What shall I do mit Charley? Me and my man can't nothing make of him. When we want to lick der little imp he gets the bed under where we can't reach for him and must put a book on her bedroom door to hold him for his licking. Please soak him in school about as often as you got time.

Teacher—If Louis is bad please lick him until his eyes are blue. He is very stubborn. He has a good deal of the mule in him. He takes after his father.

Teacher—I dink you are a fool. You want my boy to read when he don't no alferbits. Please teach him some.

Miss Brown—You must stop teach my Lizzie fecal torture she needs yet reading and figors mit sums more as that, if I want her to do jumpin I can make her jump.

Miss—My boy tells me when I trink beer der overcoat from my stomach gets too thick. Please be so kind and intervene in my family affairs.

Dear teacher—Please excuse Fritz for staying home he had der measles to oblige his father.

Teacher—Please excuse Rachel for being away those two days her grandmother died to obliged her mother.

Teacher—You must excuse my girl for not coming to school she was sick and lade in a common dose state for three days.

The Climax of Savagery.

Never have the natives of a State been treated with more hideous cruelty than those of the Congo Free State. It is under the personal rule of King Leopold, whose idea is that it should furnish him with money for his private purse, and money he is determined to make out of it, no matter how. Amongst other devices, vast areas are farmed out to companies, in which, unless greatly maligned, he is a large shareholder. These companies collect india-rubber. The system is to force the natives to deliver a certain fixed amount. If a village does not do this, the hands of the men are cut off; the village is burnt, and the women and children given over to the tender mercies of some neighboring tribe of savages. This procedure is defended by the worthy monarch, in his reply to the English note protesting against such a regime, by the following economic doctrine:

"Natives cannot be exempted from all taxation when they benefit by the material and moral advantages introduced into their country. If they have no money, they must pay in manual labor."
London "Truth."

A Polite Prisoner.

The lady who was visiting the jail had been much impressed with the appearance and behavior of the prisoners, and she took occasion to express her approval to the warden.

"They seem as courteous as anybody," she said, enthusiastically, "even if they don't say anything."

"Yes, they're polite enough," assented the jailer. "But I'm a little suspicious of too fine manners."

"I don't see how you can be!" exclaimed the lady.

"Well, I am," declared the warden, "and I have been ever since one of the smoothest of them broke out of jail and left a note for me in which he wrote, 'I hope you will pardon me for the liberty of taking.'"

Had the Best Chance.

"I am in the hands of my friends," said the first candidate with much dignity. "I leave my future to them."

The second candidate smiled sardonically.

"And I," he asserted, "am in the pockets of my friends. They have to look after my future, or they won't catch even."

This, my child, demonstrates the difference between standing for office and running for the same.—Judge.

Change of Life

A TIME OF INTEREST AND GREAT IMPORTANCE TO ALL WOMEN.

Wrecked health is produced by neglect during this trying period, and small wonder that women look forward with dread to its coming, for if not properly guarded, is but the beginning of an endless chain of troubles.

As soon as the unmistakable signs known to all women make their first appearance, Ferrozone should be used regularly, and if persistently taken will be a guarantee of happy, healthy old age.

Nothing can bring more pleasure than to know that the days of sickness and suffering are over. This can best be accomplished by building up the system with Ferrozone, which produces blood, muscle, tissue, and strength to resist and ward off disease.

Ferrozone increases the appetite strengthens and improves nerve tone and digestive processes, thereby strengthening and invigorating the whole system. It gives tone to the heart, regulates its action, removes distressing palpitations, and it lays the solid foundation of perfect health.

Ferrozone is a sensible and efficient tonic; it brings back strength very quickly, and few people are so strong and healthy, that they would not be benefited by using it.

Be advised and try Ferrozone. It is very pleasant to take, one tablet after each meal. All reliable druggists sell it for 50c. per box, or three boxes for $1.25. By mail from N. C. Polson & Co., Kingston, Ont.

Morning Times

paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

trangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 10c per month, and to outside points at $3 per year strictly in advance

PETERBOROUGH, JANUARY 6, 1904

THE COMING WAR

Every day that passes without some definite reply by Russia to the Japanese note brings the two nations nearer the clash of war. Russia, with its usual suave diplomacy, takes the ground that it does not want war, that its neglect to reply to Japan is in order, if possible, to avoid a breach, and it endeavors to place the onus of belligerent action on the Jap. This is a good example of the treacherous hypocrisy of "the Bear that walks like a man." Having seized Manchuria and violated every pledge of honor in refusing to evacuate the province, it settles itself down and expresses innocent surprise, even amounting to profound regret, that Japan's deplorable thirst for blood should lead that small nation to meditate an attack upon the hosts of the Great White Czar, who is known personally to be so peacefully disposed.

The general situation is that Russia proposes to exploit decadent China, and its first move has been to block out Japan from any chance to expand in that direction by seizing Manchuria. Britain and the United States are equally interested in open ports and Chinese trade, but the seizure of Manchuria is not an act of aggression sufficient to cause them to go to war with Russia, though they recognize in it the commencement of an aggressive policy which, further pursued, may require a forceful notification to "stop." Not so with their little ally, Japan. The retention of Manchuria by Russia is a matter almost of life and death nationally. Japan is overcrowded with an active, enterprising, courageous people who require a zone of expansion. Russia holds Siberia on the north, Britain has India to the south; China, opposite to Japan, is the only part of eastern Asia available for expansion. China is decadent, and at no distant date will be partitioned. Corea and Manchuria, geographically, would be the natural share of Japan in such an event as they are adjacent to her coasts. Russia has seized Manchuria and is pushing her diplomatic agents into Corea to prepare the way for the seizure of that peninsula. Britain and the United States may be able to wait the further development of Russian aggression in China. Japan cannot afford to do so. Her national development demands that Russia be checked now before she entirely interposes her bulk between Japan and the territory the little nation has marked for her own.

While Japan is entering the fight alone because her interests are so pressing that she cannot afford to put off the evil day, the interests of Britain and the United States are such that while they will not actively participate at the outset, it is difficult to see how they can stand by and see their ally get the worst of it. If Japan should be successful there would be no danger of more extensive complications. But if she is not successful, her two big allies will have the delicate task of interfering to prevent Russia following up any advantage too far. In such an event Russia's allies might have something to say, but the possibility is rather obscure. The more real danger would be that the victorious Russians would subsequently become so insolent and aggressive in his far eastern policy that a body-check from a first-class power or powers might be rendered imperative in order to bring him to a reasonable state of mind.

DISTRESSFUL FINLAND

Poor Finland is getting to be about as distressful a country as Ireland was when it was distressful. The latest is that the Russian Governor-General of Finland has just extended the inquisitorial system of administration to public libraries and reading rooms, which are at present being submitted throughout the Grand Duchy to minute inspection by special officials with the object of searching for books, pamphlets and any other publications that might be calculated to foster and spread notions and ideas contrary to the policy of the coercive Russification of Finland. This inspection has caused the confiscation of numerous books and publications of this kind, and proprietors of these libraries and reading rooms have been notified that they will render themselves liable to have their establishments closed by the authorities if they continue to keep works that have been placed on the index by the Russian governmental administration.

When Russia assimilates she assimilates, and she isn't very benevolent about it. Not much like the United States, which does most benevolently assimilate.

LO! THE POOR INDIAN

The Indians are getting thoroughly civilized. 'General Pleasant Porter, the last chief of the Creek Indian nation, is a sufferer from the highly civilized disease known as gout. "If I had stuck to the life of my youth," he says, "I should not be a sufferer from any such trouble. I used to live out of doors, sleep on the ground and eat plain food Then I was healthy. Oh, but this gout hurts. It just compels you to swear. A religious friend told me I ought to pray for relief. Maybe so, but it's easier to swear, and seems to be most natural." Chief Porter, who is over seventy years old, has been the leader of his nation for over half a century.

A Club for Women.

A scheme is on foot to establish in London an international club for literary and scientific women, under the name of the Lyceum Club, and the idea is meeting with warm support. A provisional committee, which is in process of formation, already includes the names of Lady Frances Balfour, Mrs. Moberly Bell, Mrs. Oscar Beringer, Mrs. Craigie, Mrs. Walter Crane, Mrs. Katharine Tynan-Hinkson, Mrs. C. E. Humphry ("Madge" of Truth), Mrs. Thomas Hardy, Mme. Longard de Longarde (Dorothea Gerard), Mrs. Katharine Macquoid, Mrs. Mary E. Mann, Mrs. Alice Meynell, Mrs. Molesworth, Mrs. Hubert Bland (E. Nesbit), Mrs. Reeves (Helen Mathers), Mrs. Clement Shorter (Dora Sigerson), Mrs. Flora Annie Steel, the Hon. Mme. Alethea Wiel, Mrs. L. B. Walford, Mrs. Humphry Ward, Miss L. Alma Tadema, Miss Jane Barlow, Miss Rhoda Broughton, Miss Jeannette Gilder, Miss Beatrice Harraden, Miss Ella Hepworth-Dixon, Miss Netta Syrett, Miss Alice Stronach, Miss Sarah Tytler, Miss McTaggart, Dr. Sophia Jex-Blake, and others. A representative provisional committee is being organized in every country on the continent, in the colonies and in America.

It is proposed that the Lyceum, besides offering the usual conveniences of a residential club, should maintain an information bureau for the use of authors, journalists and students. Members visiting countries other than their own for any length of time would receive introductions to members of the club residing in that country, and foreign members visiting the club in London would have introductions to English members, so that their stay might be made as pleasant as possible. Membership will be restricted to:—(a) Women who have published any original literary or black and white work, and wives of men distinguished in literature and journalism; and (b) women with university qualifications. This, it will be seen, embraces all writing women, black and white artists, doctors and women with university degrees. The capital necessary for the formation of the club has been guaranteed, and it is hoped to secure a club house in the neighborhood of the Strand.

The Deaf Heard.

Ex-Governor Hogg of Texas has the reputation of liking to play a practical joke every time he gets a chance. The last time he was in New York City, says The New York Times, the joke he tried to perpetrate was *turned* back on him in fine style.

It happened that he wanted a shoeshine. The bootblack, a small-sized Italian, began to chatter at him after he had taken his seat in the high chair. Not being in a conversational frame of mind the portly Governor thought it would be a good plan to feign that he was deaf and dumb. So he responded by signs to everything the bootblack said.

This proceeding naturally caused the desired silence on the part of the Italian and the Governor was wrapped in his own thoughts, when suddenly a little newsboy ran up and asked him if he wanted a paper. Before he could reply the bootblack turned to the boy and said:—

"You nota talka to him. He deaf."

The newsboy looked him over, says the Governor, and then remarked in a loud voice:—

"Well, say, he's a fat old hog, ain't he?"

The Governor, who weighs 300 pounds or more, relishes telling the story, but he adds feelingly that he kept up his bluff after hearing the brutal comment of the newsboy.

A private of an infantry battalion stationed at Mhow, India, was recently sentenced to 168 hours' hard labor for calling his lance-corporal a "Bredrick."

The private, after being sentenced, asked whether he was being punished for insulting the Secretary of State for War or the lance-corporal.

The court remained silent.

It does not matter whether you preach in Westminster Abbey or teach a ragged class you are faithful. The faithfulness is all.—George McDonald.

Write on your doors the saying wise
 and bold,
"Be bold! be bold!" and everywhere
 "Be bold!
Be not too bold." Yet better the excess
Than the defect; better the more than
 less;
Better like Hector on the field to
 die,
Than like perfumed Paris turn and
 fly.

—Longfellow

ABIJAH WILFRED GOGGINS

Abijah Wilfred Goggins has (to simply
 state the truth,)
A record which is spotless as a walrus'
 snowy tooth;
He's never been to sociables, to parties, nor to balls;
He's never been to theatres, nor dizzy
 concert halls;
He's never nursed his vanity before a
 looking-glass;
He's never ogled charming girls, nor
 stood to see them pass;
He's never read Boccaccio's tales, nor
 such forbidden fruit;
He's never read the evidence in a
 breach of promise suit;
He's never used tobacco, nor by opium
 been beguiled;
He's never drank a glass of beer, nor
 ardent spirits wild;
He's never seen a horse race, nor a
 prize fight's brutal strife;
He's never bet a dollar on a contest in
 his life;
He's never yearned for riches, nor begrudged with envious eye;
He's never stol'n a penny, and he's
 never told a lie;
He's never spoke an angry word, nor
 evil utterance swore;
He's never done a single thing his conscience might deplore;
In short, his moral record (to reiterate
 the truth,)
Is beautiful and spotless as a walrus'
 snowy tooth;
And I who promulgate the fact impart
 the same with joy,
For Abijah Wilfred Goggins is my
 darling baby boy!—Harlem Life

A Strange Thing.

There was one word the little girl heard many times a day and could not imagine what it was. The word was Mussentouchit. Baby wondered who Mussentouchit could be. The strange thing lived in the bureau drawers; it lived in the sewing machine; it lived in the tall jar that stood on the little round table; it certainly lived in the glass globe where the gold fishes swam.

This went on till baby was two years old. Mussentouchit was everywhere—in the shining books on the parlor table; in the flower beds; among the roses; even in mamma's work-basket the strange thing lived; and if baby took up a reel of silk or cotton, there was Mussentouchit.

One day baby found herself by the glass globe all alone. The family were very busy, and for a few minutes forgot the little, prying, restless darling.

This was her chance. Up went the chubby legs into the chair that stood near the gold-fish globe. Poised on the rounding cushion, baby reached far over to touch the gold-fish. In reaching she lost her balance and fell, dragging the globe to the floor. There was a crash, a scream, a rush, and mamma was on the spot. Baby was picked up, kissed and scolded.

"I dess I tilled old Mussentouchit 'is time!" she said, shaking herself and walking off.

How to Save Money.

Our one thing we must resolutely resolve that we will not spend money in trifles. "Trifles make up the sum of human life;" they certainly add very considerably to the sum of household expenses. Yet the peculiarity about them is that the people who most indulge in them are the most unconscious of the fact. "Avoid spending money in trifles, of course," says the embarrassed householder, "that is what every one says; yet why repeat the advice to me? I never buy trifles; I have something else to do with my money." Yet more likely than not the very next time this individual goes to market a small purchase will be made which benefits no one, and which runs away with one of those pennies that must be put together before the pounds can be saved. It is a characteristic of unthrifty people that they readily yield to the temptation to buy trifles. The unthrifty, the unmethodical and the weak let money dribble between their fingers; the capable, managing, economical persons do not part with money unless they get money's worth in exchange.

A Snake in a Base Ball Game.

Two Pond Eddy (N. Y.) clubs were playing a game of baseball recently, when a batter struck a ball over into left field, and the fielder ran to get it. The ball rolled along through the grass, and when the player who was after it got to where he had seen it stop, he was almost paralyzed to see lying there, instead of the ball, a big rattlesnake, coiled to strike. The player jumped back in time to escape the fangs of the snake, for it struck savagely at him. The player smashed the snake's head with a stone. The ball lay in the snake's coils. It is supposed that the snake was lying asleep in the grass, when the ball rolled along and ran against him. The reptile had instantly coiled around the object and prepared for suspected danger.

A Cold Wave.

A cold wave, as defined by Prof. T. Russell, is a fall of temperature in twenty-four hours of 20 degrees over an area of 50,000 square miles, the temperature in some parts of this area descending to 36 degrees. Between 1880 and 1890 no less than 691 cold waves were recorded in the United United States.

But a Momentary Triumph.

Revenge is a momentary triumph, of which the satisfaction dies at once, and is succeeded by remorse; whereas forgiveness, which is the noblest of all revenges, entails a perpetual pleasure. It was well said by a Roman emperor that he wished to put an end to all his enemies by converting them into friends.

Constructing Sentences.

Here is a sentence of thirty-one words which some ingenious person has constructed of the six letters found in the word "maiden:" "Ida, a maiden, a mean man named Ned Dean and Media, a mad dame, made me mend a file and dime and mind a mine in a Dan den in Maine."

To Protect Animals.

There is one society of boys and girls in England to protect animals, which has over 50,000 members.

"He married a widow, young, beautiful, wealthy, and without a relative on earth."

"Jove! Luck like that is better than a license to steal!"

Anecdotal.

Sophocles' tragedy of "Antigone" was produced at the Theater Royal, Dublin, once with Mendelssohn's music, and the "gods" were greatly pleased, and, according to their custom, demanded a sight of the author. "Bring out Sophecles!" they yelled. The manager explained that Sophocles had been dead two thousand years and more and could not well come. Thereat a voice shouted from the gallery, "Then chuck us out his mummy!"

A hair dresser was summoned to a private house the other day to shave a French poodle. Miss Mary, hearing a sound of a voice in the room in which the operation was being performed, put her wicked little ear to the keyhole, and this is what she heard: "Nice day, sir," (pause). "Razor suit you, sir?" (pause). "Good deal of rain, sir, lately," (pause). "A little powder, sir?" (pause). "Hair's very thin, sir, on the top. Wants a little brilliantine. Shampoo, sir? Next!"

The recent sale of the "nobleman's" gown worn by King Edward when at Cambridge has revived a stock of reminiscences of his Majesty's undergraduate days, several of which will be new to the present generation. "Many a time have I seen the Prince," says an old townsman, "walking down Trinity street with his gown thrown over his arm, his hat tilted slightly on one side of his head, and smoking a big cigar—in defiance of the regulations, of course. But what would you? He was the Prince of Wales, and, as such, secure from the interference of the proctors."

In the early days of missionaries in Maoriland, one of the first of the chiefs to become converted was old Te Roti. Now Te Roti, in addition to his proper wife, had a slave wife that he had captured from some other tribe. The missionary told the chief that he would have to put away the latter, as he could not be a true Christian and keep two. The missionary was away at some other station for a few weeks, and when he returned Te Roti met him, and smilingly told him that the little difficulty about the two wives had been fixed up. "What have you done with Rata?" said the missionary, referring to the slave wife. "Oh," said the chief, "I eat her last week!"

A foreign nobleman who, if report speaks true, is somewhat henpecked, invited some men a night or two ago to play bridge in his hotel. The meeting was a convivial one, and all went "merry as a marriage bell." It grew late, and fears were expressed by the party that they were trespassing upon the kindness of the mistress of the house, who, by the way, was not present. "Not at all, gentlemen, not at all; play as long as you please. I am Czar here," said the master of the mansion. "Yes, gentlemen; play as long as you please," said a silvery voice, and all rose immediately as the baroness stood before them; "but, as it is after 1 o'clock, the Czar is going to bed." He went.

A prominent racing man tells the following story on himself: His jockey fell ill on the eve of an important race, and left him without a rider for the horse which he had entered for the event. In looking about for a substitute he decided that his stable-boy, who was thoroughly familiar with "Spitfire's" ways, would fill the bill very acceptably. "Now you must be careful," he warned him, "to use 'Arizona' as a pacer; he is a wonder, and will lead the track; follow him closely until just before the finish—don't pass him under any circumstances until you get within a few lengths of the line; then let 'Spitfire' out for all you're worth." The capitalist paused in his recital, and turned his cigar meditatively in his fingers. "Well, did he obey your instructions?" asked one of his listeners. "Yes," answered the owner, "to the letter. He kept just behind 'Arizona' until they were almost at the finish line, and then he spurted ahead in great shape, but unfortunately there were four horses ahead of 'Arizona.'"

Concerning one of Phil May's old models, the Sydney "Bulletin" has the following: Brophy was his name, an ex-Anglican minister. Exiled from the ministry and dreadfully down on his luck, Brophy to the last managed to rig himself out in "third editions" of old-fashioned clerical clothes—a sort of ecclesiastical scarecrow in bad circumstances. Brophy applied to May for charity, and the artist, much to the old man's delight, gave him a shilling and a "retaining fee" of half a crown a week to sit as a model. This really meant that for nearly three years the old broken-down parson, who had something of the look and stoop of John Henry Newman, was one of Phil May's pensioners. Whenever he "sat," Brophy, in addition to the "half-crown regular," got his dinner and tea at May's. One day the eighty-year-old model asked May to give him some lessons in drawing. The joke-loving artist consented, on the understanding that Brophy was to leave May his skeleton when he died. A contract to this effect was written by May and solemnly signed by Brophy. Brophy, who could not be induced to draw anything save girls' faces and ladies of the ballet, continued to receive his lessons and his half-crown up to the week of May's departure from Sydney. The artist parted with his venerable model in the most comical manner. "You've played me a dirty trick," said May, "by swindling me out of that skeleton. I could have bought one, in sound order and condition, for half the money you've cost me." The old fellow, conscious of his base ingratitude to his best and most patient friend, answered, "Don't be angry with me, Mr. May. It's not my fault. I meant to keep my word. Stay in Sydney a few months longer, and give me another chance to show you that I am a man of honor."

His Quotation.

As a stockbroker was getting out of his cab, a friend, strolling by, accosted him thus:

"Say, old man, you are looking awfully off color."

"Yes," replied the other, "I really begin to think that I am getting on my last legs."

"Nonsense," said his friend, "you'll live to see a hundred yet."

"Bosh," exclaimed the broker, "do you, a man of business, really think that heaven will take me at par when it can get me at 67?"

A young lady called at a music shop and asked for something new in piano music. The clerk asked her if it made any difference how many sharps there were in the piece. "Oh, no," she replied, "not in the least, for if there are more than two I always scratch them out with my penknife!"

A pair of eyes to see the beautiful, the good and the true—God's fingerprint in flower and field and snowflake.—Boston Herald.

BLOOD DISEASED MEN

If you ever contracted any blood disease you are never safe unless the virus or poison has been eradicated from the system. Have you any of the following symptoms? Sore throat, ulcers on the tongue or in the mouth, hair falling out, aching pains, itchiness of the skin, sores or blotches on the body eyes red and smart, dyspeptic stomach, sexual weakness—indications of the secondary stage. Don't ruin your system with the old fogy treatment—mercury and potash—which only suppresses the symptoms for a time only to break out again when happy in domestic life. Don't let quacks experiment on you. Our New Method Treatment is guaranteed to cure you. Our guarantees are backed by bank bonds, that the disease will never return. Thousands of patients have been already cured by our New Method Treatment for over 20 years. No names used without written consent.

Mr. E. A. C. writes: "Your remedies have done me more good than Hot Springs and all the doctors and medicines I had previously tried. I have not felt any of those pains or seen any ulcers or blotches for over seven years and the outward symptoms of the loathsome disease have entirely disappeared. My hair has grown in fully again and I am married and happy."

$400,000 was Produced from the Properties now owned by the

NEW YORK-GRASS VALLEY GOLD MINING CO.

above the 400 foot level, under the old management. During the last year the mine has been thoroughly opened up. New and richer ore bodies discovered. Large reserves now in sight.

Large and thoroughly complete Merralls mill now working. Besides this, six quadruple discharge stamps are now being installed. Each stamp will increase the present output at least 20 tons daily. The mine is now producing steadily and increasing output daily. As soon as the new stamps, now being installed, are running, the output will reach at least 125 tons daily. At a moderate estimate the monthly income should exceed

FORTY THOUSAND DOLLARS

During the coming year it is the intention of the management to install more stamps so that the output can be brought up to FIVE HUNDRED TONS DAILY.

Quick dividends are positively assured, and will most surely be large and continuous. *The present Board of Directors is composed of competent business and mining men, who are giving their personal attention to the affairs of the Company.*

The price of Stock will be advanced to 75 Cents per Share almost immediately.

This is your last chance to purchase into this producing mine at 30 CENTS PER SHARE *for cash or instalments.* We have only a limited amount left at this figure, therefore send your orders in early.

REMEMBER IN BUYING THIS STOCK YOU ARE BUYING

INTO
- A present producing property.
- A mine that will pay large and handsome dividends, as the reserves of ore on hand warrant.
- A property that has 600 acres, only a small area of which has been mined.
- A proposition that can mine its ore cheaper than almost any other mine in the world, owing to free water power. *Cost of mining and milling not being over $1.00 per ton*

We have just received the following telegram, under date of November 24th:

KAYE, DE WOLF & CO., New York City. Grass Valley, Cal., Nov. 24th.

Mill now running on medium grade ore from reserves. Latest mill returns forty ounces amalgam from batteries since sixteenth. *The Ferrin ore chute on fifth level has been reached.* Expect the ore on this level will pay much better than any yet opened up. The bottom of the shaft is also in good ore. Recent developments fully justify the expectations that have been formed. All who visit property report a large dividend payer soon. J. W. HASLER, Secretary.

Send for prospectus and full information to KAYE, DE WOLF & CO., 39 Cortlandt St., New York, or to PETERBOROUGH BROKERAGE CO., Canadian Fiscal Agents.

Dont Miss this Opportunity to Make

An investment in the Preferred Treasury stock of a Company that is now, and has been for the past fourteen months, paying a dividend of 30 per cent. on the present price of 30 cents per share, from ore treated at custom mill. This dividend will be largely increased in the near future as the Company is about ready to start a twenty stamp mill, located near their property, which has been leased.

A FEW THOUSAND LEFT

Take advantage of the opportunity as only a few thousand shares are yet for sale, and then the stock will be withdrawn from the market without further notice.

SATISFIED STOCKHOLDERS

There has not been a share of stock transferred since the Company started, fourteen months ago, showing the stockholders are well pleased with their holdings.

TREASURY STOCK RESERVE 600,000 SHARES

being ample for all reserve purposes. Management first class.

IT WILL PAY YOU

To write or call on us for full information regarding this stock.

A BUSINESS MAN'S LETTER.

Wm. Thomson, Esq., of Orillia, Vice-President Standard Chemical Company of Toronto, Tells of a Visit to the Muskoka Free Hospital for Consumptives.

GREATLY IMPRESSED WITH WORK BEING DONE.

Personally Raises Several Hundred Dollars to Help Lessen the Load of Debt.

There can be little doubt that the National Sanitarium Association is handicapped in its great work for Consumptives in the fact that its two institutions in Muskoka are far away from any large centre of population. Few people have an opportunity to see for themselves the magnificent work that is being done.

These hospitals are away from the public eye. Any, however, who do visit them, are united in their commendation of the splendid appointments of the place, and, best of all, of the real joy and hope that is being brought to many suffering ones.

We are glad to have the opportunity of publishing the following letter from Mr. Wm. Thomson, of Orillia, one of Canada's best known lumbermen, which tells what he has seen himself. It reads:

ORILLIA, Ont., November 2, 1903.

W. J. GAGE, Esq.,
Chairman Executive Committee
National Sanitarium Association,
Toronto, Ont.

My Dear Mr. Gage,—

I have much pleasure in enclosing herewith cheque for One Hundred Dollars ($100.00) from the Tudhope Carriage Company of Orillia, a donation to the Free Hospital for Consumptives at Gravenhurst. Please acknowledge this to the Tudhope Carriage Company in the usual way.

I have written to a number of my friends, to try and get them interested in this good work. I hope to be able to send you further donations. I have written my friends a personal letter, something similar to the following:

> "Last week I paid a visit to the Free Hospital for Consumptives at Gravenhurst. I met some of the management there, and promised to try and interest some of my friends in this work.
>
> "I might say there were 49 patients there last week, all poor people, most of them without a dollar in the world, and suffering from the dreadful disease, Consumption. There are many sad stories, and I know I have thought a great deal about the work of the institution ever since my visit there. I do believe it is worthy of assistance, and we who have health and the necessaries of life should encourage this work along.
>
> "I understand the expenses lately have been double the income, and unless the management meet with more encouragement, I am afraid the work will have to be curtailed. I know you have many calls, but I do wish you would give this matter a thought, and, if possible, assist. I have written to two or three confidentially, and hope to be able to collect some more for this work. Should you not feel like contributing a donation, remember this request, and your reply is just between you and me, and strictly confidential.
>
> "I might mention, to show that I have confidence in the work, I have already given a donation of $100.00 and two row boats to the Free Hospital this year, and intend to give another $100.00 before the end of the year."

Sincerely yours,

Wm. Thomson

Sir Wm. R. Meredith, Kt., or Mr. W. J. Gage, Toronto, will receive and acknowledge any contributions made.

Don't Put Off STOVE BUYING

and when you decide to buy, be sure to buy stoves with a record at Adam Hall's. Our stock of Stoves, Range and Heating, are now complete for the Fall, comprising the following lines: THE SOUVENIR RANGE, for coal and wood, in four sizes and styles. The Advice of Sandy McTavish

MISTRESS MARY M'TAVISH was a sweet, pretty-looking woman still. She had not been, however, particularly happy in her married life, for the match had been a "made-up one" by her grandfather. Still, the couple had jogged along, in a peaceable kind of way, on their flourishing farm, and when Mary was feeling the want of sympathy and the "petting" she had been used to, she took refuge in her garden, where her beloved flowers bloomed luxuriantly. Often she would talk to them, as she sat amongst them, with her knitting, and she got to fancy they heard and answered her, when the tall ones nodded their heads in the soft breeze as if in reply.

Sandy McTavish was a man of sterling worth, but a bit "dour" and stern. He loved his winsome young wife dearly, though he would have thought it unmanly to make the slightest demonstration of his real feelings. "A very respectable man," his minister said of him, but—he had his ways and it had been pretty well known before he married that he had no gumption in his management of women folks.

When looked upon as a confirmed old bachelor he had met Mary one evening on the heathery braes, with a rose in her hair, and had succumbed to her fresh charms. He was nearly double the girl's age, but being a well-to-do man and she a penniless lass, before she quite realized it all she found herself installed as mistress of Brindle Farm. She had every comfort, but them "ways" were trying, and she would often have gladly gone without her dinner for a nicely-turned compliment or a kiss. Likely as not she would have got them both for the asking—but ah! the flavor would be gone!

One fine morning she put on the blue dress her husband had admitted that he thought "no bad," and proposed driving into the country town with him to be photographed, although she had jocularly remarked, "I'm no near as good-looking as I was." Now—now was the opportunity for that coveted compliment and kiss. Alas! poor Mary!

Sandy really in his heart of hearts thought his lass quite as sweet and bonnie as on the day he wedded her, but, worthy man, it didn't occur to him he might please her by saying so. Her appearance was so charming, actually, that a strange feeling of reticence tied his tongue, and he just grunted out: "Hoots, lassie! that canna' be helped!" provoking thereby, to his surprise, a burst of tears from his better half and an emphatic refusal to be "taken."

"Women are kittle cattle," he mused, as he drove off alone. "There's no understandin' them at times. Nae doot she just wants a good cry, puir bit thing! She's gey young for an auld man like me, I'm thinkin', but——"

But he bought some bright ribbons at the fair that day.

Some years afterwards, when he caught a chill and died—died with his hand holding Mary's fast and close, and his eyes looking into hers, she mourned for him sincerely. He left her with a tidy little sum in the bank, so she kept on the farm, the products of which met with ready sale everywhere, for their excellence was proverbial.

She had suitors, lots of them, but Sandy had warned her to beware of fortune-hunters, so she cold-shouldered all attentions. Her beauty was waning; it was of a surety the gold "in the bank" they were courting, and Sandy—poor Sandy!—would never rest in his grave if he thought she would be misled by any of these ravening wolves after the "siller."

But it was lonely work—very; and on looking back, even Sandy's silent, reserved companionship had been, or seemed to have been, the acme of cheerfulness.

* * * * * *

It was early morning. The servants were astir, out in the fields. Mary shaded her eyes with her hand and gazed out over the moor, covered with its bonnie blooming heather, and far beyond to the great mountains, bathed in bright sunlight, and her "gude man's" words came to her mind: "There'll be mony a man after ye whin I'm gone, Mary wumman. Liker than no' it'll be for your bit money, more than for yersel'. So tak tent, but mind ye, considerin' it'll be eerie like for ye here when I'm awa', I've no objections to ye couplin' wi' a decent lad, always providin' that it is yersel' he loes, and no' yer bawbees. Also, dinna forget to mak' sure he's an able man; yin no' above daein' gude, honest wark, an' that'll strive for yer comfort afore all else—as—as I've done, though it mightna' be aye in a smooth-tongued way, lass. But I'se warrant an honest heart an' fustian's better than broadcloth an' fine speeches that are no sincere.

* * * * * *

Overstress of work lately, along with petty disagreements among the "hands," which she felt unable to quell, and, above all, a natural longing for companionship of a congenial nature, brought these almost last words of her husband to her mind. Now just how to set about following up this advice rather puzzled Mary. She had heard stories of women, evidently devoid of all sense of modesty, "advertising." The very thought of such a proceeding made her cheeks burn. "Advertising for a husband!" When Sandy was "sparking" her she hadn't even met him "halfway." She felt discouraged, and quite a few salt tears fell and mingled with the golden pats of fresh butter which she was deftly handling and packing, ready to send off.

The last pound had no label — she found she had run short of them, so ran to her desk for a sheet of soft white paper. An idea struck her. Taking a pen, she wrote on the sheet: "This butter was churned, worked and packed by me—Mary McTavish—a poor, lonely widow of eight and twenty, at Brindle Farm, Ayr, Scotland."

By some strange chance that very consignment found its way to the home of a well-to-do widower of middle age and good connections, a man far above the sordid pettiness of being on the lookout for a well-dowered "No. two."

Then such butter!—delicious!—solid cream! The woman who could make such must be well worth looking after. He spread it thickly on both sides of his bread, the better to test its flavor, and then, with a thump on the solid mahogany table which set all the crockery dancing and caused the toast to reel out of the rack and stagger down to the floor in a tipsy manner, he exclaimed: "I'll make her number two as sure's my name's John Jamieson! Let's see!" smoothing out the little greasy bit of paper—"Mary! a good name—my mither's—gude thing it's no 'Jeanie!' Puir lass! I mind fine her saying, 'John, there'll be mony a wumman after ye—all kinds—after I'm gone, mair than likely mair for your bit money than for yersel', though ye're a well-favored man. John,' says she, 'a vera well-favored man. I've nae objections to yer mairrying a decent woman that isna taken up wi' fine claes and falderals'—them's the very words—'for ye'll be kind of lone some whin I'm awa', man John. Kind o' lonesome!'"—and John Jamieson drew his horny hand across his eyes. "'But mind ye,' puir Jeanie said, says she, 'see ye get a capable lass, yin no above gude, honest work, an' that'll keep ye as—as—comfortable as I've striven to dae.'" Here a few salt tears dropped quietly upon the very pat of fresh butter which had been baptized already by those of Mary McTavish.

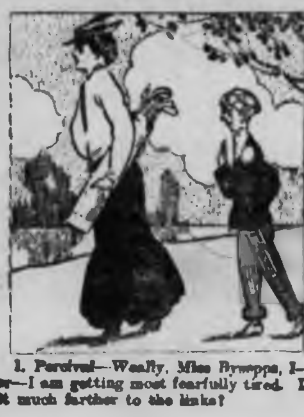
John cleared his keen eyes a second time and proceeded to business. "Poor! comes next; that's a' richt. She'll no' hae fine claes and falderals, an' I can gie her a' the wincey and homespun she needs" (with a little chuckle.) "Then lonely! Ah! that's it. Lonely! So am I! For it's jist wearin' ma heart oot, I am, though I'm blest if I quite realized it till I saw this scrap o' paper an' I sampled her butter. A woman who can mak' stuff like that is no above honest work, so I'm keepin' tae the promise I made my gude wife, langsyne, tae the letter. An' no takin' a designing hussy tae my heart and home."

* * * * *

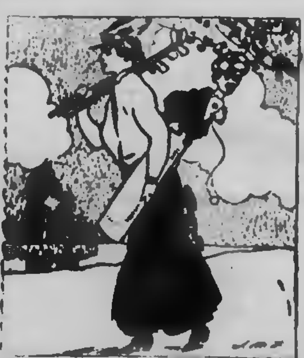
And so, before another hour was over, John Sutherland Jamieson had indited and posted a letter to Brindle Farm. It was short, but to the point. The answer was also brief—and practical. What followed is the business of no one, except those most interested.

However, the widow and widower are lonely no more. JETNA.

How He Reached the Links.



1. Percival—Weally, Miss Bysoppe, I—er—I am getting most fearfully tired. Is it much farther to the links?



2. Miss Bysoppe—Don't mention it, Mr. Brawnless.

The Less, the More.

"What!" asks the astonished husband when the wife shows him the bill for her new theater-gown; "five hundred dollars for that dress!"

"Why, yes, my dear," purrs the fond wife.

"Five hundred dollars! Why, there isn't half as much goods in it as there is in one of your ordinary dresses."

"I know; but when the modiste makes a decollete gown she always makes a higher charge."

"Gee! Poor old Adam! I wonder what his household expenses were?"—"Judge."

Womanhood Must Wash.

George Herbert Palmer, professor of philosophy in Harvard University, is optimistic in regard to the college woman. He does not believe that the higher education is going to harm the true woman, and says that it does not speak well for a woman if she cannot stand a college training. His opinion on the subject has been asked so many times that he decided to settle the matter once for all, and the last time he was asked the usual question he replied briefly and to the point, "I have no use for womanhood that won't wash."

Advice on Matrimony.

A professor of a noted medical college was addressing the graduating class. "Gentlemen," he said, "you are going out into the world of action. You will likely follow in some degree the example of those who have preceded you. Among other things you may marry. Let me entreat you to be kind to your wives. Be patient with them. Do not fret under petty domestic trials. When one of you asks your wife to go driving, do not worry if she is not ready at the appointed time. Have a treatise on your speciality always with you. Read it while you wait, and I assure you, gentlemen" — and the professor's kindly smile seemed to show a trace of irony—"you will be astonished at the vast amount of information you will acquire in this way."

Mrs. Wiggs.

While her bright sayings have brought money and fame to the author, Mrs. Alice Hegan Rice, as well as to the publishers, the dramatist, the actors, and everybody connected with "Mrs. Wiggs" as a book or a play, Mrs. Mary A. Bass, the original sage of the cabbage patch, is living in her former poverty in Louisville, Ky.

A Variable Weight.

Teacher—How many ounces in a pound?

Tommy—It depends on the grocer.

Dog Watch.

The phrase, "dog watch," has really nothing to do with dogs. It is a corruption of dodge-watch—two short watches, one from four to six, and the other from six to eight in the evening, introduced to dodge the routine, or prevent the same men always keeping watch at the same time.

A Fly's Wings.

The wings of a fly are used with great quickness, and probably 600 strokes are made per second. This would carry the fly about twenty-five feet, but a seven-fold velocity can easily be attained, making 175 feet per second, so that under certain circumstances it can outstrip a race-horse.

STANDS BY AN ANARCHIST

Central Union of New York Urges General Action in Turner Case

tion has been adopted by the Central Federated Union to call a mass meeting for the purpose of protesting against the deportation of John Turner, an English anarchist who is now held at the Island. All central labor unions in the country are to be appealed to for New York, January 4.—All the unions throughout the country will be urged to stand by an anarchist now awaiting deportation at Ellis Island. A resolusupport in the matter, and will be asked to aid in an effort to secure the repeal of the law under which Turner is being held by the immigration officials. Delegates who addressed the meeting declared that the law, in its present form, has the opposite effect of that desired.

BURIED SATURDAY

Coroner's Jury Decides that Deceased Was Temporarily Insane

London, Jan. 2—At the inquest on the body of Mr. Andrew Pattullo, M.P.P., held yesterday, the deceased's nephew, Mr. George Pattullo, testified that his uncle was in good health, but had been subject to fits of depression, since the death of his wife, and had frequently complained of loneliness. He described the finding of his uncle's body on Tuesday last in the latter's bedroom, deceased having committed suicide by cutting his throat with a razor.

The jury brought in a verdict of suicide while temporarily insane. The remains were buried in Finchley Cemetery today at 2 o'clock.

Messages of condolence from all over Canada have been received.

HEAD REDUCED TO PULP

Walter Bainard Was Killed in a Tool Company's Works

London, Ont., Jan. 3—An accident Walter R. Bainard, his life. The first occurred in the London Tool Company's shops, Bathurst street, Thursday, afternoon, which cost a machinist named intimation any of his shopmates had of the fatal occurrence was when an apprentice named Michael, discovered Bainary lying on the floor beside the plane, dead

A doctor found the skull terribly crushed, the top of the head being reduced to a pulp. From marks from the big plane it would seem that Bainard, in leaning over the plane, had been caugth in the head by a moving knob, and an upright post, and when the machine finally released its victim, he fell to the floor. The din of machinery drowned the sound of the falling body, or any outcry, if the unfortunate man uttered such.

Deceased was 23 years of age, belonged to Glanworth, and had been employed in the shops a couple of years. No inquest will be held.

Minneapolis, Minn., Jan. 4—Within the past eight business days Minneapolis mills have booked almost 160,00 barrels of flour for export to Japan. Further enquiry was reported today, and it is not unlikely more business will result.

TO THE AFFLICTED.

Dear Reader,—Are you a sufferer from any of the following ills: Lack of ambition, nervous exhaustion, ideas easily confused, irritability of temper, impairment of memory, despondency, general debility, liver not right, kidneys out of order, rheumatism, dyspepsia or indigestion, dizzy or fainting spells? Does your heart palpitate? Do you have smothering or sinking sensations, pimples, or eruptions of the skin, etc, etc.

If you are troubled as above, you can be cured by the use of Dr. Clarke's Wonderful Little Red Pills. A trial order of three boxes for $1.00 will convince anyone that these pills are truly wonderful. We are daily in receipt of letters bearing the highest testimony. We have not space to tell you all about them here, but will answer any enquiries as to their merits. Mrs. John Macdonald, Durham, N.S., writes us, "After taking two boxes of Dr. Clarke's Little Red Pills for indigestion, which I had been troubled with for a number of years, I am now perfectly well. I followed the directions carefully.

To every one sending for a trial order and finding good results we ask to observe our special offer enclosed with every box. It is of special interest to every one.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 35c. per box, or 3 boxes for $1.00.

Dr. Clarke's Sure Cure for Catarrh and Dr Clarke's Sure Cure for Eczema, same price $500 will be paid for any case that it will not permanently cure.

Equitable Gold Mining Co.

R. C. LANE, President. F. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,350 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,050 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $4.25 per ton as cost of mining and milling. One-half of all over and above this $4.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 265-tunnell; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

THE PETERBOROUGH BROKERAGE CO.
FISCAL AGENTS

Rio Colorado Gold and Copper Co.

THE BEST INVESTMENT EVER OFFERED.

INVESTIGATE and you will buy this Stock at FIVE CENTS

IT WILL BE WORTH PAR INSIDE OF SIX MONTHS

Clients of ours have acquired twelve claims in the richest mineral section of California, on the Colorado River. We have had this property examined, and it is said that it will make a mine equal to any of the large producers.

It carries Gold, Silver, Lead, Copper and Iron, and has abundance of shipping ore in sight. The vein is large and rich.

We have 20,000 shares to sell at 5 cents per share, and then the stock will be placed on the market at par. Guaranteed with five million of securities behind it to protect the investor from loss.

This 20,000 shares is to pay for the annual assessment work on the property, and must be sold at once.

The Company absolutely owns its property, and WE propose to make a paying proposition out of it. DON'T DELAY OR YOU WILL BE TOO LATE FOR THIS STOCK at Ground Floor prices. Remit to,

WESTERN BROKERAGE COMPANY, Incorporated
396 Henne Block, LOS ANGELES, CAL.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price that will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

REFERENCES—The Governor of the State, and any bank in Boise, Idaho. Write the Company for particulars. Address

GEO. W. E. DORSEY, President
Boise City, Idaho.

[illegible] Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 6 claims, 600 x 1500 each. A 70 foot shaft on the Martha claim shows a vein of $30.82 ore 5 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.82 to $19,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay then $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address.

Dry Placer Miner, formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 200 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine—Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-8c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

'Henry Fielding's Dream'

By CORTLAND MYERS.

leader told her to bring her own class, and he would find a place for them. That week she found a ragged boy on the street, asked him to her home, told him she would give him some new clothing if he would go to Sunday school with her the following Sunday. He promised her he would.

"The first Sunday he was the only scholar; the next Sunday he was the only scholar, and the third Sunday he was not there at all.

"She did not give him up, but found him, and found the clothes were being used for every day, and almost worn out already.

"She tried him three times with clothes, and her heart's best love, but he seemed to be bad, and only bad, and her work a failure. She told the superintendent so, and said she must give him up. 'There was not anything in him; he was deceitful and mean, and they better let him go.'

"'No, said he, 'try him once more.'

"She did, and in the very spirit of Christ stayed by her task. An angel could do no more.

"That boy," said Mr. Dowling, "was Dr. Robert Morrison, the first and great missionary to China. Mighty on earth and mighty in heaven! How do you teachers know what you have been doing to-day?"

Elsie knew he meant her, and thought:

"I will try it again if they want me to, and the very same class too."

As soon as the school was dismissed, Mr. Dowling was at her side, and asked her for her name and address.

He was waiting to write it, but she had already written it upon a slip of paper and handed it to him.

"Where is your church home?" he said.

"Well," she replied, "I hardly know what to say. I have not been in the city very long, and have not brought my letter to any church yet. I have been to several different churches, but was to yours this morning, and liked it very much."

"I suppose you came there because of your being to the mission before?"

She hastened to reply, but he interrupted her by asking:

"Where is your old home?"

"In Vermont," she answered.

"What part of it?"

She told him, and a look of surprise and mingled delight passed over his face as he said:

"Why, I was brought up near there myself. Of course, I have not lived there for many years, still everything about that part of the country is familiar to me. That makes me more interested in you. Now, I cannot talk to-day, but I am coming to call on you when you are home. Yes, if you want me to, I will come this week. Let me see. I can call for a few moments to-morrow evening."

"You will be welcome," said Elsie.

She wondered, and even partially sighed, as she thought:

"We have so little, and in such a small place, I am almost ashamed to have him come."

He walked away, came back in a moment, and said:

"Before I go I want to introduce you to one of our noblest young ladies, and one of the best workers in my church, also in the mission here, and everywhere in the city. She is a very rich girl, the daughter of one of the greatest manufacturers in the country, but she sacrifices everything for Christ and the good of others. I am sure you will be glad to know her."

He turned, and motioned to a young woman near by to come that way. As she approached Elsie saw an expression of character the like of which she had rarely, if ever, seen.

Her features seemed to be the marks of Christ. She was graceful in form and move. She carried a certain charm which changed an introduction into a long acquaintance.

It takes fifty years of introduction for some people. It takes fifty seconds for others.

Familiarity and companionship always cost much if they are valuable, but it comes more quickly in some instances than in others.

Elsie's first thought was: "What a chasm between my condition and hers," but condition is not character, and the bridge was speedily swung across.

Mr. Dowling hastened away after the mere mention of their names to each other.

Grace Chalmers and Elsie Fielding had little in common except their devotion to Christ and a worthy ideal for life.

Elsie could compete with her in that respect.

Character is the queen's throne, an ideal is the golden sceptre in her hand.

Movement toward a high ideal is the spt almost of divinity, even if the most of time is passed in the narrow circle of two small rooms. Moving away from the ideal is at once the tragedy and pathos of life.

They paused a moment in conversation and entered into sympathy with each other concerning the hard problem of a class of boys, for Miss Chalmers had experienced just about the same trouble as Elsie had.

As they moved toward the door, she said to Miss Fielding:

"Which way do you go?"

Elsie told her with some shadow of hesitancy. She was not proud, but she was human.

"I am going that way myself," said she. "At least a part of the way, and you will have to let me go with you."

As they walked on, she said:

"I think I saw you in church this morning. You sat right behind us, and as I turned around after the service I caught sight of you, and I think there was a young gentleman with you."

"Yes," replied Elsie, "there were two of them. My brother and a friend of his. I remember you, too, but of course, never thought of meeting you again, and in fact, I was a stranger to everybody there. That was the first time, and I did not know until to-day that the mission belonged to that church."

"How did you like the church?"

"Oh, very much," replied Elsie. "I couldn't tell much about the building and the music, because it was the sermon that especially interested us. My brother was very anxious to have that question answered."

"Well," said Miss Chalmers, "we were all interested in it, and I think this sermon was good and the subject ought to be talked about, but my father, while he does not say much, I know feels that the pulpit better leave such questions alone. Of course, he is a little out of sympathy with some of the views brought out this morning. He is a manufacturer, and that is a standpoint he declares different from the pulpit. He says the ministers do not understand the situation and the difficulties. They are in danger of allowing their sympathies to run away with their judgment. If they had a few strikes on their hands, they might be able to preach upon the labor question. He said when we reached home this noon that when he went to church he wanted to hear the gospel, and not any discussion of the labor unions, but I am glad that Mr. Dowling has the courage to face the employers and speak the truth to them as well as everybody else. He does not hesitate or stop for anybody. All get treated alike with him, and he says if the Gospel means anything it means the solution of the labor question, and all other questions, and he is commissioned of Heaven to bring the principles of Christianity to bear upon every part of human society. He is a noble man, and does not bend his principle for anybody or anything. It hurts sometimes, but he says: 'The truth Jesus uttered had the same effect.'"

Just then Elsie could not have been more astonished had an earthquake shaken the stones beneath her feet. They were at the corner, and from the other street came Henry and Richard, as if it had been timed by the watch.

Elsie recovered instantly from her surprise, and said:

"Well, I didn't expect to meet you, but I am glad I did, because I want to make Miss Chalmers acquainted with my brother and his friend, Mr. Harding."

There was a look in Henry Fielding's eye which only he who is skilled in reading character and understanding the vast meaning in a glance or single expression could understand, or would even notice. Some new element of life had suddenly appeared and crossed his pathway. Was it an angel?

After a moment's conversation Grace said she had been delighted to meet them, but must hasten homeward, as this was her corner.

She disappeared in the direction of Flower avenue, where her home stood among those of the rich

(To be continued.)

FOUND IN ROOM WITH THROAT CUT

Tragic Death of Mr. R. Mativier at Savoy Hotel

Montreal, Jan [illegible]—Lying bathed in his own blood, and with a razor by his side, where it had fallen from his hand, Mr. R Mativier, a wealthy wine merchant and importer, of Paris, France, was found in his room at the Savoy Hotel, with his throat cut from ear to ear.

Mr. Mativier reached the hotel on the 31st of December last and was shown a room. Nothing much was seen of him by the hotel people, and it was not until yesterday morning when the door of the room was found locked and no answer could be obtained to repeated knockings, that access to the room was obtained, when Mr. Mativier was found cold in death

Medical men were summoned immediately, but it was evident that life had been extinct for some time, and the body was removed to the Morgue.

The deceased was a middle aged man, and when he registered was apparently in the best of health. The hotel authorities beyond stating the fact that a suicide had occurred in the hotel, would not make any statement, and the Coroner ordered the immediate removal of the body to the Morgue.

Mr. Mativier received no callers and kept himself shut up in his room all day, and it would appear from the condition in which the body was found that the deed was done early last evening.

10,000 SCHOOLS CLOSED

The Crusade in France Against Religious Teaching

Paris, Jan. 5.—The plan of the Combes government for the secularization of education is now ripe. During the last eighteen months 10,049 schools depending on religious congregations has been closed. The number of boys establishments belonging to the Christian Brothers to be suppressed shortly is 1,658, while the girls' schools affected number 1,822. M. Combes has signed a decree nominating a commission to draft a bill and study the measures to be adopted in the way of extra school buildings for the children taken over by the state.

STORMS ON ATLANTIC

Two Schooners Wrecked on the Coast of Newfoundland

St. Johns, Nfld, Jan. 6.—The schooner Clara Mason, laden with codfish and bound for Europe, was driven ashore at Bonavista in a gale and became a total wreck. The crew was rescued.

North Sydney, C.B., Jan. 6.—The captain and crew of 16 men of the French fishing schooner Sapho reached here today from Newfoundland, after having abandoned their craft, which had been nearly wrecked by the winter gales. The men rowed 14 miles from the land, and when near the shore of Red Island all their dories were capsized in the surf. No one was lost.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.56 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing green all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $61.88 and $15.18 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet to the present tunnel it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mines for many years to come.

All the assays mentioned in this report were made by the assayer of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

WOMAN'S HOUSEHOLD

The Household Pests.

Every house is invaded at some time or other by some variety of household pest.

Whether it be in the form of Croton bugs, mice or bedbugs, the result is the same—to drive a careful housekeeper to distraction.

The best thing to keep away mice is a cat; the next best thing is a trap. Few housekeepers know, however, that mice will not go near a trap unless it is thoroughly scalded and aired after every three or four captures.

Paris green will effectually destroy roaches and Croton bugs. It should be sprinkled sparingly around the places they frequent. Cloride of lime will also keep away water bugs.

Borax is an enemy to red ants. It is very difficult to get rid completely of these little pests once they have invaded a house.

Many housekeepers keep them out of refrigerators by placing each leg of the refrigerator in a saucer of water. The water must be renewed each day before it evaporates, and will prove an effectual barrier to armys of red ants.

Bedbugs are the bane of every woman's existence. The advent of the iron bed has done much to help rid houses of them, but still they will gather in carpets, closets and woodwork unless carefully watched. This is especially true of apartment houses.

Cut Glass and Bric-a-Brac

Clean water and a proper mixture is the secret of keeping glass brilliant.

If mirrors are very dull and speckled, the following fluid is excellent: Take a small portion of whiting and add sufficient cold tea to make a paste; rub the specks from the glasses' surfaces with warm tea, dry with a soft cloth; rub a little of the paste well on the mirror and polish dry with tissue paper. Stains and finger marks may be removed from a looking-glass by rubbing with a soft cloth wet with alcohol.

Discolored ivory may be restored to its original whiteness by soaking it in water and while wet inclosing it in a glass jar nd exposing it to the strong rays of the sun. Repeat the process until the ivory is bleached.

China which has become discolored should be treated to a thorough scouring with coal ashes.

Marble is best cleaned with the following mixture: *Four tablespoonfuls* of baking soda, two of pumicestone and two of precipitated chalk. Add water until these ingredients are of a paste consistency. Rub preparation on marble, then wash it off with tepid soapsuds.

Bric-a-brac is generally in a dingy condition at the end of winter. If it is gummy, rub with dry salt or baking soda. A strong solution of ammonia and water will clean a piece of bric-a-brac thoroughly if an old toothbrush is vigorously used in immersing the article in the solution.

When Moths Corrupt.

An ounce of camphor is worth a pound of sachet!

That clothes are perfectly clean and free from dust is the first requisite for their preservation against the dissolute moth, common garden or "Buffalo" variety.

Blankets should be washed carefully and aired in the sun for two or three hours and then put away with each fold filled with camphor in chests lined with white shelf-paper.

Furs placed in tar paper bags and hung up in a roomy closet, with crushed camphor placed in the pockets, will defy the greatest moth gourmand if every now and then during the season they are taken out and aired.

Woollen goods and silk articles may be prevented from turning yellow by placing pieces of bees wax about the goods. Silk fabrics should never be kept folded for any length of time in white paper, as the chloride of lime in the paper will impair the color of the silk.

To prevent creasing lay newspapers without opening in the folds of the goods and fold them up together.

Laces and fine white goods should be folded in blue paper. This prevents their turning darker.

All Kinds of Stains.

To clean knives nothing is better than the old fashioned brick dust.

Mud stains should be allowed to dry, then thoroughly brushed with a dry cloth and the spots removed by rubbing with alcohol.

Grease stains are eradicated most effectually with benzine. The liquid should be rubbed back and forth over the stain until it has disappeared. It will not then leave a ring.

On silverware, stains require prompt attention, or they take too long to remove. Sulphuric acid will remove the stain left by medicine. Dip the spoon in the acid, repeating the process until it has disappeared, then wash it in very hot water. To remove egg stain from silver rub it with table salt.

Ink stains on furniture use this: Add six drops of niter to a teaspoonful of water and apply to the ink stain with a feather. If the ink does not yield to this, make mixture stronger and repeat process.

On carpets, grease or gummy dirt stains may be removed by rubbing on them the following mixture: One bar of good soap to two teaspoonfuls of sal-soda and saltpeter and four quarts of boiling water. When cool add six ounces of aqua-ammonia. Bottle and use as required.

On pictures, soap should never be used. Wash the painting gently with clear warm water, dry with a piece of cheese-cloth, then rub it with a clean cloth saturated with olive oil.

Borax is best to use for stained tinware. Should the inside of a tin teapot or coffee pot be discolored boil it in strong borax solution for a short time and all its first brightness will return.

"Senate" and "Father."

Old men had great authority among people of antiquity. Rome borrowed this trait from the Lacedemonians. The titles "senate" and "father," applied to statesmen, arose from the habit of depending on the wisdom of men of years.

CONFESSORS WENT ON STRIKE

Berlin, Dec. 31.—All kinds of curious strikes have taken place in Germany during the past year, including a strike of physicians and that of the students at the University of Wurzburg. The oddest, however, is reported from Munich. All the Father Confessors in the City Hospital and Sanatoria ceased their occupation yesterday because the *municipal authorities* discharged one of their number. The authorities declare that they were compelled to do so, because the priest in question used to ply patients in the confessional and on the sick bed with *indiscreet questions*.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.
Capitalized at $2,000,000.00.
Par value $1.00. Full Paid and Non-Assessable
At 50 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 7000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.
1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.
Selling at 20c a Share
Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 175 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 300 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*
C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado
ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not A Gamble
but a
Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold

PROSPECTUS INFORMATION FREELY, GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO.,
FISCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.
The Peterborough Brokerage Co., Local Agents.
WANTED—GOOD AGENTS IN EVERY CITY.

NEW TERM

AT THE

Peterboro' Business College

—BEGINS—

Monday, January 4, 1903

Day and Night Classes.

It is desirable that all who purpose entering the school should do so on the above date.

Y. W. C. A.

The education classes of the Young Women's Christian Association are being re-opened this week and all who are taking class work are urged to be present at the beginning of a new term.

—The Board Meeting which was to have been held last Monday has been postponed until to-morrow, Jan. 7th, at 3.30 p.m. Important business will be hoped that there will be a large attendance.

Married in Woodstock

The home of Mr. William Gardner, Delaure street, Woodstock, was the scene of a very pretty wedding, when his daughter, Miss Mary Gardner, was married to Mr. Peter Gardner of the American Cereal Co., Peterborough. The wedding was a quiet one, and only immediate friends and relatives of the contracting parties were present. Rev. Dr. McMullen, pastor of Knox church, officiated. In the evening, the newly-married couple left on the 6.17 east-bound train for Peterborough, where they will reside. The Times extends its hearty congratulations.

Township Elections

SMITH.

The result of the election in Smith township is to elect the following Council:

Mr. R. M. Elliott, reeve, by acclamation.

Councillors, Messrs. Bell, Harvey, Graham, Scott.

The vote stood, Scott, 315; Harvey, 256; Graham, 248; Bell, 241, Fowler, 217.

DUMMER.

Reeve, H. A. Moore, by acclamation

Councillors, No. 1, W. Miles, 229; No. 2, J. Darling, 183, No. 3, J. Patterson, 172; No. 4, E. Martin, 161.

A PETERBOROUGH LADY A POSSIBLE VICTIM

Fears That Miss Maggie Hennessy May Have Perished in Chicago Fire

Mr. Daniel Hennessy, who resides on Elizabeth street town, left yesterday morning for Chicago, in search of his daughter, Miss Maggie, who went to that city ten days ago to visit friends and who has not been heard from since the great holocaust. It is feared that she may be a victim of that dreadful fire.

In the list of dead and injured which appeared in the Chicago papers, the name of Miss Hennessy does not appear but it may be that she is one of the unidentified victims. She was a great admirer of opera music, and this, together with the fact that no answer could be had to telegrams sent her, lead her relatives to fear that she might have been caught in that awful death trap.

It is needless to say that everyone in Peterborough will hope that the fears of Mr. Hennessy are groundless.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked up By Reporters on Their Rounds

—Races today on the Driving Park.

—The County Council will meet on Tuesday, Jan. 26.

—This weather pleases both the ice man and the coal man.

—The supplementary meetings of the Farmers Institute were held yesterday.

—The annual meeting of the Little Lake Cemetery Company will be held on Monday, Jan. 18th.

—Bargains in fancy goods and dolls balance of this month at Times Bookstore.

—Blank books and office stationery for every line of business at reasonable prices Times Bookstore.

—The East Peterborough Agricultural Society will hold its annual meeting in Norwood on Wednesday, January 20th.

—People who have been grumbling that we never have an old-fashioned winter nowadays are growling worse than ever now that we have got one.

There will be a meeting of the Ladies Literary Association of St. Peter's T.A.S. on Thursday evening next, January 7th, instead of Friday, as formerly announced. A paper on "Early Martyrs" will be read, and a musical programme has been prepared for the occasion.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Ven. Archdeacon Casey, of Lindsay, was in town yesterday.

—Mr. Milton Walker, of Winnipeg, is visiting friends in town.

—Mr. James Kendry, M.P., and Mrs. Kendry, are registered at the Oriental.

—Mrs. (Rev.) J. W. Fox, Brookholm, is the guest of her parents, Mr. and Mrs. A. R. Kidd.

—Miss R. L. Robertson, trained nurse, has been called to Otonabee on a scarlet fever case.

—Mr. Alex. Elliott has returned to Toronto after spending the holidays at home.

—Miss Margaret Hamilton returned to Victoria University yesterday after spending the holidays at home.

—Mrs. W. Edwards, (nee Miss Eva Carlisle) left for Kingston yesterday, where she will enter Kingston General Hospital as a nurse in training.

—Mrs. Parliament, of Cannington, is visiting her brother, Mr. Thomas Chatten, sr., and is staying at Mr. Jas. H. Chatten's, 204 Smith street

—Mr. A. J. Gough, of Toronto, is in town on business in connection with the changes which are taking place in their Peterborough store.

Children's Aid

The date of the Amateur Dramatic Entertainment to be given for the benefit of the Children's Aid is Tuesday, Jan. 12th. Hon. C. N. Daly, late of New York, has kindly consented to coach the two plays, "A Pair of Lunatics," and "Naval

KNOWS HOW

Doctor was Fooled by His Own Case for a Time

It's easy to understand how ordinary people get fooled by coffee when doctors themselves sometimes forget the facts.

A physician speaks of his own experience.

"I had used coffee for years and really did not exactly believe it was injuring me, although I had palpitation of the heart every day.

"Finally one day a severe and almost fatal attack of heart trouble frightened me, and I gave up both tea and coffee, using Postum instead and since that time I have had absolutely no heart palpitation except on one or two occasions when I tried a small quantity of coffee which caused severe irritation and proved to me I must let it alone.

"When we began using Postum it seemed weak—that was because we did not make it according to directions—but now we put a little bit of butter in the pot when boiling, and allow the Postum to boil full 15 minutes which gives it the proper rich flavor and the deep brown color.

"I have advised a great many of my friends and patients to leave off coffee and drink Postum, in fact I daily give this advice." Name given by Postum Co., Battle Creek, Mich.

Many thousands of physicians use Postum in place of tea and coffee in their own homes and prescribe it to patients "There's a reason."

Card of Thanks.

To the Electors of Peterborough :

Ladies and Gentlemen,—I desire to tender my sincere thanks to the electors of Peterborough for the hearty support given me in securing my election as an Alderman for the ensuing term. I shall endeavor to discharge the duties pertaining to the office to the best of my ability.

E. F. MASON.

Card of Thanks.

I desire to thank most heartily all ratepayers who so kindly assisted by vote and influence in assuring my election as member of the Municipal Council for 1904.

In acknowledging these services I beg to assure the ratepayers that they will have no reason to regret the confidence so expressed.

Yours respectfully,

WM. SCOTT.

Ald. Batten's Thanks

To the Electors,—Allow me to return you my hearty thanks for the very large general vote which you gave me and which resulted in re-electing me for Alderman for 1904. Such a flattering expression of your confidence is very gratifying to me, especially as the vote represented all classes of the electors in the five wards.

Your Obedient Servant,

JOS. H. BATTEN

Thanks to the Electors

Ladies and Gentlemen :

Please accept my sincere thanks for the very hearty support which I received in the election for Alderman, and which elected me by an increased majority as one of your Aldermen for the third term.

Let me assure you that I will endeavor and to justify the confidence you have again reposed in me.

Respectfully yours,

H. RUSH.

Jan 6th, 1904.

Card to the Electors

To the Electors of Peterborough :

Ladies and Gentlemen,—I take pleasure in expressing my thanks to all who, by their support in Monday's election, helped to elect me as Alderman for 1904. I have special reason to feel grateful at the result, seeing that this is the fifth year you have expressed your confidence in me for a similar position by a larger vote than ever.

Your Obedient Servant,

ROBERT CLINKSCALE

Thanks from Mr. Hicks

My thanks are due and are hereby tendered to the Electors of Peterborough and Ashburnham, both Ladies and Gentlemen, for their influence and support, which resulted in my being chosen as one of your Board of Aldermen for the current year. This evidence of confidence is all the more pleasing to me seeing that it has come almost voluntarily and without any special effort on my part. That one should be successful enough to "get there" out of a ballot composed of eighteen candidates, speaks well for his friends.

I feel that you have placed me under an obligation to do my very best to repay the confidence you have reposed in me.

Yours truly,

R. HICKS.

Returns Thanks

To the Electors of Peterborough :

I desire to return my best thanks to the electors and friends who were so good as to aid in my election as alderman, and to assure them that it shall be my earnest desire to faithfully discharge the duties of such an important position.

I earnestly hope that by my record I may prove worthy of the confidence expressed by the very large vote polled in my favor.

I am not vain enough to think that it was my popularity or ability that influenced the electors to so generously cast their votes in my favor, but rather the desire of the voters in Wards No 1, 2, 3 and 4 to accord to No. 6 Ward, a fair measure of representation in the Council, so that the interests of No. 6 Ward might not be neglected or overlooked.

Yours sincerely

FRANK ADAMS.

Card of Thanks

To the Electors,—I desire to express my warm appreciation of the very flattering confidence you placed in me at the polls.

I feel highly honored, indeed, and I sincerely trust that I will be able to appreciate the honor conferred upon me, by discharging my duties to the very best interests of greater Peterborough.

I believe that in no greater way can a man enjoy the confidence of the people, than by doing what is right, and by being conscientious in all matters brought up for consideration irrespective of whom it may please. My motto will be to this end, without fear or favor. I wish also to thank most heartily my friends and "the boys" who worked so energetically in my behalf in all the wards for my election.

Wishing all a most prosperous and a Happy New Year, I have the honor of being,

Your humble servant,

W. J. JOHNSTON

The crowning joy of womanhood is motherhood and the crowning joy of motherhood is to have healthy children. But there can be no joy in motherhood without health, and without health for the mother there can be no health for the child.

$500 REWARD! FOR WOMEN WHO CANNOT BE CURED.

Backed up by over a third of a century of remarkable and uniform cures, a record such as no other remedy for the diseases and weaknesses peculiar to women ever attained, the proprietors and makers of Dr. Pierce's Favorite Prescription now feel fully warranted in offering to pay $500 in legal money of the United States, for any case of Leucorrhea, Female Weakness, Prolapsus, or Falling of Womb which they cannot cure. All they ask is a fair and reasonable trial of their means of cure.

WORLD'S DISPENSARY MEDICAL ASSOCIATION, Proprietors, Buffalo, N. Y.

Mrs. W. J. Kidder, of Hill Dale Farm (Enosburg Center), Enosburg, Vt., writes: "During the past year I found myself expecting maternity, and in rapidly failing health. I suffered dreadfully from bloating and urinary difficulty. I was growing perceptibly weaker each day and suffered much sharp pain at times. I felt that something must be done. Took twelve bottles of Dr. Pierce's Favorite Prescription, and also followed your instructions. I began to improve immediately, my health became excellent, and I could do all my own work. I had a short, easy confinement and have a healthy baby boy."

Dr. Pierce's Common Sense Medical Adviser is sent *free* on receipt of 31 one-cent stamps for the paper covered book, or 50 stamps for the cloth bound. Address Dr. R. V. Pierce, Buffalo, N. Y.

Gloomy View of the War Situation Taken in the Japanese Capital

JAPAN IS NOW READY FOR THE CONFLICT

Ominous News From the Far East---Russia's Latest Offer Not Satisfactory to Japan

Tokio, Jan. 7.—It is reported from Vladivostock that the Russian squadron there is preparing for action.

An extra edition of the Official Gazette has been issued, containing army and navy orders prohibiting the publication of any reports of the movements of troops or war vessels from this time on. Otherwise the Japanese authorities are not interfering with the press messages.

Paris, Jan. 7.—An official despatch sent from Tokio late last evening says the Minister for Foreign Affairs had not received the Russian reply up to that time. The officials here conclude from this that Viceroy Alexieff is awaiting an opportune moment to present it.

The general tone of the comment in official circles is slightly less hopeful. The most significant feature of the despatch from Tokio is the statement that Japan is hastening final preparations for a far more extensive despatch of troops to Corea than at first contemplated. The Government has now decided to send an army of 35,000 men, organized as two divisions, to Corea. This is more than double the strength of the expedition first contemplated, and requires a large fleet of transports and extensive arrangements, which are proceeding rapidly towards completion. The destination of this army is expected to be southern Corea, particularly Fusan adn Masampho. Russia may object to the despatch of this large army, and it may develop into the first act of the impending conflict. Rumors are in circulation at Marseilles that a French naval division is about to receive orders to sail for the Far East.

TWO DIVISIONS FOR COREA.

A despatch to the Havas Agency from Tokio today says, "The preparations for the embarkation of two divisions of Japanese troops are continuing actively. It is believed they will be despatched to ports in South Corea, to ensure order.

London, Jan. 7.—The Corean Charge D'Affaires in an interview says he has good reason to believe that the United States, Great Britain, Japan and Russia regarding Wiju and Yongampho will result in the opening of those ports at an early date. Russia, he added, is still opposing the opening, and a few Russian troops have occupied Yongampho.

Corea, he declared, would never agree to Russia's proposal to establish a neutral zone in Northern Corea, running south from the Manchurian frontier as far east as Yuensan and went to Ping Yang, as it would prejudice the sovereignty and integrity of Corea, which is guaranteed by the Anglo-Japanese traety.

Telegraphic advices received from Seoul by the Charge D'Affaires two days ago did not mention the possibility of Japan landing the troops at Masampho. Should however, such action be taken, Corea would not offer armed opposition. Corea's relations with Russia and Japan were friendly, and the Charge did not believe war would result from the present negotiations.

CONFLICT WOULD FOLLOW IF JAPAN LANDED TROOPS

Reports Show That Situation is Critical--Corea Vital Point

Paris, Jan. 6—The Chefoo correspondent of the Paris edition of The New York Herald cables as follows.

"Eight thousand Japanese troops are ready to land at Masampho, and their landing will probably mean war.

"A regiment of Cossacks is expected at Port Arthur. Reserves are being moved from Blagoveyshchensk (the capital of the Amur province in Eastern Siberia) to Tsitsihar (in Manchuria.)

"The position of the troops in Manchuria is being rearranged, but their location is kept a secret."

WOULD MEAN WAR.

The St. Petersburg correspondent of the Paris edition of the New York Herald says that should the Japanese occupy Masampho it would result in bringing matters to a crisis. Admiral Alexieff—the Russian Viceroy in the far east—has full power to act in the case of such provocation.

GREAT CONCESSIONS

St. Petersburg, Jan. 6— In her reply to Japan, Russia made great concessions and hopes that her proposals will prove acceptable to Japan.

The Foreign Office informed the Associated Press to-day that instructions had been sent to Viceroy Alexieff, on which the reply was based. The letter was drawn up in the most conciliatory spirit. Some of the Japanese proposals were accepted, while others were made the subject of extended observations, and were met by counter-proposals.

There are strong hopes that on Thursday next, the Russian Christmas, the Czar may be able to announce that peace is assured.

COREA THE VITAL POINT.

Paris, Jan. 6— It developed today that the greatest differences between Russia and Japan arises from the proposals made by Russia that a neutral zone shall be established extending from Ping Yang, in Corea, on the south to the Russian frontier on the north. The Russian Government has expressed a willingness to recognize the preponderating influence of Japan in the remainder of Corea, and the two powers are agreed respecting the principle of the integrity of China and Corea. Japan, however, saw no reason why the proposed neutral zone should be established, holding that the entire peninsula would be subject to her preponderating influence. The attitude of Russia is believed to be due to the fact that if Japan controls Corea she will thereby more easily menace Port Arthur as well as Vladivostock.

The diplomat who gave to the Associated Press the foregoing information expressed himself as confident that Russia in her reply to Japan will give way on this vital point.

COUNTER PROPOSALS SERIOUS.

London, Jan. 6—The statement made by the Foreign Office at St. Petersburg by the Associated Press today regarding the instructions sent to Viceroy Alexieff was communicated to the British Froeign Office and to the Japanese Legation here. They both expressed pleasure at the fact that Russia had evinced such a friendly attitude, but they said no definite conclusion could be drawn until the nature of the counter-proposals was known. The Japanese Legation reiterated that the cardinal points of the Japanese proposals admitted of no counter-proposals, but said that if the serious points were included among those accepted there was a possibility of reaching a settlement by further negotiations.

ELECTED OFFICERS

Annual Meeting Ladies' Aid Society of Charlotte-St Church

The annual meeting of the Ladies' Aid Society of the Charlotte street Methodist church was held in the schoolroom. The election of officers resulted as follows:

President—Mrs. S. Clegg.

Vice-President—Mrs. Adamson.

Secretary—Mrs. Wharton.

Assistant Secretary—Mrs. A. B. Cunningham.

The various reports presented showed the Society to be in a prosperous condition, having enjoyed a most successful year.

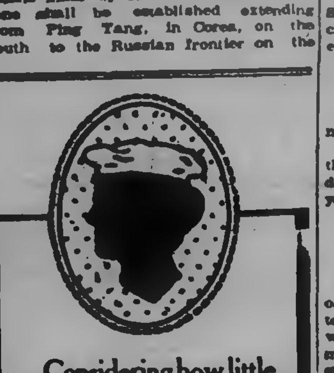
GUARDS SENTENCED

Calgary, Jan. 6— Commissioner Perry of the North-West Mounted Police yesterday sentenced the three constables who were on duty when the convicted murderer Cashel, made his escape. Constable Piper, who had control of the guardroom, was given a year, and Constables Phillips and Leslie were each sentenced to six months' imprisonment. All sentences were with hard labor. The constables were also dismissed from the force.

THEATRES MUST CLOSE

Chicago, Jan. 6—Mayor Harrison has vetoed the plan proposed by some theatre managers to open their play houses and admit patrons to the main floor only.

EVERYBODY READS THE TIMES.



Considering how little you spend in a year for baking powder, why not have the best?

Cleveland's is a pure, cream of tartar powder that never fails, and the best that is made.

PICTON WINS FIRST GAME FROM PETERBORO

THE JUNIORS WERE ALSO DEFEATED BY COBOURG

The intermediate series of Group No. 2 opened at Picton last night, when the crack team of that place brought defeat to the Peterborough seven by a score of 6—3. The rink was crowded with Pictonites who cheered themselves hoarse at the brilliant plays of their team, when a goal was scored in their favor.

The result of the game was received in Peterborough at the Brock street rink, where a wire was installed and the results received by quarters. In the first quarter Picton scored 1 goal and in the second 2, Peterborough also scoring 2, making the score at half time 3—2 in Picton's favor. In the third quarter Peterborough again scored making it a tie, 3—3 at the end of the quarter. In the last quarter Picton added three more to their number, Peterborough failing to score. Result of game, at finish 6—3.

The following players represented the Peterborough team—Goal, Mercer; point Howell, cover-point, Cavanagh; forwards, Roy Armstrong, Whitcroft, Morgan H. Armstrong.

The first Junior O.H.A game of the season in Group No. 2 was played on the Brock street rink last night between Peterborough III. and the Cobourg juniors, resulting in a victory for the latter team by a score of 7 to 3.

The half-time score was 3—2 in Cobourg's favor. A fairly good crowd witnessed the game, considering the attendance generally, at a junior match. The game was rough at times, very little combination work being displayed by either team. Harry King made an efficient referee.

The line-up of the Peterborough team was as follows; Goal VanEvery; point Moore, cover-point, Parker; forwards, McFarlane, Kennedy, Grose and Long.

The T.A.S had a good practice last night, being their last before the game with Keene on Friday night.

CHALLENGE ACCEPTED

Having accepted the challenge of the Cordage tug of war team to pull for the Sykes trophy, the Quakers have fixed the date for next Saturday night, the pull to take place in the T.A.S rooms

The following may be of interest to some of our local wrestlers:

Montreal, Jan. 6, 1904.

Sporting Editor of The Times:

Dear Sir,—Kindly let me know if there is a wrestler in Peterborough. Let me have his name and address or hand him this note and tell him to drop me a line.

Yours very truly,
GEO. KENNEDY,
639 Lagauchetiere
Montreal

GAUTHIER WINS

The Local Wrestler Wins the Championship

The boxing and wrestling show last night, under the auspices of the Cordage Company Hockey Club was largely patronized and a lengthy programme was presented.

The entertainment was opened by an instrumental selection followed by a song by Mr. E. Crowe. The next item was a wrestling bout between Pitts Wallace and Wreck Jeffries for the 130 pound championship of the town, Mr. Jeffries winning. The songs presented by Mr. R. J. Beaumel, were much appreciated and also the step dancing by Mr. L. Houlihan.

The boxing bout of 12 rounds between Hockey Jones, of Hamilton and Jack Morrison, of Lindsay, resulted in a victory for Jones in the second round.

George Gauthier, the local wrestler, defeated the so-called Farmer Burns in the three round bout.

The tug of war between the Canadian Cordage Company and William Hamilton teams for the Sykes trophy resulted in a victory for the Cordage Co. team.

WELL MERRITED HONOR

St. Peter's Choir Remember Miss K. Hurley

On Tuesday evening the members of St. Peter's choir met at the residence of Mr. T. Hurley, to express their high appreciation of Miss Kate Hurley, their talented organist, who is going south on an extended visit. The following address was read by Miss A. Simons, after which Miss May Clancy made a presentation of a beautiful diamond ring, and a handsome boquet of flowers.

To Miss K. Hurley, organist of St. Peter's Cathedral, Peterborough.

Dear Miss Hurley,—We, the members of the choir of St. Peter's Cathedral, desire to take this opportunity to extend to you our sincere thanks for the interest you have taken in our welfare. No words of ours can fittingly express our gratitude to you for the great pains you have taken during the past number of years in assisting us in our work.

You freely gave us the benefit of your experience and at all times manifested the deepest interest in our success.

We have found you ever a faithful and painstaking instructor and you will ever be held dear in the memory of the members of the choir.

We would ask your acceptance of this slight token of our esteem and respect, trusting that it may in some measure, prove a silent small reminder of the pleasant hours we have spent together.

In after years when you recall
The days of pleasure past,
And think of joyous hours and all
That's flown away so fast,
When some forgotten "air" you hear
Brings back past scenes to thee,
And gently claims your listening ear
Keep one kind thought for "We."

The members of your choir.

(Signed) The members of the choir of St. Peter's Cathedral.

Miss Hurley, who was taken entirely by surprise, expressed her warm thanks in a few well chosen words.

Subsequently those present were hospitably entertained by the Misses Hurley, and a delightful evening was spent.

On Monday Miss Hurley will leave for La Porte, Texas, to join her brother, Rev. Father Hurley, where she will spend six months. She will carry with her the hearty good wishes of hundreds of Peterborough people, for a pleasant visit and safe return.

The Navies of Russia and Japan

A war between Japan and Russia will begin with a struggle for the command of the sea. It is highly unlikely that Japan will land any considerable force in Korea until she has driven the Russian battle-fleet, and most of the Russian cruisers off the high seas. To try to invade Korea with Russian warships at large would be a mistake which often has been made in the past, and which seldom has failed to bring disaster.

The naval forces in the North Pacific are, on the whole, well matched, with a slight preponderance of actual ships on the Russian side, and a noticeable superiority in reserve strength on the Japanese side. Battleship strength is the important thing. According to The Navy League Journal, a well-informed periodical, Russia should have at present seven, possibly eight, battleships. There are the Petropaulovsk, Poltava and Sebastopol, of 11,000 tons; the Peresviet, Oslabya, Pobieda and Retvizan, of nearly 13,0000 tons; and Tsarevitch, of rather over 13,000 tons. The latter vessel is on the way to the Orient, and may have arrived. These all are vessels of the standard type of four heavy guns, and eleven or twelve 6-inch quick-firing guns. Their total heavy gun force is twenty 12-inch guns, twelve 10-inch guns, and ninety-three 6-inch quick-firers. The slowest have a speed of 15 knots, the fastest of 18 knots.

The Japanese battle-fleet consists of six ships, the Fuji and Yashima, of 12,300 tons, and the Hatsuse, Shikishima, Asahi and Mikasa, of 15,000 tons. All of these vessels are armed with four 12-inch guns, and a number of 6-inch quick-firers, ten in the case of the two smaller ships, fourteen in the case of the two smaller ships, fourteen in the case of the others. Their total heavy gun force is twenty-four 12-inch guns and seventy-six 6-inch quick-firers. They are very fast, only one having a speed as low as 18 knots; three of them exceed 19 knots.

300 CANADIANS WOULD AID JAPAN

Big Rush For Active Service By South African Volunteers

CANNOT ACCEPT HELP

Constitution of the Army Forbids This Japanese Consul Confident of Result

Montreal, Jan. 7.—"Over 300 applications have reached me from Canadians all over the Dominion, from Halifax to Victoria, to join the Japanese army as volunteers in the event of hostilities with Russia. The majority of these men saw service in South Africa and are drawn from commissioned and non-commissioned officers, engineers, etc. I am sorry to say there will be no chance of the Japanese Government accepting any volunteers from Canada. Our army is a conscriptive army, and no foreigners can serve. I need hardly say, however, how gratified my Government is at the friendly feeling evidenced in these applications for service."

These were the words of Mr. T. Nosse, the Consul-General of Japan, to the Star today. Now that the tension between Japan and Russia is strained almost to breaking point, the views of Mr. Nosse of the subject of Japan's preparedness for the struggle that would appear inevitable are timely and to the point.

THE POSITION OF JAPAN.

After outlining the raison d'etre of the trouble between the two countries, Mr. Nosse spoke of the position of Japan after the China-Japan war. Corea was the cause of that war, and since that time the independence of the country under the guiding hand of the Japan Government had been maintained. Then came the Russians and pounced down upon Manchuria. Finding they were successful in that seizure, they laid covetous eyes on Corea. Corea was the key to the coast line of Japan, and in order for the latter country to maintain her independence as a nation it was necessary that the Russians should not be allowed to have one inch of Corea. Having gained such a stronghold in Manchuria, the Russians were of the opinion that it was only necessary to keep at it in order to get into Corea. Japan, however, was determined that so far as she was concerned (and as she was the most interested party her views should have some weight), Russia should not only give Japan certain privileges in Manchuria, should leave Corea alone once and for ever.

Regarding an outbreak of hostilities Mr. Nosse said that Japan would have been perfectly justified in going to war with Russia last summer. She was, however, held back by England. Matters had gone to such a length now that Mr. Nosse was of the opinion that war could scarcely be avoided. "It depends on the strength of the peace party in Russia," he said with a smile. "At the present moment the war party would appear to be in the ascendant. Their policy is that if Japan is to be beaten she must be beaten now. She is a rapidly growing country and if we do not crush her now she will soon get too big for us."

FRANCE AND BRITAIN BEST OF FRIENDS

Mr. Henry Norman on Visit of English Members to Paris

GOOD WILL MANIFESTED

Excellent Feeling Credited to the Good Taste and Tact of King Edward

Montreal, Jan. 7.—Hon. Henry Copeland, Agent-General for New South Wales in London, is at the Windsor. Mr. Copeland is on his way to London after a six months' leave of absence in Australia.

Speaking of the fiscal campaign of Mr. Chamberlain, Mr. Copeland said:

"Although the Australians are a conservative people, and always debate and weigh well any public question before giving it their endorsation, I believe the people, as a whole, are favorably impressed with the Chamberlain policy. The Federal Government, prior to the recent elections, was likewise in sympathy with the movement."

Of the recent elections in the Commonwealth, Mr. Copeland says he has been endeavoring to ascertain the exact standing of the parties in the Parliament of Australia ever since he left Vancouver, but to no purpose. He saw that the labor party made strong gains, owing to the assistance of the newly enfranchised women voters, but that is all. He thinks that if Canada is desirous of cultivating trade relations with Australia, as she appears to be, an attempt should be made to secure a little news from time to time.

The Agent-General then described the splendid harvest which had followed four or five years of drouth and general depression, and he aded that all sections of the Commonwealth were now in the boom.

Hon. Mr. Copeland was born in England, but went to Canada about 47 years ago. He was in political life in New South Wales prior to removing to London, and held office in three different Administrations.

He says that up to the present time the Commonwealth has not appointed a High Commissioner in London, although it is probable she will do so sooner or later. Although some little friction has taken place in working out the new constitution, Mr. Copeland is convinced that in time the Commonwealth will be a success. No decision, says Hon. Mr. Copeland, has yet been reached as regards the selection of a seat for the Federal Government. Tumut was chosen by one branch of the Parliament, while Bombala was selected by the other, and it may be some time before the capital is finally located. In excusing the delay Hon. Mr. Copeland said that the same thing was experienced before in the choice of Ottawa and Washington as capitals of Canada and the United States.

Hon. Mr. Copeland will visit Ottawa and Quebec before leaving for St. John or Halifax, en route for London. He is generous in his praises of Canada.

THIRTY PEOPLE KILLED IN HEAD-ON COLLISION

Mexico Express Struck Cattle Train While Going at Thirty Miles an Hour

Kansas City, Mo., Jan. 6— The Rock Island's California and Mexico express, which left Chicago on Monday night at 11.30 for the west, collided head-on today at Willard, Kansas, 14 miles west of Topeka, with a cattle train. The whole train was demolished. Thirty persons were killed, and every person on the train was injured.

A relief train left Topeka for the scene returned to that city at 7.30 this morning with the dead and injured.

The train, which left Kansas City at 10 o'clock last night, was twenty minutes late, and was running at the rate of 30 miles an hour. The train carried many persons for Oklahoma, who had taken advantage of the homeseekers' excursion rates. It also contained through sleepers and chair cars from San Francisco and Los Angeles.

The wreck was one of the most serious that has happened on the Rock Island system in years. Between Kansas City and Topeka the Rock Island uses the tracks of the Union Pacific.

Occurring at a small station, with few facilities for aid, and in the darkness, there was much delay in carrying the dead and in caring for the hurt. The train was composed of a combination baggage and mail car, a regular baggage car, a smoker, a tourist sleeper and a standard sleeper.

H. G. Parson, a reporter of the Topeka State Journal, who was on the wrecked Rock Island train, arrived in Topeka at 8 o'clock this morning, after driving overland from the scene of the collision. Parson escaped with slight injuries, while two persons on the seat in front of him were killed.

IT'S UNCLE SAM'S TURN TO MAKE SOME MOVE

Wants Reciprocity with Canada and Knows That Canada will Not Seek It

Chicago, Jan. 6— The Record-Herald says, editorially, under the heading "It is Our Turn to Move",

That the free interchange of products between the several Provinces of Canada and of the States of the Union is the manifest dictate of nature and of national interest is now generally conceded by all fair-minded Americans who are capable of viewing the question in its broader aspect and who have no personal interest at stake in maintaining a commercial barrier between the two countries.

The great mass of producers and consumers are therefore substantially agreed on the desirability of reciprocity with Canada. The only question now is, Who shall make the first move toward the convention that shall secure the same interchange of products between Manitoba and Minnesota that prevails between Minnesota and Illinois.

In the mind of Goldwin Smith there is no question as to who should make the first move. In an article in Monday's Record-Herald the distinguished economist says; "it is your own turn to make the advance, and being manifestly the greater power, you can do this without danger to your dignity." In this article the unspeakable folly of longer maintaining this tariff wall between contiguous States and Provinces is most luckily and forcefully presented. Protected interests on both sides will demur to any proposals looking to a reopening of the reciprocity question. But, as Professor Smith points out, the objection to these interests would not prevail against a reciprocity treaty if the United States Senate were made to understand that the interests of the people plainly pointed the other way.

Why should the farmer of Illinois be ruined by commercial union with Manitoba any more than he was ruined by the opening up of Minnesota and Dakota? asks Mr. Smith. In summing up the arguments for Canadian reciprocity the writer makes it very plain that if Canada is to be shut down from the market of her own continent she must produce for a European market, and "her face, politically, as well as commercially, will be turned to the same quarter as her trade."

Ottawa, Jan. 6.—The Province of Quebec through a deputation, which waited on Sir Wilfrid Laurier to-day, asked that it be given one representative in the two important commissions shortly to be formed, that is, the one for the construction of the eastern division of the new transcontinental railway and the other a permanent tribunal under the presidency of Mr. Blair to regulate the railroad traffic of the Dominion.

"There are two Provinces especially interested in the construction of the new highway from the prairies east, that is, Ontario and Quebec, and we think," remarked one of the deputation, "that aside from all other considerations, Quebec has a right to have direct representation on this Board."

As regards the commission to regulate and control the railway business of the country, these representatives of Quebec claim that there should be one commissioner familiar with the French language and the civil code which is peculiar to the Province of Quebec. The deputation did not submit any names, but confined themselves to the discussion of the principle. The Premier promised that their views would be duly considered.

The deputation was composed of Senators Dandurand and Beique, Rodolph Lemieux, and Victor Geoffrion, M.P.'s and Hon. Lomer Gouin, Commissioner of Public Works for Quebec. They were accompanied by Hon. Raymond Prefontaine.

Ottawa, Jan. 6—Is Germany seeking a re-opening of negotions with Canada in the hope that the latter may modify its present tariff on German imports? Such an inference may be drawn from the fact that Herr Franz Bopp, the German Consul-General at Montreal, came to Ottawa and had a long interview with the Prime Minister. Sir Wilfrid was asked whether the interview meant that Germany was willing to adopt a more conciliatory policy towards Canada, and replied that he could make no statement, as the matter was confidential. Nevertheless, it is firmly believed that Herr Bopp has given the Prime Minister to understand that Germany is willing to reconsider its present tariff policy towards Canada.

IMPRESSED WITH PREFERENCE POLICY

Hon. Henry Copeland Thinks That Australia Would Favor It

PARTIES IN COMMONWEALTH

It is Hardly Possible to Ascertain Their Exact Standing at Present

Montreal, Jan. 7.—Mr. Henry Norman M.P., for Wolverhampton in the British House, newspaper man, traveller, publisher and editor, who is at present in the city, a guest of his old friend, Mr. C. R. Hosmer, said today to a reporter that never, even in the days of the Crimea, has there been anything like the good feeling which now exists between the people of Great Britain and the Republic of France.

The speaker was a prominent member of the British Parliamentary party which visited the French capital in November of last year. It will be remembered that at that time a party of 170 people, made up of members of the British House, their wives, daughters and sweethearts, returned the visit of the French members to England, which occurred in July last.

Going back, however, to the beginning of the present movement which has tended to an international good-fellowship between the two nations, one is compelled to recall how King Edward acting upon instinct rather than upon precedent, took the first step, when he crossed the English channel and landed on the shores of France, almost alone and unattended.

Then later came the visit of President Loubet to England, and Mr. Norman tells how the little President of the French Republic was cheered in the streets of London in a manner which would be accorded to few if any of any of the foreign rulers.

Next came the visit of the members of the French House to London and then followed as a natural sequence of events the return visit of the Britishmen already referred to.

THEY OWNED THE TOWN.

To use an Americanism, the members of the British Parliamentary party literally owned the town when they got over to old Paris, so states Mr. Norman. There were dinners and receptions. On the streets the members of the British House were cheered by the populace. The public buildings were decorated in honor of the occasion; scores of carriages were placed at their disposal, and even the French newspapers held receptions for them, and got up special momentos on the occasion.

Altogether the entire party were upward of a week in France, and at the expiration of that time they were loath to leave. As a matter of fact, a considerable number did stay on and made a trip through France, meeting everywhere the same spirit of good-fellowship.

"Here are two peoples," said Mr. Norman, "who have for centuries had the absurd notion that they were hereditary enemies, and now they have become the best of friends, all through the excellent judgment and honest good sense of King Edward VII."

London, Jan. 6.— Dr. Parkin, who has recently returned from touring Australia in his capacity as agent of the Rhodes scholarship scheme, speaking last night, said that New Zealand and Australia were enthusiastic over the Rhodes idea, but were afraid that the graduates would not return home. Dr. Parkin has replied when this objection was raised, that they were scattering the best over the Empire, like, for instance, Prof. Rutherford, a New Zealander, of McGill, who has made a famous discovery in connection with radium.

South Africa, Rhodes' own home, curiously enough, thought the least about the scheme. Mr. Carnegie did not believe that Americans would care about the idea, remarking, "Our young men want to make money."

"The labor party," he says, "is a menace to Australia, and the only safety lies in a coalition between Premier Deakin and Mr. Reid, leader of the Opposition. The Australians used to say that Canada was slow, but now they are eager to follow her."

A Dissolving View.

Lord Rosebery, speaking to the Scottish Liberal Club at Edinburgh, called the Government "a dissolving view."

Quoting the Chamberlain and Deakin telegrams, he asked where were the proposals of Australia and New Zealand. The Imperial crisis had now dwindled down to the interests of certain gentlemen who had kindly formed themselves into a tariff commission.

Unionists United.

The Duke of Marlborough, speaking at the opening of the Colonial Products Exhibition at Liverpool yesterday, said Liverpool had taken the first step in the direction of proving the value of colonial products. The exhibition showed that the Empire could be self-sustaining.

Sir Edward Grey, speaking at Carnarvon yesterday, said it was hopeless to talk of a zollverein within the Empire, as the colonies would not have it. Preferential tariffs might mean the raising of the existing tariffs with the colonies. The proposed commission would not proceed on scientific lines, but would be subjected to political pressure. The policy of Messrs. Chamberlain and Balfour was not free trade within the Empire, but protection at home.

[illegible] View.

The Australian Federation of [illegible] passed a resolution declaring that any preference given to British goods should be as an acknowledgment of the protection afforded by the British navy, and not with a view of securing preferential treatment of colonial produce in the Motherland.

WEATHER NOTES

Thursday—Fair and milder

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,
The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says. Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. I would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply Dr. S. Goldberg 208 Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

[illegible] paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at [illegible] per month, and to outside points at $3 per year strictly in advance.

PETERBOROUGH, JANUARY 7, 1904

ECONOMY OF GOOD ROADS

William E. McClintock, chairman of the State Highway Commission, gives some interesting testimony regarding the "good roads movement" in Massachusetts. "We have had scores of men before us," he says, "who have testified, of their own volitions, that they are today doing with one horse the work on the roads for which formerly two horses were necessary, and with two horses what formerly required three or four, and that they are hauling from 50 to 100 per cent. more load. Consequently, for the farmers and all drawers of freight over the state highways, there is a large actual saving of teams. Then there is a material saving of time, because the loads are drawn at a perceptibly faster rate over the easy grades and smooth surface of the state roads than over the steep grades and uneven surfaces of the old style of dirt roads. In exceptional instances the saving is great." In the cost of hauling freight and farm produce, the chairman estimates that there is a saving of 25 per cent. of the former cost of every farmer and freight teamster who uses the roads habitually. This does not include the saving on harness, which is also a material item."

In an article treating of the new methods and improved machinery imported into the work, to reduce the cost and increase efficiency, it is remarked that formerly gravel roads were refaced by hand. The gravel would be spread on to a depth of from three to six inches. Really a new road would be built. This would require months for compacting, and the road would not be in good condition until this process was somewhat completed. Now a machine is used for distributing the gravel. The new treatment can be given for the small cost of $10 to $15 per mile. The machine is used also for spreading sand. On the surface of macadam roads the sand is better binding material than the dust from the stone, for it is not so liable to be blown off by winds. With the machine a cubic yard of sand can be distributed in a minute and a half.

The commission has also introduced a system of using the road material which is near at hand at all towns. In the case of heavy clay roads, the plan has been tried of digging out the centre to a depth lower than the frost will reach. The cut is gradually less towards the sides, so that there is a V-shaped trench. This is filled by coarse field stones, or stones from useless stone walls in the vicinity, to a depth of about eighteen inches in the centre, and six or [illegible] at the sides. The best material which is conveniently near is used for covering. If good gravel is not to be had, then earth is put on. It will work down only part way, leaving a practical drain at the bottom. Such a road is not acted upon by frost, and the cost varies from $800 to $1,800 per mile, probably not averaging over $1,000, while the average cost of macadam is about $5,000 per mile. From twenty-five to thirty miles of this rough stone road have been built this year, distributed all over the state.

The people of the towns, seeing what has been done under the supervision of the commission, are doing similar work at their own expense. So the system of improved roads has been extended greatly. While the state has built a little over 500 miles, the towns have built on their own account a little over 800 miles. This year Barnstable County, which is one of the poorest counties in the state, comes forward with a total of about $46,000 appropriated by the several towns, for connecting the system of state roads averaging fifteen cents per square yard. Such roads last about three years, making the average cost per year 5 cents per square yard. The stone roads which the commission have built cost one cent per square yard per year, against five cents. Such roads will run, as a rule, twenty-five years without requiring a thorough resurfacing. When they are resurfaced the cost is about twenty-five cents per square yard. Distributed over twenty-five years this makes an additional cost of a cent a yard. So the total cost of maintenance of the stone roads is only two cents per square yard per year, against five cents for the clay roads. That makes a total saving of $264 per mile a year, or about $6,600 per mile for twenty-five years. Thus the saving in the cost of maintenance of a stone road over a clay road in twenty-five years equals the entire cost of the original construction of the stone road.

EDITORIAL COMMENT

Canadians who want to help Japan are hardly to be blamed. This weather is calculated to drive people to any old place when something hot is going on.

It will be noticed that Russia doesn't put a special delivery stamp on her reply to Japan, for fear that it'll get there before the navy.

The dentists are going to hold a banquet at Quebec. An especially toothsome repast is expected.

Russia shows its humanity by showing a far greater disposition to "kill time than to kill Japanese.

A particularly fiendish touch to the zero weather was the discovery of a plumbers combine in Toronto.

Chronic Billiousness

IN ITS TRIAL FOLLOW HORRIBLE DREAMS, DESPONDENCY MELANCHOLY AND GENERAL WEAKNESS.

The proper elements needed to promote good digestion, regularity of the bowels, correct action of the kidneys and liver, must be supplied when a bilious condition of the system is once established.

Ferrozone can't help but do this. It gives the stomach perfect rest, and allows you to partake of and enjoy the variety of food that is necessary for maintaining health. One Ferrozone tablet taken after each meal will separate the nutritious portions of the food from the waste, which is carried off, thus preventing and curing constipation and its attendant evil, piles.

Being a potent blood purifier, Ferrozone cleanses the crimson flood of all bile and impurities, and as a result the complexion is restored to a rosy, healthy hue, and the dark circles under the eyes and the deathly pallor of the cheeks go away never to return.

Taken for disorders of the stomach, commencing with billiousness and ending with derangements of the liver and kidneys, Ferrozone achieves marvelous results. It is at the same time a tonic and stimulant, and a regulator of all bodily functions, and chronic sufferers should not fail to give it a fair trial. It will do them good without doubt, and if the malady is curable it will yield to Ferrozone.

With the use of Ferrozone appetite will be better, the blood made rich and pure, sleep will be dreamless and sound. Your muddy complexion will be cleared and beautified, your eyes will acquire a new brightness, and as your spirits rise and good health returns, you will bless the day you learned the secret of Ferrozone's power.

If you think you need Ferrozone go to the nearest drug store and procure a supply. Refuse a substitute and insist on having the genuine Ferrozone, which costs 50 cts. per box, or 6 boxes for $2.50. By mail from N. C. Polson & Co., Kingston, Ont.

DOWIE'S LATEST SCHEME

San Antonio, Tex., Jan. 6.—John Alexander Dowie, the founder of Zion City, is not going to Australia on this trip. He has arrived here to investigate Matagorda Island, on the Texas coast, as a site for a new "Eternal City."

Dowie's plan is to enter upon extensive stock farming and factory work. He has an option on the island which embraces thirty thousand acres.

Dowie admits that he may bring his entire following to the new settlement.

GUARDS SENTENCED

Calgary, Jan. 6— Commissioner Perry of the North-West Mounted Police yesterday sentenced the three constables who were on duty when the convicted murderer Cashel, made his escape. Constable Piper, who had control of the guardroom, was given a year, and Constables Phillips and Leslie were each sentenced to six months' imprisonment. All sentences were with hard labor. The constables were also dismissed from the force.

THEATRES MUST CLOSE

Chicago, Jan. 6—Mayor Harrison has vetoed the plan proposed by some theater managers to open their play houses and admit patrons to the main floor only.

AN IMPORTANT REQUISITE.

The Right Way to Make an Introduction.

An important requisite in good breeding is to know how to acknowledge an introduction and to know how and when to make one.

A hostess always rises and extends her hand with some cordial expression of welcome to the guest who is presented. A man is introduced to a woman in this manner: "Mrs. White, may I present Mr. Reed?" The lady's name is always mentioned first, and the man presented to the woman not vice-versa. When one person is introduced to another it is not necessary for the person seated to rise. An inclination of the head, repeating the name of the one presented, as "Mrs. Blight," "Mr. Reverence is quite sufficient.

When a very old lady or an old gentleman is introduced it is more courteous to rise and acknowledge the introduction. When a hostess is introducing two guests it is well for her to make some remark which will serve to give each one some slight peg on which to hang their conversation. Miss Green, may I present my brother's friend, Mr. Duer? He has just returned from the Philippines. I am sure you have heard us speak of him." This averts the embarrassment of sounding the athletic young man on Wagner or boring the intellectual young woman with the subject of golf.

A married woman should introduce her husband in this manner: "Let me present my husband, Mrs. Mackey? I believe he has not met you—Mrs. Mackey, John." Women are introduced by this form: "Mrs. Pell, you know Mrs. Livingston?" It is ceasing to be the custom to shake hands when introduced, though when one wishes to seem very cordial one may do so with perfect propriety. Off-hand introductions are very bad form. A man should, if possible, always ask permission of his woman friend before introducing any other man.

The Matrimonial Trunk.

Have you a "matrimonial trunk?" A collection of buds which burst through the petals of seclusion into the garden of society at the beginning of the present season is responsible for starting a fashion which will naturally have many followers.

It came about in this way, according to the explination of one of the young women. The marriage of a friend had led to a revelation in the number and variety of "pretty things gathered by the bride in anticipation of the change in her state. The young woman who wasn't going to be married—at least not just then—was all admiration. When she had told her friends about the lovely things that Mabel had she wondered, somewhat doubtfully, if she would have as nice things at her own wedding.

Her own speculation gave her the idea. "Why of course I can have just as fine," she said suddenly, "and so can all you girls. I'll tell you what we'll do. We'll start to fill a matrimonial trunk."

"What's a matrimonial trunk?" asked the others in chorus.

"That's an invention of the spur of the moment," returned the proposer. "This is what I suggest:—Let each girl set aside from among her trunks one particular trunk which is to contain only those things which are to be part of the trousseau."

"What trousseau?" again demanded the girls. "None of us is engaged."

"Of course not," answered the inventor. "But we will be in the course of time. Such things have been known to happen, you know. Well, when we get married we will not be without finery. If you don't want to use a trunk for the purpose, why, you might take a box from a dry goods store, line it with rose-colored silk and cover it to match the tint of your room.

"Into this box or trunk put now and then a bit of finery. I know what I shall start mine with—that beautiful sandal wood fan I got for my birthday. Then a fine lace handkerchief once in a while, a pair of slippers, or something like that."

"Yes," put in another of the buds. "And I shall put away that elderdown dressing sacque mamma gave me the other day. I haven't worn it yet, so it will do nicely."

All the others discovered they had something suitable to the purpose, and so the fad of the matrimonial trunk was fairly started. Since the decision was made the girls have been adding to the collections, and they are now in an advanced stage of perfection. Every three months it is the intention of the young women to hold a private exhibition, at which each will be given an opportunity to view the progress made by the others.

The matrimonial trunk is now a thoroughly established institution in certain quarters. The girls, when they get a new piece of finery, tell each other they have something more for the "m. t.," as they have dubbed the receptacle.

Stewed celery is an attractive dish and one easily made. The celery is cut into small pieces and then stewed in a little water until tender, when milk and butter are added. Let it come to a boil and season with salt and pepper.

Coal is worked so easily in China that in Shansi it sells at less than 25 cents per ton at the mines.

[illegible] physician just graduated from the medical school was asked about his plans. "I am to be a specialist on the nose." "Ah!" asked his bright interlocutor, "which nostril shall you treat?"

"Didn't you have a pleasant voyage?" he asked. "Oh, yes," replied Miss Greenblood, "except for the vulgar trade winds we encountered."—Philadelphia "Ledger."

EVERYBODY READS THE TIMES.

WISE SAYINGS

The art of quotation requires more delicacy in the practice than those conceive who can see nothing more in a quotation than an extract.—Isaac Disraeli.

We Germans fear God, but nothing else in the world.Bismarck.

History is philosophy teaching by example.—Lord Bolingbroke.

Four hostile newspapers are more to be feared than a thousand bayonets.—Napoleon.

RULES OF POLITENESS

1. To be polite is to have a kind regard for the feelings and rights of others.

2. Be as polite to your parents, brothers sisters and schoolmates as you are to strangers.

3. Look people fairly in the eyes when you speak to them or they speak to you.

4. Do not bluntly contradict any one.

5. It is not discourteous to refuse to do wrong.

6. Whispering, laughing, chewing gum or eating at lectures, in school or at places of amusement is rude and vlugar.

7. Be doubly careful to avoid any rudeness to strangers, such as calling out to them, laughing or making remarks about them. Do not stare at visitors.

8. In passing a pen, pencil, knife or pointer, hand the blunt end toward the one who receives it.

9. When a classmate is reciting do not raise your hand until after he has finished.

10. When you pass directly in front of any one or accidentally annoy him say: "Excuse me," and never fail to say: "Thank you" for the smallest favor. On no account say "Thanks."—School rules of Santa Barbara, Cal.

Harris Cohen, the Baxter street clothier, whose recent death revealed the fact that the money he had made in business had all been lost in horse racing, was anything but an Irishman, yet frequently he made bulls.

One of his bulls concerned a horse he had just bought. A man said this horse was a poor one—said it could not compare with a certain animal of his own.

"Rubbish!" Cohen retorted. "Rubbish! Why, that horse of mine can stand still faster than yours can gallop."

GUARDIANSHIP NOTICE

In the matter of Emma Laura Legros, Joseph Armand Legros, John Albert Legros, and Mary Ladouiska Legros, infant children of the late Charles Legros, in his lifetime of the Town of Peterborough, Barber and Tabacconist.

NOTICE is hereby given that after the expiration of twenty days from the first publication of this notice an application will be made to the Surrogate Court of the County of Peterborough for the appointment of Alphonse Tremblay of the Town of Peterborough, Mechanic, as Guardian of the above-named infants.

Dated the 23rd December, 1903.

A. P. POUSSETTE,
Solicitor ad litem
for the said Alphonse Tremblay.

ARE YOU A PRISONER?

THOUSANDS of men are prisoners of disease as securely as though they were confined behind the bars. Many have forged their own chains by the vices of early youth, exposure to contagious disease, or the excesses of manhood. They feel they are not the men they ought to be or used to be. The vim, vigor, and vitality of manhood are lacking. Are you nervous and despondent? tired in the morning? have you to force yourself through the day's work? have you little ambition and energy? are you irritable and excitable? eyes sunken, depressed and haggard looking? memory poor and brain fagged? have you weak back with dreams and losses at night? deposit in urine? weak sexually?—you have

Nervous Debility and Seminal Weakness.

Our NEW METHOD TREATMENT is guaranteed to Cure or No Pay. 25 years in Detroit. Bank Security. Beware of quacks—Consult old established, reliable physicians. Consultation Free. Books Free. Write for Question Blank for Home Treatment.

Drs. Kennedy & Kergan,

148 SHELBY STREET. DETROIT, MICH.

$400,000 was Produced from the Properties

now owned by the

NEW YORK-GRASS VALLEY GOLD MINING CO.

above the 400 foot level, under the old management. During the last year the mine has been thoroughly opened up. New and richer ore bodies discovered. Large reserves now in sight.

Large and thoroughly complete Merralls mill now working. Besides this, six quadruple discharge stamps are now being installed. Each stamp will increase the present output at least 20 tons daily. The mine is now producing steadily and increasing output daily. As soon as the new stamps, now being installed, are running, the output will reach at least 135 tons daily. At a moderate estimate the monthly income should exceed

FORTY THOUSAND DOLLARS

During the coming year it is the intention of the management to install more stamps so that the output can be brought up to FIVE HUNDRED TONS DAILY.

Quick dividends are positively assured, and will most surely be large and continuous. The present Board of Directors is composed of competent business and mining men, who are giving their personal attention to the affairs of the Company.

The price of Stock will be advanced to 75 Cents per Share almost immediately.

This is your last chance to purchase into this producing mine at . . . . 30 CENTS PER SHARE for cash or instalments. We have only a limited amount left at this figure, therefore **send your orders in early.**

REMEMBER IN BUYING THIS STOCK YOU ARE BUYING

INTO
- A present producing property.
- A mine that will pay large and handsome dividends, as the reserves of ore on hand warrant.
- A property that has 600 acres, only a small area of which has been mined.
- A proposition that can mine its ore cheaper than almost any other mine in the world, owing to free water power. Cost of mining and milling not being over $1.00 per ton

We have just received the following telegram, under date of November 24th:

KAYE, DE WOLF & CO., New York City. Grass Valley, Cal., Nov. 24th.

Mill now running on medium grade ore from reserves. Latest mill returns forty ounces amalgam from batteries alone since sixteenth. The Perrin ore chute on fifth level has been reached. Expect the ore on this level will pay much better than any yet opened up. The bottom of the shaft is also in good ore. Recent developments fully justify the expectations that have been formed. All who visit property report a large dividend payer soon.
J. W. HALSNER, Secretary.

Send for prospectus and full information to KAYE, DE WOLF & CO., 39 Cortlandt St., New York, or to PETERBOROUGH BROKERAGE CO., Canadian Fiscal Agents.

IS THERE CERTAINTY IN MINING

The Idaho Richmond Gold Mines Company says Yes

AND HERE IS THE PROOF

1st—By having a property located in a camp that has produced over sixty million dollars worth of gold.
2nd—By having a property that has produced over one hundred and fifty thousand dollars to the former owners.
3rd—By having over two thousand feet of development work done on the property in the way of tunnels and drifts.
4th—By having four different ledges on the property, varying in width from three feet to thirty feet, besides several smaller ones all rich in free gold.
5th—By having now on the dumps are estimated to be worth over twenty thousand dollars, and all taken from development work.
6th—By having large amount of stoping ground opened up for the taking out of large quantities of ore.
7th—By being able to ease a mill that is located within two thousand feet of the property for the treatment of the ore, which will be done as soon as a small amount of the stock is sold to help defray the expenses of getting ready.

There is no promoter or gift stock, and there is yet over six hundred thousand shares in the Treasury.

We can prove to your satisfaction that we have a mine, and it will pay you to write for information, if you are looking for an investment that will pay you good returns.

A BUSINESS MAN'S LETTER.

Wm. Thomson, Esq., of Orillia, Vice-President Standard Chemical Company of Toronto, Tells of a Visit to the Muskoka Free Hospital for Consumptives.

GREATLY IMPRESSED WITH WORK BEING DONE.

Personally Raises Several Hundred Dollars to Help Lessen the Load of Debt.

There can be little doubt that the National Sanitarium Association is handicapped in its great work for Consumptives in the fact that its two institutions in Muskoka are far away from any large centre of population. Few people have an opportunity to see for themselves the magnificent work that is being done.

These hospitals are away from the public eye. Any, however, who do visit them, are united in their commendation of the splendid appointments of the place, and, best of all, of the real joy and hope that is being brought to many suffering ones.

We are glad to have the opportunity of publishing the following letter from Mr. Wm. Thomson, of Orillia, one of Canada's best known lumbermen, which tells what he has seen himself. It reads:

Orillia, Ont., November 2, 1903.

W. J. Gage, Esq.,
Chairman Executive Committee
National Sanitarium Association,
Toronto, Ont.

My Dear Mr. Gage,—

I have much pleasure in enclosing herewith cheque for One Hundred Dollars ($100.00) from the Tudhope Carriage Company of Orillia, a donation to the Free Hospital for Consumptives at Gravenhurst. Please acknowledge this to the Tudhope Carriage Company in the usual way.

I have written to a number of my friends, to try and get them interested in this good work. I hope to be able to send you further donations. I have written my friends a personal letter, something similar to the following:

> "Last week I paid a visit to the Free Hospital for Consumptives at Gravenhurst. I met some of the management there, and promised to try and interest some of my friends in this work.
>
> "I might say there were 49 patients there last week, all poor people, most of them without a dollar in the world, and suffering from the dreadful disease, Consumption. There are many sad stories, and I know I have thought a great deal about the work of the institution ever since my visit there. I do believe it is worthy of assistance, and we who have health and the necessaries of life should encourage this work along.
>
> "I understand the expenses lately have been double the income, and unless the management meet with more encouragement, I am afraid the work will have to be curtailed. I know you have many calls, but I do wish you would give this matter a thought, and, if possible, assist. I have written to two or three confidentially, and hope to be able to collect some more for this work. Should you not feel like contributing a donation, remember this request, and your reply is just between you and me, and strictly confidential.
>
> "I might mention, to show that I have confidence in the work, I have already given a donation of $100.00 and two row boats to the Free Hospital this year, and intend to give another $100.00 before the end of the year."

Sincerely yours,

Wm Thomson

Sir Wm. R. Meredith, Kt., or Mr. W. J. Gage, Toronto, will receive and acknowledge any contributions made.

Don't Put Off STOVE BUYING

and when you decide to buy, be sure to buy stoves with a record at Adam Hall's. The Pussy Willows.

Kurt was a dear little chubby fellow who had his father's cane, pretending to make music with it, as though he were a musician and was playing the violin.

"The May is trav'ling hither,
The May is at the door.
The garden and the meadow
Will bloom again all o'er."

Then his little sister Marie sighed and said: "Yes, yes, you play that tune all the time, but it does not bring the spring; it comes and comes not," and then she cut the doll's apron which she was making too short, so both of the children were now sad.

"Yes, spring doesn't come yet," said the little fellow, as he looked out of the window.

Just then father appeared at the door and said quite softly: "It has already come, but it's still in the forest. Shall we go look for it?"

"Hurrah, hurrah! yes, yes!" said both the children. Marie buttoned her little brother's coat, then put on her own warm cloak, and soon they were ready to start. They walked through the streets quite like staid older folks, but soon as they had reached the end of the town Kurt rode upon his father's walking cane and the little Marie danced and sang:

"Right foot, left foot, heel and toe,
Dancing merrily, here we go."

Now the trees seemed quite near. Nearer and nearer they came, yet they did not seem to be green. "Where is the spring now?" they asked. The dried leaves which had fallen from the branches when Jack Frost had come down from the North with his cold, icy wind and shaken them rudely, rustled as they walked through them. The children took their father by the hand and went quite near, until they stood under the trees. The soft spring breeze wafted above them, and it seemed as though they might be whispering to each other. Suddenly Kurt began to run fast as he could, and then he stooped down and cried: "Papa, papa, see what spring has brought."

His little sister ran to his side, and what did she see? From under the dry brown leaves there peeped out a lovely little flower, white, soft and clear as moonshine.

Yes, indeed, spring has brought this. Here was a little flower and there was another. Each child had as many as he could pluck. "Lovely windflower that [illegible] woods," said the father, [illegible] they walked on. Suddenly they all stood still and listened. A bird was singing, half joyously, half sadly, but oh! so sweetly. "Why does the little bird sing so sadly?" asked Marie. "Because it is hungry," said Kurt.

"No," said papa, "that isn't the reason, my child. It is because it is lonely and misses the roof of leaves where it could build its nest; that is the reason it utters its plaint and calls the spring. But now we will look for the pussies for dear mamma."

"Little kittens," cried Kurt; "but we have no sack."

"I will carry them in my apron," said Marie. "And I in my hand," said papa.

Then the children laughed and thought to themselves, but they will cry "mew." Papa stepped down into a hollow and said, "Now I have 'em."

When he came up again he had three tiny twigs in his hand. "But where are the little kittens?" They sat on the twigs in little gray furred coats, and out of each peeped a tiny leaf. They were pussy willows which the spring had brought. Dainty little things! "Each shall have a little kitten; hold your hands," said papa, sportively, "and now we'll go home."

"Did you find spring?" asked mamma. "Yes; shut your eyes and hold your hands," gleefully cried the children. "Now look!" And there in her hand was a bunch of fresh, sweet spring flowers.

"Now I know, too," said dear mamma, "that spring is here."

Country Wit.

any one who has ever been rash enough to attempt to make sport of the street gamin of a large city knows only too well what a fatal mistake it is, but one is not so well prepared to be made the victim of his own joke by an apparently unsophisticated country boy.

A lad of fifteen was driving along a country road, taking a load of calves to market, when he chanced to meet a company of young folks who were evidently out for a pleasure excursion. The young men of the party, thinking to amuse themselves and their companions at the boy's expense, began to imitate the bleating of the calves.

But their merriment was of short duration, for without a moment's hesitation he called out to his would-be tormentors, as the vehicles were passing, "Oh, I knew what you were before!"—Atlanta Constitution.

A Good Dinner Made De Blowitz Talk.

"Getting what you want from kings or statesmen," De Blowitz said to me once, "is all a matter of dining with the right people."

Never a truer word was said.

De Blowitz, himself, who knew more of Europe than all Europe put together—who checkmated Bismarck and "cooked Count Munster's goose"—did most of his work at the dinner-table or in the ball-room.

In persuading him to write his memoirs I followed his precept. For over a year we smoked and talked or dined and talked—there in his marvelous home in the Rue Greuze—until somehow or other he began to write his reminiscences. He had written four or five papers; I do not know whether he would have finished them or not had not the "Times" stepped opportunely in.

One morning I found him sitting in his bedroom by the window that looks out on the little Burying ground of Passy. He was wrapped in his old, red, wadded-silk dressing gown; his legs were crossed under him and he looked—the huge, short, egg-shaped man—more like a little Buddhist idol than ever before.

"Well, I've left the 'Times,'" he said; there was a long silence, and then he added: "They turned me off like an old horse."

When this remark was telegraphed to London the "Times" denied that it had turned its great men off "like an old horse." I do not know what special kind of turning off that is, but the intrigue that resulted in De Blowitz's withdrawal was a nasty piece of business, and he used the words I have quoted.

His dog "Fly," fat and old as he, waddled up to him and lay by his chair; and so I left them—the old, outworn friends. In a few days he went to his country place at Les Petites Dalles on the Normandy coast; for the next few months the memoirs advanced rapidly. I made a short visit to New York, and, on my return to Paris, found a telegram inviting me to breakfast. When I went to his home, the next day, he had taken to his bed. He had been stricken down suddenly and was dying. Over his head hung a great crucifix of silver and ebony; the beads were in his hands. He looked up, however, with the grim humor that was always in him.

"I have 'Fly's' illness," said he, "but the worst of it is that they can't poison me to put me out of my pain."

Two days later he was dead.—Vance Thompson in "Success."

COST SOMETHING TO SQUARE.

The Next Time a Friend Wants an Accommodation He Gets It in Cool Cash.

A young bachelor met a friend—a married man—and poured out his tale of woe in something like this:

"I say, old chap, I'm up against it. Tomorrow is the birthday of my best girl, and, of course, I want to make her some sort of a present. To tell you the truth, I have promised her a gold belt buckle that she fancies, but the darned thing costs $25, and all the money I can rake and scrape just now is a beggarly $10. Now, if you'll let me have the other $15 I'll hand it back the next pay day."

The married man was not flush himself just then, but as he knew his friend was all right, and really wished to do him a favor, he said:

"I haven't the money about me, but I'll tell you what I'll do. I have an account at Blank's jewelry shop. Let's go down there and see the buckle. I'll buy it and have it charged to my account, and you can hand me the $25 any time before the first of the month, when the bill will be rendered."

The scheme worked to a charm. The young man with the "best girl" was delighted, and the buckle was carried off in triumph. That would have been the end of the episode doubtless, had not the wife of the lender got hold of the bill during the absence of her husband on a business trip. Judge of his consternation upon receiving a telegram in these words:

"Come home at once. I know all."

Taking the fast train he reached the city, took a cab to ride home, and, dashing upstairs three steps at a time, he entered his bedroom and found his wife in tears, while engaged in packing her trunk.

"You wicked, deceitful wretch!" she exclaimed, between sobs. "Who would have believed that you would deceive me in this way? I am going home to m—mo—mother! I wi—wi—wish I had ne—nev—never left her at all—boo-hoo-hoo!"

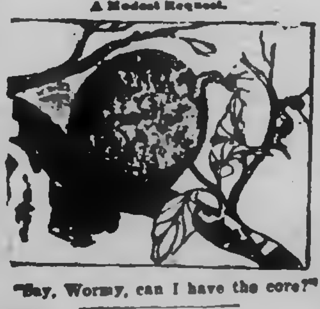
"Deceive you!" cried the frantic and bewildered husband, "what do you mean? Who, what—why, I never deceived you in my life."

"Oh, you needn't stand there and try to lie out of it! I know all! I know all about the hussy. Look, here is the bill for the gold belt you bought her! To think that it should ever come to th—this—boo-hoo-hoo!"

Then followed the copious tears and sobs. When the wife's grief had about spent itself in tears, the husband got an opportunity to explain, and it took remarkable eloquence and abundance of caresses to straighten matters out.

"But wasn't it a narrow escape?" said he, as he detailed the story. "Everything was against me. It had a suspicious look, certainly. After this, when a friend wants an accommodation he gets it in cool cash, if I have to go out and borrow it."—Cincinnati Enquirer.

A Modest Request.



"Say, Wormy, can I have the core?"

Incomes and Expenditures.

Statistics of the income and expenditures of the British people were presented recently by Sir Robert Giffen before the members of the British Association. The total income of the British Empire reaches the enormous sum of £3,130,000,000, from a capital of £22,350,000,000. For the United Kingdom the income is £1,750,000,000, from a capital of £15,000,000,000. The only nation that rivals the empire is the United States, with an income of £3,000,000,000. The leading figures as to expenditure in the United Kingdom are as follows:—Food and drink, £468,000,000, or 34 per cent. of the total; dress, £182,000,000, or 13 per cent.; house, £222,000,000, or 16 per cent.; national services (exclusive of education), £180,000,000, or 13 per cent.; miscellaneous (including £30,000,000 for education, £25,000,000 for church, £30,000,000 for locomotion, etc.), £120,000,000, or 9 per cent., and cost of distribution, £300,000,000, or 15 per cent.

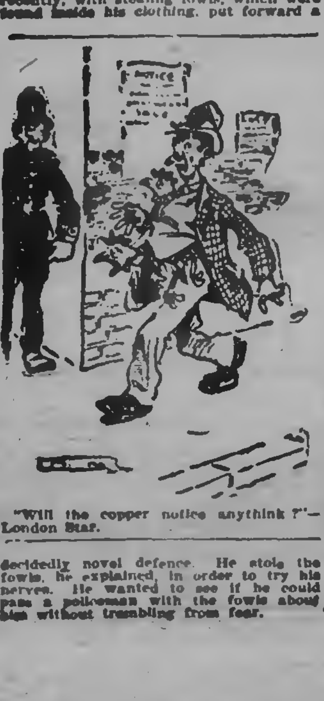
Lord Dalmeny Selected.

The Executive Committee of the Midlothian Liberal Association on September 30 selected Lord Dalmeny, elder son of Lord Rosebery, as Liberal candidate for the county, the Master of Elibank, the present member, having intimated that he will retire at the end of the present Parliament. Lord Dalmeny addressed the committee, giving an outline of his political views. He declared himself to be a Gladstone free trader, not a Chamberlain free trader.

He was unalterably opposed to a food tax; was in favor of licensing reform on the broad lines of Lord Peel's minority report; was in favor of a miners' eight hours bill, and thought it should be one of the first duties of a Liberal Government to reverse the injustice inflicted on English Nonconformists by the two education acts.

Trying His Nerve.

Joseph Wootton, who was charged at the Southwestern Police Court, London, recently, with stealing fowls, which were found inside his clothing, put forward a decidedly novel defence. He stole the fowls, he explained, in order to try his nerves. He wanted to see if he could pass a policeman with the fowls about him without trembling from fear.



"Will the copper notice anythink?"—London Star.

TO MAKE CONCESSION

Mr. Chamberlain Will Not Ask More Than We Get from Preference

London, Jan. 5— Mr. Chamberlain writing to the Agent-General of New South Wales, points out that the details of his Imperial preference scheme cannot be settled until all the parties to the proposed measure are ready to negotiate. He declared himself confident that nothing he will ask by way of surrender by the colonies will be more than a fair return for the large concessions he is prepared to give.

The London Evening Globe, commenting on this statement of Mr. Chamberlain says "The colonies will get a quid pro quo for all they may be asked to surrender."

The Westminster Gazette, commenting says "It is evident from Mr. Chamberlain's remarks that it is his intention to ask the colonies for something. This is another proof of the absurdity of the statement that there has been any offer whatever already made by the colonies."

A CITIZEN FORCE.

Sir Frederick Borden's Scheme Is In Every Way Practical.

London, Jan. 5.—The Pall Mall Gazette says that Canada's new military scheme proposed by Sir Frederick Borden is in every way practical, and is calculated to produce a highly trained citizen force with a second line behind it of partially trained men.

FOOLISH SLURS.

Chamberlain's Supporters Called Untruthful and Half Educated.

London, Jan. 6— Referring to the manifesto of Liberal Agent Millman at Ashburton, who refers to the supporters of Mr Chamberlain as "a set of unprincipled, untruthful and half educated men," the St. James' Gazette says these terms are applied to such servants of the Empire as Agent-General Cockburn, of Australia, and Agent-General Turner of British Columbia. Men who have made a name of fame and who hold great places in the British Empire are termed half-educated by a party hack.

CANADIAN LECTURING.

London, Jan. 6 — Professor Hamilton Archibald, of Montreal, who has been engaged by the Sunday School Union to lecture on art teaching, commenced his lectures yesterday to a large audience.

NEW RAILWAY OFFICES.

London, Jan. 5—The Canadian Pacific Railway Company will open their new offices in Trafalgar Square on Thursday. Lord Strathcona will perform the ceremony.

SHOPS FOR ST. THOMAS.

Wabash Railway Will Locate Works in That Town.

St. Thomas, Jan. 6— Mayor Maxwell yesterday received a letter from General Superintendent Robins of the Wabash Railway stating that the company would accept the city's offer to locate their Canadian workshops in this city.

TO THE AFFLICTED.

Dear Reader,—Are you a sufferer from any of the following ills: Lack of ambition, nervous exhaustion, ideas easily confused, irritability of temper, impairment of memory, despondency, general debility, liver not right, kidneys out of order, rheumatism, dyspepsia or indigestion, dizzy or fainting spells? Does your heart palpitate? Do you have smothering or sinking sensations, pimples, or eruptions of the skin, etc., etc.

If you are troubled as above, you can be cured by the use of Dr. Clarke's Wonderful Little Red Pills. A trial order of three boxes for $1.00 will convince anyone that these pills are truly wonderful. We are daily in receipt of letters bearing the highest testimony. We have not space to tell you all about them here, but will answer any enquiries as to their merits. Mrs. John Macdonald, Durham, N.S., writes us, "After taking two boxes of Dr. Clarke's Little Red Pills for indigestion, which I had been troubled with for a number of years, I am now perfectly well. I followed the directions carefully.

To every one sending for a trial order and finding good results we ask to observe our special offer enclosed with every box. It is of special interest to every one.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or 3 boxes for $1.00.

Dr. Clarke's Sure Cure for Catarrh and Dr. Clarke's Sure Cure for Eczema, same price. $500 will be paid for any case that it will not permanently cure.

Equitable Gold Mining Co.

R. C. LANE, President. S. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,350 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 200-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

THE PETERBOROUGH BROKERAGE CO.
FISCAL AGENTS

Rio Colorado Gold and Copper Co.

THE BEST INVESTMENT EVER OFFERED

INVESTIGATE and you will buy this Stock at FIVE CENTS

IT WILL BE WORTH PAR INSIDE OF SIX MONTHS

Clients of ours have acquired twelve claims in the richest mineral section of California, on the Colorado River. We have had this property examined, and it is said that it will make a mine equal to any of the large producers.

It carries Gold, Silver, Lead, Copper and Iron, and has abundance of shipping ore in sight. The vein is large and rich.

We have 20,000 shares to sell at 5 cents per share, and then the stock will be placed on the market at par. Guaranteed with five million of securities behind it to protect the investor from loss.

This 20,000 shares is to pay for the annual assessment work on the property, and must be sold at once.

The Company absolutely owns its property, and will propose to make a paying proposition out of it. DON'T DELAY OR YOU WILL BE TOO LATE FOR THIS STOCK at Ground Floor prices. Remit to,

WESTERN BROKERAGE COMPANY, Incorporated
396 Henne Block, LOS ANGELES, CAL.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price that will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

References—The Governor of the State, and any bank in Boise, Idaho. Write the Company for particulars. Address,

GEO. W. B. DORSEY, President
Boise City, Idaho.

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 6 claims, 600 x 1500 each. A 70 foot shaft on the Martha claim shows a vein of $30.83 ore 8 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.83 to $19,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay them $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address,

Dry Placer Miner, formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds *the machine will separate the gold* from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the *problem of handling sand or gravel* containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the *moving of material* are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 15 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, *paying laborers $1.75 per day.*

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

'Henry Fielding's Dream'

By CORTLAND MYERS.

"Well," said Henry, "where did you find her?"

"Oh, I have had the strangest experiences this afternoon but first tell me if you do not think she has a beautiful way."

"Yes, and even a beautiful face."

"Yes," replied Richard, "but you didn't give us time enough to take in the situation or the beauty, either."

"That's right," said Henry, "before I recovered from being startled and stunned she was gone Who is she, anyway?"

"She is one of the richest girls in the city," said Elsie, with a faint desire to tease and increase curiosity.

"What nonsense," said Henry. "You will have to tell us where you met her, and all about her, before we believe such a story as that; what can you have to do with one of the richest girls in the city? We must have gone to the planet of Mars if we have been introduced to a rich girl. That is not our society on the earth."

"Oh," said Elsie, "I do not believe the rich and the poor are so far apart as it is pictured sometimes. Character and education and ambition—yes, real Christianity, are bringing them nearer together. It is just as true as I said it. That is Grace Chalmers; she is rich, and her father is a great manufacturer. They sat right in front of you in church this morning, and—and—"

"Hold on, hold on," said both voices at the same time, "that is enough, give us the explanation. The facts seem like ghosts; put the clothes of reality upon them," continued Henry.

"Who else do you think I met this afternoon?" was the only answer Elsie made.

"Never mind," said Henry, "tell us about the first case first."

They had now reached the door, and Henry said:

"Come up, Dick: you will have to hear the rest of this strange story."

"The rest of it," said he. "I have not heard any of it yet, but here goes for the end of the chapter."

When they reached the rooms, they both declared that Elsie had delayed and tantalized enough.

"Now out with the whole thing," said Henry.

"Yes, not take off hat or anything else; sit right there," said he, "and make the startling revelation."

Then she told him of her amazement at seeing *David Dowling* come into the mission, of his pleasing manner, of the light and joy he seemed to carry. She related her trouble with the class and his errand of love and kindness to her, and the unmanageable boy, also the story he told the school, and how she knew it was all for her sake.

Then came the most interesting part of it, and not a word had been said by her listeners up to that point, and neither ventured a question now, only with their eyes.

They looked toward each other with an expression of wonder if it was all so, and yet *if Elsie* told it, they knew it must be true to the letter.

Then she went back in her story to tell how he had asked her name and address, and after the service she had to give it to him; also of his saying that he was coming to call.

Now a bright smile played on Richard's face, and he said.

"Henry, that is for you. You will meet the parson now, and be good again."

"Nonsense," replied Henry. "I have been once, but have not promised to go again, and I do promise to be away if I know when he is coming to see Elsie. But how about this rich girl?"

"He called her over to where I was standing and introduced her to me, and left us to talk a moment, and then to walk home together."

"How do you know about her father and her money, and the seat in the church, and all that?"

"He told me a part of it, and she told me the rest. Of course, Mr Dowling gave me the information about her wealth, and he also said she had the greatest riches of character that she was one of the noblest young women in the city, so pure in heart and unselfish in life. She was interested in every good work, and loved to help the poor and work for them in the mission and everywhere."

"She must be an exception," said Henry. "I don't believe she moves in a large circle of her kind. That class of people are few in this city. Most of those with money are just living for themselves. What do they care for the suffering and sorrowing and starving poor? They are as far away from them as if they lived in China."

"You must remember," said Elsie "that China is not very far away, and all people in this world come closer to each other than they think You may be right and yet partially wrong, Henry. There is not such a great gulf between the working people and those with money. It is possible to cross from one side to the other, anyway, and some of the rich people are doing more than anybody knows, except God. I was reading in the paper only *yesterday* of a *poor* woman who attempted suicide by jumping from the pier. She held her starving child to her bosom. They rescued her, more dead than alive, and carried her to the hospital. In the night she died, and that next afternoon one of the richest ladies in the city, the wife of one of the largest business men in America, came with her carriage to get the orphan and crippled child, and care for it as her own. Was not that Christlike? Even Jesus could not do better with money than that, and that is only one of thousands of like cases, I believe."

"That is good to say, and rather sweet to think," said Henry; "but, Elsie, you don't see and know what I do. That is only a drop in the great ocean of want and wrong."

"I cannot help it," replied she, "I still believe there is a great deal of good in this world, and some unselfishness among the well-to-do class."

"Some is a good word, sister," said Henry; "but what more do you know about Miss Chalmers?"

"Ah," said Richard, "that question is a window. The light is in Henry's heart now. That shows where his interest is. I thought he would not care whether there was any woman in the world besides his sister and mother, and now he is suddenly changed. What will not an hour do?"

"More than run the minute hand around the face of a clock," answered Henry.

"How strangely circumstances change and things work out in this world," said Elsie "Wasn't it a peculiar thing *that I should meet* these very people whom we saw and heard this morning, and I not know that *the mission* had *anything* to do with church to which Henry was taking us? Anyway, I am just delighted, and I am going to that church all the time now, and do more in the mission, too, than I have done. This has been a new day in my life."

"It seems like one in mine, too," Henry

"I belong to the family, Elsie says, and it must be in mine, too," said Richard.

"Was her *father* at *church* this morning, I wonder," said Henry. "He probably does not go to church, or the preacher would not ask that question in his sermon, and answer it as he did."

"Yes, he was there," said Elsie; "his daughter told me so."

"Well, I think *more* of that minister than I did before. I supposed he was like the rest o. them, afraid to speak the truth unless it pleased the people who paid his salary."

"*I do not think you need look* at Mr. Dowling more than once," said Elsie, "to know that he has the courage o' his convictions and would speak any time and any place what believed God told him to say."

"I believe that, too," said Richard "I like to agree with your sister, Henry, on general principles, but in this she is certainly right. I believe *the man* who preached that sermon this morning is both honest and heroic. Your world and mine is changed somewhat by it, and if that kind of sermons were preached in every pulpit, with backbone and heart and blood in them as well as brain, the churches would be crowded and society would be saved. The annity between classes and the fighting *between employers and employees* would cease. Men who do not go to church are not necessarily totally bad and destitute of all conscience and religion. They want to have the truth given application to the burning questions o' the day. Don't you think, Henry, that most men in our factory have respect for Christianity and a belief in it, and even *respect for the church*, but they don't believe in the present cold and impractical methods o. pulpit plat-

(To be continued.)

For The Extermination of The "Piano Pest."

In Germany the attack on the promiscuous use of the piano and other noisy musical instruments at all times and places has assumed almost the phase of a crusade. The latest and most characteristic discussion of the problem is a determined protest made by Siegmund Auerbach, a leading physician of Frankfort-on-the-Main, in the Supplement of the Munich "Allgemeine Zeitung," No. 142, the oldest and probably most influential general scientific journal in the country. The publication of the protest in this journal is significant, indicating that the learned world of the Fatherland is taking the matter seriously. We translate and quote the following:

"The protest of thinkers against the piano pest is not new, nor have the protestants been the meanest among men. Both Goethe and Schopenhauer have virtually cursed the evil habit of their thoughtless neighbors that interfered with their work and comfort, and yet, comparatively speaking, their sufferings must have been small compared with that of most modern men. Still more recently the litterateur, M. Lessing, wrote a series of articles in the 'Nord und Sud,' in which he voiced the protest of nervous people against this evil. It is well known to what trouble Mrs. Carlyle went to save her husband from molestation of this kind, and how Richard Wagner sought peace at a high price from the distorting street rabble in Florence. The question itself has a history which prominent men have helped to make.

"The question has both a medical and a legal side. The effect of such noise on the finely-strung nerves of the thinkers and writers is very dangerous, and as a physician I can testify to this danger. Piano-players have no right to endanger the health of their neighbors, and, this being the case, it is the right and the duty of states and governments to protect their people against the pest. There are regulations that forbid crying out wares on the streets, that regulate the noise that may be made by hucksters and others; why should there not be regulations to protect people from the piano hammerer? Just how this is to be done it will be the business of our lawmakers to determine. But one way that seems to be good would be to determine that those who by their callings or by choice are bound to use the piano or the loud musical instruments hours and hours each day should be compelled to live in certain quarters of the city, or in certain squares in a street, or in certain sections of squares, just as in the railroad trains there are certain parts and portions where smoking is allowed and others where it is forbidden. In this way there would be unmusical places where other people could live undisturbed and be sure that the next moving-day would not bring the unwelcome pianos into the new neighborhood. But both medical and legal considerations call for an *extermination* of the 'piano pest.'"

PARADOXES

Sterne beat his wife and wrote most pathetically on a dead donkey.

Johnson, who was a perfect bear wrote admirably on politeness.

An electric thrill in the grasp of her hand as you say "good night" means at least $4 left at the florist's next day.

A man never knows his friends until that "touching" period of adversity has arrived.

It's a wise speculator that knows his own broker.

In the "show" of "Vanity Fair" the woman who thinks should be given the "blue" for "performance only"—"conformation and style" don't count in her class.

Facial massage is a popular treatment for wrinkles. I know a better—contentment.

The "summer girl," like some extravaganzas, is not always gold because she glitters.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northeast of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.65 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.96 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values $12.50. This being a general sample taken from the dump. The other two assays are $62.66 and $79.06 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet -ɹəʇuı ʃʃıʍ ʇı ɥʇɹou ʇuəsəɹd sıɥʇ ɯo sect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

FLEEING GERMAN YOKE

Great Throngs Leaving the Fatherland for United States

Berlin, Jan. 6.—During the year just closed 37,000 emigrants left Germany for the United States. In 1900 the number was 20,000. Since 1901 it has steadily risen. Only German subjects are included in that total, the Russians and Austrians being left out of the account. The emigration agents expects that during 1904 the stream of emigration will exceed that of all former years from Germany. It is estimated that more than 40,000 will emigrate. In Galicia and Moravia the number appearing for passes to leave the country is extraordinary. Among the Slovaks of the western Carpathians entire districts are becoming depopulated. A similar story comes from Lithuania.

The German government is building still more extensive barracks for the thousands who pour through Berlin to Hamburg and Bremen, while the great Atlantic companies are doing the same thing at the ports. The North German Lloyds and the Hamburg-American lines expect to ship nearly 250,000 emigrants during March, April and May.

BLAMES UNION FOR FIRE

Chicago Holocaust Said to be Due to Labor Unions

Chicago, Jan. 6.—William A. Brady, owner and manager of "The Pit," last night indirectly attributed the Iroquois theater disaster to the labor unions. "If the man who had charge of the spotlight had known his business there would have been no disaster," said Mr Brady, "an dit is the system of substituting that makes it posaible to have a man in charge of the calcium lights who does not know his business. The manager of a theater is not to blame, for the very simple reason that he has no voice in selecting the substitutes. They are furnished by the unions. I have seen many accidents, some of which might have been as serious as that of yesterday. They were caused by lights who does not know his business. They were furnished by labor unions who represented a man to be an electrician or an electrical worker when he did not know a calcium light from a beefsteak.

"As I say, the manager is helpless. I have trained men in my productions to manipulate the lights. I have paid them to attend the rehearsals and familiarize themselves with the work. Perhaps they reported for one or two nights. Then a man whom I had never seen before would come on. He had been substituted without my knowledge or consent by the union."

PLUMBERS ON THE JUMP

Many Frozen Pipes and Many Burns Citizens in Hurry for Relief

The cold snap of the past few days produced an epidemic of frozen water and gas services and the plumbers are as busy as bees. Every man available is out on the warpath with his thawing apparatus, and the telephones in the plumbers shops are busy. Every unfortunate householder wants his pipes thawed out early in the morning, and when the plumber is not on the spot in a brace of shakes, he rushes to the 'phone and says warm things to those at the shops. Many of the pipes burst under the strain and flooded things generally. Those in this predicament were relieved first.

So far the street mains have not suffered from the frost, doubtless due to the mantle of snow that covers the ground.

CZAR GROWS MORE RELIGIOUS

Death of Princess Elizabeth Has Great Effect on Ruler

St. Petersburg, Jan. 6.—Since the sudden and pathetic death in his arms of little Princess Elizabeth of Hesse-Darmstadt the Czar has been more than ever devoted to his religious duties. He always has been religious, but now he spends hours at his private devotions and in writing prayers in Russ and Slavonic for the Imperial family.

A strange rumor is current in both Moscow and St. Petersburg that if the child expected next June be a son the Czar will abdicate in favor of his brother, who will become regent until the Czar's son comes of age.

Some Clever Epigrams.

One of the epigrams mentioned by Professor Brander Matthews, in an article on "American Epigrams," in Harper's for November, is the following by Walter Learned:—

"You say, when I kissed you, you are sure I must quite
Have forgotten myself. So I did; you are right.
No, I'm not such an egotist, dear, it is true,
As to think of myself when I'm looking at you."

Many examples are also given of epigrams by Holmes, Lowell, Aldrich, and other of our poets, among them this, adapted by Fitz-Greene Halleck from Goethe:

"All honor to woman, the sweetheart, the wife.
The delight of our homesteads by night and by day,
The darling who never does harm in her life—
Except when determined to have her own way."

"Ragtime" Hear to Stay.

Recently The New York Sun published an interview with John Philip Sousa in Chicago, in which he asserted that ragtime will last as long as the great operas. "Ragtime," says the famous bandmaster, "is an established feature of American music; it will never die, any more than "Faust" and the great operas will die. Of course, I don't mean to compare them musically, but ragtime has become as firmly established as the others, and can no longer be classed as a craze in music. Nearly everybody likes ragtime. King Edward VII. liked it so well that he asked us to play more of it, and we gave him 'Smoky Mokes' and 'Georgia Camp Meeting.' Emperor William and the Czar were also converted to ragtime. It is just as popular everywhere as ever it was, and I see no reason why it should not remain in favor so long as music is played."

The New York Times, commenting on this latter assertion, remarks:—"Well, why not? One of the most important functions of music is to give pleasure, and if ragtime pleases, why should it not last and give pleasure to future generations? Those who prefer what the east side critic of the park concerts characterized as 'misery music' can usually get it, and doubtless will continue to prefer it to the more popular varieties of song and dance music."

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
AND
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000.00.
Par value $1.00. Full Paid and Non-Assessable

At 50 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 1000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate
to your heart's content,
and quickly, then let us
hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 20c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 116 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, FISCAL AGENTS,

C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not A Gamble
but a
Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a smal block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY, GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

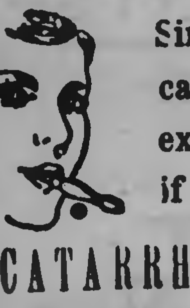
COLDS
COUGHS, CATARRH,
AND
CONSUMPTION



Simply can't exist if

CATARRHOZONE

Is inhaled 4 times daily.

Catarrhozone is the most pleasant and powerful destroyer of disease germs known to science. It is inhaled at the mouth, and in traversing the air passages of the nose, throat, bronchial tubes and lungs passes over not less than 1,000 square feet of mucous surface.

The penetrating, healing vapor of Catarrhozone goes wherever the air we breathe can go, and no matter how remote the disease may be it will quickly cure it.

The bacilli of Catarrh and Consumption are expelled from the system by one day's use of Catarrhozone. Ordinary coughs and cold in the head are cured in ten minutes. Most severe cases of Asthma, Bronchitis, and Lung Trouble are relieved in a few hours.

Catarrhal Deafness, Head Noises, Ringing in the Ears, can be corrected in a short time and cured by the persistent use of Catarrhozone, which is guaranteed to prove satisfactory or your money refunded. Two months' treatment complete, with liquid for restarting and hard rubber inhaler, costs $1.00; trial size 25c. At druggists or N. C. Polson & Co., Kingston, Ont.

JOHN FINDLAY NOMINATED

By the Liberal Convention at Norwood Yesterday

There was a fair attendance at the Liberal convention in Norwood, yesterday to select a candidate for the approaching elections for the House of Commons. Considerable interest was centered in the meeting, as it was generally understood that there would be a close contest between Messrs. John Lang, M. P., Mr. John Findlay, of Norwood, and Mr. John Quinn, of Douro for the nomination. After preliminary business had been disposed of, balloting for candidates was proceeded with. The result of the first ballot was the retirement of Mr. Quinn, and on the second ballot Mr. Findlay was selected. His nomination was made unanimous by a standing vote, Mr. Findlay accepting in a brief speech.

Bargains in Pianos

There are some first class bargains to be had in some new and second hand pianos and organs, at W. G. Landrum's, 190 Charlotte street, agent for Heintzman & Co., Toronto. Call and see for yourself.

A PLEASANT PARTY

Mr. and Mrs. McAllister Entertain Friends at the Craig House

On New Year's eve Mr. and Mrs. McAllister entertained about 30 of their friends to a dance and supper at the Craig House, Lakefield. The party drove up in two large busses and were joined by several from Lakefield. Dancing was kept up until two o'clock. Mr. Craig provided a dainty supper, and did everything possible to add to the pleasure of those present.

THE VERY TIME

When a Powerful Food Is Most Needed

The need of a delicate yet nutritious food is never felt so keenly as when a convalescent gets a set back on account of weak stomach. Then is when Grape-Nuts shows its power for it is the most scientific and easily digested food in the world.

"About a year ago," says a Kansas woman; "my little six year old niece Helen left the invigorating and buoyant air of Kansas, where all her life she had enjoyed good health, to live in the more quiet atmosphere of Ohio. She had a complete change of diet, consisting of a great variety of improper food, and of course a change of water, somehow she eventually contracted typhoid fever.

"After a long siege her case seemed hopeless, doctors gave her up, and she was nothing but skin and bones, couldn't eat anything for weeks, did not know even her father or mother. Her parents wishing to get something dependable and yet nourishing finally hit upon Grape-Nuts food for her, and it turned out to be just the thing.

"She seemed to relish it, was soon conscious of her surroundings and began to gain health and strength so rapidly that in a short time she was as well, playful and robust as if she had never been ill.

"We all feel that Grape-Nuts was the predominating factor in saving the sweet little girl's life." Name given by Postum Co., Battle Creek, Mich.

Look in each package for a copy of the famous little book, "The Road to Wellville."

THE WINTER RACES.

RESULT OF THE FIRST DAY'S RACES

A Splendid Day's Sport—Some Fine Horses but Small Attendance

Yesterday's races on the Driving Park under the auspices of the Turf Club, was a great success, so far as the races were concerned. Unfortunately, the attendance was not what it should have been. There was a large number of entries, and keen competition in the events. Six hundred dollars in purses is offered for the two days' meet.

2.40 CLASS.

Three out of five heats. Nine entries.

1.	Dollie Keeswick	1	1	1
2.	Little Clipp	2	2	2
3.	Little Mack	3	3	3
4.	Billie C.	5	4	6

Time—2.26 1-2, 2.25, 2.29

2.22 Class.

Best three out of five. Four entries

1.	Sailor Boy	1	1	1
2.	Rob Roy	2	2	2
3.	Blucher	3	3	3
4.	Conduct	4	4	4

Time—2.30, 2.29 1-2, 2.29 1.44.

The celebrated horse, Black Mack, will trot an exhibition heat today. There should be a large attendance.

THE GREAT FAMILY JOURNAL

A Subscriber Who Says He Could Not Get Along Without It.

The following letter was received yesterday and speaks for itself:

Hyners, Ont., Dec. 30

Dear Times,—Please find enclosed $2 for subscription to the g.f.j. I could not get along without it. It fills the bill to a "T." Wishing you the compliments of the season, I am &c. J. J. WELSH.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporters on Their Rounds

—Buy school books and supplies at Times Bookstore.

—This is the plenteous season of the year when the plumber gathers his crop of plums.

—The town clock is being repaired, under the skillful direction of Mr. Charlie McClelland.

—To every subscriber who brings us one new subscriber to the Weekly Times for one year, we will give free of charge a choice of three splendid premium pictures. See samples at this office.

—Nothing makes a Peterborough man so vain nowadays as to be able to say that his thermometer registered a few degrees lower than the other fellow's this morning.

—The auxiliary branch of the Deep Sea Mission will meet on Friday afternoon at 3.30 o'clock at the residence of Mrs. Hughes-Charles. All the members are requested to be present.

—Quite a number of wells in the district have gone dry and many farmers have to draw water distances for their stock. Melting snow for domestic purposes is a popular pastime with many residents.

—In connection with the week of prayer two services were held last night one in George street and one in Mark street. Rev. Dr. Torrance was the speaker at the former, and Rev. J. A. Wilson at the latter.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. W. H. Meldrum went out to Fenelon Falls yesterday.

—Mr. W. Bunton accompanied the hockeyists to Picton yesterday.

—Miss McCormick, of Belleville, is the guest of her sister, Mrs. Gilbert, London street.

—Miss Clara Thompson and Miss Ruby Ross, of Toronto, are the guests of Miss Mabel Routley.

—Mr. F. H. Amys, Lakefield, was in town yesterday, and favored The Times with a call.

—Miss Marion Hastings, who was the guest of the Misses Whiten for a few days returned to Toronto Monday.

—Miss Arvilla Morrow, of Peterborough, is visiting her aunt, Mrs. Jas. Morrow.—Bowmanville Statesman.

—Mr. and Mrs. Frank McCoy, and son of Peterborough, who have been spending Christmas and New Years with friends in town, have returned home, after having a very pleasant time.—Port Hope Guide.

—Mr. John Craig, the genial proprietor of the Craig House, Lakefield, dropped in yesterday to extend the usual season's greetings to this great family journal.

Children's Aid Concert

Mr. R. Gliddon has kindly promised the services of his orchestra for the entertainment to be given for the benefit of the Children's Aid Society on Tuesday evening, Jan. 12th. It is hoped that such a charitable a cause may be given the generous support of the public. The plays to be produced are, "A pair of lunatics,— and "A Novel Engagement," The cast of the plays include Mrs. K. Bardley Wilmot Miss Archer, Miss Barlee, Messrs. D. Hughes-Charles, K. Bardley Wilmot, R. M. Hamilton and J. M. Lawrence.

Confused.

"Henry Peckhecker," observes his wife as they sit at the happy breakfast-table, "you were certainly in a sad condition when you came home last night."

"Why, my dear," stammers Henry, "how can you say such a thing? I remember distinctly that when I came in you asked me to wind the clock, put out the dog, and light the night-lamp."

"Yes; and this morning I found the night-lamp with all the wick wound up in the chimney, and Fido's tail perfectly bare where you had touched him with a match, and the clock lying on the back porch."—"Judge."

A common type of persons are those who will never consent to be outdone on any subject. One of those marvel-mongers, relates a contemporary, was talking to a friend at a railway station the other day, when a very small man toddled down the platform. "Look at that little creature!" the friend said. "By Jove! that's the smallest man I ever saw in my life!" "Really?" his companion carelessly rejoined. "Really? Yes, really and truly too. Do you mean to say that you have ever seen a smaller?" said the friend; and he soon had his answer. "My dear fellow, I know a man so small that if he has a pain he can't tell whether he has a sore throat or a stomach-ache."

A Heart to Heart Talk

The Hon. Amos P. Atkins, who is one of the most prominent men in New Albany, Ind., and Treasurer of Floyd County, has this advice to give to those who are shut up within the narrow confines of office or shop:

"Dr. Pierce's Golden Medical Discovery seems to take the place of hard training in developing strength, vigor and endurance of the system and expelling all impurities, with which the blood sometimes gets clogged. I have found by personal experience that it enables me to do more hard work, and at the same time endure more physical strain and partake with greater vim in outdoor sports than anything I know of. It can always be relied upon to increase the appetite, induce healthful sleep, and tone and refresh a worn-out system.

"A number of my friends who have used it speak in the same high terms, and we have reason to consider it an office man's friend."

Dr. Pierce's Golden Medical Discovery is a blood-purifier and health-giving tonic that contains no alcohol, opium or other narcotic. It is a purely vegetable compound, made from roots and herbs in an up-to-date pharmaceutical laboratory, and has been used and recommended by thousands of people during the past thirty-seven years.

$3,000 FORFEIT will be paid by the World's Dispensary Medical Association, Proprietors, Buffalo, N. Y., if they cannot show the original signature of the individual volunteering the above testimonial, and also of the writers of every testimonial among the thousands which they are constantly publishing, thus proving their genuineness.

VOL. 32., NO. 6 PETERBOROUGH ONTARIO, FRIDAY JANUARY 8 1904. PRICE TWO CENTS

RUSSIAN WAR FLEET HASTENS TO THE EAST

Every Indication That War Will Come in a Few Days at Most

IMPORTANT DEVELOPMENTS HOURLY EXPECTED

England and the United States May Aid Japan, in Which Case Russia Would Get Her Deserts

London, Jan. 8.—The Post says that England could not look on while Japan was being worsted. There would doubtless be united action by Britain and the United States on behalf of Japan.

Malta, Jan. 8.—Five Russian torpedo-boat destroyers sailed from here today in an eastward direction.

Moscow, Jan. 8.—The Russian volunteer fleet cruiser Saratoff has been ordered to Sebastopol to receive her armament and thence proceed with all haste to Port Arthur. The Russian auxiliary cruiser Orel has been ordered to remain at Odessa until she receives her armament.

London, Jan. 8.—A dispatch to Reuter's Telegram Company from Tokio says there is increasing evidence there of the imminence of some important development, but that the most rigourous secrecy is maintained in all official circles.

RUSSIANS WILL HOLD SIN-MIN-TUN.

Tien-Tsin, Jan. 8.—The Russian office here has informed the railroad officials that a detachment of 100 Russian troops will occupy Sin-Mun-Tun, on the railroad running to Shan-Hai-Kwan and Tien-Tsin, in two days from date.

Pekin, Jan. 8.—Advices received here from Tokio says that the Russian Foreign Minister, Count Lamsdorff, promised to hand Russia's reply to the Japanese Minister at St. Petersburg Saturday last, but it is believed here that the reply reached the Japanese Government before that date.

MAY PRECIPITATE WAR.

Paris, Jan. 8.—The movements of the Russian naval division at Bizerta, Tunis are being closely followed by the diplomatic representatives of the powers interested in the Japanese-Russian situation. One of the leading diplomatists said the departure of the division for China "might prove decisive in inducing Japan to take speedy action," and compared Japan's position with that of the Transvaal on the eve of the outbreak of the South African war when the dispatch of large British reinforcements induced President Kruger to open hostilities.

It is point out that if the additional division succeeds in passing Suez Russia's naval strength in Chinese waters will thereafter exceed Japan's, their present strength being about equal.

No news has been received at the legation regarding the Russian reply; but it is asserted that unless the reply is a positive and favorable declaration of Russia's attitude toward Japan, without further negotiations, will employ force to obtain satisfaction for her demands.

SAYS WAR APPROACHES NEARER.

St. Petersburg, Jan. 8.—According to the Novoe Vreyma, the Russian Government is trying to avoid war because it is peacefully disposed and the Japanese Government is doing the same because it does not desire bankruptcy, and the British and French are doing everything possible to maintain peace.

"Nevertheless," the Novoe Vreyma continues "war approaches nearer and nearer."

The Novoe Vreyma, which is decidedly pessimistic, blames the chauvinism of the Japanese people and press for the present crisis.

An official note published today announces that instructions have been sent to Viceroy Alexieff as to the reply to be sent to the last Japanese note.

MENACE TO AMERICAN TRADE.

Washington, Jan. 8.—Reports of unrest in China and indications that the Pekin Government is inclined to join hands with Tokio in the event of war between Russia and Japan have been received at the State Department with regret. The possibility of China becoming involved in such a conflict presents, it is said, a grave menace to American trade, and the officials of the Washington Government are disposed to bring to bear all the legitimate moral pressure at their command both at St. Petersburg and Pekin to preserve peace between Russia and China even if the war between Russia and Japan cannot be averted.

THE THEATER ENQUIRY IS A DIFFICULT TASK

Technicality May Block Fixing of the Responsibility for Chicago Fire

Chicago, Jan. 6.—"Make every possible effort to ascertain the identity of some persons who died in this corner."

States Attorney Deneen has made this request of Coroner Traeger, as they stood at the end of the blind gallery passage, where before a locked exit more than thirty of the victims of the Iroquois disaster were found. In this request, repeated at every point where bodies were found States Attorney Deneen gave the kep to some of the gravest questions that will confront the grand jury in fixing the criminal responsibility for deaths.

It will not be sufficient for the purpose of a criminal prosecution for the coroner to show that the locked door coroner to show that the locked door was responsible for 30 deaths, even if the responsibility for the locked door is fixed. In order to sustain a prosecution for manslaughter, it will be necessary for the coroner to determine the identity of one or more of the individuals whose death the door caused.

Many Burials.

Bodies of 566 victims of the Iroquois Theatre fire have been buried according to burial permits issued by the health department. Only nine remain unburied. Four of these are unidentified.

Thursday, an official count of the dead in the various morgues was made by the police, and it was announced that 583 bodies had been found. To this total have been added from time to time the names of those who have died of injuries received in the fire, until the police list reaches 591. So far as the police not know, there are but two persons still missing.

The question of priority of death of the fire victims is the issue on which many estates may be tied up in the courts for months and years.

Probate Judge Cutting says he anticipates that in a hundred of estates this issue will have to be determined before the estate can be ajudicated.

HAMILTONIANS ESCAPE.

Hamilton, Jan. 6.—Among the Hamiltonians who were in the Iroquois Theatre fire in Chicago were Mr. William Gordon, brother of Mr. J. S. Gordon, the well-known artist of this city, and Mr. W. J. Halliday, son of Police Constable Halliday.

Mr. Gordon's left arm was broken, and his face was slightly burned. Mr. Halliday was in the first gallery when the fire broke out, but as he had arrived too late to obtain a seat he was standing at the back of the gallery. He was carried off his feet and landed outside the building.

POWER BEHIND THRONE

New York, Jan. 6.—A cable from St. Petersburg says—

"Give no credence to false and senseless rumors appearing in the newspapers.

"The Russian Church preaches the gospel of charity and peace."

(Signed) "Pobiedonostseff."

M. Pobiedonostseff, the Procurator of the Holy Synod of Russia, is regarded as one of the strongest powers behind the throne of the Czar. Even Count [illegible] has no other power.

HOW CASHEL ESCAPED

Matron Knew of a Plot to Release the Murderer

Calgary, Jan. 6.—In the trial of John Cashel, Flora Bazeau, an attractive young woman, matron in the guardroom, testified that she had become fairly friendly with Cashel. She had met John Cashel at her father's house. John told her some time before the escape that if Ernest Cashel did not get a new trial he intended to get him out of jail. He intended to get guns in to him, and then he could force his way out. There would be a horse waiting for him. He would be dressed in woman's clothing, and get over to Buffalo, Wyoming. If he ever got there he could stay, because Cashel had so many friends that the police would never get him away.

He said that if he had to go down himself he would do it, rather than let his brother be punished.

John Cashel asked the girl to get revolvers for him, but she refused. He said that he could easily get them himself.

SEPARATE SCHOOL BOARD

Inaugural Meeting of the Board on Wednesday Night

The inaugural meeting of the Separate school board was held Wednesday evening.

The chair was taken at 8 p.m. by the secretary, who stated that the recently elected trustees had filed the necessary declarations, and were therefore entitled to take their seats. The members present were Messrs. Jos. Gosselin, John Primeau, Jos. Hickey, Jas. Hourigan, George Ball, Henry Carveth, John J. Lynch, M. L. Henry, Jas. Murty, and Jas. Clancy.

Nominations were asked for the chairmanship of the board for 1904.

Mr. J. J. Lynch was unanimously elected chairman.

John Corkery was re-elected Secretary Treasurer.

The Rev. W. J. McColl was re-appointed Local Superintendent of Schools.

Mr. L. M. Hayes was re-appointed as High School Trustee.

Messrs. M. L. Henry and J. J. Lynch were appointed auditors.

Messrs. Clancy, Murty and Henry were appointed a committee to strike the standing committees. They reported as follows:

Finance—Messrs. Henry, Murty and Ball.

School Management—Messrs. Hickey Gosselin and Hourigan.

Property—Messrs. Clancy, Primeau, and Carveth.

The first named on each committee will be the chairman thereof.

The minutes of the previous meeting were read and confirmed.

Accounts were presented from:

C. Wilhelmy	$ 7 50
Review Co.	2 00
M. McFadden	42 50
P. Hamilton Co.	34 80
J. O'Brien	7 50
R. Johnston	10 00

These accounts were referred to the Finance Committee.

The chairman and the secretary were authorized to make the necessary arrangements with the Bank of Toron to to the extent of $2000 until the Board is provided with funds by the Town Treasurer.

The statements of the Receipts and Payments for the year 1903 was presented, being as follows;

Receipts.

Town tax	[illegible]
Provincial [illegible]	[illegible]
Outside municipalities	667 60
Miscellaneous	4 00
	$6091 60

Payments.

Salaries	$4600 00
Fuel	386 11
Repairs	134 41
Furniture	96 33
Interest	126 45
Supplies	131 30
Water	19 00
Miscellaneous	61 46
	$5664 75

Received and referred to the auditors.

The Property Committee was authorized to procure the necessary supply of wood for the schools.

It was considered advisable that some arrangements be made to introduce a system of fire drill among the pupils of the several schools, and the matter was left in the hands of the local superintendent to conder with the several teachtendent to confer with the several teachers regarding the best means of having it brought into effect.

LUCKY PRIZE WINNERS

At St. Peter's Bazaar Held Before Xmas in Opera House

The names of the prize winners in connection with the bazaar held in the Opera House in December, in aid of St. Joseph's hospital, will be found below. Much credit is due the ladies who had the affair in hand, for the success of the bazaar. The following are the names referred to

No. 19, 2016, Handsome rug, Mr. Angell, Water street, M. O'Leary, Douro.

No. 20, 333, $5 gold piece, a friend, won by Joseph Allen, Lakefield.

No. 240, Handsome hand painted screen Miss Annie Simons, won by Miss Aggie Meher, of Douro.

No. 1 Doll, donated by Mr. C. B. Routley, won by Miss Tootsey O'Toole.

No. 2 Doll, by Miss Maggie O'Brien won by Miss Heenan.

The number of beans in silver tobacco jar donated by Mr. Richard Sheehy, were 1307, nearest guess, 1300 by James O'Brien Downey street.

RUSSIA'S DIFFICULTIES IN WAR WITH JAPAN

How The Little Empire Would Have The Advantage on The Start

New York, Jan. 8.—The New York Times says it seems certain that Russia will have no ally in a struggle with Japan. In the face of the Anglo-Japanese alliance it is not for her interest to have any. For that undertaking binds Great Britain to come to the rescue of Japan if Japan is attacked by more than one power. The British navy would be an immediately decisive factor in any war on the Asiatic coast of the Pacific, as against Russia and any possible Russian ally. More than that, a war between Great Britain and Russia could not be confined to the Far East, but would inevitably extend to Europe. And the coast of European Russia would be absolutely defenceless against the British navy, since all accounts agree that Russia has stripped herself of every available man-of-war for service in Orinetal waters. An effective blockade of Russia's Baltic ports would be easily within the power of the British fleet, even after a large enough detachment had been made from it to ensure a naval preponderance in the Pacific. Finland is by no means Russiafied. A Finnish rebellion would be the natural and immediate result of a state of war between England and Russia, and the sea power of Great Britain would be of immense aid and comfort to the rebels. The risk of soliciting the alliance of any European nation against Japan would so much outweigh the possible benefits of such a course that it is not to be imagined that Russia contemplates taking it.

The fight, then, would be between Japan at home and Russia far abroad. Every man, every munition, almost every article of subsistence would have to be carried across Asia to the Russian army. Suppose that, at the eastern extremity of the Trans-Siberian Railway Russia had a city of two hundred thousand souls, instead of an army of that size, and that this city had to be subsisted from two thousand miles away, by means of one single-track railway. The problem presented would be one of the utmost difficulty, at least, in time of peace. It would become entirely insoluble in time of war. For more than half its length, the road would be vulnerable to Japanese attacks, and to the attacks not merely of the Manchurian "bandits" whom Russia reports as having given her so much trouble already, but probably of the regular Chinese troops. However contemptible these may be in the field, they are dangerous enough when the question is only of disabling a railway, to make it necessary for Russia to maintain so strong a guard over the line of communication which is vital to her, as seriously to weaken her fighting force. If it be said that she has men enough for both uses, that is doubtless true, but both the fighting force and the railway guard must be subsisted from the ultimate base of supplies. Every Russian in East Asia "drags at each remove a lengthening chain," while a disablement of the road at any one of its innumerable vulnerable points, would mean a huge disaster.

POPE WORKS FOR PEACE

Communicates with President Roosevel Regarding Colombia

London, Jan. 8.—In W. T. Stead's the Daily Paper, first issued today, is printed an interview which George Lynch, the war correspondent, had with Pope Pius, in which he appealed to the Pontiff to use his influence with the powers in behalf of the Macedonians. "Perhaps I have done more," said the Pope, "than you know of. I do not wish to interfere in politics unless I know it will be effective of good. Only the other day, when there appeared to be a prospect of war and bloodshed in Colombia, I communicated with President Roosevelt and received a most courteous and cordial reply from him."

UNION MEN IN DILEMA

Confronted with Fine or Imprisonment for Libel

Richmond, Va., Jan. 8.—Unless they be sooner released on taking oath that they are bankrupt W. H. Mullen and Sidney Gates, prominent union men and labor leaders must serve three months in the city jail for criminally libeling C. B. Buchanan, superintendent of the street car lines here that are owned by Frank J. Gould. Some months ago during a strike Mullen and Gates started a paper called the Opinion, which was published in the interests of the strikers. It devoted a large portion of its space to abuse of the street car company and Mr. Buchanan.

Seamen's Terrible Plight Men Exhausted and Frozen

Five Men Nearly Frozen to the Deck and Almost At Point of Death

Gloucester, Mass., Jan. 7.—Capt. J. B. Seabean of the British schooner Ayr and his crew of four were brought here yesterday by the fishing schooner Jennie B. Hodgson, nearly dead from exposure, after having been rescued from their wrecked vessel off Cape Cod.

Captain Parkman Hodgson, of the fishing schooner, when about ten miles off Cape Cod, sighted the dismasted Ayr. On boarding her he found five men practically frozen to the deck and almost at the point of death. The helpless seamen were taken to the fishing schooner. They had been for thirty hours without food or water with the thermometer far below zero, and were continually washed by tremendous waves.

HOME RULE THEIR SLOGAN

Directory of United Irish League Meets at Dublin

Dublin, Jan. 8.—At a meeting of the national directorate of the United Irish league tonight presided over by John Redmond, resolutions were passed in favor of home rule and the maintenance of the national organization "in full power as the only means of enabling the people to derive the benefits intended by the recent land act in face of the unreasonable attitude of the landlords, who have refused to sell their estates except on extravagant terms and who have placed other obstacles in the way of the smooth working of the act, thus necessitating pressure upon parliament to amend the act."

Resolutions were also passed demanding the redress of the grievances of Catholics in regard to university education.

EVERYBODY READS THE TIMES.

SHOULD PETERBOROUGH ACT?

Many Towns and Cities in Canada are Taking Warning

The awful Chicago theater holocaust has caused a close inspection of many public halls in Canada. Peterborough should not be excepted, and we suggest that the new Council take the matter up.

In his inaugural address in London, Ontario, Mayor Beck promises to treat as a subject which his fellow-citizens in large numbers, regard as of pressing importance, namely, that of providing assurances of safety in popular assemblages. He will be warmly supported in making official inquiry into the construction and equipment of the various places of amusement as to the safeguards available in time of panic arising from fire or other cause. What means have people of getting out of a building in a desperate hurry? is the great question. True, the doors are made to open outwards, but is the inner construction such as to make them reached easily? Not so many years ago doors opening outwards were brought into vogue. The doors of every public, as well as private building, opened inwardly. A catastrophe reminded the people how strangely they had departed from the wise custom of the Greeks, whose doors were made universally outwards, and one going out made a noise from the inside to notify passers-by so as to prevent surprise. In places of amusement, where every available inch of space is measured for its seating capacity, and the audience may be packed "like herrings in a barrel," the way out should be so easy that the people could flow out in a stream without any impediment. Yet how often it is that in a crisis, like that at Chicago, the people become wedged together, in the mad scramble for life.

General Sports

T. A. S. VS KEENE TO-NIGHT—THE RACES

The secretary of the T.A.S. Hockey team has kindly presented the representatives of the press with tickets for the season's matches.

The first game in this district of the Trent Valley League will take place tonight between the T.A.S. and Keene and should be hotly contested as Keene is bringing the strongest team ever put on the ice by them. There will be a few changes in the T.A.S. line-up of last year.

SMITH FALLS SENIORS WON

Ottawa, Jan. 7.—The first match in the O.H.A senior series played in Ottawa this year took place last evening at the Aberdeen Pavilion between the Smith's Falls and Aberdeen teams. It resulted in a victory for the former by 3 goals to 0.

The hockey displayed was not of a lightning-like variety, and the players of both teams are qualified for intermediate company and nothing higher.

ACTION AGAINST VARSITY PLAYERS.

An emergency meeting of the directors of the University of Toronto Athletic Association was held Wednesday at the gymnasium, with Prof. Dr. McCurdy in the chair, to discuss the status of the Varsity hockey team, which has been playing at the American and Canadian "Soo," and for which offense it was placed under the ban of the Ontario Hockey Association.

The upshot of the meeting was that copies of the following telegram were sent to the Secretaries of Queen's and

Toronto, Jan. 6, 1904

McGill Athletic Associations,

If facts are as reported, we will suspend players in games at "Soo" from further participation in University athletics. Fuller information later.

(Sgd.) S. P. Biggs, Secretary.

THE RACES.

There remains two heats one in the 2.30 class and one in the free for all to be run this afternoon. There will also be a consolation race for the horses who were not inside the money in the 2.40 class. This race includes 5 entries, the purse to be 75 per cent. of the days gate receipts.

Considerable talk in betting circles is going the rounds against the bookmakers at the driving park, who, as is the rule with all bookmakers in the case of dead heats, when giving odds or taking odds, refund half the money or retain half, as the case may be, in the event of a dead heat. Quite a number who had money on the horses in the dead heat yesterday afternoon were not aware of this fact, hence considerable talk was raised against the action of the bookmakers.

The Queen of Holland has an enormous fortune, only a part of which belongs to the crown.

Green crocidolite, or "cat's eye," is found in New Mexico.

Mrs. Greene—Now, tell me truly, do you believe it is any benefit to punish children?

Mrs. Berch—Certainly. You can't imagine how much better I feel after I've given Tom and Mabel a good trouncing.—San Francisco Wasp.

Russell of The "Times."

When the King went to dine with his fellow-Benchers in the Middle Temple Hall this week he had a chance encounter at once agreeable and unexpected. Present at the gathering was a certain "junior" barrister, called fifty-one years ago, famed among English-speaking men as "Billy" Russell of the "Times." Sir William Howard Russell, who was eighty-three last March, occupies a special niche among war correspondents. His brilliant letters from the Crimea—where he was known as "the pen of the war"—did more than anything else to bring to the public eye the breakdown of the military machine. He it was who so vividly pictured the dire and preventible sufferings of the troops during that awful winter before Sebastopol; and, on the other hand, it was his glowing eloquence, lit by Hibernian fire, that left imperishable records of the Balaclava charge and the "soldier's battle" of Inkerman. The two civilian names of that epoch which sprang instinctively to everyone's lips when the war was mentioned were Dr. W. H. Russell's and Florence Nightingale's.—London "Outlook."

WEATHER NOTES

Friday—Mild.

HOW THE DOMINION OF CANADA WILL SOLVE THE BIG PROBLEM.

Boats to Carry 70,000 Bushels of Grain Through Water Route and Take Freight Back to Twin Towns.

Montreal, Jan 7—"The work of the Transportation Commission will be to facilitate the moving of traffic originating in Canada along Canadian routes. The first task we will likely undertake will be to establish the shortest and cheapest route from Lake Superior to the English market," said the chairman of the Transportation Commission, while discussing the most important problems that the commission would at once take up for the benefit of the Dominion.

"Now, it seems to me that the problem of getting grain through from the West to Montreal in a satisfactory manner will depend largely on the establishment of an efficient boat service between Fort William and Montreal. It would certainly seem that if the steamers on the upper lakes can make money at a 1 1-2 cent rate on grain to Georgian Bay ports, the through line to Montreal can be worked out on a profitable basis. The steamers that are on use at present are only able to carry 60,000 bushels at the very most, and therefore cannot solve the problem. I am satisfied that a boat able to carry 70,000 bushels, and not more than 253 feet in length and drawing only 14 feet, can be built, and would help to solve this problem satisfactorily. Such a steamer is being built at present at Toronto.

Westbound Traffic.

"Besides, such a line is bound to become an important factor in the westbound traffic. They could offer a rate against which the railways could not compete. The company having such a line should, however, follow the example of the railway companies, and have representatives in England and on the continent who would direct the traffic to the Canadian West by the cheaper Canadian steamship line.

"Then comes the important question of a port on Hudson's Bay. It must be remembered that such a port would be just as close to Liverpool as Montreal, and would represent the saving of the big haul from the West to the Atlantic ports. With the construction of the Grand Trunk Pacific to the north of Lake Abitibi, the port on the Hudson's Bay will be within a very short distance of the main line, and can easily be reached by a branch line. I understand that up near the bay there are very large areas of excellent spruce. While the ground is covered with a thick moss that keeps the frost in it, there is proof that once the frost is removed, the land is quite arable. Such a port would prove the natural outlet for the Peace River district and many other sections of the North-West.

A Line to the Yukon.

"The recent decision in the Alaskan boundary question makes it necessary that a new line should be found up into the Yukon country. It would seem that with the Grand Trunk Pacific completed, with a terminal hundreds of miles north of Vancouver, would prove the natural starting-point for a through short line to the Yukon.

"It is altogether likely that we will go right ahead and gather as much data as possible that will tend to solve these all-important problems. It must be remembered that Canada is a specially favored country as far as her waterways are concerned and it seems natural that they should contribute most of all to the solving of many important problems. We must look to our waterways to be able to offer competition against so vast an organization as the Canadian Pacific and prevent any possibility of their imposing exorbitant rates. During a recent visit to the West I found the people enthusiastic over the establishment of the line of steamships.

"Canada is on the verge of a period of great development, which renders the solving of the problems just enumerated all the more important."

A CRY OF DISTRESS COMES FROM BULGARIA

Note to the Porte From Bulgarian Government Complains of Gross Abuses

Constantinople, Jan. 7.—The Bulgarian Government has sent a note to the Porte, complaining of the nonfulfilment of its promises concerning reforms in Macedonia. The note points out that the Turkish authorities continue to purposely arrest Bulgarians entering Turkey, that insurmountable obstacles are placed in the way of the importation of Bulgarian merchandise, that there is now no passage of armed bands across the frontier, and that the Porte is receiving every assistance from Bulgaria in the accomplishment of the work of pacification.

The note further directs the attention of the Porte to the prosecution of the Bulgarian population in Macedinia and says the Turkish troops in the Kirk-Kilisseh district are settling Mussulmans in Christian villages, the inhabitants of which are now seeking refuge in Bulgaria and the Ottoman authorities are compelling the Bulgarian population to abandon the Exarchate and recognize the Patriarchate.

London, Jan. 7.—The correspondent of the Times at Rome says the public declaration that Joan of Arc has passed the second stage of her canonization means that the Maid of Orleans, in addition to the three virtues faith, hope and charity, also displayed temperance, fortitude, prudence, and justice. Thus, she acquires the title of "venerable," although the right to have altars erected and public worship addressed to her is withheld until the last stage of the canonization, in which she is proved to have worked miracles.

The Pope has invoked the intercession of the Maid of Orleans for the restoration of peace to the French Catholics.

It is not certain that Joan will pass the last stage of canonization, as it may be considered inexpedient to let her do so. At the present time she is venerated by all Frenchmen alike. It is feared that if she now entered fully into the Roman calendar many of her countrymen would never mention her name again.

London, Jan. 7.—The Liverpool Daily Post, commenting on the correspondence between Mr. Chamberlain and Premier Deakin says; "Mr Chamberlain has struck out of the republished version of his speech the passage in which he foretold that Canada would restrict her manufactures in the interest of Great Britain, but this simple and easy expedient of the facile orator does not go far with a Canadian to meet the difficulties."

The Post says Mr. Peel's article in the Independent Review has shown what an intricate and sinuous mass the Canadian fiscal policy is. Mr. Peel found nothing to give any hope of good to accrue to the Empire from Mr. Chamberlain's proposals relating to Canada.

New Office Opened.

The Canadian Pacific Railway Company's new offices on the Strand were formally opened to-day. Lord Strathcona, who presided at the formality, sketched the history of the railway from 22 years ago, when, he said, not five people in Canada believed there would ever be a railway in Canada from coast to coast and running north of Lake Superior. He emphasized the necessity of a faster ocean service as a complement to the fast Canadian Pacific Railway expresses, and the greater importance of being able to get a through ticket from London to the far East. His Lordship favorably commented on the work done by the office of the Canadian Pacific Railway in the heart of London, under the able direction of Chief Agent Baker. He complimented the Canadian Government officials and, speaking of Canada's magnificent prosperity, predicted a glowing future for the country. Among those present were Admiral Freemantle, General Jameson, Canadian Pacific Agent Baker, W. T. R. Preston, G. G Colmer, Mr. Griffiths, W. J. Shaughnessy, son of President Shaughnessy, A. Long, of the Bank of Montreal, and R. Clougher, formerly of Toronto.

England Responsible.

The National Zeitung, referring to the negotiations between Germany and Canada, says the British Government, replying to Germany, in regard to the commercial policy of Canada, laid stress on the fact that her colony must not be regarded by foreign States as an independent country. The paper infers from this that it depends upon England alone whether the commercial relations between Canada and Germany are satisfactory or not.

Canadian Society Luncheon.

The Canadian Society's luncheon at the Holborn Restaurant last night was a great success. Mr. Roy Somerville presided, and Mr. Hamar Greenwood, the principal guest, made a very humorous and entertaining speech. A large number were present. Mr. Barlow Cumberland has resigned from the presidency of the society, owing to his returning to Canada.

Ottawa, Jan. 6.—Enquiry with regard to the plans of the Marconi company for wireless communication between Canada and the Old Country goes to show that there has been no material change in the position of affairs since the Finance Minister put the facts breifly before Parliament last session.

The company claims to be in communication from time to time between its Cape Breton station and the station in Poldhu, Cornwall, but is not yet able to maintain such an efficient and uninterrupted service as could warrant it in accepting business from the public. It was said that one difficulty lies in the fact that the trans-Atlantic station is not equipped with as strong an electric force as has been developed on this side. However that may be, the Government is assured that the company is still quite confident that the enterprise will prove a commercial success, and that the money was not thrown away which Parliament voted towards its establishment in Canada.

Heintzman & Co.'s piano tuner, T. S. Shay is here from Toronto. Leave orders at Ormond & Walsh's drug store, 'Phone 161.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

[illegible] paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the District at [illegible] per month, and to outside points at $3 per year strictly in advance.

PETERBOROUGH, JANUARY 8, 1904

THE CHICAGO IROQUOIS FIRE

If the statements which are being sent out from Chicago in regard to the Iroquois Theatre holocaust are verified at the coroner's inquest, which is being held, it would appear that the principal responsibility for that awful calamity will be laid very near to the building inspection department of that city. It is said that there were city ordinances requiring all buildings of the character of the Iroquois Theatre to be provided with the following among other safeguards against fire.

A system of automatic water sprinklers.

A ventilating shaft at the rear of the stage to act as a chimney to draw smoke and flames away from the auditorium.

A fire alarm directly connected with the city fire alarm system.

An official of the Chicago building inspection department is authority for the statement that the Iroquois was equipped with none of these precautions. How this statement will square with the claim of the proprietors that no money was spared to make the Iroquois one of the safest playhouses in Chicago remains to be shown by the coroner's inquest.

As to the question of the automatic sprinklers, it is reported that the building commissioners stated that the way the theatre was built obviated the necessity of them, and then there was some vague reference to the provision about iron doors, making it unnecessary to put in sprinklers. This explanation of the absence of the automatic water sprinkler system from the Iroquois Theatre will astonish fire underwriter experts, and surely is the result of a confusion of terms. An automatic sprinkler is designed to put out fire, once started, from one compartment to another. Iron doors are also placed upon the outsides of burning buildings to prevent fire contact from closely adjoining buildings, and these were probably referred to by the inspector as obviating the necessity of a "water curtain," which is a device much newer than the automatic sprinkler and designed for quite a different purpose.

POWER BEHIND THRONE

New York, Jan. 6—A cable from St. Petersburg says—

"Give no credence to false and sensational rumors appearing in the newspapers.

"The Russian Church preaches the gospel of charity and peace."

(Signed) "Pobiedonostzeff."

M. Pobiedonostzeff, the Procurator of the Holy Synod of Russia, is regarded as one of the strongest powers behind the throne of the Czar. Even Count Plehve has no more power.

BANK PRESIDENT CRITICISED

The Bret Harte Mining Company's Splendid Proposition

A president of one of the largest national banks in Chicago was criticised by his brother presidents because he has become largely interested in a gold and copper mine in the Rocky Mountain range. His answer was: "Throughout the Rocky and Sonora Ranges, ages gone God builded stronger vaults in His granite banks than ours. He filled these vaults with gold, silver and copper, with coal and iron.

"He put it in the heart of the always poor prospector, and guided him on his way to the door of the bank vault. The Federal Government handed him its Patent title to all-there-in. It is no crime, but a virtue to enter. With drill blast, pick and spade, this poor man broke the combination lock and entered. But for him our notes of issue would be but as the "Stump Trail" currency of 1857."

"But for him this Government would be bankrupt. I know one man who a few years ago was a poor school master, today he is the richest man on this continent, his wealth is safely invested. His income on a three per cent. basis will pay an annual interest on all the real and personal property in Chicago and Cook County as assessed in 1903—four hundred and three million dollars."

"You can insult him no deeper than to say to him he is "lucky," or it's chance. He only swears when these insuits are in evidence. He says I listened to the story of an Arizona prospector I knew he was trying to tell me the truth. In short, God gave me an opportunity, and at the same time strengthed my power of common sense sufficient for me to put out my hand and grasp it. He will wager every dollar that he has that his mine will be producing $12,000,000 in gold and copper on that future day when National Banks are unknown. Remember—a mine is simply a crop, already raised and deposited in the bin, or bank. You check it out at your pleasure. Remember also, that if you do not check out a ton in the next twenty years it will be drawing and accumulating faster than will a two per cent. U. S. Government Bond, simply from increase in value of copper, and especially from improvement in mining and saving values."

The greatest and most reliable scientist of the past, Baron Von Humbolt (see Encyclopedia) said and wrote: "The wealth of the world lies in the volcanic upheavels of Arizona and New Mexico."

The BRET HARTE GOLD MINING COMPANY is located on one of these vaults of wealth, and will soon have the doors opened for business. Are you a stockholder? Have you common sense enough to put out your hand to grasp the opportunity offered?

If you want to share in the dividends soon to be declared, write at once and become a member of the Company. The stock is now selling at 15 cents per share (par value $1.00, fully paid and non-assessable.

DISTRICT NEWS

KEENE.

—Miss May Parks, of Belleville, is visiting Mrs. Robert Weir for a few weeks.

—Misses Mabel and Pearl McCann spent New Year's with friends in Hastings.

—Mr. and Mrs. M. Clancy and Miss Loretto Clancy, of Peterborough, were the guests of Mrs. Kenneally for a few days last week.

—Mr. Jas. McCrea, who has been visiting his sisters during the holidays, left for Winnipeg on Monday.

—Mr. Scott Laing, of Toronto, spent Sunday with his parents.

—Miss Flora Powel is visiting Miss Bessie Reid at present.

—Miss Lena Cummings, of Peterborough, is visiting her sister, Mrs. W. Read.

—Mr. Wm. Cummings, who was visiting his sister, returned to Chicago on Tuesday.

—We are sorry to report that Miss Willena Miller is seriously ill with pneumonia, and hope for her speedy recovery under Dr. Harrison's skillful treatment and Miss M. Walsh, trained nurse.

—Mr. T. Walsh had six young cattle killed by the train on Sunday. His gate was open and the cattle strayed on to the track, and a double header killed six out of ten.

—We are glad to report that Mrs. McFarlane, who has been ill for some time, is recovering.

—The Keene hockey team lost the first game of the season by default. Several of the players were unable to go to Peterborough, and that club claimed the game.

—Mrs. (Dr.) Harrison was called to Toronto on Tuesday by the death of her father, Mr. Nixon.

—Mr. T. Laing and family moved to Toronto this week, where they will reside in future.

—The grist mill has been running only a few hours each day for some time, on account of scarcity of water power.

—The first carnival of the season will be on Friday evening, January 15th.

—Quite a number of our citizens attended the meeting of the East Peterborough Liberal Association in Norwood on Wednesday.

TO COMMUNICATE WITH ENGLAND

Ottawa, Jan. 6—Enquiry with regard to the plans of the Marconi company for wireless communication between Canada and the Old Country goes to show that there has been no material change in the position of affairs since the Finance Minister put the facts breifly before Parliament last session.

The company claims to be in communication from time to timme between its Cape Breton station and the station in Poldhu, Cornwall, but is not yet able to maintain such an efficient and uninterrupted service as could warrant it in accepting business from the public. It was said that one difficulty lies in the fact that the trans-Atlantic station is not equipped with as strong an electric force as has been developed on this side. However that may be, the Government is assured that the company is still quite confident that the enterprise will prove a commercial success, and that the money was not thrown away which Parliament voted towards its establishment in Canada.

Hindu Saint.

There is a man staying at a temperance hotel at Oxford, says the "Daily Mail," who can stop the beating of his heart for thirty seconds, during which time his existence is suspended, and his spirit, it is said, wanders in space, reading the future.

His is no idle claim. While in Oxford, three years ago, he demonstrated his powers to Professor Max Muller and Professor Carpenter, and then, journeying to Cambridge, astounded Mr. F. W. Myers and other medical men, who, after using stethoscopes and similar appliances, expressed themselves as being completely satisfied. A few weeks ago, while in New York, from which city he arrived in England on Saturday, he repeated the performance before a Dr. Ayres. On the last occasion he told of the death of a prominent American three days before the news reached New York.

It is only on the rarest occasions, though, that these marvels and others equally astounding are performed before perplexed scientists. "I am a teacher, not a wonder-worker," he says. "These things are only child's play. My mission in life is a spiritual one."

His name is Agamya Guru Paramahamsa, and he is the chief of the Hindu Mahatmas, of whom such wonders are told by those who have visited India. In his "Life," Professor Max Muller described him as a first-rate Sanskritist, a man of remarkable intelligence, and "the only real saint who has come to English-speaking lands."

Years of fasting and mortification prepared him for his life-long mission, which consists of traveling throughout the length and breadth of India teaching the philosophy of altruism and self-abnegation and acting as spiritual father and philosopher to millions of the population.

His present visit to England, which is the second he has paid to our shores, is a temporary halt made on the return journey to his native land. He cares nothing for money or for the pleasures of material existence. "I am supported by my disciples," he told a representative of the "Daily Mail." "If I telegraphed to India they would send me thousands of rupees. I do not want that. What is money? It cannot bring happiness. It cannot help one at the last."

In India he is idolized, he says, by millions. "When I arrive at a place to teach," he said, "my followers bring me food, wash my feet, and then drink the water. I do not preach over here or lecture. People are paid to lecture here. I could not consent to change my knowledge for money. Besides, why should I go into the street and utter truths to robbers and fools? Would they listen?

"Why should I preach to the commercial-minded people of England? Would they listen, either? I have met many men, but few wise ones. So I just travel round when I am abroad finding out the few wise men and ignoring the rest, who only want to be convinced by the strange things I can perform. They are only for children, not for those who seek the higher truths. I do not come here to work miracles."

His beardless face is bright with intelligence and kindness. When he is out of doors his close-cropped hair is hidden by a large green turban. Beneath a flowing yellow Hindu robe one can trace the outlines of a large, athletic frame, which is a fine testimonial to the vegetarian diet on which he exists. Even this he only partakes of once a day.

"I am fifty-six years old," he said. "For years and years I studied law and medicine and all the philosophies of the East. Now I am a teacher of Vedanta philosophy, which means the attainment of the highest."

For two years he lived in a dark cave, with no one to tend him but a few faithful followers. Then he remained for five years in the heart of a Himalayan jungle.

"I come from the poorest country in the world," he tells you in his excellent English. "I am told of the prosperity of other countries, so I come to see what they know of the truth. I have just left America. What did I see there? The people are straining to get rich, eager after money, caring for nothing else. There are thieves in every street. The newspapers are full of nothing but murders and crimes. They care only for themselves. I have traveled far, and I can judge. Now I go back to my own country. The way of austerity is the way of knowledge."

Englishmen's Three Gods.

The Englishman is the last man among civilized races to be an artist, a musician or a poet, but he is the first to be a gentleman. An Englishman thinks coldly, loves coldly and fights coldly, but he gets there just the same. There is always a fascinating smoothness about him, and he worships three gods—his flag, his trade and his top-hat.—"Bulletin," Sydney.

A short time ago a pitman was asked by a friend who was very bowlegged to purchase when next "i' the toon" a pair of stockings for him. On the following Saturday the pitman entered the shop of a well-known hosier to make the purchase. The shopman was most obliging; but, having shown the intending purchaser nearly every pair in stock, he at last thought it time to ask of the man a more minute description of what was required. He said he had shown nearly all they had, and he was sure their shop was second to none; and, as they had hitherto given satisfaction to all classes, it was strange they could not now suit a customer. The pitman laconically replied, "What I want is a pair o' bow-legged yins."

Possibly the Chinese would take a little more kindly to Christianity, if they realized that you can believe in it without practicing it.—Puck.

The Luxembourg Museum has just bought several pictures that were displayed in the foreign section in the Paris exposition. Among these are Walter McEwen's "A Sunday in Holland," and Humphrey Johnson's "Portrait of a Woman," both from the United States section.

Lincoln's great war secretary, Stanton, was to have had a monument built to his memory some time since in his native town of Steubenville, O., but the association formed a few years ago to raise the funds has not met with any success. An effort is now being made there to revive the project.

Before the German Empire was unified an author had to obtain 22 different copyrights for a book, and a railway bill had to pass through 14 different parliaments.

The royal palaces of Bangkok form a city in themselves. They consist of several hundred individual palaces, surrounded by magnificent gardens and pagodas. Bangkok is really a city of waters. It is an Indo-Chinese Venice. More people live in floating homes on the Menam, "the Nile of Siam," and in many canals, than in permanent buildings.

BY-LAW No. ____

A By-law to fix the assessment of the real and personal property of The Peterborough Sugar Company, Limited.

Passed 1st reading December 17, 1903.
Passed 2nd reading December 17, 1903.
Finally passed '904.

WHEREAS The Peterborough Sugar Company, Limited, have agreed to purchase Park Lots Numbers 16, 17, 18 and 19 in Lot No. 15 in the 11th Concession of the Township of North Monaghan for the purpose of erecting thereon a factory for the manufacture of beet sugar with a capacity of 600 tons of beets per day. And whereas the establishment of such factory in the said Township is of great value to the farming community and the citizens generally and it is desirable to encourage and assist the establishment of such factory by fixing the assessment of the said Company's real and personal estate for a term of years.

NOW THEREFORE the Corporation of the Township of North Monaghan by the Council thereof enacts as follows:—

1. The total assessment of the real and personal property of The Peterborough Sugar Company, Limited, actually used in connection with and appurtenant to the operations of its Beet Sugar factory and the manufacture of Beet sugar and the by-products of sugar beets is hereby fixed at the sum of Ten thousand dollars ($10,000.00) for the period of twenty years, commencing on the 1st day of January, 1904, subject to the following conditions:—

(a) The said factory shall in each and every year of the said term be operated to the fullest extent practicable, having regard to the seasons and supply of beets.

(b) In case the works to be erected by the said company shall cease to be used for the manufacture of Beet sugar or the By-products of sugar beets, or in case the said works shall be continuously closed down for three consecutive years the provisions of this By-law shall become inoperative and of no further effect.

2. The votes of the duly qualified Electors of the Township of North Monaghan shall be taken upon this By-law on Friday, the 15th day of January, 1904, commencing at the hour of nine o'clock in the forenoon and closing at the hour of five o'clock in the afternoon of the same day at the several polling places following, that is to say:—For Polling Division No. 1, at May's School House; for Polling Division No. 2 at the Township Hall, and the Deputy Returning Officers for taking the said votes at the said places respectively shall be H. G. Webber and J. J. Bennett.

3. The 17th day of January, 1904, at the hour of 12 o'clock noon and the office of the Township Treasurer in the Town of Peterborough are hereby fixed as the time when and the place where the Clerk will sum up the number of votes given for and against the By-law.

4. The 13th day of January, 1904, at the hour of 12 o'clock noon, and the office of the said Township Treasurer are hereby fixed as the time and place for the appointment of persons to attend at the various polling places and at the final summing up of the votes by the Clerk respectively on behalf of the persons interested in and promoting or opposing the passing of the By-law respectively.

5. That all cost charges or other expenses in connection with the submitting of this By-law to the ratepayers of the said Township of North Monaghan shall be paid by The Peterborough Sugar Company, Limited.

(Signed) ROBERT FOWLER, Chairman.
(Signed) G. W. BENNETT, Clerk.
[Seal]

NOTICE

TAKE NOTICE that the foregoing is a true copy of a proposed By-law which has been taken into consideration and which will be finally passed by the Council of the Township of North Monaghan (in the event of the assent of the electors being obtained thereto) after one month from the first publication hereof in the Morning Times newspaper, the date of which first publication is the 25th day of December, 1903, and that at the hour, day and place therein fixed for taking the votes of the electors the polls will be held.

G. W. BENNETT,
Township Clerk.

Womanly Troubles

SHOULD NOT BE ALLOWED TO UNDERMINE HEALTH AND BEAUTY, BUT SHOULD BE TREATED AT ONCE BY FERROZONE

It is impossible to go into details on this subject, but the experience of many a poor woman who is crippled for life, just because she didn't use a good remedy in time, should be a warning to others.

When the first stages of womanhood appear in a young girl, a great deal depends upon getting her over this critical stage, so that in years to come she will not develop green sickness or consumption.

As soon as she complains of flushed face, headache, bearing down feelings, give her at once a course of Ferrozone treatment which will carry her past the crisis.

In the adult woman if any irregularities occur, Ferrozone will be found a remedy of remarkable potency and power.

Ferrozone is the ideal regulator for the monthly period and causes all organs of the body to perform their work properly, and at just the expected time.

It purifies the blood, tones up the nerves and vital energies. The stomach is strengthened, and digestive and assimilative processes are improved by the good work of Ferrozone. It regulates the bowels, cures constipation, and piles, and replaces disease and decay by health and strength.

There is nothing better for the complexion than Ferrozone. It removes the dark circles from under the eyes, removes and cures all manner of skin eruptions, gives brightness and brilliancy to the eyes, a rosy tint to the cheeks, whitens the teeth and develops a well rounded plump and handsome form.

Ferrozone is the ladies' favorite, and should find a place in every household. It is prepared in the form of a chocolate coated tablet, convenient and pleasant to take. Price per box 50c. or three boxes for $1.25. Sold by all druggists, or by mail from N. C. Polson & Co., Kingston, Ont.

K&K K&K K&K K&K

$400,000 was Produced from the Properties now owned by the

NEW YORK-GRASS VALLEY GOLD MINING CO.

above the 400 foot level, under the old management. During the last year the mine has been thoroughly opened up. New and richer ore bodies discovered. Large reserves now in sight.

Large and thoroughly complete Merralls mill now working. Besides this, six quadruple discharge stamps are now being installed. Each stamp will increase the present output at least 20 tons daily. The mine is now producing steadily and increasing output daily. As soon as the new stamps, now being installed, are running, the output will reach at least 125 tons daily. At a moderate estimate the monthly income should exceed

FORTY THOUSAND DOLLARS

During the coming year it is the intention of the management to install more stamps so that the output can be brought up to FIVE HUNDRED TONS DAILY.

Quick dividends are positively assured, and will most surely be large and continuous. The present Board of Directors is composed of competent business and mining men, who are giving their personal attention to the affairs of the Company.

The price of Stock will be advanced to 75 cents per Share almost immediately.

This is your last chance to purchase into the producing mine at 30 CENTS PER SHARE for cash or instalments. We have only a limited amount left at this figure, therefore send your orders in early.

REMEMBER IN BUYING THIS STOCK YOU ARE BUYING

INTO
A present producing property.
A mine that will pay large and handsome dividends, as the reserves of ore on hand warrant.
A property that has 600 acres, only a small area of which has been mined.
A proposition that can mine its ore cheaper than almost any other mine in the world, owing to free water power. Cost of mining and milling not being over $1.00 per ton.

We have just received the following telegram, under date of November 24th:

KAYE, DE WOLF & CO., New York City. Grass Valley, Cal., Nov. 24th.

Mill now running on medium grade ore from reserves. Latest mill returns forty ounces amalgam from batteries alone since sixteenth. The Perrin ore chute on fifth level has been reached. Expect the ore on this level will pay much better than any yet opened up. The bottom of the shaft is also in good ore. Recent developments fully justify the expectations that have been formed. All who visit property report a large dividend payer soon.

J. W. HAISNER, Secretary.

Send for prospectus and full information to KAYE, DE WOLF & CO., 39 Cortlandt St., New York, or to PETERBOROUGH BROKERAGE Co., Canadian Fiscal Agents.

IS THERE CERTAINTY IN MINING

The Idaho Richmond Gold Mines Company says Yes

AND HERE IS THE PROOF

1st—By having a property located in a camp that has produced over sixty million dollars worth of gold.
2nd—By having a property that has produced over one hundred and fifty thousand dollars to the former owners.
3rd—By having over two thousand feet of development work done on the property in the way of tunnels and drifts.
4th—By having four different ledges on the property, varying in width from three feet to thirty feet, besides several smaller ones all rich in free gold.
5th—By having now on the dumps are estimated to be worth over twenty thousand dollars, and all taken from development work.
6th—By having large amount of stoping ground opened up for the taking out of large quantities of ore.
7th—By being able to lease a mill that is located within two thousand feet of the property for the treatment of the ore, which will be done as soon as a small amount of the stock is sold to help defray the expenses of getting ready.

There is no promoter or gift stock, and there is yet over six hundred thousand shares in the Treasury.

We can prove to your satisfaction that we have a mine, and it will pay you to write for information, if you are looking for an investment that will pay you good returns.

PETERBOROUGH BROKERAGE CO.
Fiscal Agents for Peterborough.

THE STONY PASS MINING CO.

OF SILVERTON, COLORADO

Has opened an office in
China Hall Block, Peterborough

where investors are invited to call and inspect samples of ore taken from the mines of the Company. There never was a better investment offered the people of Peterborough.

ROBERT HARRISON
Manager.

APPEARANCE

Is such an important feature on the table It makes a heap of difference to the pleasure of the meal whether you have a good or a poor looking Sugar on the table

St. Lawrence Extra Granulated Sugar

is the whitest and best looking Sugar to be had, and besides, it has the advantage of being the best quality and greatest strength.

A BUSINESS MAN'S LETTER.

Wm. Thomson, Esq., of Orillia, Vice-President Standard Chemical Company of Toronto, Tells of a Visit to the Muskoka Free Hospital for Consumptives.

GREATLY IMPRESSED WITH WORK BEING DONE.

Personally Raises Several Hundred Dollars to Help Lessen the Load of Debt.

There can be little doubt that the National Sanitarium Association is handicapped in its great work for Consumptives in the fact that its two institutions in Muskoka are far away from any large centre of population. Few people have an opportunity to see for themselves the magnificent work that is being done.

These hospitals are away from the public eye. Any, however, who do visit them, are united in their commendation of the splendid appointments of the place, and, best of all, of the real joy and hope that is being brought to many suffering ones.

We are glad to have the opportunity of publishing the following letter from Mr. Wm. Thomson, of Orillia, one of Canada's best known lumbermen, which tells what he has seen himself. It reads:

ORILLIA, Ont., November 2, 1903.

W. J. GAGE, Esq.,
Chairman Executive Committee
National Sanitarium Association,
Toronto, Ont.

My Dear Mr. Gage,—

I have much pleasure in enclosing herewith cheque for One Hundred Dollars ($100.00) from the Tudhope Carriage Company of Orillia, a donation to the Free Hospital for Consumptives at Gravenhurst. Please acknowledge this to the Tudhope Carriage Company in the usual way.

I have written to a number of my friends, to try and get them interested in this good work. I hope to be able to send you further donations. I have written my friends a personal letter, something similar to the following:

> "Last week I paid a visit to the Free Hospital for Consumptives at Gravenhurst. I met some of the management there, and promised to try and interest some of my friends in this work.
>
> "I might say there were 49 patients there last week, all poor people, most of them without a dollar in the world, and suffering from the dreadful disease, Consumption. There are many sad stories, and I know I have thought a great deal about the work of the institution ever since my visit there. I do believe it is worthy of assistance, and we who have health and the necessaries of life should encourage this work along.
>
> "I understand the expenses lately have been double the income, and unless the management meet with more encouragement, I am afraid the work will have to be curtailed. I know you have many calls, but I do wish you would give this matter a thought, and, if possible, assist. I have written to two or three confidentially, and hope to be able to collect some more for this work. Should you not feel like contributing a donation, remember this request, and your reply is just between you and me, and strictly confidential.
>
> "I might mention, to show that I have confidence in the work, I have already given a donation of $100.00 and two row boats to the Free Hospital this year, and intend to give another $100.00 before the end of the year."

Sincerely yours,

Wm Thomson

Sir Wm. R. Meredith, Kt., or Mr. W. J. Gage, Toronto, will receive and acknowledge any contributions made.

The Navies of Russia and Japan

A war between Japan and Russia will begin with a struggle for the command of the sea. It is highly unlikely that Japan will land any considerable force in Korea until she has driven the Russian battle-fleet, and most of the Russian cruisers off the high seas. To try to invade Korea with Russian warships at large would be a mistake which often has been made in the past, and which seldom has failed to bring disaster.

The naval forces in the North Pacific are, on the whole, well matched, with a slight preponderance of actual ships on the Russian side, and a noticeable superiority in reserve strength on the Japanese side. Battleship strength is the important thing. According to The Navy League Journal, a well-informed periodical, Russia should have at present seven, possibly eight, battleships. There are the Petropaulovsk, Poltava and Sebastopol, of 11,000 tons; the Peresviet, Oslabya, Pobieda and Retvizan, of nearly 13,000 tons; and Tsarevitch, of rather over 13,000 tons. The latter vessel is on the way to the Orient, and may have arrived. These all are vessels of the standard type of four heavy guns, and eleven or twelve 6-inch quick-firing guns. Their total heavy gun force is twenty 12-inch guns, twelve 10-inch guns, and ninety-three 6-inch quick-firers. The slowest have a speed of 16 knots, the fastest of 18 knots.

The Japanese battle-fleet consists of six ships, the Fuji and Yashima, of 12,300 tons, and the Hatsuse, Shikishima, Asahi and Mikasa, of 15,000 tons. All of these vessels are armed with four 12-inch guns, and a number of 6-inch quick-firers, ten in the case of the two smaller ships, fourteen in the case of the two smaller ships, fourteen in the case of the others. Their total heavy gun force is twenty-four 12-inch guns, and seventy-six 6-inch quick-firers. They are very fast, only one having a speed as low as 18 knots; three of them exceed 19 knots.

HOSTILITIES MAY BEGIN AT ANY MOMENT IN EAST

Gloomy View of the War Situation Taken in the Japanese Capital

JAPAN IS NOW READY FOR THE CONFLICT

Ominous News from the Far East—Russia's Latest Offer Not Satisfactory to Japan

Tokio, Jan. 7.—It is reported from Vladivostock that the Russian squadron there is preparing for action.

An extra edition of the Official Gazette has been issued, containing army and navy orders prohibiting the publication of any reports of the movements of troops or war vessels from this time on. Otherwise the Japanese authorities are not interfering with the press messages.

Paris, Jan. 7.—An official despatch sent from Tokio late last evening says the Minister for Foreign Affairs had not received the Russian reply up to that time. The officials here conclude from this that Viceroy Alexieff is awaiting an opportune moment to present it.

The general tone of the comment in official circles is slightly less hopeful. The most significant feature of the despatch from Tokio is the statement that Japan is hastening final preparations for a far more extensive despatch of troops to Corea than at first contemplated. The Government has now decided to send an army of 25,000 men, organized as two divisions, to Corea. This is more than double the strength of the expedition first contemplated, and requires a large fleet of transports and extensive arrangements, which are proceeding rapidly towards completion. The destination of this army is expected to be southern Corea, particularly Fusan and Masampho. Russia may object to the despatch of this large army, and it may develop into the first act of the impending conflict. Rumors are in circulation at Marseilles that a French naval division is about to receive orders to sail for the Far East.

TWO DIVISIONS FOR COREA.

A despatch to the Havas Agency from Tokio today says: "The preparations for the embarkation of two divisions of Japanese troops are continuing actively. It is believed they will be despatched to ports in South Corea, to ensure order."

London, Jan. 7.—The Corean Charge D'Affaires in an interview says he has good reason to believe that the United States, Great Britain, Japan and Russia regarding Wiju and Yongampho will result in the opening of those ports at an early date. Russia, he added, is still opposing the opening, and a few Russian troops have occupied Yongampho.

Corea, he declared, would never agree to Russia's proposal to establish a neutral zone in Northern Corea, running south from the Manchurian frontier as far east as Yuensan and west to Ping Yang, as it would prejudice the sovereignty and integrity of Corea, which is guaranteed by the Anglo-Japanese treaty.

Telegraphic advices received from Seoul by the Charge D'Affaires two days ago did not mention the possibility of Japan landing the troops at Masampho. Should however, such action be taken, Corea would not offer armed opposition. Corea's relations with Russia and Japan were friendly, and the Charge did not believe war would result from the present negotiations.

Paris, Jan. 6.—The Chefoo correspondent of the Paris edition of The New York Herald cables as follows:

"Eight thousand Japanese troops are ready to land at Masampho, and their landing will probably mean war.

"A regiment of Cossacks is expected at Port Arthur. Reserves are being moved from Blagoveyshchensk (the capital of the Amur province in Eastern Siberia) to Tsitsihar (in Manchuria.)

"The position of the troops in Manchuria is being rearranged, but their location is kept a secret."

WOULD MEAN WAR.

The St. Petersburg correspondent of the Paris edition of the New York Herald says that should the Japanese occupy Masampho it would result in bringing matters to a crisis. Admiral Alexieff—the Russian Viceroy in the far east—has full power to act in the case of such provocation.

GREAT CONCESSIONS

St. Petersburg, Jan. 6— In her reply to Japan, Russia made great concessions and hopes that her proposals will prove acceptable to Japan.

The Foreign Office informed the Associated Press to-day that instructions had been sent to Viceroy Alexieff, on which the reply was based. The letter was drawn up in the most conciliatory spirit. Some of the Japanese proposals were accepted, while others were made the subject of extended observations, and were met by counter-proposals.

There are strong hopes that on Thursday next, the Russian Christmas, the Czar may be able to announce that peace is assured.

COREA THE VITAL POINT.

Paris, Jan. 5— It developed today that the greatest differences between Russia and Japan arises from the proposals made by Russia that a neutral zone shall be established extending from Ping Yang, in Corea, on the south to the Russian frontier on the north. The Russian Government has expressed a willingness to recognize the preponderating influence of Japan in the remainder of Corea, and the two powers are agreed respecting the principle of the integrity of China and Corea. Japan, however, saw no reason why the proposed neutral zone should be established, holding that the entire peninsula would be subject to her preponderating influence. The attitude of Russia is believed to be due to the fact that if Japan controls Corea she will thereby more easily menace Port Arthur as well as Vladivostock.

The diplomat who gave to the Associated Press the foregoing information expressed himself as confident that Russia in her reply to Japan will give way on this vital point.

COUNTER PROPOSALS SERIOUS.

London, Jan. 6—The statement made by the Foreign Office at St. Petersburg by the Associated Press today regarding the instructions sent to Viceroy Alexieff was communicated to the British Foreign Office and to the Japanese Legation here. They both expressed pleasure at the fact that Russia had evinced such a friendly attitude, but they said no definite conclusion could be drawn until the nature of the counter-proposals was known. The Japanese Legation reiterated that the cardinal points of the Japanese proposals admitted of no counter-proposals, but said that if the serious points were included among those accepted there was a possibility of reaching a settlement by further negotiations.

HEAD ON COLLISION

With the Result that Thirty People Were Killed.

Kansas City, Mo., Jan. 6— The Rock Island's California and Mexico express, which left Chicago on Monday night at 11.30 for the west, collided head-on today at Wilford, Kansas, 14 miles west of Topeka, with a cattle train. The whole train was demolished. Thirty persons were killed, and every person on the train was injured.

A relief train left Topeka for the scene returned to that city at 7.30 this morning with the dead and injured.

The train, which left Kansas City at 10 o'clock last night, was twenty minutes late, and was running at the rate of 30 miles an hour. The train carried many persons for Oklahoma, who had taken advantage of the homesteaders excursion rates. It also contained through sleepers and chair cars from San Francisco and Los Angeles.

The wreck was one of the most serious that has happened on the Rock Island system in years. Between Kansas City and Topeka the Rock Island uses the tracks of the Union Pacific.

Occurring at a small station, with few facilities for aid, and in the darkness, there was much delay in extricating the dead and in caring for the hurt. The train was composed of a combination baggage and mail car, a regular baggage car, a smoker, a tourist sleeper and a standard sleeper.

H. O. Parson, a reporter of the Topeka State Journal, who was on the wrecked Rock Island train, arrived in Topeka at 5 o'clock this morning, after driving overland from the scene of the collision. Parson escaped with slight injuries, while two persons in the seat in front of him were killed.

ABIJAH WILFRED GOGGINS

Abijah Wilfred Goggins has (to simply state the truth,)
A record which is spotless as a walrus' snowy tooth;
He's never been to sociables, to parties, nor to balls;
He's never been to theatres, nor dizzy concert halls;
He's never nursed his vanity before a looking-glass;
He's never ogled charming girls, nor stood to see them pass;
He's never read Boccaccio's tales, nor such forbidden fruit;
He's never read the evidence in a breach of promise suit;
He's never used tobacco, nor by opium been beguiled;
He's never drank a glass of beer, nor ardent spirits wild;
He's never seen a horse race, nor a prize fight's brutal strife;
He's never bet a dollar on a contest in his life;
He's never yearned for riches, nor begrudged with envious eye;
He's never stol'n a penny, and he's never told a lie;
He's never spoke an angry word, nor evil utterance swore;
He's never done a single thing his conscience might deplore;
In short, his moral record (to reiterate the truth,)
Is beautiful and spotless as a walrus' snowy tooth;
And I who promulgate the fact impart the same with joy,
For Abijah Wilfred Goggins is my darling baby boy!—Harlem Life.

Origin of The Handkerchief.

The evolution of the pocket-handkerchief is odd and interesting. There was a time when it was an unmentionable thing—an article to be kept out of sight and referred to only in a whisper. In polite conversation it was carefully avoided, and as to one's being caught using a handkerchief, it meant social ostracism.

This state of things obtained up to the time of the first Napoleon, when the Empress Josephine brought it forward for a personal reason. The only defect in her beauty was an irregularity of the teeth, and to hide this she used a delicate little handkerchief, which from time to time she raised to her lips. Thus she was enabled to laugh occasionally. Seeing that it was a case of either laughter going out or handkerchiefs coming into fashion, the court ladies adopted the pretty piece of cambric and lace, and it quickly came into favor with all classes.

In England the evolution of the article which is now so openly displayed by women was equally slow. There was a time when it was forbidden to mention it on the stage or to make use of it even in the most tearful situation, while the people in the gallery and the pit shed their tears into their laps. Even when it was mentioned for the first time in one of Shakespeare's plays it was received with hisses and general indignation by the audience. Little by little, however, the prejudice gave way, and a time came when the handkerchief could be flourished in broad daylight. Now it has fallen into a kind of refined manipulation, and from its style and management it is even possible to estimate the wealth and breeding of its owner.

TO THE AFFLICTED.

Dear Reader,—Are you a sufferer from any of the following ills: Lack of ambition, nervous exhaustion, ideas easily confused, irritability of temper, impaired memory, despondency, general debility, liver not right, kidneys out of order, rheumatism, dyspepsia or indigestion, dizzy or fainting spells? Does your heart palpitate? Do you have smothering or sinking sensations, pimples, or eruptions of the skin, etc., etc.

If you are troubled as above, you can be cured by the use of Dr. Clarke's Wonderful Little Red Pills. A trial order of three boxes for $1.00 will convince anyone that these pills are truly wonderful. We are daily in receipt of letters bearing the highest testimony. We have not space to tell you all about them here, but will answer any enquiries as to their merits. Mrs. John Macdonald, Durham, N.S., writes us, "After taking two boxes of Dr. Clarke's Little Red Pills for indigestion, which I had been troubled with for a number of years, I am now perfectly well. I followed the directions carefully.

To every one sending for a trial order and finding good results we ask to observe our special offer enclosed with every box. It is of special interest to every one.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or 3 boxes for $1.00.

Dr. Clarke's Sure Cure for Catarrh and Dr. Clarke's Sure Cure for Eczema, same price. $100 will be paid for any case that it will not permanently cure.

Equitable Gold Mining Co.

H. C. LANE, President. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 3,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 365-tunnell; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

THE PETERBOROUGH BROKERAGE CO.
FISCAL AGENTS

Rio Colorado Gold and Copper Co.

THE BEST INVESTMENT EVER OFFERED

INVESTIGATE and you will buy this Stock at FIVE CENTS

IT WILL BE WORTH PAR INSIDE OF SIX MONTHS

Clients of ours have acquired twelve claims in the richest mineral section of California, on the Colorado River. We have had this property examined, and it is said that it will make a mine equal to any of the large producers.

It carries Gold, Silver, Lead, Copper and Iron, and has abundance of shipping ore in sight. The vein is large and rich.

We have 20,000 shares to sell at 5 cents per share, and then the stock will be placed on the market at par. Guaranteed with five million of securities behind it to protect the investor from loss.

This 20,000 shares is to pay for the annual assessment work on the property, and must be sold at once.

The Company absolutely owns its property, and WE propose to make a paying proposition out of it. DON'T DELAY OR YOU WILL BE TOO LATE FOR THIS STOCK at Ground Floor prices. Remit to,

WESTERN BROKERAGE COMPANY, Incorporated
396 Henne Block, LOS ANGELES, CAL.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price that will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

REFERENCES—The Governor of the State, and any bank in Boise, Idaho. Write the Company for particulars. Address.

GEO. W. E. DORSEY, President
Boise City, Idaho.

J. W. DOUGHTY, Fiscal Agent,
Peterborough.

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 16th from 5 cents to 10 cents per share. This company owns 6 claims, 600 x 1500 each. A 70 foot shaft on the Martha claim shows a vein of $30.32 ore 3 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.32 to $19,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay then $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address.

FRED'K DALTON PARKER, LAWYER,	LOS ANGELES, CAL.
GEORGE T. ORDWAY, COMMISSION BROKER,	CHICAGO, ILL.
EGBERT CHAMBERLAIN, Dry Placer Miner, formerly of California.	NEW YORK

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 200 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

'Henry Fielding's Dream'

By CORTLAND MYERS.

itudes."

"Yes," said Henry, "David Dowling is on the right track, and we will again."

CHAPTER IV.

A Stormy Night in Union No. 10.

"You will have to make haste with me to-night, Elsie," was the way Henry greeted his sister the following evening, as he rushed in from work, and at once began hurried proceedings to get ready to go out again.

"What makes you in such a rush to-night?" she asked. "Is there something unusual at your meeting?"

"Yes," he replied, "we expect a stormy night over the treatment of the street car men who are out on a strike, and besides, we are threatened with a lockout ourselves."

"Well, you need not go on such a run through the house and through your supper. You will have ample time."

"No, I have not," he answered; "there are some things which I want to arrange before the hour, and I am on a committee which meets a half hour previous to the regular meeting."

"Oh, Henry, I believe you, and always believe you,' with a bright flash in her eye, and a smile darting across her face, 'but I just happened to think of something, and I know you have thought of it, and that is the secret of your hurry to-night. Come on, the table is all ready, and I will do my part to make no mistake in the schedule time. If the train is late, it will not be my fault."

"What do you mean by your conundrum?" queried *Henry*.

"Oh, you know."

"No, I don't; and that answer is neither a black one nor a white one."

"Just think a moment while you are loosening your collar button."

"Do you mean the preacher's coming here?" asked he.

She laughed, and said:

"That is the old way of crawling out. Asking a question, and in the interrogation mark is the whole story. You are just trying to get out before he comes."

She did not say it, but could not help wishing something would break, or Mr. Dowling would come earlier, or almost anything so that he would miss Henry before he went.

"You are not blind, Elsie. To tell the truth, I am quite willing to be down the stairs and about a block away when he gets here. I have not anything against him, but a great deal now in his favor. Yet a minister is not just my kind, and I would as *soon be necessarily absent*. You are a church girl, and can talk all evening with him. I have not anything in common, you know, and you can give my regrets. I don't know just what I mean by that, but you give it just the same."

Henry followed to the letter the prescription for dyspepsia, and swallowed his food without injury to its form or feelings, and quickly *finished* his dress by throwing on his coat and hat at the same time.

He started to the door, and was saying good-night to Elsie, when there was a footstep in the hall, and a careful rap at the door.

Elsie understood that strange and expressive look upon Henry's face — almost a startled appearance.

She said: "Open the door."

As he did, a ringing voice, laden with joy, said:

"Good-evening, Mr. Fielding. I have not met you, but I know you. Anybody could tell that you were the brother whom your sister told me about."

Henry was embarrassed for a moment, but quickly recovered to say:

"Come in; you are very welcome; of course, I know who you are, too. I have seen you before."

Elsie immediately arose to greet him, and offer him their best chair.

"You will have to excuse me for coming so early, because when I promised you to call I *forgot that* I had another engagement for the evening which I could not break, and so came here for a moment on my way."

Henry was waiting, and almost holding his breath to get the first opportunity to say: "You will have to accept my apology for going, because I was on my way to the door just as you came."

At last he said it, and added: "I suppose that does not make any difference, because you came to see my sister, anyway, and not me."

"Oh, no," said Mr. Dowling, emphatically. "I know about you, and rather think it was as much for you, if not more."

He was quick to read character and look through the surface of circumstances. He knew what would please Elsie best, and at the same time be at least a silk thread around Henry, whom he was already anxious to take as a prisoner for Christ.

No one knew how his heart went out to save men, especially young men away from home and away from God.

Whenever he saw a noble-looking fellow like Henry outside of the church, and a good, honest purpose in his soul, he said: "It seemed as if Calvary was upon him."

The people who only heard him preach did not get into the secret of his life. Sometimes even his methods and *subjects of sermons* and utterances were misunderstood and criticised, and even condemned, yet through everything he did and said there ran the one purpose— to help fulfill the holy mission of his Saviour.

He could begin a sermon almost anywhere, but he never failed to end it at the Cross.

The moment he saw Henry Fielding he detected a man for whom Christ died, and worthy of his best efforts. Henry's apparent anxiety to go only made him more anxious to reach him in some way, and he felt that it was not to be a task marked impossible.

It is this spirit in a consecrated man's soul which is always victorious.

When Henry closed the door he could not refrain from saying:—

"I heard your sermon yesterday, and I am coming again."

"I thank you," said Mr. Dowling; "I shall look for you."

He turned toward Elsie and remarked:—

"You evidently have a noble young man for your brother. He carries the marks and bears inspection."

"Yes," said Elsie, "there is only one thing lacking; if he would only become a Christian and a member of the church, I would think he was perfect."

"I imagined he was not much of a Church fellow, but we will bring him."

"I would be so happy if that could be," replied she: "I would give up anything in the world if it would only come true. I cannot tell you how happy I was. I think I was the nearest to heaven I have ever been last Sunday morning when he went to church with me, and it was all his own suggestion. I know God has answered my prayer. I have asked Him a thousand times to do this, and He has worked out everything so strangely and yet so beautifully."

"Tell me about it," said Mr. Dowling.

Then Elsie related to him the story of the church bulletin, the labor union, Richard Harding, the service and their pleasure in the sermon. "Now, this is the strangest part of it. I know some people would say, 'Oh, it was just chance,' but I know God answers prayer. Why should I go to the mission yesterday afternoon? I had only been occasionally, but I seemed impressed with a certain resistless necessity that I must go. I had to hasten more than ever, and I was late at that, but I went. Then, *to my astonishment*, I saw you there for the first time, met other friends who had seen us in the morning, even to be interested and friendly enough to walk home with me, and, strangest of all, to meet my brother and his friend Richard on the corner of the street where Miss Chalmers and I were to separate. Now he has met you.'

"Well," interrupted Mr. Dowling, "that is a chain which only a higher power could forge. The eyes of the world do not discover the working and are blind to the intricate methods of His answer, but the intricacy does not destroy the *validity*.'

"That is just what I believe,' said Elsie. "I know my prayer has been answered, and *I am sure* the end is not yet."

"Just what is the reason for his not going to *church*?" asked Mr. Dowling.

"I do not believe he has a good one," answered Elsie, "but he thinks he has. I fear he misunderstands the church and its real work in the

(To be continued.)

A Strange Thing.

There was one word the little girl heard many times a day and could not imagine what it was. The word was Mussentouchit. Baby wondered who Mussentouchit could be. The strange thing lived in the bureau drawers; it lived in the sewing machine; it lived in the tall jar that stood on the little round table; it certainly lived in the glass globe where the gold fishes swam.

This went on till baby was two years old. Mussentouchit was everywhere—in the shining books on the parlor table; in the flower beds; among the roses; even in mamma's work-basket the strange thing lived; and if baby took up a reel of silk or cotton, there was Mussentouchit.

One day baby found herself by the glass globe all alone. The family were very busy, and for a few minutes forgot the little, prying, restless darling.

This was her chance. Up went the chubby legs into the chair that stood near the gold-fish globe. Poised on the rounding cushion, baby reached far over to touch the gold-fish. In reaching she lost her balance and fell, dragging the globe to the floor. There was a crash, a scream, a rush, and mamma was on the spot. Baby was picked up, kissed and scolded.

"I dess I tilled old Mussentouchit 'is time!" she said, shaking herself *and* walking off.

How to Save Money.

For one thing we must resolutely resolve that we will not spend money in trifles. "Trifles make up the sum of human life;" they certainly add very considerably to the sum of household expense. Yet the peculiarity about them is that the people who most indulge in them are the most unconscious of the fact. "Avoid spending money in trifles, of course," says the embarrassed householder, "that is what every one says; yet why repeat the advice to me? I never buy trifles; I have something else to do with my money." Yet more likely than not the very next time this individual goes to market a small purchase will be made which benefits no one, and which runs away with one of those pennies that must be put together before the pounds can be saved. It is a characteristic of unthrifty people that they readily yield to the temptation to buy trifles. The unthrifty, the unmethodical and the weak let money dribble between their fingers; the capable, managing, economical persons do not part with money unless they get money's worth in exchange.

A Snake in a Base Ball Game.

Two Pond Eddy (N. Y.) clubs were playing a game of baseball recently, when a batter struck a ball over into left field, and the fielder ran to get it. The ball rolled along through the grass, and when the player who was after it got to where he had seen it stop, he was almost paralyzed to see lying there, instead of the ball, a big rattlesnake, coiled to strike. The player jumped back in time to escape the fangs of the snake, for it struck savagely at him. The player smashed the snake's head with a stone. The ball lay in the snake's coils. It is supposed that the snake was lying asleep in the grass, when the ball rolled along and ran against him. The reptile had instantly coiled around the object and prepared for suspected danger.

A Cold Wave.

A cold wave, as defined by Prof. T. Russell, is a fall of temperature in twenty-four hours of 20 degrees over an area of 50,000 square miles, the temperature in some parts of this area descending to 32 degrees. Between 1880 and 1890 no less than 691 cold waves were recorded in the United United States.

But a Momentary Triumph.

Revenge is a momentary triumph, of which the satisfaction dies at once, and is succeeded by remorse; whereas forgiveness, which is the noblest of all revenges, entails a perpetual pleasure. It was well said by a Roman emperor that he wished to put an end to all his enemies by converting them into friends.

To Protect Animals.

There is one society of boys and girls in England to protect animals, which has over 50,000 members.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jennie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.66 to $20 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.96 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jennie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values: $12.60. This being a general sample taken from the dump. The other two assays are $62.66 and $79.66 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group, is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Three developed mines with more than $500,000.00 worth of ore on the dumps and an inexhaustible supply in the mines, assaying as high as $140.00 per ton, with an actual mill test of seven tons running

$24.65 PER TON IN GOLD

One mill completed ready for operation and another being built. One and one-half miles from the main line of the Southern Railroad, cheap labor, cheap fuel. Plenty of water and a climate allowing operations 365 days per annum, are a few of the advantages that go to make this one of the most valuable mining properties today in the country.

Send for free copy of the "Gold Nugget" and learn something about the North Carolina Gold Fields that produced all the gold in this country before '49 and that are today attracting the attention of the world.

It is said that charcoal is a very valuable hygienic agent for pigs. It is a corrective, and acts as a preventive against various diseases arising from disordered digestive organs. If some charcoal, or even ashes, are put in the pigsty the pigs will soon show they like it.

300 CANADIANS WOULD AID JAPAN

Big Rush For Active Service By South-African Volunteers

CANNOT ACCEPT HELP

Constitution of the Army Forbids This Japanese Consul Confident of Result

Montreal, Jan. 7.—"Over 300 applications have reached me from Canadians all over the Dominion, from Halifax to Victoria, to join the Japanese army as volunteers in the event of hostilities with Russia. The majority of these men saw service in South Africa and are drawn from commissioned and non-commissioned officers, engineers, etc. I am sorry to say there will be no chance of the Japanese Government accepting any volunteers from Canada. Our army is a conscriptive army, and no foreigners can serve. I need hardly say, however, how gratified my Government is at the friendly feeling evidenced in these applications for service."

These were the words of Mr. T. Nosse, the Consul-General of Japan, to the Star today. Now that the tension between Japan and Russia is strained almost to breaking point, the views of Mr. Nosse of the subject of Japan's preparedness for the struggle that would appear inevitable are timely and to the point.

THE POSITION OF JAPAN.

After outlining the raison d'etre of the trouble between the two countries, Mr. Nosse spoke of the position of Japan after the China-Japan war. Corea was the cause of that war, and since that time the independence of the country under the guiding hand of the Japan Government had been maintained. Then came the Russians and pounced down upon Manchuria. Finding they were successful in that seizure, they laid covetous eyes on Corea. Corea was the key to the coast line of Japan, and in order for the latter country to maintain her independence as a nation it was necessary that the Russians should not be allowed to have one inch of Corea. Having gained such a stronghold in Manchuria, the Russians were of the opinion that it was only necessary to keep at it in order to get into Corea. Japan, however, was determined that so far as she was concerned (and as she was the most interested party her views should have some weight), Russia should not only give Japan certain privileges in Manchuria, should leave Corea alone once and for ever.

Regarding an outbreak of hostilities Mr. Nosse said that Japan would have been perfectly justified in going to war with Russia last summer. She was, however, held back by England. Matters had gone to such a length now that Mr. Nosse was of the opinion that war could scarcely be avoided. "It depends on the strength of the peace party in Russia," he said with a smile. "At the present moment the war party would appear to be in the ascendant. Their policy is that if Japan is to be beaten she must be beaten now. She is a rapidly growing country, and if we do not crush her now she will soon get too big for us."

IMPRESSED WITH PREFERENCE POLICY

Montreal, Jan. 7.—Hon. Henry Copeland, Agent-General for New South Wales in London, is at the Windsor. Mr. Copeland is on his way to London after a six months' leave of absence in Australia.

Speaking of the fiscal campaign of Mr. Chamberlain, Mr. Copeland said:

"Although the Australians are a conservative people, and always debate and weigh well any public question before giving it their endorsation, I believe the people, as a whole, are favorably impressed with the Chamberlain policy. The Federal Government, prior to the recent elections, was likewise in sympathy with the movement."

Of the recent elections in the Commonwealth, Mr. Copeland says he has been endeavoring to ascertain the exact standing of the parties in the Parliament of Australia ever since he left Vancouver, but to no purpose. He saw that the labor party made strong gains, owing to the assistance of the newly enfranchised women voters, but that is all. He thinks that if Canada is desirous of cultivating trade relations with Australia, as she appears to be, an attempt should be made to secure a little news from time to time.

The Agent-General then described the splendid harvest which had followed four or five years of drouth and general depression, and he added that all sections of the Commonwealth were now in the boom.

Hon. Mr. Copeland was born in England, but went to Canada about 47 years ago. He was in political life in New South Wales prior to removing to London, and held office in three different Administrations.

He says that up to the present time the Commonwealth has not appointed a High Commissioner in London, although it is probable she will do so sooner or later. Although some little friction has taken place in working out the new constitution, Mr. Copeland is convinced that in time the Commonwealth will be a success. No decision, says Hon. Mr. Copeland, has yet been reached as regards the selection of a seat for the Federal Government. Tumut was chosen by one branch of the Parliament, while Bombala was selected by the other, and it may be some time before the capital is finally located. In excusing the delay Hon. Mr. Copeland said that the same thing was experienced before in the choice of Ottawa and Washington as capitals of Canada and the United States.

Hon. Mr. Copeland will visit Ottawa and Quebec before leaving for St. John or Halifax, en route for London. He is generous in his praises of Canada.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
AND
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.
Capitalized at $2,000,000.00.
Par value $1.00. Full Paid and non-Assessable
At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 1000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.
1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.
Selling at 75c a Share
Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 175 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known, proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*
C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado
ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not A Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO.,
FISCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.

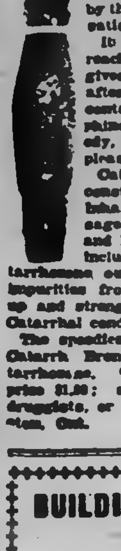
WANTED—GOOD AGENTS IN EVERY CITY.

MINISTERS PRAISE CATARRHOZONE

Rev. D. K. Smith of White Head N S was cured of Catarrh by CATARRHOZONE.

The following statement coming from one of Nova Scotia's prominent churchman carries conviction of the fact that Catarrhozone is all right.

"For years I tried all the advertised remedies for Catarrh, but was unable to get relief until I used Catarrhozone. Before I had used the Inhaler half an hour my nostrils became free and clear so that I could breathe easily through them. In one day Catarrhozone helped me immensely, stopped my coughing and hawking and cured a dull pain that was continually over my eyes. I have great pleasure in recommending Catarrhozone. I have proved it the best remedy for Catarrh and diseases of the throat, lungs and bronchial tubes."



There is certainly no remedy that is so well spoken of by the clergy as Catarrhozone and this can be accounted for by the fact that it gives perfect satisfaction.

It is the only remedy that reaches all diseased parts and gives quick relief without bad after effects. Catarrhozone contains no cocaine nor morphine. It is nature's own remedy, soothing and healing, and pleases everybody that uses it.

Catarrhozone is a local and constitutional treatment. The inhaler clears the air passages, stops the headache, and Ferrozone Tablets that are included in every complete Catarrhozone outfit, never fail to drive impurities from the blood. This builds up and strengthens the system so that Catarrhal conditions cannot exist.

The speediest cure for Coughs, Colds, Catarrh Bronchitis and Asthma is Catarrhozone. Two months' treatment, price $1.00; small size, 25 cents; at druggists, or N. C. Polson & Co. Kingston, Ont.

LOST

On Tuesday evening in the northwest part of the town, a goat skin robe, with letters W. H. in black paint on red lining in the center. Finder will be rewarded by leaving the robe at this office.

A Bold Theft

On Wednesday a cutter was taken from the Monroe House, belonging to J. H. E. Vrooman, V.S., Bobcaygeon. Chief Rossel would be pleased to have any information on the subject

Mr. T. F. Matthews Chairman

The Water Commissioners held their initial meeting for this year on Wednesday. There were present Messrs. T. F. Matthews, W. H. Hill and W. H Moore, Mr. Matthews was re-elected chairman for the third consecutive year.

Allowed to Go

At the Police Court yesterday, C. W. Throop, who pleaded guilty of forgery last week, appeared for judgment. Restitution having been made the magistrate, in view of the fact that it was the prisoner's offence, and because the family record had always been a creditable one, allowed him to go.

A Veteran Missionary

Rev. Dr. McDougall, a man of great natural gifts and long experience as a pioneer preacher in our Northwest will preach in Mark street church next Sunday morning. From early boyhood he has lived in the Northwest. As a peace maker in the Riel rebellion and a wise and trusted adviser of council and governments, he is one of the history makers of that great land. He preaches on Sunday morning in the interests of the Woman's Missionary Society of the church.

NEW TERM

AT THE

Peterboro' Business College

—BEGINS—

Monday, January 4, 1903

Day and Night Classes.

It is desirable that all who purpose entering the school should do so on the above date.

WM PRINGLE,

Opposite Post Office, Principal

Our Water Works System

Peterborough now has in the neighborhood of 22 miles of water mains, of which 5,121 lineal feet has been laid during 1903. There is a total of 143 hydrants.

Amateur Theatricals

The plan of the Opera House for the amateur theatrical entertainment to be given for the Benefit of the Children's Aid Society of the Alexandra Club will open at Sallsbury's on Monday morning. Tickets are selling rapidly and the prospects for a successful evening are excellent.

Old Servants Remembered

Mr. John Wood, of Ashburnham, whose duties as clerk of the municipality, terminated with the union, filled the position for 31 years, and Mr. A. H. Peck, was treasurer for 28 years. It was pleasing to know that the council of the Village, at its last meeting, fittingly remembered the two faithful officials.

Preparatory Service at St. Paul's

Service preparatory to communion will be held in St. Paul's church this evening at 8 o'clock, when Rev. G. Yule, of Springville will preach, and the new communicants will be received and welcomed. The members of Session will meet at half-past seven in the parlor of the church.

They will Investigate

Toronto World—Mr. Bertram, of the Government's Railway Commission, leaves Toronto for St. John, N.B., where the commission will commence its enquiries. The commission will have the services of a first-class engineer to advise them. In Ontario, one of the subjects of investigation will be the Trent Valley Canal.

The Closing Meeting

The closing meeting in connection with the Week of Prayer services was held in Charlotte street Methodist church last evening. Rev. W. J. Jolliffe, pastor of the church, presided, while with him on the platform were Revs. J. G Potter, J. C Davidson, Dr. Torrance and J. A. Wilson. The address of the evening was delivered by Rev. Mr. Potter on the subject prescribed "Families, schools, colleges." The address was a powerful one, and the meeting was a helpful one in every way.

Visit of Famous Missionary

Rev. Dr. John McDougall, the veteran missionary among the Indians of the Northwest will preach in the George street church on Sunday evening next, under the auspices of the W.F.M.S. Mr. McDougall was attached to General Strange's staff in the last rebellion in 1885 and led the column during most of the campaign. Mr. McDougall's father was a missionary and the Doctor has been among the tribes since he was 16 years old. His influence among the chiefs has been most extraordinary, and always exerted to keep the tribes loyal to the Crown. None of his Indians ever carried a rifle against the British Government.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. J. J. Daly, Orillia, is in town taking in the races.

—Mr. A. B. Spellman, of the Clarendon House, Hastings, was in town yesterday.

—Mr. Percy O. Jameson left this afternoon for Lethbridge, Alta., after spending a short time at home.

—Miss Eva Byers, Manvers, is the guest of her sister, Miss Maggie Byers Sherbrooke street.

—Miss Eva Byers, Manvers, is the guest of her sister, Miss Maggie Byers, Sherbrooke street.

—Montreal Star— "Major George W. Hatton, formerly well known in military circles in Montreal, died in Benton Harbour, Mich., of heart failure, December 28th. He was a brother of J. Cassio Hatton, Esq., K.C., and Mrs Charles D. Tylee, of Fairfield, Rosemere." Major Hatton was a first cousin of Mr. Geo. W. Hatton of town.

DOURO ELECTIONS

Only One of the Old Council Has Been Re-Elected

Full returns for Douro elections are at hand, as follows;

FOR REEVE.

	Divisions 1	2	3	4
McCligott	36	69	61	22—186
Quinn	23	14	8	6—51

Majority for J. McCligot 134

FOR COUNCILLORS.

Moher	37	87	74	41—239
Allen	47	56	61	36—199

Jory	63	31	30	40—164
Condon	40	31	48	25—144
Ryan	22	28	30	30—108

First four elected.

KNIFED

Coffee Knifed an Old Soldier

An old soldier, released from coffee at 72, recovered his health and tells about it as follows;

"I stuck to coffee for years although it knifed me again and again.

"About eight years ago," (as a result of coffee drinking which congested my liver) "I was taken with a very severe attack of malarial fever. I would apparently recover and start about my usual work only to suffer a relapse. After this had been repeated several times during the year I was again taken violently ill.

"The Doctor said he had carefully studied my case and it was either 'quit coffee or die,' advising me to take Postum in its place I had always though coffee one of my dearest friends, and especially when sick, and I was very much taken back by the doctor's decision for I hadn't suspected the coffee I drank could possibly cause my troubles.

"I thought it over for a few minutes and finally told the doctor I would make the change. Postum was procured for me the same day and made according to directions; well, I liked it and stuck to it and since then I have been a new man. The change in health began in a few days and surprised me and now, although I am seventy-two years of age, I do lots of hard work, and for the past month have been teaming, driving sixteen miles a day besides loading and unloading the wagon. That's what Postum in place of coffee has done for me. I now like the Postum as well as I did coffee.

"I have known people who did not care for Postum at first but after having learned to make it properly according to directions they have come to like it as well as coffee. I never miss a chance to praise it." Name given by Postum Co., Battle Creek, Mich.

Look for the little book, "The Road to Wellville" in pkg.

THE WINTER RACES.

THE SECOND DAY'S RACES A SUCCESS

A Good Crowd and Fine Day's Sport—The Winning Horses

There was a much larger attendance at the Driving Park yesterday than there was on the previous day, and those who went were well repaid for their trouble. The following is the result;

2.30 CLASS, PURSE $150.

BlackBoy	1	3	3	3	2
Robert Henry	4	4	1	1	4
Jim Watson	3	1	2	2	1
Keepabell	2	2	4	4	3

FREE FOR ALL, PURSE $150

Guctnenor	1	2	2	3
George Sheeley	2	3	2	d. h.
Maud Wilks	4	4	4	4
Sphinx B	3	1	1	d. h.
J. B F.	6	5	5	6

There remains two heats one in the 2.30 class and one in the free for all to be run this afternoon. There will also be a consolation race for the horses who were not inside the money in the 2.40 class. This race includes 6 entries, the purse to be 75 per cent. of the days gate receipts.

The Turf Club are to be congratulated on the success of the meet. The races were the most exciting ever witnessed in Peterborough.

BURLEIGH AND ANSTRUTHER

Full Returns of the Voting for Reeve and Councillors

The following is the result of the municipal elections;

FOR REEVE.

Tucker	29	59	88
Lean	28	48	76
Wigg	35	32	67
Hadley	6	22	28

The first four are elected.

WANTS AN EXPLANATION

East Ward Wants to Know if the Dickson Co. Was Exempted

To the Editor of The Times;

Dear Sir,—I did not write before the elections took place for fear that certain rumors afloat had no foundation, and that by giving publicity to such rumors it might injuriously affect these members of the Ashburnham Council who were seeking election in Greater Peterborough, there not being time to make a reply to vindicate themselves. The rumors to which I refer are that an emergency meeting of the Ashburnham Council was called during the last day or two of the village's existence as a separate municipality, and a bylaw was passed exempting the Dickson Company's property in Ashburnham from taxation for ten years. As there is so much talk about this transaction and I am loath to believe that neither Messrs. Adams or Scott would be a party to anything that they would be ashamed of, I, as well as many others, would be pleased to know the facts of the matter before forming a judgment in the case. Will Mr. Adams be good enough to give us a satisfactory explanation of the matter, as I am sure he will be able to do.

Yours truly,

EAST WARD.

January 8, 1904.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporters on Their Rounds

—Stratford proposes to return to the ward system.

—The class of instruction for officers of the 57th met last night.

—Charlotte street Young Men's Guild will hold their regular monthly meeting this evening.

—On bargain, 125 sheets best quality of note paper for 19 cents. Times Bookstore.

—If delivery of The Times is irregular make complaint to the office without delay.

—The statutory meeting of the new Council will be held on Monday evening.

—See the cloth bound books on bargain at only twenty cents each during this month. Another line at two for 25 cents—a snap. Times Bookstore.

—The Times is requested to state that the Never Learn Club will meet on Tuesday evening next at 8.30 instead of Wednesday night as usual.

—To every subscriber who brings us one new subscriber to the Weekly Times for one year, we will give free of charge a choice of three splendid premium pictures. See samples at this office.

THE DICKSON CO'S ASSESSMENT

A Lucky Thing for Us That The Company Did Not Locate at Lakefield

The Times is in receipt of a lengthy letter regarding the Dickson Company's assessment, which the writer has either forgotten to sign or is ashamed to affix his signature. We would not refer to the matter at all only that we think a few words on the subject just now may not be amiss. The Dickson Company, when they disposed of their mill property to the Cereal people, were about to centre their business in Lakefield. Had they done so, the loss to Peterborough would have been incalculable. Not only in the way of wages paid out to employees, but the town would have been deprived of its main wood supply.

The Dickson Company deserves to be treated with every consideration. It is an industry that has kept the town together when there was little else doing.

In their bargain with Ashburnham Council the company has secured barely what it is entitled to. There are a few chronic grumblers whom we have with us always, who never fail to register a kick on every possible occasion. Our anonymous correspondent is evidently one of them.

Bargains in Pianos

There are some first class bargains to be had in some new and second hand pianos and organs, at W. G. Landreth's, 190 Charlotte street, agent for Heintzman & Co., Toronto. Call and see for yourself.

"I wrote to Doctor Pierce, who sent me a very kind letter and advised me."

Thousands of weak and sick women can trace the beginning of a new life of perfect health to that letter written to Dr. Pierce.

Sick and ailing women are invited to consult Dr. Pierce, by letter, *free*. All correspondence held as strictly private and sacredly confidential. Address Dr. R. V. Pierce, Buffalo, N. Y.

Dr. Pierce's Favorite Prescription cures weak and aching backs, headaches, nervousness and other womanly ailments by curing the womanly diseases which cause them.

"In the spring of 1902 I became very ill," writes Mrs. Alvina Scholtz, of Lake Washington, Lesueur Co., Minn., "my back was very weak and ached so that I could do no work at all, so I was obliged to take to my bed. I felt a constant desire to urinate and the pains in abdomen were almost unbearable. I wrote to Dr. Pierce, who sent me a very kind letter, and advised me to take his 'Favorite Prescription' and 'Golden Medical Discovery.' I took six bottles of each and am a well woman now. I cannot say enough in favor of Dr. Pierce's medicines."

"Favorite Prescription" makes weak women strong, sick women well. Accept no substitute for the medicine which works wonders for weak women.

Dr. Pierce's Pleasant Pellets are the most desirable laxative for delicate women.

GIVING STRENGTH & VIGOUR

SIDE-LIGHTS ON LIFE.

Conscience is that within us which tells us what our neighbors are doing wrong.

If you would be happy you must learn to live a day at a time.

It is never too late to mend, but sometimes it is time wasted.

Never belittle your own acts. People are very apt to take you at your estimate.

Every time an argument gains you a new friend it loses you two old ones.

Some men find it so hard to get enough to drink that they don't bother about anything to eat.

Every woman can venture to be saucy if she pleases—but not if she displeases.

It is not the false teeth that are most objectionable; it is the false tongue behind them.

Instead of waiting for his ship to come in a man should charter a tug and go out to meet it.

An Irish orator speaking of his native land said:—"Ireland's cup of misery has been overflowing for years and is not yet full."

Innocence is like an umbrella: when once it is lost it is useless to advertise for it.

Beauty is only skin deep, but it answers the purpose just as well as if it were deeper.

When a man changes his mind the other fellow is apt to get the worst of the bargain.

An ounce of might is often more powerful than a pound of right.

MEN AND WOMEN. Use Big G for unnatural discharges, inflammations, irritations or ulcerations of mucous membranes. Painless, and not astringent or poisonous. Sold by Druggists, or sent in plain wrapper by express, prepaid, for $1. or 3 bottles $2.75.

BIG G. CURES in 1 to 5 days. Guaranteed not to stricture. Prevents Contagion. THE EVANS CHEMICAL CO. CINCINNATI, O. U. S. A.

THE WAR CLOUD LOOKS OMINOUS BRITISH CABINET WILL MEET TO-DAY

England Will Probably Declare Herself in Favor of Japan

VERY GRAVE SITUATION

Great Preparations Continue for the Conflict which is Close at Hand

London, Jan. 9—The British Cabinet is called to meet today, when it is expected an important declaration will be forthcoming regarding the eastern situation.

The Daily Mail says that England will probably tell Russia what she is up against in her quarrel with Japan.

The Tokio correspondent of The Times says the Japanese distrust the optimistic forecasts of continental Europe in reference to Russia's reply. They recall that similar forecasts preceded the first reply, from which not only the very semblance of conciliation was absent, but the previous concessions by Baron von Rosen, the Russian Minister, had been abrogated. The leading journals bitterly resent the fact that whereas Japan's original proposals related to Manchuria only, Russia has introduced Corea, which presents a life and death problem for Japan, thereby impending a settlement.

NO IMMEDIATE DEVELOPMENTS.

There are two indications that nothing definite has developed in the Far Eastern crisis and that nothing is likely to develop until Monday.

The first, according to the Tokio correspondent of the Daily Telegraph, is that an urgency meeting of the Japanese Cabinet has been called for today, and the second is that the members of the British Cabinet have been notified to assemble on Saturday.

The meeting of the Japanese Cabinet has almost certainly been called for the purpose of considering the reply of Russia to the last Japanese note, and it is equally certain that the meeting of the British Cabinet will be for the purpose of discussing the attitude of Great Britain in the light of the Russian reply.

Editorials in this morning's papers are almost unanimous in admitting that even if the war should be confined to Russia and Japan, Great Britain cannot possibly see Japan crushed, and in the event of Japan suffering a severe naval defeat, Great Britain would be compelled to go to her assistance.

The Telegraph asserts the Cabinet will be compelled to consider also the limits of British neutrality in the event of a Russo-Japanese war.

Some of the papers urge that a plain indication of Great Britain's intentions would be most effective in averting war.

The Morning Post asks: "What has the Government done by way of preparation for a war on a great scale in 1904?"

The Daily Mail wants Russia notified that "under no circumstances will Great Britain permit the Russian Black Sea fleet to pass the Dardanelles," and urges the Admiralty to "see that the navy is quite ready for emergencies."

REGIMENT FOR COREA.

The Daily Mail's correspondent at St. Petersburg says that the news is confirmed that the Second Rifle Regiment has already left Mukden for Corea to protect Russian interests there.

The delay in the departure of the Russian warships lately assembled at Bizerta, which are destined for the Far East, is reported to be due to the fact that instructions have been received directing them to shadow the Japanese cruisers Kasaga and Nisshin. The Russian cruiser Aurora has left Bizerta for the Piraeus, and the Dimitri Donskoi has gone to Suda Bay to await the departure of the Japanese cruisers from Genoa. The Japanese vessels will be followed through the Suez Canal, if they go that way. The Oslyabya and other vessels of the Russian squadron remain at Bizerta. Some of these cruisers will follow the Japanese cruisers if they sail westward. The purpose in either case is to capture them if war is declared. The Japanese thus have the alternative of running the gauntlet of the Russian ships or being bottled up in a neutral port."

A despatch to Reuter's Telegram Company from Tokio says: "All the Russian warships recently at Vladivostock are reported to have sailed, probably for Port Arthur.

HOW NEGOTIATIONS STAND.

Tokio, January 9.—A high Japanese authority makes the following explanation of the status of the far eastern question.

The statement that Russia has made concessions to Japan is not exact. Russia, in October, made certain concessions which were accepted by Japan, subsequently withdrew them, and assumed an attitude which left the Japanese little hope of reaching a satisfactory agreement.

"The Japanese Government recognizing Russia's special interests in Manchuria, and wishing to regulate, once for all, all questions in the far east, made the following proposals:

"Russia and Japan should mutually respect the independence and territorial integrity of China and Corea. To recognize reciprocally—Japan, the special interests of Russia in Manchuria; Russia—the special interests of Japan in Corea.

To engage mutually not to infringe—Japan the commercial rights and immunities acquired by Russia in Corea; Russia—the commercial rights and immunities acquired by Japan in Manchuria.

Russia declined the Japanese propositions and submitted a counter proposition, providing for the creation of a neutral zone extending from the China-Corean frontier to Wong Tan, on the east, and to Ping Yang on the west. This zone comprised about a third of Corea.

This took from Japan all guarantee of the protection of her rights in Manchuria, and sequestrated a considerable part of Corea, where, without contradiction, Japan's interests preponderate, being within the legitimate sphere of Japan.

"The proposal exasperated Japanese public opinion. Japan could not accept the proposal, for this reason;

"The definite occupation by Russia of Manchuria, would be a permanent menace to the independence of Corea, which Japan must prevent at any price, for Corea is an advance post of Japan's line of defence and the safety of Corea is a condition sine qua non of her own security."

BRITISH IMPORTS FROM THE DOMINION

The Value for Year Just Closed Totalled £16,000,000

C. P. R. LONDON OFFICES

Lord Strathcona at Opening Ceremonies Speaks of Need of a Fast Service

London, January 9.—The imports into Great Britain from Canada for the year, 1903, according to the Board of Trade returns, are as follows,—Cattle, 190,315 head, valued at £3,315,776; sheep and lambs, 23,291 head, £139,046; wheat, 10,504,341 cwts., £3,751,867; wheat, meal and flour, 2,637,596 cwts., £1,256,341; peas 213,164 cwts., £81,814; bacon, 946,249 cwts., £1,001,657; hams, 137,497 cwts., £524,642, butter, 185,464 cwts., £800,243; cheese, 1,848,153 cwts., £4,833,000; eggs. 667,000 great hundreds £218,571; horses, 421, £14,640.

The figures for the month of December are as follows;—Cattle, 9,276 head, valued at £156,141; sheep and lambs, 11,400 head, £17,107; wheat, 833,100 cwts., £257,445; wheat, meal, and flour, 231,700 cwts., £112,046; peas, 47,170 cwts., £16,756; bacon, 46,130 cwts., £106,514; hams, 7,116 cwts., £18,542; butter, 3,727 cwts., £18,-436; cheese, 107,337 cwts., £276,533; eggs. 110,645 great hundreds, £46,346; horses. 12, £080.

THE C.P.R. OFFICES.

The magnificent Canadian Pacific offices in Trafalgar Square were formally opened to-day. Lord Strathcona, who performed the ceremony, sketched the history of the railway from thirty-three years ago, when, he said, not five people in Canada believed there would ever be a railway from coast to coast, running north of Lake Superior. He emphasized the necessity of a faster ocean service, as a compliment to the fast Canadian Pacific expresses, and the great importance of being able to get a through ticket from London to the Far East or South. With the work of the office of the C.P.R. in the heart of London under Chief Agent Baker, the able labours of the Canadian Government officials, and Canada's magnificent prosperity, he predicted a glowing future for the country

Among those present were Admiral Freemantle, General Jameson, Mr. Archer Baker, Mr. W. T. R. Preston, Mr. J. G. Colmer, Mr. Griffith, of the Canadian Office, and Mr. W. J. Shaughnessy, son of Sir Thomas, President of the C.P.R.

AN ANTI-CHAMBERLAIN VIEW.

The Liverpool Daily Post, commenting on the correspondence between Mr. Chamberlain and Premier Deakin, of Australia, says Chamberlain has struck out of the republished version of his speech the passage in which he foretold that Canada would restrict her manufactures in the interests of Great Britain, but this simple and easy expedient of a facile orator will not go far to meet the Canadian difficulties. The Post says that Peel's article in the Independent Review has shown what an intricate and sinuous mass the Canadian fiscal policy is. Peel found nothing to give any hope of good to accrue to the Empire from Chamberlain's proposals relating to Canada.

THE GERMAN SURTAX.

The National Zeitung, referring to the negotiations with Canada, says that the British Government, in replying to Germany, laid stress on the view that with regard to commercial policy, Canada must not be regarded by foreign states as an independent country. The paper infers that it depends on England alone, whether the commercial relations of Canada with Germany are satisfactory or not.

THE CANADIAN LUNCHEON.

The Canadian Society luncheon, at the Holborn restaurant, today, was a great success. Mr. Roy Somerville presided. Hamer Greenwood, who was the principal guest, made a humorous and entertaining speech to the large company present. Mr. Barlow Cumberland, of Toronto, has resigned the presidency of the society, owing to his approaching return to Canada.

SNOWSHOE COSTUMES
MADE NEW BY
DIAMOND DYES.

If your blanket costume, sash, tuque and stockings worn last year are now faded, soiled or spotted, you can, at a cost of from 10 to 30 cents make them as good as new by using DIAMOND DYES. The work is easy and simple. Diamond Dyes are money savers.

A SUCCESSFUL MEET.

RESULT OF THE THIRD DAY'S RACES AT THE DRIVING PARK

The third day of the winter races brought to a close a most successful meet and to the Turf Club is due much praise for the class of racing and the manner in which they were carried out. That the Club have encouraged true legitimate sport in anything coming under their management is evident from the great success that attended their races. The horsemen who bring their horses to compete are some of the best in the Province and are owners of the finest and speediest horses on the turf. These gentlemen speak in the highest terms of the Club for the way in which the proceedings are conducted and the prompt and courteous treatment received by them at the hands of the management. This in a large degree is conducive to successful races and the Club has done all in its power to furnish lovers of the turf with the cleanest sport.

Yesterday's programme consisted of two unfinished races, Sphinx B. and George Sheeley trotting a dead heat in the free for all on Thursday afternoon, a consolation race for all horses which were not inside the money in the 2.40 class, for a purse of 75 per cent of the rate receipts and the unfinished race in the 2.30 class. Following were the successful horses,

In the free for all which resulted in a dead heat Thursday afternoon, Sphinx B. won the heat and race.

In the unfinished race, two heats of which were won on Thursday, Jim Watson won first money yesterday, and Black Boy second money.

In the consolation race two heats were trotted, Lord Roberts taking first and Maud Wilkes second money.

MANITOBA LEGISLATURE

Was Formally Opened at Three O'clock on Thursday

Winnipeg, Man., January 9.—Promptly at 3 o'clock, yesterday afternoon, amid the booming of guns from Fort Osborne, Sir Daniel McMillan, as Lieutenant-Governor, formally opened the first session of the eleventh Manitoba Legislature. A guard of honour in command of Col. Evans, escorted the Governor's party to the House. Before the delivery of the speech from the throne, the members retired and on their return to the chamber, announced that James Johnston, of Boissevain, M.L.A., for Turtle Mountain, had been elected speaker.

Lieut.-Governor McMillan then delivered the speech from the throne, which was very brief.

Hon. R. P. Roblin, leader of the Government brought down a bill on the administrating of oaths, and asked for an adjournment till Monday at 3 p.m.

The session promises to be the shortest in the history of the province, there being no important legislation to discuss.

MRS. A. LEGAULT
Almost a
Lost Woman
from
Nervous Prostration,
Insomnia and
Headache

Mrs. A. Legault, Montreal, Que., says: "I would have been a lost women had I continued much longer in suffering. My case was a bad one. Nervous prostration, insomnia, headache, and loss of memory made up my troubles, and I feared they would lead to insanity. The doctors treated me with all their skill, but I did not get any better. Some of my friends advised me to try Paine's Celery Compound. The first bottle gave me little relief, but the second worked miraculously on my nerves. After the use of nine bottles I can positively say I am cured."

T. A. S. HOCKEY TEAM DEFEAT KEENE BY 5-4

IN A HARD FOUGHT GAME ON BROCK STREET RINK

A hard fought game between Keene and the T.A.S. marked the opening of the Trent Valley League in this district last night. It took 17 minutes over time to decide which team would be the victors. All through the game the spectators, who numbered about 1,000, a large number coming from Keene, were wild with enthusiasm at the brilliant plays of their respective teams. The T.A.S. went on the ice with much the same team as last season, with the exception of Crough in goal and Barbeau on the wing, but were not in condition, which told on them greatly. Their shooting was inaccurate and many shots went to either side of the net, the combination work was not to the mark, the passing being done without much judgment, and the players relied considerably on individual playing.

Billy George, who has been on the ice but three times this season, played a remarkably fine game considering the practice he has had. Parnell also played a good game and showed up well in the scoring. Barbeau, who figured on the team for the first time in a match showed up well. George Lynch who jumped into the game during the past week, showed lack of practice toward the finish, but was prominent in many brilliant plays in the early part of the match. Crowley at cover-point made a number of good rushes up the ice and attacked the visitors' nets time after time. Billy Meagher was again at his old position, point, and saved the nets from being punctured time after time by breaking up the combination of the visitors. Crough, who was in the nets for the T.A.S. played a very good game.

Keene was represented by practically the same team as last year and were in the pink of condition, working hard and fast from the start to the finish, Quinn, Lang and McCarthy doing good work while J. McIntyre in goal, played a great game.

Just before the expiration of time, when the T.A.S. tied the score, making it four all, the visitors grew disheartened and from then began to lag.

At the end of time both teams had scored 4 goals and were ordered to play 10 minutes more, 5 minutes each way; neither team however, scored and an extra 10 minutes was ordered to be played in the first half of which the T.A.S. scored the winning goal. Shortly after this George Lynch, who was tripped by a Keene player, slashed him with his stick and was sent to the fence, but before reaching the boards was about to be attacked by a couple of the visitors who no doubt were feeling rather blue at the way things were going, and the whole of the Keene team left the ice, refusing to finish the remaining three minutes, as a result of which the referee declared the T.A.S. winners

Keene led throughout the game, until towards the finish, when the T.A.S. tied the score.

In the first half the visitors scored two goals and the T.A.S. 1, and in the second added two more to their number, the T.A.S. scoring three, making the game a tie. In the last ten minutes of overtime play the T.A.S. scored their winning goal. The following players represented Keene; Goal, J. McIntyre; point Dixon; cover-point, Quinn; wings, Lang, McCarthy, Miller and H. Quinn

The T.A.S. lined up as follows, Goal, Crough; point, Meagher; cover point, Crowley, forwards, George, Barbeau, Lynch and Parnell.

Goal umpires—McDonough and Welsh. Referee—Harry King.

After the game the T.A.S. Club banquetted the Keene team at McCallum's restaurant.

Belleville defeated Port Hope at the former place last night, by a score of 8 to 2.

LIVE LAKEFIELD LOCALS

Items of Interest From Our Pretty Northern Village.

—Mr. Frank Pullen, who has spent the last six months in Lakefield, superintending the installation of the electrical machinery for the Portland Cement Company, left Sunday evening for Shawinigan Falls. There he will look look after a contract for Dick, Kerr & Co., of Lancashire, England

—Mr. J. M. Kilbourn, President of the Lakefield Portland Cement Co., returned to town Tuesday morning to attend the annual meeting of the shareholders. Mr. Kilbourn was largely interested in the table factory which was totally destroyed by fire at Owen Sound on Christmas Day.

—Mr. and Mrs. Dela Fosse and family are now staying at the Craig House. Mr. and Mrs. Roland Johnston and family have also secured a suite of rooms which they will occupy on Monday

—The Chosen Friends will give an entertainment next Thursday evening in the town hall.

—There was a lively game of hockey at the rink on Monday evening. The contestants were the T.A.A. of Peterborough and the local aggregation, the former team coming off victorious.

—The regular meeting of the Public Library Board was held in the Reading Room on Monday night.

—Frank Dela Fosse left for Trinity College School, Port Hope, on Thursday afternoon.

—Several of our local sportsmen took in the races at Peterborough Wednesday and Thursday.

—Mr. Harry Sherin, who has been indisposed for the past two weeks, is making good progress toward recovery.

—Mr. Samuel Nelson, who was taken ill on Sunday, died at 4 o'clock Friday morning

STRANDED IN WINNIPEG

Winnipeg, January 9.—A party of fourteen Mexican men, women and children are stranded at the Immigration Hall here. They reached Chicago a few weeks ago from Cuba, where they had worked and had $300 to carry them to Montreal. They went to Chicago owing to their ignorance of the geographical location of Montreal. It is alleged that a railway agent at Chicago, taking advantage of their ignorance, ticketed them via Vancouver, in order to get as much money as possible. Their funds gave out and they were compelled to leave the train here. The Government will have to care for them and ship them to Montreal.

EVERYBODY READS THE TIMES.

FATAL DYNAMITE EXPLOSION

Farmer Killed Near Mille Roches Station

Mille Roches, January 9.—A farmer named Ernest Froom, who lived two miles north of here, was instantly killed this morning by the explosion of dynamite, which he was thawing out. His wife was seriously injured and the house badly wrecked.

Mrs. Froom, who was in another part of the house, had a miraculous escape, but was badly cut and bruised. She regained consciousness just in time to crawl from the ruins as they took fire. Neighbours, who were attracted by the report, extinguished the blaze. Mr. Froom was a fine young man, about 22 years of age, and was married only a year ago. It is not likely that an inquest will be held.

FATAL SHOOTING

Revolver Under Pillow Exploded with Fatal Result

Ogdensburg, N.Y., January 9.—The village of Saranac Lake is excited over the tragic death of one of its most prominent and wealthy citizens, which occurred last night. Carl Gordon, a brother-in-law of Daniel Hanna, son of Senator Mark Hanna, of Ohio, spent last evening with a party of freinds bowling. He returned to his home about eleven o-clock. It was his custom to keep a loaded revolver under his pillow. It is not exactly known how the accident occurred, but the weapon was in some manner discharged, the bullet entering his cheek, and passing out through the top of his head, killing him instantly. Gordon was 28 years of age, and leaves a wife and two small children.

CHARGED WITH MANSLAUGHTER

Stratford, Ont., January 9.—Charles Ford, and George Mark, engineer of the train which caused the death of Fireman John Aiken, of Windsor, by collision on the Grand Trunk Railway, on October 31 were in Stratford yesterday, and gave bail for $1,000 each to appear at the assizes to be held on February 15 to answer on a charge of manslaughter.

OTTAWA POST OFFICE PLANS

Ottawa, January 9. — The Cabinet yesterday considered various plans for rebuilding the Ottawa Post Office and finally referred the whole subject to Sir Wm Mulock and Hon. James Sutherland. Several schemes are mooted, including one to erect a block for the Post Office Department, with a corner for the local office. Another scheme is to have two post offices, one for the upper and one for lower town.

The February Delineator.

The February Delineator is a magazine of uncommon interest and value. Its stories, articles and pictures are excellent, and the review of the fashions, including a letter from Mrs. Osborn, thorough and enlivening. In fiction there is a mystical tale entitled The Silver Boat, by Albert Bigelow Paine; a strong love-story from the Pacific by Edith Proctor Clarke, The Wooing of Tia; and a delightful middle-age romance by L. M. Montgomery, also a chapter of the Evolution of a Club Woman, the much discussed serial by Agnes Surbridge. The home life of Calve, the most interesting personality among the favorites of the opera, is described in a remarkably illustrated article by Percy Mitchell. A serious paper on The Cultivation of Ideals by Lillie Hamilton French will be generally enjoyed, and collectors of antiques especially will be interested in The Quest of Roxane, by Frances Roberts. Dr. Grace Peckham Murray's article on the care of the complexion meets an urgent need for just such a scientific treatise simply presented. There are entertaining pages for young people, including chapters of The Little Garden Calendar of Albert B. Paine, and Gabrielle E. Jackson's Tommy Postoffice, and an interesting paper dealing with the manners and customs of the Red men, by Lina Beard. There is also timely information on a variety of topics of interest to women, with especial reference to needs of the household.

HAS STOPPED MUCH TRADE

Ottawa, Jan. 7.—The latest trade returns evidence that German trade has been badly hit by the Canadian surtax. For the four months ending October, 1902 the total importations from Germany amounted to $3,843, while for the same period of the present year, they were $5,066,264, a decrease of $797,-379. On the other hand, the imports of free goods continue to increase as did also the dutiable goods before the imposition of the surtax.

BACK TO PULPIT

What Food Did for a Clergyman

A minister of Elizabethtown tells how Grape-Nuts food brought him back to his pulpit; "Some 5 years ago I had an attack of what seemed to be Lagrippe which left me in a complete state of collapse and I suffered for some time with nervous prostration. My appetite failed, I lost flesh till I was a mere skeleton, life was a burden to me, I lost interest in everybody and almost in every body save my precious wife.

"Then on the recommendation of some friends I began to use Grape-Nuts food. At that time I was a miserable skeleton, without appetite and hardly able to walk across the room; had ugly dreams at night, no disposition to entertain or be entertained and began to shun society.

"I finally gave up the regular ministry, indeed I could not collect my thoughts on any subject, and became almost a hermit. After I had been using the Grape-Nuts food for a short while I discovered that I was taking on new life and my appetite began to improve; I began to sleep better and my weight increased steadily; I had lost some 50 pounds but under the new food regime I have regained almost my former weight and have greatly improved in every way.

"I feel that I owe much to Grape-Nuts and can truly recommend the food to all who require a powerful rebuilding agent, delicious to taste and always welcome." Name given by Postum Co., Battle Creek, Mich. A true natural road to regain health, or hold it, is by use of a dish of Grape-Nuts and cream morning and night. Or have the food made into some of the many delicious dishes in the little recipe book found in each pkg.

Ten days trial of Grape-Nuts helps many. There's a reason.

Look in each package for a copy of the famous little book, "The Road to Wellville."

THE STATES MAY FORCE COLOMBIA'S TO FIGHT

Fleet of American Warships Making Hostile Demonstrations at Colon

New York, Jan 8.— A fleet of warships is assembling at Colon, presumably with the purpose of making a hostile demonstration against Colombia, says a despatch from Panama.

The authorities will insist on the withdrawal of the Colombian army, now lined up across the border, this side of the Atrato River. Naval officers feel certain that it is the intention to compel Colombia either to withdraw her troops or to fight.

All the warships are due at Colon before Tuesday. It is believed in Colon that the Colombians are ready to fight.

JAPAN'S CHANCES ARE GOOD ON THE SEA

Her Navy is Superior to Russia's and She Possesses Docks to Make Repairs

Probably the latest and most reliable estimate of the relative fighting strength of Japan and Russia is that made for the London Times by its military and naval correspondents and printed in the issue of that paper which has recently arrived here. The outlook, according to these experts, is more than favorable for Japan at sea, while there is at least an even chance for her on land.

The naval expert admits, to start with, that there are factors on both sides which are hard to determine, but he gives us the benefit of all the knowledge available. He compares the Japanese fleet with the Russian ships which are either in the Far East or are now on their way there. Japan has six battleships to Russia's eight, but not even the best of the Russian ships comes up to the Japanese standard. Moreover, the Japanese ships are practically all of one grade and can be handled therefore to great advantage, while the Russian fleet must adapt itself in action to the capacity of its poorest vessel. In armored cruisers Japan has six to Russia's five, and Japan's are the better. In protected cruisers Japan has fourteen to Russia's eight.

Fine Dockyards.

Even more important than this superiority of fleet is the fact that Japan has four fine dockyards, "quite capable both of constructing and repairing vessels of any class," while Russia's docking facilities are "entirely inadequate even for the ordinary repair and maintenance of the fleet." So great is Japan's superiority at sea, everything considered, that the writer would not be surprised, if the Russians should "withdraw their ships into the Gulf of Pe-Chi-Li, rather than force a fleet action."

When the issue at sea has been settled, either by victory or blockade, then will come the land campaign. Japan's permanent army has 7,500 officers and 150,000 men. Her reserve and territorial armies bring her total land force to 420,-000 men. Russia, according to the best estimate that can be made, has about 150,000 men in the Far East, while "it is probable that the Russian troops which would be available for service in Manchuria when either Russia or Japan has proved its naval domination in the China seas will not much exceed 300,000 men."

Chances on Land.

With Japan victor at sea, the military expert believes that Japan's transportation facilities would be far superior to Russia's. He points out that the Siberian railroad is exceedingly vulnerable, that it would require an immense force to guard it, and that at the best, its facilities cannot serve for the maintenance of more than 100,000 men. On the other hand, Japan, with her railroads and harbors, and with her short sea haul "should be able to land an expeditionary force superior to any force that Russia by means of her land communication, can concentrate against her, in four months."

The personal factors—bravery, brains, enthusiasm, discipline—are less amenable to calculation, but both the military and the naval experts believe in their best judgment that the the Japanese are the superior.—Toronto Star.

London, Jan. 8—A despatch from Tokio, under today's date, says;

"From the Russian Legation it is announced that the negotiations will continue."

Wheat advanced a further shilling per quarter today in some of the Provincial markets on the prospect of war.

About 116,000 tons of coal were shipped from Cardiff Wales, during the past week, 46,000 to Japan, 40,000 to Port Arthur, and 30,000 to Hong Kong.

HOPE IS SINKING.

London, Jan. 8 —Minister Hayashi, today said; "After reading the reply all I can say is that hope for a peaceful settlement is growing less and less. Conditions are very grave."

Japan has decided not to buy the Chilian warships for which negotiations had been started.

The British home fleet left Portland this morning for the Spanish coast, after coaling to the full capacity. The fleet will thus be in readiness to replace the Channel squadron in the event of the latter being required to fill up vacancies in the Mediterranean squadron, should vessels be ordered thence to the Far East.

FOR ACTIVE SERVICE.

Hong Kong, Jan. 8—A detachment of two hundred and fifty Britishers of the Sherwood Foresters has been warned to be in readiness for active service.

London, Jan. 8—The Westminster Gazette says the resolution which the Canadian Manufacturers Association has just passed is very interesting. Tariff reform in Canada is advocated, but there is no sign of a schedule of forbidden industries or of any willingness to give that fair measure in return for what Mr. Chamberlain demands as the price of the preference by the Mother Country. The words "foreign competition," are used clearly to include British competition.

The Gazette commends the resolution to the attention of those who believe that the colonies have made any offer of a reciprocal concession.

TEACH BOYS TO GROW TREES.

Lansing, Mich., Jan. 8 — Instruction and work in forestry have been given by the department of botany in the Agricultural College of Michigan since 1875, but the possibilities of the State as a field for such work have so long been apparent that the college has at last undertaken the work of giving young men special training in that direction. Hereafter, four years will be devoted to the study. Of those who make a specialty of forestry, reproduction and valuation surveys of virgin or culled stands on or near the college, farm are required. The aim is to furnish all of the agricultural students with the information that will likely prove of most service to them and to prepare men for professional forestry, the various plantations and management of present stands furnishing illustrations.

TRAIN ESCAPED WRECKER.

Farmer Arrested at Woodstock Charged With Obstructing Track.

Woodstock, Jan. 7.— William Cole, a young farmer of East Oxford, was arrested here yesterday by Chief Detective Day, of the G.T.R., charged with placing an obstruction on the G.T.R. east of Woodstock on Saturday last, in an attempt to wreck the morning express. Fortunately, the obstruction was discovered by the sectionmen in time to avert an accident.

CAPE COLONY'S DEPRESSION.

Government Discouraging Immigration of Persons Without Ample Means or Prospect of Employment.

New York, Jan. 7— Sir Percy Sanderson, the British Consul-General, gave out the following today;

"Information has been received to the effect that the Government of Cape Colony desires, owing to the present condition of trade in the colony, and throughout South Africa, to discourage the further immigration of persons without ample means or prospect of immediate employment. Numbers of skilled artisans and others have been thrown out of work, and fresh arrivals accentuate the position."

CASHEL COMMITTED.

Calgary, Jan. 7—John Cashel has been committed for trial on the charge of having assisted his brother, Ernest Cashel, to escape from the police barracks.

BRAKEMAN KILLED.

Winnipeg, Jan. 7—Austin O. Boyle, Canadian Pacific Railway brakeman, fell from the top of a train at Virden yesterday and was fatally injured. He leaves a wife and children at Brandon.

WEATHER NOTES

Saturday—Not much change in temperature

When you stop to think that home-made tea biscuit cost but five cents a dozen, is there any reason for buying at the baker's?
Made with Cleveland's Baking Powder they will taste better and will be more wholesome and appetizing than any you can buy.

PETERBOROUGH, JANUARY 8, 1904

SALVATION ARMY COLONIES

The failure of innumerable socialistic schemes and colonies has led many to prophesy the same outcome for the colonies established by the Salvation Army. Five years ago the Salvationists went to work in their own way to help the needy unemployed. Their purpose was, as stated in their own language, "to place the waste labor on the waste land by means of the waste capital, and thereby convert the trinity of waste into the unity of production, or, more briefly stated, "the landless man to the manless land."

The above gives no idea of the practicality of the way they went to work. They had no socialistic plans of feeding indolent people with a spoon or giving to everybody according to his wishes. Nor did they propose a Utopia, where all might enjoy a place of blissful ease, and each feed upon his neighbor until all was gone. They wanted no communism.

They furnished, as far as they were able, the opportunity for men to work for a living, in the hope that eventually these men would own their own homes. Everything was carried on according to strict business principles, without maudlin sentiment or the patronage of charity. Money was advanced to the colonists whenever it was seen that the business venture was safe. With this by way of capital the work has been praiseworthy in every respect and a credit to the good sense and business ability of the officers of the Army. Socialists and communists who are idly dreaming of a good time coming, when there shall be no capital and no labor, would do well to learn a lesson or two from the successful experiments of the Salvation Army.

PLEASING PICTURE OF SOCIETY

Numerous writers and preachers have assailed the upper ten, known as society, as frivolous and wasteful of both time and money.

But Chicago brings a different story of society. There at the various hospitals young society women have been among the most faithful workers in ministering to the dead and wounded and in aiding the living in their heart-rending search for missing relatives. At the news of the great calamity, these young women came forward, not only paying their own expenses, but going down into their pockets to provide delicacies for the injured.

The world recognizes that the women of society generally have plenty of leisure. But their usefulness in Chicago shows that they also have in their hearts a warm love for humanity. Willing to face scenes of suffering and to tax themselves that they may bring comfort to the injured, makes these young society women an ornament to their sex.

JAPAN AND RUSSIA

While the dispatches indicate that war between Russia and Japan is inevitable, in European financial circles a different view is entertained.

War is costly. To carry it on means the expenditure of vast millions. With it known that the finances of Russia are in a deplorable state, that land would find it difficult to secure a loan in Europe or in America. Japan's condition is somewhat similar. The finances of the land of the Mikado are at a low ebb. To carry on war, millions must be secured.

With these facts known, there is a belief that neither Russia nor Japan, will allow the condition of actual hostilities to be reached. Neither can afford it. Russia is undoubtedly playing the game of bluff to the full limit. Japan seems equally determined. If a clash does come, both will be illy prepared for it, from a financial standpoint.

EDITORIAL COMMENT

Germany, it is said, begins to repent of her harshness toward Canada in the matter of tariff. The Canadian surtax is checking her sales of certain classes of goods, and may lead to a reconsideration of the conditions and a fairer adjustment of duties on our products.

Japan and Russia still parley, but at any time there may be a clash. Indications point to Great Britain standing by Japan. United States interests also seem to lie in that quarter. Perhaps an appreciation of these facts makes Russia hesitate.

APPLICATION TO PARLIAMENT

Notice is hereby given that an application will be made on behalf of the Town of Peterborough to the Legislative Assembly of the Province of Ontario at the next session thereof for an act for the following purposes;

1. That the said Town of Peterborough may be incorporated as a City, with all the rights, powers and privileges of cities under The Consolidated Municipal Act 1903.

2. To declare that it has been and shall be lawful for the Commissioners of the Peterborough Town Trust, with the approval of the Municipal Council, to invest a portion of the sinking fund received by them in the purchase of the buildings and other permanent improvements erected and made by tenants under lease from the Commissioners on any land vested in the Commissioners.

3. To provide for the vesting of the real estate and sinking fund which belonged to the Corporation of the former Village of Ashburnham in, and the management of the same by, the Commissioners of the Peterborough Town Trust.

4. To amend section 3 of 3, Edward VII., chapter 60, so as to authorize the Council without the assent of the electors to borrow sums not exceeding $10,000 in any year for the purpose of making extensions, repairs, improvements and alterations in the waterworks, and to pass by-laws for that purpose.

5. To ratify and confirm By-Law number 1054 of the Corporation of the Town of Peterborough, entitled, "A By-Law to aid the Colonial Weaving Company" being a By-Law to fix the assessment of the said Company at $4,000 for a period of ten years from the first day of January, 1904, upon the conditions in said By-Law mentioned.

6. To ratify and confirm By-Law number 1059 of the said Corporation, being a "By-Law to authorize the purchase of certain real property required for the use of the Corporation of the Town of Peterborough and to borrow the sum of $10,000 to pay for same and to authorize the sale of any part of said land not required for Municipal purposes."

7. To authorize the Council, without the consent of the electors, to borrow money for the purpose of erecting an Isolation Hospital or Hospitals, and to pass By-laws for that purpose.

8. To confirm the purchase by The Little Lake Cemetery Company of part of Lot number Forty-six and Lots numbers Forty-seven and Fifty-seven on Registered Plan No. 60 for the Town of Peterborough.

9. To make alterations in the number term of office, manner of appointment and duties of the Town Trust Commissioners.

10. To provide for the reduction of the number of members of the Board of Education.

11. To provide for the election of Aldermen for a term of two years and for one half of the members of the Council retiring each year.

12. To provide for the appointment by the Council of a Court of Revision consisting of three members, none of whom shall be a member of the Council.

13. To ratify and confirm By-Laws passed by the Council of the late Village of Ashburnham exempting the property of The Dickson Company, of Peterborough, situated on Burnham's Point, and the property of The Canadian Ultimator Company, Limited, situated on the south side of Elizabeth Street, from taxes, except school taxes, for a period of ten years, upon the conditions in said By-Law mentioned.

Dated at Peterborough this sixth day of January, 1904.

E. H. D. HALL,
Solicitor for the said Town.

JAPAN'S CONSULS ARE AT LOW WATER

Apprehension of War in the Far East Depresses Japan—Other Interesting Items.

London, January 7.—Consols to-day touched 86 12-16, another low water mark. The Rothschilds say this appears to be entirely due to apprehension of war between Russia and Japan, and not the fear that Great Britain will be involved in the fighting.

CONSIDERING REPLY.

Tokio, Jan. 7—The Government is silent concerning the terms of the Russian rejoinder.

Japan has taken the reply under consideration.

THE IMPERIAL BOND.

Preferential Trade Looms on Australian Political Horizon.

Ottawa, Jan. 7.—Mr. D. H Ross, Canadian trade agent in Australia, writes the Trade and Commerce Department that the bond of imperial feeling is indeed strong in Australia. A phenomenal harvest, he says, means a renewed buoyancy in importations, and a preferential trade is looming on the Australian political horizon.

DUKE DEVONSHIRE BACK AGAIN.

Buries Hatchet With Lord Rosebery and Will Amalgamate Interests.

London, Jan. 7— The impending return of the Duke of Devonshire (who on Oct. 5, last resigned the office of Lord President of the Council) to the Liberal party is announced by the Pall Mall Gazette, which understands that the Duke and Lord Rosebery have agreed to "bury the political hatchet," and amalgamate their interests.

TRAIN ESCAPED WRECKER.

Farmer Arrested at Woodstock Charged With Obstructing Track.

Woodstock, Jan. 7.— William Cole, a young farmer of East Oxford, was arrested here yesterday by Chief Detective Day, of the G.T.R., charged with placing an obstruction on the G.T.R. east of Woodstock on Saturday last, in an attempt to wreck the morning express. Fortunately, the obstruction was discovered by the sectionmen in time to avert an accident.

CAPE COLONY'S DEPRESSION.

Government Discouraging Immigration of Persons Without Ample Means or Prospect of Employment.

New York, Jan. 7— Sir Percy Sanderson, the British Consul-General, gave out the following today;

"Information has been received to the effect that the Government of Cape Colony desires, owing to the present condition of trade in the colony, and throughout South Africa, to discourage the further immigration of persons without ample means or prospect of immediate employment. Numbers of skilled artisans and others have been thrown out of work, and fresh arrivals accentuate the position,"

CASHEL COMMITTED.

Calgary, Jan. 7—John Cashel has been committed for trial on the charge of having assisted his brother, Ernest Cashel, to escape from the police barracks.

HAS STOPPED MUCH TRADE

Surtax has Decreased Imports from Germany Though Free Goods Continue to Increase.

Ottawa, Jan. 7.—The latest trade returns evidence that German trade has been badly hit by the Canadian surtax. For the four months ending October, 1903, the total importations from Germany amounted to $2,653, while for the same period of the present year, they were $1,886,284, a decrease of $797,370. On the other hand, the imports of free goods continue to increase as did also the dutiable goods before the imposition of the surtax.

BRAKEMAN KILLED.

Winnipeg, Jan. 7—Austin O. Boyle, Canadian Pacific Railway brakeman, fell from the top of a train at Virden yesterday and was fatally injured. He leaves a wife and children at Brandon.

NORDICA IS AFRAID.

New, York, Jan. 7 — Mme. Nordica has decided to forego further concert engagements in America this season and will sail for Europe on Friday. The change in Mme. Nordica's plans is said to be due to the alleged receipt by her of threatening letters.

[illegible] MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotency, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $3.65 to $10 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.78 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $82.68 and $73.48 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1879, and am now the manager and superintendent of the Imperial mine in this district,

(Signed) CAPTAIN A. M. PAUL.

THINGS RIGHT AND WRONG.

IT IS RIGHT TO

1. To break bread, muffins or biscuits at table.

2. To moderate one's speaking voice and to enunciate clearly and distinctly.

3. To answer at once an invitation to any social function, accepting or declining definitely.

4. To sign one's christian name to all communications. For example: "Sincerely yours, Henrietta Jones."

5. To speak of trousers and waistcoats.

6. For a gentleman to walk in the side nearest the curbstone when accompanying a lady.

7. To eat with a fork whenever possible. Iced creams, water ices and berries are eaten with a fork.

8. To use a knife at table only for cutting meat or fowl or game.

9. To place a spoon used for tea or coffee upon the saucer as soon as it has served its purpose.

10. To use a saltspoon where individual salts are not placed at each cover.

11. For a gentleman to remain standing until after ladies have been seated at table; to assist the lady whom he has escorted to the dining-room.

12. To reserve all matters pertaining to the toilet for the privacy of one's dressing-room (the care of the teeth included).

13. To accept a first invitation when possible to do so.

14. For people in deep mourning to decline an invitation to a social function without a written explanation. A card sent with black border conveys its own reason.

15. To take soup from the side of the bowl of the spoon.

16. To drink moderately a small quantity at a time, holding goblet or wineglass by the stem.

17. For a gentleman to throw away his cigar, or at least remove it from his mouth, when bowing to a lady.

18. For a gentleman to remove his hat when offering a lady his arm, and to do so in the manner represented by the illustration.

19. To hold the fork in the right hand when eating, with the tines forming a bowl shape. Illustration.

20. To raise the fork to the mouth with the right hand so that the fork shall be almost parallel with the mouth. Illustration.

IT IS WRONG TO

1. To cut sliced bread, biscuits or muffins.

2. To roar or scream, even at one's family or servants.

3. To answer an invitation to a luncheon, breakfast or dinner in a doubtful or hesitating manner.

4. To make use of a title as a signature. For example: "Mrs. Colonel Jones," or "Mrs. Hannah Brown."

5. To speak of pants and vests.

6. For a gentleman when accompanying a lady to permit her to walk "on the out side." When walking with two ladies to walk between them.

7. To eat anything from a spoon which can be properly conveyed to the mouth by the aid of a fork.

8. To use a knife for cutting lettuce, fish or vegetables.

9. To leave a spoon in a cup of tea or coffee.

10. To take salt with one's knife from a general salt-cellar.

11. For a gentleman to seat himself at table before ladies have been seated and to remain seated after ladies have made the first movement towards rising.

12. To use toothpicks in public; unpardonable at table.

13. To decline a first invitation without giving satisfactory and legitimate excuse for so doing.

14. To send invitations for ordinary functions to a household during the first month of their affliction. Weddings only are excepted.

15. To make a noise while taking soup, or to blow hot liquids with the object of cooling them.

16. To drink the entire contents of glass or cup at one attack. To hold glass or cup by the bowl.

17. For a gentleman to speak to a woman with his cigar in his mouth, or to smoke in her presence without asking and receiving her permission to do so.

18. For a gentleman to seize a lady by the elbow with an intention of aiding her.

19. To pile food upon the back of the fork, holding it upside down for this purpose. Illustration.

20. To jerk the hand with the fork around to the mouth with an awkward bend of the elbow and to bring the fork directly opposite the mouth. Illustration.

FACTS ABOUT ANIMALS

A species of fish is said to have been discovered in New Zealand which burrows in the sand, and it is reported that farmers often find it alive buried in the beach some distance from the water.

Butterflies invariably sleep head downward. They raise their wings and hold them back to back against each other so that from above they are almost invisible. Moths fold their outer wings tightly down over the brightly colored under wings. In each case the manner of folding their wings serves as protection.

A rattlesnake's bite, it is said equals in poisonousness the combined bites of 3,500 mosquitoes.

A new species of mountain sheep has been found in Alaska. It is known as the "saddle-backed" or "piebald" sheep. Its head, neck and breast are of snow white. The other portions of the body are brownish grey.

Had the Best Chance.

"I am in the hands of my friends," said the first candidate with much dignity. "I leave my future to them."

The second candidate smiled sardonically.

"And I," he asserted, "am in the pockets of my friends. They have to look after my future, or they won't catch even."

This, my child, demonstrates the difference between standing for office and running for the same.—"Judge."

A Wedding Au Naturel.

There was a wedding yesterday in Graceless Church.

Lord Baldknob of Killshire, England married Miss Sallie Panhandle of East Pittsburg.

The bridal party, including the attorneys for both sides, formed in the alcove promptly at 11.30.

At 11.45 the real estate in the bride's name was transferred to his lordship.

At 11.50 a million dollars in legal tender changed hands.

At high noon all the railroad first mortgage bonds known to be in the bride's possession were handed over.

A vote of thanks was then passed to his lordship for leaving the bride's father enough to live on comfortably until the next rise in Wall street, which is predicted for next spring.

At 12.15 two bishops, four clergymen two real estate lawyers and a barrister representing the plaintiff, pronounced the benediction.

The groom will pass the next three weeks with his bride at his estates in England, after the roof has been repaired.

After this, it is understood, they will separate and enter society.—"Life."

Constipation

Causes Headache, Abdominal, Pains, Piles and in Severe Cases Insanity and Apoplexy

It is a common mistake to conclude that Constipation is not a dangerous condition. Although at first it is only accompanied by slight inconvenience and pain, yet if not corrected, it will inevitably lead to very dire results.

Great care should be used in selecting a remedy for constipation because if a violent purgative is employed, it is sure to set up pain, irritation and congestion, and result finally in piles.

The experience of those who have tested all the cures for constipation, seems to prove that Ferrozone is the most agreeable and satisfactory treatment. It makes the bowels so well ordered that natural and unassisted action is established. Nothing can equal the immediate sense of comfort it produces, and pains in the head, and stomach, and in the intestines, disappear almost at once.

Ferrozone is very mild and certain in its action, and never causes inconvenience or distress. Ferrozone can be taken early as long as required and in no way interferes with business or pleasure, and nothing may be feared from its use, however prolonged it may be.

For Constipation, Piles and Sick Headache, Ferrozone stands unrivalled. The driver of the City Express Company, who suffered from piles, says: — "Constant sitting on the wagon seat, produced a rectal irritation, which combined with constipated condition of the bowels, brought on a severe attack of piles. I used without benefit, different ointments, and other remedies; but got quick relief and most satisfactory results from Ferrozone. I can recommend Ferrozone to all who suffer from piles.

Ferrozone always cures, and can be purchased at any reliable drug store or 50 cts. a box or three boxes for $1.25. Sent to your address by mail if price is forwarded to N. C. Polson & Co., Kingston, Ont.

TO THE AFFLICTED.

Dear Reader,—Are you a sufferer from any of the following ills: Lack of ambition, nervous exhaustion, ideas easily confused, irritability of temper, impairment of memory, despondency, general debility, liver not right, kidneys out of order, rheumatism, dyspepsia or indigestion, dizzy or fainting spells? Does your heart palpitate? Do you have smothering or sinking sensations, pimples, or eruptions of the skin, etc, etc.

If you are troubled as above, you can be cured by the use of Dr. Clarke's Wonderful Little Red Pills. A trial order of three boxes for $1.00 will convince anyone that these pills are truly wonderful. We are daily in receipt of letters bearing the highest testimony. We have not space to tell you all about them here, but will answer any enquiries as to their merits. Mrs. John Macdonald, Durham, N. S., writes us, "After taking two boxes of Dr. Clarke's Little Red Pills for indigestion, which I had been troubled with for a number of years, I am now perfectly well. I followed the directions carefully."

To every one sending for a trial order and finding good results we ask to observe our special offer enclosed with every box. It is of special interest to every one.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or 3 boxes for $1.00.

Dr. Clarke's Sure Cure for Catarrh and Dr. Clarke's Sure Cure for Eczema, same price $000 will be paid for any case that it will not permanently cure.

Equitable Gold Mining Co.

R. C. LANE, President. F. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thous and dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 3,150 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet, 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed and is in possession of the properties and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $106,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 265-tunnell; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

THE PETERBOROUGH BROKERAGE CO.
FISCAL AGENTS

Rio Colorado Gold and Copper Co.

THE BEST INVESTMENT EVER OFFERED

INVESTIGATE and you will buy this Stock at **FIVE CENTS**

IT WILL BE WORTH PAR INSIDE OF SIX MONTHS

Clients of ours have acquired twelve claims in the richest mineral section of California, on the Colorado River. We have had this property examined, and it is said that it will make a mine equal to any of the large producers.

It carries Gold, Silver, Lead, Copper and Iron, and has abundance of shipping ore in sight. The vein is large and rich.

We have 20,000 shares to sell at 5 cents per share, and then the stock will be placed on the market at par. Guaranteed with five million of securities behind it to protect the investor from loss.

This 20,000 shares is to pay for the annual assessment work on the property, and must be sold at once.

The Company absolutely owns its property, and WE propose to make a paying proposition out of it. DON'T DELAY OR YOU WILL BE TOO LATE FOR THIS STOCK at Ground Floor prices. Remit to,

WESTERN BROKERAGE COMPANY, Incorporated
396 Henne Block, LOS ANGELES, CAL.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price tha will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

REFERENCES—The Governor of the State, and any bank in Boise, Idaho. Write the Company for particulars. Address

GEO. W. E. DORSEY, President
Boise City, Idaho.

J. W. DOUGHTY, Fiscal Agent,
Peterborough.

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 5 claims, 600 x 1500 each. A 70 foot shaft on the Martha claim shows a vein of $30.82 ore 5 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.82 to $15,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay then $200 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address,

W. D. WALRATH,
NOTTINGHAM BUILDING, - SYRACUSE, N.Y.

Dry Placer Miner, formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

'Henry Fielding's Dream'

By CORTLAND MYERS.

[illegible] he thinks, you ministers have no sympathy with the workingmen, and the churches are just for the rich and well-to-do. I fear he has gotten to be almost a socialist, or something like that. I do not believe he is an infidel. I know he believes in Christ. But, then, he says there is little of the real spirit of Christ in the church. He does not believe it is very anxious, if desirous at all, to have him and his class. He witnesses so much injustice in society and so many wrongs placed upon the laboring men that he says his work is in the labor union, and he can make the best fight for the right there. He is one of their best workers and most enthusiastic supporters. He is on committees, and has held office, and even makes speeches sometimes. Yes, he has advocated strikes, and been a participant in them. The one now going on is taking all his interest. It is in all this, Mr. Dowling, he thinks the church stands off on one side, and is deaf to the cry of real need and speechless before the deepest necessities and darkest sins in human society."

David Dowling had been looking right at Elsie when she began to tell him the story, but before she was half-way through his eyes were upon the floor at his feet, and his mind and heart were following every word that she uttered. At her first real pause he shook his head and said:

"I am afraid he is not the only one."

"No," said Elsie, "his friends, and in fact, all his associates, feel just the same. He says there are one hundred and fifty men in his place of business, and only three of them go to church."

"There must be some reason for all this. I hardly know what to say about it," replied Mr. Dowling. "Only I know this, that there has not been anything in all my recent ministry that has troubled me more than this, and by God's help I am going to do my best to change this feeling on their part. Of course, they are wrong in a measure, but is not the church to blame, also? Anyway, Miss Fielding, I promise you to do my best for your brother, and I believe he can be saved for the church and be a wonderful element in the work of bringing the unions and the churches nearer together. Perhaps they do not understand us, and I am quite sure we do not understand them.

"Now I will tell you what we will do. You come to our church, take your class in the mission, be one of us in interest and service, and we will gradually get into his heart and life. You cannot do the greatest things in the world all at once. We will be patient, but persistent. It is easier to turn electricity or steam into a new channel than it is a life. I am convinced that any man can be reached by love and the spirit of God. You get him to come next Sunday. I will watch for him, and be sure to grasp his hand, and also to introduce him to some of our best people. We will use all means toward the same end."

"He is so opposed to it all," said Elsie, "that I am afraid, and yet I will try not to lose any faith, but will just give all my prayers to this, and I am so glad that you have come. I believe God sent you, although I was almost ashamed of these two rooms as being all of our home, and being up three flights of stairs, but now I do not care, and I will tell you more about him some time, and my coming here, and why everything is just as it is."

"That is what I want to know," replied he, and in his tone was deep interest in everything which concerned others.

"But I must go," he continued, as he looked at his watch.

His call had been an informal one, even if it had been the first. It did not carry the professional air, but a warmth of love that made her say three times before he had closed the door "that she wanted him to come again."

When he had disappeared she sat down alone in the room with some of the strangest thoughts and feelings of her life, mingled joy and wonder and hope. Yes, in the combination was an element of faith—simple, yet confident.

She was powerful in her womanly characteristics, yet childlike in her purity and simplicity.

She bowed her head to the table and only thought at first, when almost unconsciously she was praying, and the tears of deepest gratitude were dropping upon her hands, while angels came from heaven to gather up the precious jewels

* * *

Her brother was also passing one of the sign-boards of his life and stood at the fork of the roads.

Oh, that he might turn to the right. Every man has strategic points in life. He is victor who follows his vision. The man who refuses to see or refuses to obey is lost.

It was a stormy night in Union No. 10.

The necessary business had been transacted, and the time was ripe for interest and enthusiasm in the one absorbing topic. Not only was there a strike on the part of their fellow-workingmen, but they were standing before a lock-out in one of the factories where several hundred of the men were employed. As far as they could see, they were absolutely guiltless.

Of course, there had been some talk of objection to the introduction of new machinery to take the place of the men, and especially the skilled men, and now the company, some one represented, had sent to a distant city, and were shipping in a whole crowd of non-union men to take their places.

It was only report, but enough evidence around it to convince them of a foundation in fact.

Every man was ready to have something to say, even if he had never attempted a speech in the meeting.

Most of the sentiment uttered was bitter, and many of the words were bullets.

The whole spirit was fight — and why not? It was a question of right and justice. A question of bread and home.

Frank Peters, one of the leaders in speech, declared that it was more than that. It was just as great a question as lay in front of Abraham Lincoln when he signed the Emancipation Proclamation. It was a question of liberty. "We are slaves to the present system," he shouted, and everybody cheered. His blood was now at the boiling point as he cried: "Fight! Yes, fight that is our only hope. I would just as soon carry a musket in this cause as to carry any gun that was shouldered in the War of the Rebellion. Yes, rather. This battle and this cause is farther reaching. We ought to cry in the labor unions, 'Liberty and Union now and forever, one and inseparable.' It is inseparable from our unions, and the victory we must have and will have."

Again the applause was tremendous, and he scarcely waited for silence before he plunged into a wave of his own kind of eloquence against the criminality of this present proceeding upon the part of the employers.

"They want everything, and are willing to use us only as machines. When the machine can do more or better, we must be thrown out to be the old, worn-out, rusty rubbish of society. I, for one, stand firmly against the whole infamous proceeding, and will starve before I give up the fight."

He sat down amidst a roar of noise, part talk and part the confusion of approval, but before order was restored Tim Marden was entering vigorously and almost violently into the discussion.

He began talking about the street car strike, and the perfect justice of their cause. Their hours were too long, and their pay was too small, and there was no help for them, only in making their righteous demands, and, when they were refused, to strike.

Some one interrupted: "Yes, but they might have tried to arbitrate it first."

The interrupter was silenced and the speaker went on:

"Neither we nor they have much sympathy from any source. The public does not appreciate our position and does not realize our wrongs, nor the injustice we are constantly suffering. Neither do they understand that if it was not for our unions it would be a thousand times worse. They do not know how we have by hard fight secured all the advantages we now possess, and that the iron heel would press [illegible]

(To be continued.)

A Variable Weight.

Teacher—How many ounces in a pound?

Tommy—It depends on the grocer.

Dog Watch.

The phrase, "dog watch," has really nothing to do with dogs. It is a corruption of dodge-watch—two short watches, one from four to six, and the other from six to eight in the evening, introduced to dodge the routine, or prevent the same men always keeping watch at the same time.

A Fly's Wings.

The wings of a fly are used with great quickness, and probably 600 strokes are made per second. This would carry the fly about twenty-five feet, but a seven-fold velocity can easily be attained, making 175 feet per second, so that under certain circumstances it can outstrip a race-horse.

Notes Sent to Teacher

These notes are declared by the Chicago "Inter-Ocean" to be authentic:

Teacher—What shall I do mit Charley? Me and my man can't nothing make of him. When we want to lick der little imp he gets the bed under where we can't reach for him and must put a hook on her bedroom door to hold him for his licking. Please soak him in school shust as often as you got time.

Teacher—If Louis is bad please lick him until his eyes are blue. He is very stubborn. He has a good deal of the mule in him. He takes after his father.

Teacher—I dink you are a fool. You want my boy to read when he don't no alferbits. Please teach him some.

Miss Brown—You must stop teach my Lizzie fiscal torture she needs yet reading and figors mit sums more as that, if I want her to do jumpin I can make her jump.

Miss—My boy tells me when I trink bear der overcoat from my stummack gets too thick. Please be so kind and intervene in my family affairs.

Dear teacher—Please excuse Fritz for staying home he had der measles to oblige his father.

Teacher—Please excuse Rachel for being away those two days her grandmother died to obliged her mother.

Teacher—You must excuse my girl for not coming to school she was sick and lade in a common dose state for three days.

The Climax of Savagery.

Never have the natives of a State been treated with more hideous cruelty than those of the Congo Free State. It is under the personal rule of King Leopold, whose idea is that it should furnish him with money for his private purse, and money he is determined to make out of it, no matter how. Amongst other devices, vast areas are farmed out to companies, in which, unless greatly maligned, he is a large shareholder. These companies collect India-rubber. The system is to force the natives to deliver a certain fixed amount. If a village does not do this, the hands of the men are cut off, the village is burnt, and the women and children given over to the tender mercies of some neighboring tribe of savages. This procedure is defended by the worthy monarch, in his reply to the English note protesting against such a regime, by the following economic doctrine:

"Natives cannot be exempted from all taxation when they benefit by the material and moral advantages introduced into their country. If they have no money, they must pay in manual labor."
London "Truth."

A Polite Prisoner.

The lady who was visiting the jail had been much impressed with the appearance and behavior of the prisoners, and she took occasion to express her approval to the warden.

"They seem as courteous as anybody," she said, enthusiastically, "even if they don't say anything."

"Yes, they're polite enough," assented the jailer. "But I'm a little suspicious of too fine manners."

"I don't see how you can be!" exclaimed the lady.

"Well, I am," declared the warden, "and I have been ever since one of the smoothest of them broke out of jail and left a note for me in which he wrote, 'I hope you will pardon me for the liberty of taking.'"

Parting.

It has always been a moot point whether absence really does make the heart grow fonder, or whether there is not more truth in the saying, cynical though it be, "Out of sight, out of mind." I am inclined to think, from what one knows of the world, and of the people in it, that the latter solution is the true one. An imaginative person, cherishing fondly a supremely impossible ideal, may no doubt become more and more impressed by the perfections of the loved one, as he—or she—creates and nurses a delusion—a delusion which time and distance may tend to preserve from being destroyed by the rude shock of reality.

But to the unimaginative, matter-of-fact majority, the past is nothing, the future unheeded, while the present is everything. "Time's busy fingers are not practised in resplicing broken ties," they say, in effect, when they mean to excuse their forgetfulness or inconstancy. But whether people are merely superficial in their emotions or are possessed of real, deep feeling, there must of necessity be a certain amount of melancholy tenderness about a parting which "may be for years," or may, indeed, be "for ever."

And then, with regard to the manner of parting. Is it better to linger over the "sweet sorrow," or to get it over as quickly as possible with one sharp, sudden wrench? Byron says, "Let's not unman each other—part at once: All farewells should be sudden;" and Shakespeare expresses a like sentiment:

> "Adieu! I have too grieved a heart
> To take a tedious leave;"

though elsewhere he gives us a perfect picture of a reluctant, lingering parting, linked sweetness long drawn out, of a surety:

> "E'en thus two friends condemn'd,
> Embrace and kiss, and take ten thousand leaves,
> Loather a hundred times to part than die."

I think this is typical of many lovers' partings, where "he" and "she" are saying good night "till it be morrow."

* * *

Verily a kiss through a veil is like gato champagne through a straw.

He who findeth an American wife findeth a good thing—yea, and a costly.

Courtship may be termed a beau knot that marriage pulls into a hard knot, and, occasionally, a very hard knot.

CRYING!

What for? If you ask her she will tell you she doesn't know. She just feels nervous, that's all. A man is apt to have very little sympathy with this condition in his wife. He can't see any earthly reason why she should cry. She has plenty to eat, plenty to wear, and he does everything he can, he thinks, to make her happy; and in spite of that, she sits down and cries softly to herself, apparently without any cause or reason. But there is a cause, and that cause is some disorder or disease of the delicate womanly organism. Unhealthy drains have taken away the vital force. Inflammation is fretting the nerves of the whole body. If women did but understand the intimate relation of the general health to the local health of the delicate womanly organs, they would realize that the quick way to establish the general health is to cure the local disorders. Dr. Pierce's Favorite Prescription dries the drains that enfeeble women, heals inflammation and ulceration and cures female weakness. It is a medicine that can absolutely be relied upon to make weak women strong and sick women well. It contains no alcohol, and is entirely free from opium, cocaine and all other narcotics.

Women suffering from disease in chronic form are invited to consult Dr. Pierce, by letter, *free* of charge. Dr. Pierce, assisted by his staff of nearly a score of physicians, has in a little over thirty years treated and cured more than half a million sick and ailing women. All correspondence is strictly private and sacredly confidential. Address Dr. R. V. Pierce, 663 Main Street, Buffalo, N. Y.

COULD SCARCELY WALK.

"For the sake of poor, suffering women, I feel it my duty to inform you of the great benefit your medicine has given me," writes Mrs. Callie [illegible], of Watts, Iredell Co., N. C. "I was in a [illegible] condition when I wrote to you. I had [illegible] disease so bad I could scarcely walk and suffered such dreadful misery I hoped to be relieved by death. You wrote to me to take your 'Favorite Prescription' and I have taken [illegible] bottles of it, and two of your Pleasant Pellets. I am entirely well and feel like a new woman. I feel thankful to God and to Doctor Pierce for the blessings I now enjoy. I have a fine, big boy, two months old and never got along so well in my life. I can't praise your medicines enough."

NO USE FOR DOCTORS.

"About five years ago I had very poor health," writes Mrs. S. E. Whalen, of [illegible], Missouri. "After doctoring four years with four doctors they gave my case up; said they had done all they could. I had been confined to my bed half my time; the other half I could hardly drag around. I had such pains in my back and abdomen I could not stand on my feet for more than a few minutes. My feet were cold or burning, and my periods came too often. The doctors said it was change of life. [illegible] I had heard of Dr. Pierce's medicines, [illegible] got me a bottle of 'Favorite Prescription.' I took it and it helped me in some way, so I wrote to you and followed your advice. I commenced 'Favorite Prescription,' 'Golden Medical Discovery' and the 'Pleasant Pellets.' I was so constipated all the time and [illegible] would weaken me so that I would have to go to bed. To the great surprise of everybody I [illegible], and when I meet my friends they [illegible] I never thought you would be here now. I can say it was your medicine, which no doubt is the best in the world. Have had no use for doctors since I tried your medicine."

Dr. Pierce's Pleasant Pellets are an effective medicine for the bowels and liver. They do not re-act upon the

The Leading Specialists of America. 25 Years in Detroit. Bank Security.

Nine out of every ten men have been guilty of transgression against nature in their youth. Nature never excuses, no matter how young, thoughtless or ignorant he may be. The punishment and suffering corresponds with the crime. The only escape from its ruinous results is proper scientific treatment to counteract its effects. The DRAINS, either by nightly losses, or secretly through the urine, must be stopped—the NERVES must be built up and invigorated, the blood must be purified, the SEXUAL ORGANS must be vitalized and developed, the BRAIN must be nourished. Our New Method Treatment provides all these requirements. Under its influence the brain becomes active, the blood purified so that all pimples, blotches and ulcers disappear; the nerves become strong as steel, so that nervousness, bashfulness and despondency disappear; the eyes become bright, the face full and clear, energy returns to the body, and the moral, physical and sexual systems are invigorated; all drains cease—no more vital waste from the system. The various organs become natural and manly. We invite all the afflicted to call and consult us confidentially and free of charge. Cures Guaranteed or no Pay. We treat and cure: Varicocele, Blood Diseases, Stricture, Gleet, Emissions, Urinary Drains, Spermatorrhoea, Unnatural Discharges, Kidney and Bladder Diseases.
CONSULTATION FREE. BOOKS FREE.
If unable to call, write for a QUESTION BLANK for Home Treatment.

$400,000 was Produced from the Properties
now owned by the
NEW YORK-GRASS VALLEY GOLD MINING CO.

above the 400 foot level, under the old management. During the last year the mine has been thoroughly opened up. New and richer ore bodies discovered. Large reserves now in sight.

Large and thoroughly complete Merralls mill now working. Besides this, six quadruple discharge stamps are now being installed. Each stamp will increase the present output at least 20 tons daily. The mine is now producing steadily and increasing output daily. As soon as the new stamps, now being installed, are running, the output will reach at least 135 tons daily. At a moderate estimate the monthly income should exceed

FORTY THOUSAND DOLLARS

During the coming year it is the intention of the management to install more stamps so that the output can be brought up to FIVE HUNDRED TONS DAILY.

Quick dividends are positively assured, and will most surely be large and continuous. The present Board of Directors is composed of competent business and mining men, who are giving their personal attention to the affairs of the Company.

The price of Stock will be advanced to 75 cents per share almost immediately.

This is your last chance to purchase into this producing mine at 30 CENTS PER SHARE for cash or instalments. We have only a limited amount left at this figure, therefore send your orders in early.

REMEMBER IN BUYING THIS STOCK YOU ARE BUYING INTO
A present producing property.
A mine that will pay large and handsome dividends, as the reserves of ore on hand warrant.
A property that has 600 acres, only a small area of which has been mined.
A proposition that can mine its ore cheaper than almost any other mine in the world, owing to free water power. Cost of mining and milling not being over $1.00 per ton.

We have just received the following telegram, under date of November 24th:
KAYE, DE WOLF & CO., New York City. Grass Valley, Cal., Nov. 24th.
Mill now running on medium grade ore from reserves. Latest mill returns forty ounces amalgam from batteries alone since sixteenth. The Perrin ore chute on fifth level has been reached. Expect the ore on this level will pay much better than any yet opened up. The bottom of the shaft is also in good ore. Recent developments fully justify the expectations that have been formed. All who visit property report a large dividend payer soon.
J. W. HAISNER, Secretary.

Send for prospectus and full information to KAYE, DE WOLF & CO., 39 Cortlandt St., New York, or to PETERBOROUGH BROKERAGE CO., Canadian Fiscal Agents.

IS THERE CERTAINTY
IN MINING
The Idaho Richmond Gold Mines Company says Yes
AND HERE IS THE PROOF

1st—By having a property located in a camp that has produced over sixty million dollars worth of gold.
2nd—By having a property that has produced over one hundred and fifty thousand dollars to the former owners.
3rd—By having over two thousand feet of development work done on the property in the way of tunnels and drifts.
4th—By having four different ledges on the property, varying in width from three feet to thirty feet, besides several smaller ones all rich in free gold.
5th—By having now on the dumps ore estimated to be worth over twenty thousand dollars, and all taken from development work.
6th—By having large amount of stoping ground opened up for the taking out of large quantities of ore.
7th—By being able to erect a mill that is located within two thousand feet of the property for the treatment of the ore, which will be done as soon as a small amount of the stock is sold to help defray the expenses of getting ready.

There is no promoter or gift stock, and there is yet over six hundred thousand shares in the Treasury.

We can prove to your satisfaction that we have a mine, and it will pay you to write for information, if you are looking for an investment that will pay you good returns.

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight, and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th ecountry. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

300 CANADIANS WOULD AID JAPAN

Big Rush For Active Service By South African Volunteers

CANNOT ACCEPT HELP

Constitution of the Army Forbids This Japanese Consul Confident of Result

Montreal, Jan. 7.—"Over 300 applications have reached me from Canadians all over the Dominion, from Halifax to Victoria, to join the Japanese army as volunteers in the event of hostilities with Russia. The majority of these men saw service in South Africa and are drawn from commissioned and non-commissioned officers, engineers, etc. I am sorry to say there will be no chance of the Japanese Government accepting any volunteers from Canada. Our army is a conscriptive army, and no foreigners can serve. I need hardly say, however, how gratified my Government is at the friendly feeling evidenced in these applications for service."

These were the words of Mr. T. Nosse, the Consul-Gneral of Japan, to the Star today. Now that the tension between Japan and Russia is strained almost to breaking point, the views of Mr. Nosse of the subject of Japan's preparedness for the struggle that would appear inevitable are timely and to the point.

THE POSITION OF JAPAN.

After outlining the raison d'etre of the trouble between the two countries, Mr. Nosse spoke of the position of Japan after the China-Japan war. Corea was the cause of that war, and since that time the independence of the country under the guiding hand of the Japan Government had been maintained. Then came the Russians and pounced down upon Manchuria. Finding they were successful in that seizure, they laid covetous eyes on Corea. Corea was the key to the coast line of Japan, and in order for the latter country to maintain her independence as a nation it was necessary that the Russians should not be allowed to have one inch of Corea. Having gained such a stronghold in Manchuria, the Russians were of the opinion that it was only necessary to keep at it in order to get into Corea. Japan, however, was determined that so far as she was concerned (and as she was the most interested party her views should have some weight), Russia should not only give Japan certain privileges in Manchuria, should leave Corea alone once and for ever.

Regarding an outbreak of hostilities Mr. Nosse said that Japan would have been perfectly justified in going to war with Russia last summer. She was, however, held back by England. Matters had gone to such a length now that Mr. Nosse was of the opinion that war could scarcely be avoided. "It depends on the strength of the peace party in Russia," he said with a smile. "At the present moment the war party would appear to be in the ascendant. Their policy is that if Japan is to be beaten she must be beaten now. She is a rapidly growing country, and if we do not crush her now she will soon get too big for us."

IMPRESSED WITH PREFERENCE POLICY

Montreal, Jan. 7.—Hon. Henry Copeland, Agent-General for New South Wales in London, is at the Windsor. Mr. Copeland is on his way to London after a six months' leave of absence in Australia.

Speaking of the fiscal campaign of Mr. Chamberlain, Mr. Copeland said;

"Although the Australians are a conservative people, and always debate and weigh well any public question before giving it their endorsation, I believe the people, as a whole, are favorably impressed with the Chamberlain policy. The Federal Government, prior to the recent elections, was likewise in sympathy with the movement."

Of the recent elections in the Commonwealth, Mr. Copeland says he has been endeavoring to ascertain the exact standing of the parties in the Parliament of Australia ever since he left Vancouver, but to no purpose. He saw that the labor party made strong gains, owing to the assistance of the newly enfranchised women voters, but that is all. He thinks that if Canada is desirous of cultivating trade relations with Australia, as she appears to be, an attempt should be made to secure a little news from time to time.

The Agent-General then described the splendid harvest which had followed four or five years of drouth and general depression, and he aded that all sections of the Commonwealth were now in the boom.

Hon. Mr. Copeland was born in England, but went to Canada about [illegible] years ago. He was in political life in New South Wales prior to removing to London, and held office in three different Administrations.

He says that up to the present time the Commonwealth has not appointed a High Commissioner in London, although it is probable she will do so sooner or later. Although some little friction has taken place in working out the new constitution, Mr. Copeland is convinced that in time the Commonwealth will be a success. No decision, says Hon. Mr. Copeland, has yet been reached as regards the selection of a seat for the Federal Government. Tumut was chosen by one branch of the Parliament, while Bombala was selected by the other, and it may be some time before the capital is finally located. In excusing the delay Hon. Mr. Copeland said that the same thing was experienced before in the choice of Ottawa and Washington as capitals of Canada and the United States.

Hon. Mr. Copeland will visit Ottawa and Quebec before leaving for St. John or Halifax, en route for London. He is generous in his praises of Canada.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000.00. Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 1000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $350,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 150 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS.*

C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not A Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a smal block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY, GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO.,
FISCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.

The Peterborough Brokerage Co., Local Agents.

CATARRH

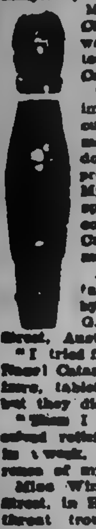
The Mother of Consumption

How this dread disease may be prevented and cured—the opinions of people who have been cured by

CATARRHOZONE

Catarrh is very often spoken of as the mother of consumption, because when unchecked, it extends from its place of beginning to the bronchial tubes then deeper and deeper, till finally the disease becomes consumption of the lungs.

The safest and best remedy for any form of Catarrh is Catarrhozone. It is inhaled to all parts of the breathing organs, kills the disease, and drives it completely out of the system.



Mrs. Mary J. Whitney, of Clay Street, Topeka, Kansas, was cured of nasal catarrh, after twenty years' suffering by Catarrhozone. She says:—

"I owe to Catarrhozone an immense debt of gratitude. It cured me of Catarrh of the most disagreeable kind after doctors without number had pronounced my case incurable. My breath is pure and my respiration regular, and I do not cough any more since using Catarrhozone. It has cured me perfectly."

Another case of Chronic Catarrh that was cured quickly by Catarrhozone is that of Mr. G. A. Luce, of 1,900 Navasota Street, Austin, Texas. Mr. Luce says:

"I tried for four years to get rid of Nasal Catarrh, used salt douches, atomizers, tablets, stomach medicines, etc., but they didn't do me much good.

"Then I tried Catarrhozone, and received relief in a few hours. It cured in a week, so that I never had a recurrence of my former trouble.

Miss Winer, who resides on May Street, in Hartford, Conn., was cured of throat trouble by Catarrhozone, and speaks of her recovery in the following words.—

"Repeated colds finally resulted in a Catarrhal condition from which I suffered more or less every spring and fall. Catarrhozone was the only remedy that relieved and cured me. I recommend it."

No treatment is so good for Catarrhal affections and Bronchitis as Catarrhozone. Its success is quite unequalled in the history of medicine. It will cure you quickly and surely, and is well worth a trial. Two months' treatment guaranteed to cure, price $1.00; small size 25c. Druggists, or N. C. Polson & Co., Kingston, Ont. Buy it to-day.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

Sunday School Entertainment

The annual Sunday School entertainment and Christmas tree of St. Luke's Sunday School was held last night. A good programme was presented by the pupils and teachers.

A Famous Missionary

Rev. John McDougall, D.D., the famous missionary in connection with our North West Indians, will preach in the Mark street church to-morrow morning, and in the George street church in the evening.

All Saints' Church

Rev. W. L. Armitage will preach his farewell sermon in All Saints' tomorrow. Special music will be rendered and the male quartette will likely sing. Holy baptism will be administered at four o'clock in the afternoon.

Y.W.C.A. Notes

The regular gospel meeting at the Y.W.C.A rooms will be held as usual, on Sunday afternoon at 4.15 o'clock. The topic will be Christ's four commands, "Be Me. Follow Me. Obey Me. Abide in Me." Four members of the Association will address the meeting.

Special for Men

The Y.M.C.A. hall should be filled to overflowing tomorrow. Mr. B. C. Sircar, a native of India, is visiting the Peterborough Association. He is the most interesting speaker, showing a good mastery of English in telling his story of the men of India. Mr. J. Laureiro will sing at the meeting which begins at 4 o'clock. Mr. Sircar will address a Boys' Rally at 10 o'clock in the Boys' Assembly Room.

LOST

On Tuesday evening in the northwest part of the town, a goat skin robe, with letters W. H. in black paint on red lining in the center. Finder willl be rewarded by leaving the robe at this office.

The Color Fund

The 57th Regimental Color Fund has reached $274.50. The following additional subscriptions have been received;—

Previously acknowledged	$267 50
Major Leigh	1 00
Sergt.—Major Britton	50
Captain Poole (3rd Dragoons)	1 00
Miss Hamilton	2 00
Mr. R Gliddon	50
Mr. Wm. Hamilton	2 00
	$274 50

A New Post Office

A new post office is about to be opened in Douro township. The post office will be situated in Mr. B. C. Gale's residence Lot. 20, Con. 2, and will be known as "Galesbury." It will be a great convenience to a large number of farmers in that part of the township, as Lakefield and Warsaw are the nearest post-offices. The mail route will be from Lakefield to Hall's Glen, and the mail will be delivered three times a week. Mr. B.C. Gale has been appointed postmaster. The new office will be opened as soon as all necessary arrangements are made.

No Drinking Allowed

The Canadian Pacific Railway Company is making it known to its thousands of employees that drunkenness in any department will not be tolerated for a moment, and one of the plans adopted is to urge as severe a sentence as the law allows in cases where the safety of the public has been in jeopardy. As a result of this John Dandridge, an engineer running into Three Rivers, and Harold J. Hillman, another engineer running into Indian Head, have been sent to jail, without the option of a fine. In the case of Dandridge there is a sentence of six months, which is probably the longest sentence in a Canadian court for a like offence. Hillman's sentence was four months in jail without the option of a fine.

Mr. McClellan Promoted

Mr. W. G. McLellan, son of Mr. J H McClellan, the well known coal merchant has been promoted. The Picton Times says. "W. G. McClellan, the genial manager of the Metropolitan bank at Wellington, has been promoted to the management of the Picton branch. His host of Wellington friends will be pleased to learn that Mr. McClellan is not severing his connection with the Wellington branch of the bank. He is to have charge of the branches at both Picton and Wellington, making his headquarters at the former place and visiting the latter several times a week. The splendid business now being done by the Metropolitan at Wellington bears eloquent testimony to Mr. McClellan's ability as a banker. He is deservedly popular already has a number of Picton friends, and should meet with marked success in his new appointment.' Mr. McClellan is a son-in-law of Dr. McAlpine, and his many Lindsay friends in Lindsay will be glad to hear of his promotion.

THE TOWN'S POSITION

Application to Parliament for Special Legislation

The town solicitor has drafted an application to Parliament covering every possible contingency. The notice must be made at once, on account of the early meeting of the Assembly. There is not time to consult the Council, which is yet unorganized, in regard to the town's needs in regard to legislation.

Prudently the solicitor has covered all possible points raised or suggested by the old council. It does not follow, of course, that the clauses in the application, which appears in another column, are to be included in the bill. They may all be omitted if the Council so decide.

THE BY-LAW STANDS

Motion to Quash Street Railway By-Law Dismissed

The motion to quash the Street Railway bylaw was quashed at Osgoode Hall yesterday. The Globe says;

"Re Meldrum and the Town of Peterborough.—E. E. A. DuVernet, for W H Meldrum, moved for an order quashing bylaw No. 1043 of the Town of Peterborough, authorizing the execution of an agreement with the Peterborough Radial Railway Company, on the ground of illegality, and that the same was not passed in the interests of the public, and that the said railway company have not performed their agreement with the town corporation. G. F. Shepley, K.C, for the Town Corporation. The bylaw having been amended in manner indicated by Meredith, J., motion dismissed without costs."

THE LATE SAMUEL NELSON

Prominent Lakefield Citizen Died Yesterday Morning

Mr. Samuel Nelson, one of Lakefield's prominent business men, passed away yesterday morning, after five days' illness from pneumonia.

The late Mr. Nelson was 73 years of age and was an old resident of the village. He leaves a widow and four married daughters as follows;—Mrs. Robert McWilliams, Peterborough; Mrs. Secret, of Vancouver, B.C.; Mrs. Pethick, of Rochester, and Mrs. Trude, of Lakefield. Mr W. H. Casement, of Lakefield, is a nephew.

His death, coming with such awful suddenness, has cast a gloom over the village. He was greatly respected and beloved by all who knew him.

The funeral takes place to-morrow at 2.30 o'clock to Ray's Cemetery.

POLICE COURT

Three Cases Occupy the Attention of Court Yesterday

Henry Starr, who pleaded guilty of assaulting P. J. Heaslip, was fined $5 and costs, $8.75 in all.

A non-payment of wages case, in which $7.00 was demanded, was settled for $3.95.

Adam Thompson, of Otonabee, took a cutter which did not belong to him, but claimed that he did not steal it. On the same night Dr. Vrooman, V.S., of Bobcaygeon, who was visiting in Peterborough found that his cutter had gone and a much inferior one left in its place. Thompson claimed that he drove a lady to town, and when he found that his cutter had disappeared he took the best one in the hotel yard. This turned out to be Dr. Vrooman's. The police did not look upon the case in the light of a theft, but for causing all the trouble fined Thompson $10.20 costs.

—The prospects for a good year in the building trades are looking up. The demand for dwellings is brisk, and if strikes and other labor difficulties do not arise there will probably be several hundred houses under way in the early spring.

EVERYBODY READS THE TIMES.

GOUGH BRO'S LEAVING TOWN

Peterborough is to Lose its Most Progressive Business Firm—The Last Great Sale of the Goughs

Peterborough's loss will be Toronto's gain, when Messrs. A. J. Gough and Richard Gough, the great clothing firm, who have for so many years conducted one of the foremost businesses in Peterborough, will have taken their departure from amongst us. The firm has built up an enormous business in Toronto, requiring their undivided attention. They will be succeeded in Peterborough by their managers, Messrs. Tully & Merrell and W. H. Meredith, who are to be congratulated on succeeding to so great and profitable a business.

The firm has been stock-taking for the past week, previous to the great "good-bye" sale which begins today. This great sale will be conducted under the personal supervision of Messrs. Gus and Richard Gough, who will be pleased to meet with all their old friends during their brief stay.

This sale is to be a record-breaker in the way of bargains. We are sure the splendid double store of the firm will be crowded daily while the sale lasts.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. J. M. Might is in town on business.

—Mr. W. H. Ivory, of Toronto, is visiting friends in town.

—Rev. Mr Bagnow, who has been suffering from a severe cold, is, we are pleased to say, able to be around again.

—Miss Lucia Oulton, of Campbellford has accepted a position on the Central school teaching staff.

—Miss Mabel Routley delightfully entertained a large number of her young friends at her home, Stewart street, on Thursday evening.

—Mrs. W. H. Noyes and Master Maxwell, who have been visiting in town, for the past few weeks, returned home to Hamilton Wednesday.

—Mr. John Hammond and daughter Nellie, of Hartney, Man., are visiting his brother-in-law, Mr. A. J. Edwards Albert street, town.

INCIDENTS OF THE DAY

Breezy Paragraphs Picked up By Reporters on Their Rounds

—Burns anniversary (Jan. 25) will be celebrated in many places this year.

—The Council will meet on Monday at 10 o'clock and again in the evening.

—Rev. Mr. Yule, Springville, conducted the preparatory services at St. Paul's last night.

—*Lindsay Post*—The Christmas gift of St. Mary's congregation to their esteemed pastor, Ven. Archdeacon Casey, amounted to $547, and will probably reach $600, when those absent have contributed.

—*Lindsay Post*—Finding that he had an account of $50 against the School Board for chemicals supplied last year, Mr. A. E. Gregory, the newly-elected member of that board for the North ward, resigned his position on Tuesday, night and another election will be held.

—The people of Kingston voted against the proposal to abolish the ward system. This system has its defects, but it also has its merits. Candidates in wards are generally better known to the electors than are those chosen by the city at large, and the political slate is harder to make with the ward candidates. There is no more reason why the whole city should elect the aldermen than that the whole country should elect the members of Parliament.

NORTH MONAGHAN.

—Owing to the unusual protracted spell of winter weather, driving on the ice is good at all points, commonly in use for that purpose.

—Miss S. Kerr, who has with good success managed S. S. No. 10, Otonabee, as teacher for a number of years, has arranged to follow a course in training at the General Hospital, Toronto, with a view to graduating as professional nurse.

—Our municipal Council and supporters decided again to omit election in the usual way. This method, besides being quite satisfactory, is considered to be also economical financially. The Council for the last year were, for Reeve, Mr. J Buckham, and for Councillors, Messrs. Robinson, Jackson, Greer, and Mr. Greer resigning leaves Mr. Harry Dawson in his place, elected by acclamation.

—Mr Jas. Riddell, of Calgary, N.W.T, brother of W. R. Riddell, K.C., of Toronto, is spending the winter season among relatives and acquaintances in and around Hamilton Township. Mr. Riddell will no doubt find much change, as it is about a quarter of a century since he left.

—Mr Arthur Fletcher and sister, Harriet, are visiting at the old home during the winter months, from Manitoba.

—Mr. Geo. Nurse will remove during the winter to Long Island, off Hall's Landing, which he purchased recently from Mr. J. W. Hall.

"*I sleep well enough at night,*
And the blamedest appetite
Ever mortal man possessed."

Riley's farmer is the very picture of a man advanced in years, yet in the enjoyment of perfect health. A good appetite, good digestion and sound sleep, are the chief factors in a vigorous old age. Life is sustained by food, when it is properly digested and assimilated. When digestion fails, there is a loss of nutrition which soon shows itself in physical weakness, nervousness, sleeplessness, etc.

Doctor Pierce's Golden Medical Discovery cures diseases of the stomach and other organs of digestion and nutrition. It strengthens the body in the only way possible,—by enabling the assimilation of the nutrition extracted from food.

The Common Sense Medical Adviser, 1008 pages, in paper covers, is sent *free* on receipt of 21 one-cent stamps to pay expense of customs and mailing only. Address Dr. R. V. Pierce, Buffalo, N. Y.

A VENERABLE PASTOR CURED BY PE-RU-NA.

Pe-ru-na is a Catarrhal Tonic Especially Adapted to the Declining Powers of Old Age.

In old age the mucous membranes become thickened and partly lose their function.

This leads to partial loss of hearing, smell and taste, as well as digestive disturbances.

Peruna corrects all this by its specific operation on all the mucous membranes of the body.

One bottle will convince anyone. Once used and Peruna becomes a life-long stand-by with old and young.

Rev. J N Parker.

Strong and Vigorous at the Age of Eighty-eight.

Rev. J. N. Parker, Utica, N. Y., writes: "In June, 1901, I lost my sense of hearing entirely. My hearing had been somewhat impaired for several years, but not so much effected but that I could hold converse with my friends; but in June, 1901, my sense of hearing left me so that I could hear no sound whatever. I was also troubled with rheumatic pains in my limbs. I commenced taking Peruna and now my hearing is restored as good as it was prior to June, 1901. My rheumatic pains are all gone. I cannot speak too highly of Peruna, and now when 88 years old can say it has invigorated my whole system. I cannot but think, dear Doctor, that you must feel very thankful to the all loving Father that you have been permitted to live, and by your skill be such a blessing as you have been to suffering humanity."—Rev. J. N. Parker.

A Bishop's Letter.

T. H. Lomax, D. D., Bishop 2nd Dist. A. M. E., of Charlotte, N. C., writes:

"I recommend your Peruna to all who want a strengthening tonic and a very effective remedy for all catarrhal complaints."—T. H. Lomax.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case, and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

PETERBOROUGH ONTARIO, MONDAY JANUARY 11 1904.

PRICE TWO CENTS

THE EASTERN WAR SITUATION VERY GRANE

British Cabinet Believed to Have Taken Strong Ground Against Russia

London, January 11.—The Cabinet meeting on Saturday was a momentous one, and it is believed the sole business was in connection with the Eastern crisis. Saturday evening papers all published leaders in which the attitude of Russia was denounced. The Post says that England has plainly informed Russia that her demands are unjust, and must be modified.

London, January 11.—Although the Cabinet, owing to a desire not to alarm the country unnecessarily, is refraining at present from holding its regular meetings, Mr. Balfour, Lord Lansdowne and other principal members of the Ministry are in constant communication with regard to the far Eastern crisis. The Premier and his advisors have not yet abandoned all hope of peace, but they admit the contention of Viscount Hayashi, the Japanese Minister here, that war is inevitable unless Russia executes a sudden reversal of policy. The diplomatic corps is generally of the opinion that the aggressiveness of Russia's diplomacy has carried the situation so far that hostilities are extremely likely even though the Czar decides at the last moment to attempt to draw back.

JAPANESE IN JAPAN.

Pekin, January 11.—Advices from Tokio strongly indicate that Japan's military seizure of Corea is gradually progressing. Should diplomacy discover an unexpected way out of the imbroglio Japan's action can be clothed with the fiction of a minor marshalling of forces to protect Japanese interests; should the outcome be war it will be found that the Mikado's strategists already achieved the initial stage of a comprehensive campaign.

BRITAIN AND FRANCE'S ATTITUDE.

St. Petersburg, January 11.—It is reported in official quarters that an understanding has been reached with the nations of Europe that insures a clearing for Russia and Japan, at least, in the first stages of any conflict that may occur between them. It is also said that Great Britain and France are making a final energetic effort to avert war. Uncertainty prevails at the War Office, as to what course Britain will adopt should Russia defeat Japan and proceed to advance the Muscovite frontier into Chinese and Corean territory.

France looks with hearty disfavour on the prospect of being drawn into the affair and is understood to have given Russia practically no assurance of material aid. These two facts appear absolutely as phases of the situation that now exercise a restraining influence on the war party in the Czar's Cabinet and entourage.

THE PROGRAMME OF JAPAN.

Tokio, January 11.—It is officially intimated that the Ministry will avail itself of any opportunity Russia may leave open for further negotiations that "hold out a hope of peace." This qualification is unofficially construed to mean that the Ministry will refuse to be a party to any dicussion obviously intended merely to postpone an encounter. Moreover should the diplomatic crisis be prolonged for any reason whatever Japan will occupy the interval in perfecting warlike plans, and will take care that matters are brought to an issue before warm weather makes operations more easy for Russia.

WHEAT ADVANCES IN PRICE.

London, January 11.—Wheat advanced a further shilling per quarter to-day in some of the provincial markets, on the prospect of war.

About 116,000 tons of coal were shipped from Cardiff, Wales, during the past week, 46,000 to Japan, 40,000 to Port Arthur, and 30,000 to Hong Kong.

A SPECIAL WAR RATE.

Seattle, Wash., January 11.—A local marine insurance house has received instruction from Lloyds to make immediately operative a special war rate of 10 per cent. on all Russian and Japanese vessels leaving this port.

THINK JAPAN A "NAUGHTY CHILD."

New York, January 11.—Nearly all persons here take the view that Japan's conduct towards Russia is that of a naughty child, cables the St. Petersburg correspondent of the Herald. She is constantly being told in the press not to be so foolish, not to waste money in the impossible task of fighting Russia, and so on. In a long article upon the alleged folly of Japan's pretensions, the Gazette says;

"What can she do to hurt Russia? She must take one of her strong fortresses, say Port Arthur; but she would require ten times more military force than she could ever bring to bear to accomplish such a feat.

"We think, however, England and America will intervene to prevent Japan from taking any such mad step as that of making war upon us."

MANY JAPS HAVE RETURNED.

Los Angeles, Calif., January 11.—By the end of the month over one thousand Japanese will have gone back from California to Japan, having been called to go by an edict of the Japanese Council.

CHINESE OBJECT TO CANADA'S ACT

Semi-Official Csinese Protest Against British Columbian Exclusion

THREATEN TO PROHIBIT

Emigration to South Africa, Unless Free to Settle in British Empire

London, January 11.—Canada is again being put forward as an obstructionist in South Africa's way. What has the appearance of a semi-official Chinese statement, published in the Chronicle today, indicates a resentful attitude on the part of the Chinese Government because British Colombia's "odious and insidious" treatment of Chinese immigrants and the British and Dominion Governments acquiescence. Chamberlain and Sir Wilfrid Laurier, they say, secured the annulment of the anti-Japanese legislation, but left China to bear the full brunt of British Colombia's exclusiveness. China, therefore, refuses to help South Africa out of her present critical labor difficulties until the Pekin treaty of 1860 is honorably observed, and the governments of the British Empire admit the rights of Chinamen freely to emigrate to British territories under mutually satisfactory regulations.

It is further stated that the Chinese Government has complete control, as all vessels must clear at the customs. Though these declarations have an ugly look, they may be merely the preliminaries to cash demands on the Rand mining magnates.

ANTI-CHAMBERLAIN MEMBERS WARNED

Winston Churchill and Lord George Hamilton Given Notice

NO REGIMENT FOR INDIA

Laurier Government Opposes Proposal as Involving Canada in Foreing Wars

London, January 11.—The British trade returns just issued by the Board of Trade show a total of £903,000,000, the highest by £25,000,000 in the history of the country.

The Chronicle says the returns are a crushing answer to Mr. Chamberlain.

The Morning Post, referring to the Board of Trade returns, says that under the antiquated system no attempt is made to differentiate between the value of goods sent to the Colonies and to foreigners. The chief moral of the returns is that the foreigners increase their business in our market more than double our increase in his.

ANTI-IMPERIALIST DROPPED.

Winston Churchill, M.P., has been formally thrown over by the Oldham Conservatives. Mr. Churchill has replied that he will continue to fight against Mr. Chamberlain, and will form a Unionist free trade association.

Lord George Hamilton has been notified by the Ealing constituency that it will no longer support him.

NO REGIMENT FOR INDIA.

The Daily Express's Ottawa correspondent cables that the Laurier Government has rejected the idea of sending a Canadian regiment to India on the ground of opposition to militarism, and the obligation to participate in England's foreign wars. The Express says the rejection is a set-back to the idea of an Imperial army.

CANADA'S CONTRIBUTION.

Sir Charles Dilke, speaking at Stroud, complained that the Colonies made infinitely smaller contributions to imperial purposes than India. Canada was deficient in labor legislation; trade unionism was to have a preference over manufacturers. Both were protected against England, and favored by means of bounties.

NEGLECTED CHILDREN

Work of Placing Them in Comfortable Homes Progresses

Mr. J. J. Kelso, superintendent of neglected children, has issued his annual report. He states that the numbers of applications for children, even infants, far exceed the supply.

There are at present twenty-seven societies actively engaged in the work of looking after neglected and abandoned children, and they have made a specialty during the past year of improving the natural homes of children by inducing parents to do their duty by their offspring. During the year a total of 1,600 children were found foster homes through the English societies. The people freely took them in and made them comfortable. The societies in Canada found homes for 239 waifs. There are now 2,030 children personally visited in their foster homes by representatives of the societies.

Mr. J. G. JARDINE RETURNS TO CANADA

Government Commissioner to South Africa is on Sick Leave

Montreal, January 11.—Mr. J. G. Jardine, the Canadian Government representative in South Africa, passed through this city on his way to Ottawa. Mr. Jardine was a passenger on the steamship Lake Champlain, and reports a most tempestuous passage before the harbor of St. John was reached.

It will be remembered that Mr. Jardine was sent by the Government to South Africa two years ago for the purpose of developing Canadian trade in that country. During his recent visit to Zanzibar he fell a victim to malaria, and has been granted some months leave of absence.

In the course of an interview Mr. Jardine said that during his visit to Africa he had been to nearly every town of importance and is firmly of the opinion that there is a great opening for the development of Canadian trade. In most of the districts the people were distinctly pro-British and would assuredly give the preference to things of British manufactures, all things being equal. Mr. Jardine regretted to say that Canadians were very slow to take advantage of the openings offered, and German and United States firms by the introduction of the characteristic business methods that prevailed in these countries were laying hold of the trade that might be coming the way of Canadian manufacturers.

MR. C. E. BROWN HONORED

Engineer at C. G. E. Works is Given a Travelling Suite Case

On Saturday morning, Mr. C. E. Brown assistant and works' engineer at the Canadian General Electric shops, who is about to leave for Europe on a commission with Dr. Haanel, Superintendent of mines, to inspect various European plants for the smelting of ores and steel, was presented with an address by the employes of the company, accompained by a beautiful travelling suite case. The address was read by Mr. Bookhout, after which Mr. W. A. Brundrette made the presentation.

Mr. Carlton E. Brown, C.E.;

Dear Sir,—As you are about to sever your relations with us as a co-worker of the Canadian General Electric Company, we, who have been associated with you in your work here, feel that we cannot allow you to take leave of us without some expression of our high regard of you as an engineer of sterling ability and a true gentleman.

Your faithful and diligent attention to duty has been an inspiration and example to us, and your gentlemanly bearing and strong character have earned for you a high place in our respect and affection which you will always hold.

While we regret that you are leaving us, yet we are glad that your change of position is a promotion to you, and feel sure that you will win an honorable place in your new sphere of work, and as we say "Good-bye" to you we ask you to please accept this gift, and as you bear it away, will you take with you our heartfelt good wishes for success and a safe journey.

From your friends in the Canadian General Electric Co.

E. G. Patterson, L. O. W Magie, R. Doble, R. E. Layfield, H. D Burnett, J. C. Hyde, W. H. Smith, W. A. Brundrette, F. Wachter, Geo. J. Tovey, A. W. Patterson, Thos. G. Anderson, Chas B. Robertson, Wm R. Robinson, B. E. Lord, John G M Wilson, Robt. Anson, A. R. Metherel, J. B. Cuncannon, A H. Goodwin, R. Cottrell, T. Moldon, P. Derrick, Robt. W. Carson, H. C. F. Foster, J. Lowes, W. R. Hodgson, W. F. Skitch, F. A. Shannon, J. B. Lambe, W. A. Noble, R. H. Shepherd, F Demaurel, Alden F. Bookhout, H Mostyn Lloyd, E. Mayhee, F. J. Bradburn, C. Gilbert, Norman Hiller, Sydney Rush, Harry Latimer, S R Stone, T. W. Wilson W. Wilson, C. Huffman.

Peterborough, Jan. 8, 1904.

Mr. Brown expects to leave in about a week.

CHILD ACCUSED OF THEFT

Windsor, Ont., January 11—Eva McLear aged fourteen years, daughter of William McLear, of this city, was arrested by the Detroit police, charged with systematic thieving. The child's mode of procedure was to stand close beside women customers in departmental stores and when the ladies laid down their purses or handbags quietly to appropriate them.

FIRST ANNUAL SUPPER.

OF PETERBOROUGH TYPOGRAPHICAL UNION, NO. 248

A Very Enjoyable Evening Address and Presentation to Retiring President

The first annual banquet under the auspices of Peterborough Typographical Union, No. 248, was held in Mr. Harry Long's handsome dining hall Saturday evening, and proved a most enjoyable function in every detail. An excellent menu was served by Mr. Long, and this was followed by a brief, but appropriate toast list, agreeably interspersed with vocal selections by Mr. Jas. Browne, N. Jolliffe and T. Begley.

To the toast "the Retiring President" Mr. Albert Martin, of the Examiner staff, replied that his two years of office had been most enjoyable and that he heartily appreciated the excellent support afforded him by the other officers.

To the toast "the newly elected President," Mr. Alf Smith, of the Review staff, returned thanks for the honor conferred on him in his election and installation as president for the current year and asked for the same support as had been given the former president. On behalf of the Typographical Union, he welcomed Mr. F. H. Dobbin, who represented the employing printers, and also the local reporters, to the first annual supper.

The toast to the ladies was appropriately responded to by Messrs. H. Lacheur and T. Begley, of the Examiner staff.

The toast to the host was responded to by Mr Long who said he seldom had a more pleasant company and that he was much pleased with the honor done him in selecting him as caterer. He wished the members every success during the year.

Mr. F. Dobbin, manager of the Review made a very acceptable address, in which he said that it afforded him much pleasure to be at the first supper of the printers and on behalf of the employing printers he wished the members every success and happiness and a bountiful spread next year. Mr. Dobbin also contributed greatly to the pleasure of the evening by a very humorous sketch.

PRESENTATION AND ADDRESS.

Not the least pleasing feature of the evening's programme was an address and presentation to the retiring President Mr. A. Martin, in recognition of his thoroughly appreciated two years' service in the interest of the local Knights of the Arts Preservative. The presentation consisted of a handsomely engraved gold locket and the address, which was read by the retiring Vice-President, Mr. R. T. Hounsell, of the Review staff, was as follows:

Mr Albert Martin, President Peterborough Typographical Union, No. 248.

Dear Sir and Brother,— Peterborough Union printers, on the occasion of their first annual banquet, gladly embrace this opportunity of expressing to you a measure of the appreciation they feel at the interest displayed, and the faithful services rendered by you in advancing the welfare of the members of the body of which you have occupied the honored position of President for the past two years.

During your regime of office you have spared neither time nor labor, and you may now with justifiable pride, look back upon your record as having been a most successful one, and one upon which the members will always think of with satisfaction. As an evidence of the union's appreciation of your interest in the cause of organized labor, and your untiring efforts for the same, your acceptance of this locket is asked and the hope is expressed that you, by it, be reminded of the esteem in which you are held by your fellow brethren in the craft.

Signed on behalf of Peterborough Typographical Union, No. 248.

R. T. HOUNSELL,
J. G. PERRY.

Peterborough, Jan. 9, 1904.

Mr Martin replied in a few well chosen words and thanked the members for their appreciation of his services and bespoke the same assistance as he had had for the new President.

The pleasant evening was brought to a close by singing the National Anthem.

REV. DR. M'DOUGALL

Noted Canadian Missionary Preaches to Large Congregation

Mr. Martin replied in a few well chosen

Yesterday Rev. Dr. McDougall occupied the pulpit of the Mark street church in the morning and the George street church in the evening, preaching sermons in the interest of the North-West missions.

In introducing Dr. McDougall last evening at the George street Methodist church, the pastor, Rev. J. P. Wilson, said that he had asked the missionary to cut away from the regular Sunday sermon and give the congregation an outline of the life of the missionaries in the far West and those with whom they came in contact in their work for our Lord.

Dr. McDougall is a very forcible and entertaining speaker and the large congregation which gathered last evening were delighted with his eloquent address. Mr. McDougall is the son of a missionary and started upon his life's work when a boy of fifteen. He gave a very interesting account of the life and mode of the Indians who inhabited our great North-West in the sixties.

His discourse was confined to the manner in which the buffaloes which inhabited the prairie at that time were captured by these red men; and latter how these men were converted to Christianity. God certainly had His purpose when he created this vast tract of land and it is rapidly becoming a very important part of His great kingdom.

The collections yesterday were of a special order in aid of missions and were very liberally contributed to.

Bargains in Pianos

There are some first class bargains to be had in some new and second hand pianos and organs, at W. G. Leadrum's, 190 Charlotte street, agent for Heintzman & Co., Toronto. Call and see for yourself.

THE PERIL IN THE BALKANS IS NOT AN IMAGINARY ONE, ARMING FOR WAR

The Japanese Navy

Naval predominance in Far Eastern waters is the question of great importance in regard to the war which, sooner or later, is inevitable between Russia and Japan. The latter power has the most modern navy, without a "junk" to consider. On the other hand, the Russian navy, as to its ships, is in great part obsolete or on the decline. It has no fighting traditions, we may say, since Navarino, three-quarters of a century ago, for its share in the events of the Crimean war, half a century ago, was by no means distinguished or glorious. The Japanese claim, therefore, that the "paper effective" of the two fleets by no means represents their actual fighting force, appears to be very well founded. On paper and by the enumeration of tonnage and guns, the two fleets appear to be fairly equal. But the Japanese claim is that their "fighting units" are superior to the Russian in every class. Of course, nothing but the actual test can determine that. But it is certain that the dozen of battleships and armored cruisers that make up the bulk of Japan's fighting naval force are of the very latest construction and equipment. The technical training and capacity of the 1,000 officers and the 20,000 seamen of the Japanese fleet may be assumed to be at least equal to that of the Russians opposed to them, while in the matter of actual experience of war, they have an evident advantage. And their "mobilization" and readiness are complete.

Chicago Fire Survivor Here

A Western Traveller Who Was in the Great Chicago Holocaust

Mr. James T. Smith, of New York, survivor of the Iroquois theater fire in Chicago, was amongst the passengers on the eastbound C.P.R. express yesterday. He was accompanied by his sister, Miss Mary Smith, and Miss Jennie Adams and Miss Thorpe, of Montreal, all of whom were in the theater during the terrible catastrophe. To a Times representative, who came on the train from Toronto, Mr. Smith told the story of their terrible experience.

The women sustained some injuries, having been burned about the face and hands and considerably bruised in the mad rush that followed the discovery of the fire. The injuries, however, are not of a very serious nature, although it is little short of miraculous that the party escaped with their lives. Mr. Smith tells a horrible story of the scenes that were enacted within the theater during the fire and the panic that followed. He had gone out between acts and was returning to the theater when the fire broke out. Realizing that some danger might fall to the women folks, he hurried made his way to the balcony and arrived there when the excitement had reached its height.

"By the time I reached the inside of the theater," said Mr. Smith, "the people had begun to pour out. At first I did not realize the real extent of the terrible affair, but in anxiety for the ones left behind I fought my way through the maddened crowd and finally reached the balcony. There I found my sister and her two companions struggling fiercely in the terrible rush of panic-stricken people. Their presence of mind, however, caused the women to seek protection in the corner and thus they escaped the stampede to a certain extent. I finally got them to a place of safety.

"It was not until this time that I paid any attention to the number of victims about me. When I did gaze over the theater a sight met my eyes that is almost impossible to describe. I was in the midst of the dead and injured, and was rapidly falling a victim to the fumes of gas when I worked my way toward an opening and got a little fresh air.

"What went on all around me is hard to tell. The death groans and maddening cries of the people for help could be distinctly heard, and yet those who were fortunate enough to get away with their lives stood by entirely helpless.

"When I finally succeeded in getting out of the theater, in company with my sister and the other two ladies, we were obliged to climb over the dead and mutilated bodies of men, women and children. The scenes were terrifying in the extreme. Many women fainted and were trampled to death. Others fought their way fiercely through the crowd in the hopes of getting out alive. How we finally reached the exterior of the ill-fated building I do not know, but we are safe, and save for the few bruises suffered little from the effects of the calamity. As soon as the women were taken to a place of safety I joined the vast army of rescuers and returned to the interior of the building in hopes of lending some aid to the dead and injured.

"It was then that the real extent of the accident dawned on me. I have witnessed the slaughter of soldiers, but no scene could have been more horrifying than to look upon the mass of dead and injured that lay on the floor of that theater. The bodies of women and children were piled on one another to the depth of three or four. We simply had to walk over them in order to rescue some who were still alive. For several hours the rescuing party worked amid this terrifying scene. Men picked up the remains of two or three infants, shouldered them, and bore the unfortunates from the building.

"The bodies were frightfully mutilated. In many cases it was impossible to tell men from women, their faces having been trampled into an unshapen mass of flesh, destroying all features and rendering their identification utterly impossible. I saw several bodies on which the flesh hung in threads, having been mutilated beneath the feet of the maddened crowd in their scramble to get out of the building. These scenes are positively beyond description, and those who witnessed the affair are the only ones that can possibly conceive the horror of it all."

Mr. Smith lost a part of his clothing during the work of rescue. He picked up an overcoat and hat from the ruins and is now wearing them until he is able to get his own clothes. Mr. Smith, like many others, also lost his pocketbook, and aside from the money he happened to have in another pocket book all his valuables are gone.

EMPRESS TO MOVE IN AUTO

Modern Vehicles will Transfer Chinese Court to New Capital

Tacoma, Wash, Jan. 11—The steamship Tacoma brings news that the Chinese empress dowager is so weary of strife and worry at Pekin that she proposes to move in automobiles as soon as possible to Hsian, the capital of the Shensi province, which is to be renamed Changan, meaning "city of eternal peace."

That was the name of Hsian when it was the capital of China over 1,000 years ago during the Tang dynasty. In mandarin circles it is believed that Pekin will soon be abandoned by the court, no matter how the Manchurian crisis ends.

Seven automobiles have been purchased in Europe for the trip of the empress One for her personal use was set up and tried last month. It has a magnificent yellow satin chair in the center, with jeweled clocks, enameled frame, mirrors, reading lamp and a rich yellow brocaded curtain.

New York, Jan. 8— An amazing story of abuses prevalent in the Tombs prison during the closing months of 1903, is told by a convict recently released upon a certificate of reasonable doubt. It includes many gross infractions of the rules. The story was laid before Warden John E. Van de Carr and Warden William Flynn on Saturday. On Monday morning Warden Van de Carr handed in his resignation.

The story is told by a man who spent several weeks in the Tombs. He claims to have spent $300, or about $75 a week, for extra privileges.

"The day I entered the Tombs, toward the end of November, I was approached by a keeper and was told that for a consideration he would let me sit outside my cell longer than the others. He demanded $1. I gave him $2, and got on the right sideat once. The next privilege I had was a feather pillow. I paid $1 for it, and it was worth it. The bunks in the cells hang on chains, and all you get is a straw pillow and a blanket.

"One evening a night keeper asked me to come to cell No. 123, where Larry Somerfield was at home. Larry is a good fellow, and he was liberally supplied by his racing friends. He kept half the prisoners in our section supplied with cash and extras and foods and drinks. At one time he had more than $100 worth of luxuries stowed away in his cell, and with the aid of a stove improvised from an old biscuit tin made omelettes and welsh rarebits, with which he regaled his friends.

"After my first visit to Larry Somerfield's cell we met every night about 7 o'clock in cell No. 123, which was empty, and which had been cleaned for our use at the order of the night keeper then in charge. It cost us $1 each and Larry usually invited half a dozen others in for company. As an absolute fact, many of the sentenced men have been permitted to assemble in this particular cell, play cards, drink whiskey, plan an escape, down Jerome, smoke, and swap yarns until 3 o'clock in the morning. I met there Bob Ammon, Max Kornfeld, who was convicted of presenting a false insurance claim; Henry Cottlieb, a lawyer, accused of forgery; Duncan Young, who killed a man while committing a burglary on Sixth avenue; Louis J. Rothstein, charged with fraud; and Joe Simpson accused of burglary."

WEATHER NOTES

Monday—Continued cold.

Macedonia Emissaries Are Scouring Europe

In Case of War in the Far East What Would Happen in the Near East

London, Jan. 9—There is no denying that Russia has not what the French call "une bonne presse." On the contrary, she is a target for newspaper abuse from many quarters. At the present moment her most virulent antagonists are in England, as was only to be expected, for the word "Russia" is to the average Englishman what a red flag is to a bull in the arena.

It is worth noting, however, that, by a curious paradox, the Liberal press in London is more conservative in its attitude than the usually Conservative organs, such as the Times, Standard, and Morning Post. The latter in particular is almost more Japanese than the Japanese themselves.

The cause of this epidemic of Russophobia is partly a sentiment very creditable to human nature that makes one sympathize with "the under dog" in a fight, and partly to a total misapprehension of the real facts.

Russia's Difficulties.

All that the unreflecting public sees is that a big power is at odds with a smaller one. The big one must, therefore, be in the wrong. Russia, in fact, is believed to be bullying Japan, to be forcing her to the wall in an effort to provoke war. How much error there is in this belief is very plain to anyone who will take the trouble to consider which of the two powers has most at stake.

If one of the Governments now face to face in the Far East has anything to gain by war it is not Russia. If one of them has anything to lose by a conflict it is not Japan. Russia has interests to defend in other parts of the world. All those of Japan are in the Far East. While Japan in a war would be able to concentrate her powers, energies, and attention upon the struggle, Russia would be unable to put forth her whole strength, owing to the conflagration that is smouldering ominously in the Balkan peninsula.

This alone is sufficient to clear Russia from the charge of bad faith in her dealings with Japan. It is the Balkan danger that has made her seek to maintain peace in the Far East by every means short of the sacrifice of her predominant position in Manchuria.

Balkan Danger Real.

The peril in the Balkans is not an imaginary one. At this moment Macedonian emissaries are scouring Europe, stirring up public sentiment and seeking funds for a "rising next spring."

Prince Ferdinand of Bulgaria appears disposed to throw down the reins to the jingo war party. One thing is certain Bulgaria is feverishly arming for war. This does not promise well for the immediate future. There is also something ominous in her presentation of a note to her suzerain power, Turkey, on the subject of reforms just at a moment when Russia is occupied in the Far East.

Only Russia's determined attitude toward the Macedonian agitators last spring kept Bulgaria from openly siding with a movement that hid political designs under a humanitarian disguise.

In case of war in the Far East what will happen in the near East? This is a question Russia is bound to consider, and until a satisfactory answer is forthcoming we may be certain she will not try to force war on "poor, brave little Japan."

Vancouver, Jan. 9 —Despite telegraphic assurances of expected peace, Japan is undoubtedly energetically completing war preparations. Several heavy orders have this week been received by Victoria and Vancouver wholesalers for flour, canned meats, and special army biscuits.

The lately-arrived Empress of Japan, had also as a passenger, S. Okamura, whose mission is to collect and ship within sixty days from two to three thousand horses suitable for cavalry or artillery service, and seasoned to cold and exposure. Mr. Okamura is accompanied by several veterinarians, and goes today to Calgary, which he will make his Canadian collection base. Agents were despatched yesterday to Montana and Oregon, with instructions to secure all suitable animals, the contractors of the White Pass winter stage line being especially appealed to. The theory that a Manchurian campaign is contemplated is largely strengthened by the class of horses demanded.

The New York Sun is exceedingly candid in an editorial article entitled, "How War in the Far East would Affect the United States;" our contemporary says: "Should France and England be involved eventually in the contest, an immense stimulus would be imparted to our national prosperity and we should probably recover a large part of the ocean carrying trade which we possessed half a century ago." Whether the war is limited to the rivals for ascendancy in Corea, or all the great European powers are swept into the vortex, the United States, according to the Sun, has little to lose and everything to gain. Our contemporary is not ashamed to add; "Phenomenal as has been already the good luck of Theodore Roosevelt, he would owe a supreme gift to fortune should the United States, as the one great neutral, become, during his term of office, the chief purveyor and the principal ocean carrier of the world." The writer, who can gloat over the prospect of all the great powers of Europe being plunged into war, in order that the United States may make a few dollars out of the carrying trade, must have the instincts of a body-snatcher and all the tastes of a carrion crow.

If one result of the Russo-Japanese war would be the introduction into Russia of Japanese civilization, Japanese justice, Japanese respect for law, and Japanese regard for human life and liberty it would not be an unmixed evil.

PETERBOROUGH, JANUARY 11, 1904

IF WAR SHOULD COME

The New York Sun is exceedingly candid in an editorial article entitled, "How War in the Far East would Affect the United States;" our contemporary says; "Should France and England be involved eventually in the contest, an immense stimulus would be imparted to our national prosperity and we should probably recover a large part of the ocean carrying trade which we possessed half a century ago." Whether the war is limited to the rivals for ascendancy in Corea, or all the great European powers are swept into the vortex, the United States, according to the Sun, has little to lose and everything to gain. Our contemporary is not ashamed to add; "Phenomenal as has been already the good luck of Theodore Roosevelt, he would owe a supreme gift to fortune should the United States, as the one great neutral, become, during his term of office, the chief purveyor and the principal ocean carrier of the world." The writer, who can gloat over the prospect of all the great powers of Europe being plunged into war, in order that the United States may make a few dollars out of the carrying trade, must have the instincts of a body-snatcher and all the tastes of a carrion crow.

VALUE OF MANUAL TRAINING

One of the most significant features of the controversy in the far east is the friendliness of Russia. In her aggressions upon China, Corea and Japan she literally has not the support of a single nation, but is acting against sentiment, the sympathies and the convictions of the whole civilized world. That does not, of course, mean that Russia would necessarily stand alone in case of a war involving a number of powers. Considerations of policy and of "balance of power," might impel one or more nations to take the Russian side against their own sympathies. But the impressive fact is that in the present controversy no nation has given its moral or diplomatic influence in favor of Russia, or has given her assurances of its sympathy, or has sought to justify the attitude and conduct of Russia before the world, while, on the other hand, expressions favorable to Japan have been innumerable.

RUSSIA AGAINST THE WORLD

The spirit of the age in the field of education is becoming more practical and aiming at the utilitarian ends of public instruction. This is a nation of workers—workers who think and do things that have been carefully thought. The fad of ornamental and perfunctory education has gone out of vogue. The banker and the bread-winner in the trench or behind the truck both are of one desire now—each is equally eager that his son and daughter shall be taught the knowledge and practice of the actual arts of independent life. Liberal expenditures for practical teaching of domestic and manual trade knowledge would work wonders in making efficient and profitable men and women of our children whose school days at best are all too few and whose lifework begins so early and needs trained minds and hands

EDITORIAL COMMENT

Two large discoveries of radium have been made lately in this country, one in Utah and one in Idaho. Judging by the history of aluminium, we may reasonably expect radium, in the course of time, to become as common as copper. What the effects will be on therapeutics, the arts and even transportation must be left to the imagination. Certainly an illimitable supply of electrical energy at a practically nominal cost would revolutionize every conceivable human industry and interest.

Doctors are puzzled over a baby in New York that has slept continuously for more than two weeks, never opening its eyes, and simply manifesting a desire for food by puckering its lips. As the good baby is the one that sleeps the most, this one deserves the prize par excellence.

If one result of the Russo-Japanese war would be the introduction into Russia of Japanese civilization, Japanese justice Japanese respect for law, and Japanese regard for human life and liberty, it would not be an unmixed evil.

EVERYBODY READS THE TIMES.

Mille Roches, January 9.—A farmer named Ernest Froom, who lived two miles north of here, was instantly killed this morning by the explosion of dynamite, which he was thawing out. His wife was seriously injured and the house badly wrecked.

Billious Dyspepsia

A DREADFUL COMPLAINT ACCOMPANIED BY HEADACHE, SICKNESS OF THE STOMACH, VOMITING THAT CAN BE *PERMANENTLY AND* QUICKLY CURED BY FERROZONE

Some persons have attacks of Billious Dyspepsia very frequently, and feel as if they were about to die.

The whole system seems to collapse. The tongue becomes coated, the face a sallow pallor, and a bitter taste is always noticeable in the mouth. At times the bowels are very constipated, but occasional acute diarrhoea is caused by the accumulation of bile in the system.

It is highly dangerous to allow such a condition to imperil your life. It must be cured and the simplest and surest remedy is Ferrozone. It digests every particle of food eaten, and prevents the waste products from clogging up the system.

Ferrozone restores all deranged organs to a healthy, vigorous condition. It keeps the bowels well regulated, makes the kidneys eliminate all poisons from the blood, and supplies the necessary elements to build up and strengthen the entire body.

Mr. Louis Meehan, one of Peterborough's most enterprising and well known business men, during the past three years was an unceasing sufferer from Billious Dyspepsia. He was cured permanently by Ferrozone and is so anxious that all others may profit by his experience that he gives the following testimonial.

"About three years ago," says Mr. Meehan, "I had the Grippe which left me in a very run down condition that finally developed into Dyspepsia. I was unable to eat but a few things and had a craving for acid. I gave up treating with the doctors because they did not help me, and on the advice of a friend used Ferrozone. It not only cured me of Dyspepsia and Billiousness, but has built up my strength to what it was before I had the Grippe. I can recommend Ferrozone as an ideal restorative."

Ferrozone is capable of digesting all classes of food, and contains in a highly concentrated form the elements necessary for strengthening and reconstructing, and nourishing the stomach and other digestive organs. It is a builder of blood, muscle and fat, and makes sickly, weak, disheartened people strong and well. Ferrozone gives you force, energy, vim and spirit and cures every time. Sold by all druggists. Price 50c. per box or three boxes for $1.25. By mail from N. C. Polson & Co., Kingston, Ont.

SOCIAL CLUB IN A NEW YORK CELL

Prisoner in the Tombs Tells of the Privileges Granted for Bribes

New York, Jan. 8.—An amazing story of abuses prevalent in the Tombs prison during the closing months of 1903, is told by a convict recently released upon a certificate of reasonable doubt. It includes many gross infractions of the rules. The story was laid before Warden John E. Van de Carr and Warden William Flynn on Saturday. On Monday morning Warden Van de Carr handed in his resignation.

The story is told by a man who spent several weeks in the Tombs. He claims to have spent $300, or about $75 a week, for extra privileges.

"The day I entered the Tombs, toward the end of November, I was approached by a keeper and was told that for a consideration he would let me sit outside my cell longer than the others. He demanded $1. I gave him $2, and got on the right side at once. The next privilege I had was a feather pillow. I paid $1 for it, and it was worth it. The bunks in the cells hang on chains and all you get is a straw pillow and a blanket.

"One evening a night keeper asked me to come to cell No. 123, where Larry Somerfield was at home. Larry is a good fellow, and he was liberally supplied by his racing friends. He kept half the prisoners in our section supplied with cash and extras and foods and drinks. At one time he had more than $100 worth of luxuries stowed away in his cell, and with the aid of a stove improvised from an old biscuit tin made omelettes and welsh rarebits, with which he regaled his friends.

"After my first visit to Larry Somerfield's cell we met every night about 7 o'clock in cell No. 123, which was empty, and which had been cleaned for our use at the order of the night keeper then in charge. It cost us $2 each and Larry usually invited half a dozen others in for company. As an absolute fact, many of the sentenced men have been permitted to assemble in this particular cell, play cards, drink whiskey, plan an escape, down Jerome, smoke, and swap yarns until 3 o'clock in the morning. I met there Bob Ammon, Max Kornfeld, who was convicted of presenting a false insurance claim; Henry Gottlieb, a lawyer, accused of forgery; Duncan Young, who killed a man while committing a burglary on Sixth avenue; Louis J. Rothstein, charged with fraud; and Joe Simpson accused of burglary."

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 2[illegible] Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

THE BANNIE MINE

ONE OF THE BEST AND SAFEST INVESTMENTS EVER OFFERED THE CANADIAN PUBLIC.

The Bannie Gold Mining & Milling Company

Offers 20,000 shares of its treasury stock at

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,

KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

Address all communications to Robert Kidd, Fiscal Agent, Peterborough, or to W. J. WILSEY, Prescott, Arizona.

A Wedding Au Naturel.

There was a wedding yesterday in Graceless Church.

Lord Baldknob of Kiltshire, England, married Miss Sallie Panhandle of East Pittsburg.

The bridal party, including the attorneys for both sides, formed in the alcove promptly at 11.30.

At 11.45 the real estate in the bride's name was transferred to his lordship.

At 11.50 a million dollars in legal tender changed hands.

At high noon all the railroad first mortgage bonds known to be in the bride's possession were handed over.

A vote of thanks was then passed to his lordship for leaving the bride's father enough to live on comfortably until the next rise in Wall street, which is predicted for next spring.

At 12.15 two bishops, four clergymen two real estate lawyers and a barrister representing the plaintiff, pronounced the benediction.

The groom will pass the next three weeks with his bride at his estates in England, after the roof has been repaired.

After this, it is understood, they will separate and enter society.—"Life."

TO THE AFFLICTED.

Dear Reader,—Are you a sufferer from any of the following ills: Lack of ambition, nervous exhaustion, ideas easily confused, irritability of temper, impairment of memory, despondency, general debility, liver not right, kidneys out of order, rheumatism, dyspepsia or indigestion, dizzy or fainting spells? Does your heart palpitate? Do you have smothering or sinking sensations, pimples, or eruptions of the skin, etc, etc.

If you are troubled as above, you can be cured by the use of Dr. Clarke's Wonderful Little Red Pills. A trial order of three boxes for $1.00 will convince anyone that these pills are truly wonderful. We are daily in receipt of letters bearing the highest testimony. We have not space to tell you all about them here, but will answer any enquiries as to their merits. Mrs. John Macdonald, Durham, N. S., writes us, "After taking two boxes of Dr. Clarke's Little Red Pills for indigestion, which I had been troubled with for a number of years, I am now perfectly well. I followed the directions carefully."

To every one sending for a trial order and finding good results we ask to observe our special offer enclosed with every box. It is of special interest to every one.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or 3 boxes for $1.00.

Dr. Clarke's Sure Cure for Catarrh and Dr. Clarke's Sure Cure for Eczema, same price. $100 will be paid for any case that it will not permanently cure.

Colonial Business a Specialty

Mostly Men.

The writer, a Manitoban, and an Anglo-Indian bound for Penang were seated in the smoking parlor of a Canadian Pacific Pullman car. The Manitoban was a cheery optimist; the Anglo-Indian a pessimist with a liver, who said he believed Canada's future lay with the United States. This my Manitoban resented, and when the Anglo-Indian ended a remark with a pious hope that Manitoba might some day be a desirable country, in spite of her severe winter, my Manitoban did not try to conceal his contempt.

"Huh!" he ejaculated. "I tell you, it's pretty prosperous right now, sir, winters and all, and don't you forget it. A fur coat's a lot cheaper than malarial fever anyway." (The Malay peninsula had been described.)

"Oh, yes! it's prosperous enough I dare say," replied the Anglo-Indian disdainfully; "but really when you talk of the Canadian North-West supplying the British wheat market . . ." and he shook his head pityingly.

"See here," said my Manitoban, "how much wheat did Great Britain import in 1902, anyway?"

The Anglo-Indian shook his head again. "Really," he began, "I'm not able to state offhand——"

"Well, I am," interrupted the other. "Great Britain imported in 1902 one hundred and fifty-one million bushels of wheat. In 1902 Manitoba's crop of all grains was one hundred million bushels, and the total wheat crop was fifty-three million bushels."

"And how much of that fifty-three million bushels found its way to England?" asked the Anglo-Indian sarcastically.

"That's all right," nodded the Manitoban; "little enough, maybe. But I'm coming to that. During the year ending June 30, 1902, the whole Dominion exported to Great Britain twenty-five and one-quarter million bushels of wheat and three-quarters of a million barrels of flour out of a total export of twenty-six million bushels and one million barrels. Now, sir, that fifty-three million bushels was raised on two million acres of land. By 1910 Manitoba may have six million acres of land under wheat cultivation—the land is there all right—and similar conditions to 1902 would mean a crop of one hundred and fifty nine million bushels, or the total consumption of wheat in Great Britain for last year. And take notice, please, I am not saying a word about the millions of acres of rich soil in the North-West Territories awaiting colonization."

"Why is there so much unoccupied land in Manitoba?" I asked, watching the Anglo-Indian ponder on the figures quoted as I spoke. "Are they 'free' lands?"

"No, sir," replied the Manitoban; "you bet most all the free land that's any good has been taken up in Manitoba. The railways, the land companies, syndicates, private individuals, own thousands of acres of land in Manitoba, and they are selling them every day, cheap, too."

"What do you call cheap?" asked the Anglo-Indian.

"Ten dollars to twenty dollars, £2 to £4 per acre," replied the other. "Why, land which is not nearly so productive in Ontario sells from $40 to $60 per acre. The West is still supposed to be 'wild,' I guess," and he laughed merrily. "Last year the official average of wheat per acre in Manitoba was given at 26 bushels. Take an average price of 50 cents per bushel, and you have a gross return of $13 per acre. Farming by figures is easy—and delusive—so let's cut this return in half (and that provides for every contingency except annihilation) and you have a gross return of $7.50 per acre, which leaves a profit, after expenses, sufficient to warrant the price of good lands going to $50 per acre within a year or two."

"And what is the reverse side of this picture?" asked the Anglo-Indian, interested in spite of himself.

"Oh, that's there all right," laughed the Manitoban. "We've had bad crops, frozen crops, dry seasons. We get a six months' winter, which is gen—u—ine winter, all right. In the early days we had to team our wheat twenty-five to fifty miles to market, and that was no picnic when the thermometer was at 40 degrees below zero. Then the mosquitoes in summer, they worry a tenderfoot some, and . . . oh, dang it! that's about all, I reckon. But still," and he waved his hand out towards the darkness, "I tell you, sirs, it's a fine country, whether it's yellow with ripening wheat or white under the bright winter stars. Its men are mostly men—those who count are—and its women know how to make a farmhouse on the prairie a pretty good place for a fellow to get home to. It's a clean, healthy life, gentlemen, and a man keeps young on the prairie a long time after he has passed the 50-mark.

"We're a long way from the center of things up here, I guess, and maybe we are a bit rough, but that doesn't count. I've often watched the twilight steal along so gently it's like a dream, and the Northern Lights shoot across the sky like a mist of flame. And it's good to smell the spring rains when they start the old earth into greenness, and to hear the honk! honk! of the geese overhead, saying they are pleased to get home to the Northland again. You bet, gentlemen, it's a good country to live in and work in, and I guess it's all right to sleep in when the work is well done. Here's my station, and I'll bid you good-night, and I hope I haven't tired you with my talk."

And the Manitoban stepped off the car as we pulled up at a station.

The moving train had resumed its steady thud! thud! thud! before the Anglo-Indian spoke.

"The Canadian Government mayn't know of him," he said, "but that man is the best sort of emigration agent they have got." He rose and yawned. "I think I'll turn in," he said. "Good-night."

But I sat and smoked for a while, thinking of the Manitoban and the life he had sketched. And the train rushed steadily forward through the night, and I thought of the unseen and as yet untilled prairie stretching to the horizon on either hand, and tried to imagine its broad acres peopled with "men who were mostly men."—H. T. Munn in "Outlook."

The Prodigal.

I bought my laughter with the coin of grief,
I paid for happiness as kings might do.
Yet, though I beggared go beyond relief,
Oh heart, the glad, mad spendthrift hours we knew!
—Theodosia Garrison in "Harper's Bazar."

Facial massage is a popular treatment for wrinkles. I know a better—contentment.

The "summer girl," like some extravaganzas, is not always gold because she glitters.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.
Capitalized at $2,000,000.00.
Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 700 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.
1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 116 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS.*

C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not A Gamble
but a
Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY, GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO.,
SCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.

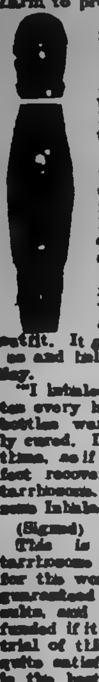
WANTED—GOOD AGENTS IN EVERY CITY.

ASTHMA CURED

Mrs. Farndel, Clementsport, N. S., suffered all her life from asthma, but was permanently cured by Catarrhozone after all other means failed.

Mrs. Farndel's recovery affords overwhelming proof of what Catarrhozone will do. Nothing except Catarrhozone was of the slightest benefit, but when given a fair trial it cured.

Now perhaps you need something for your cold or bronchitis or Asthma? Why not try Catarrhozone? Thousands have been cured by inhaling it a few minutes now and again, and certainly it won't do you any harm to profit by their experience.



Mrs. Farndel gives the following statement of her case for [illegible] of others who are suffering from asthma [illegible] that many will follow her [illegible]lar example and use Catarrhozone.

"I am now in my eightieth year and cannot recall the time [illegible] free from the Asthma. I had always a chocking cough, feverishness, spasms, difficulty in breathing, headache and nausea. My druggist advised Catarrhozone one day, and I bought a large outfit. It gave me relief in five minutes and helped me very much in one day.

"I inhaled Catarrhozone ten minutes every hour, and by the time two bottles were used, I was completely cured. I am as free now from Asthma, as if I never had it. My perfect recovery is due entirely to Catarrhozone. I prize my Catarrhozone Inhaler next to life itself.

(Signed) MRS. T. FARNDEL."

This is proof positive that Catarrhozone is a sure and speedy cure for the worst kind of Asthma. It is guaranteed to give satisfactory results, and your money will be refunded if it fails. All you need is a trial of this grand preparation to be quite satisfied and convinced that it is the best. Your druggist recommends and sells it. Price $1.00, small [illegible] & Co., Kingston, Ont.

A Society Funeral

The funeral of the late Leo Callaghan, whose sad death occurred on Friday last, took place yesterday afternoon, and was attended by the Catholic Order of Foresters and the T.A.S., of which societies deceased was an esteemed member.

A Presentation

At a meeting of the Charlotte Street Young Men's Guild, Mr. C. E. Brown, secretary of the Guild and teacher of the Young Men's Bible class, was presented with an address, accompanied by a beautifully engraved gold-headed umbrella. Mr. Brown is about to leave for Europe on an important mission, and the Guild took this means of showing their esteem for him and their appreciation of his services in connection with the Society.

Two Men for School

Mr. J. B. Mann, who for the past three months has acted as assistant secretary of the Y.M.C.A., left for the Y.M.C.A. Training School at Toronto on Friday, where he will take up the physical course. Mr. W. S. McGuire is the other member of the Peterborough Y.M.C.A. who is taking the physical course at the school. Mr. S. D. Aplin, the physical director, is to be congratulated on sending two representatives, who give promise of becoming strong leaders.

Peterboro' Business College
—BEGINS—
Monday, January 4 1903
Day and Night Classes.
It is desirable that all who purpose entering the school should do so on the above date.
WM PRINGLE,
Opposite Post Office. Principal

KENDRY OR GARVIN?

Conservatives will Meet on Saturday Next to Select Candidate

The Conservatives of West Peterborough will meet on Saturday next to select a candidate to contest the riding at the approaching elections for the House of Commons. It is understood the nomination will again be tendered the present member, Mr. James Kendry, and in the event of his refusing, it will be offered Mr. J. W. Garvin. Mr George Fitzgerald, a member of the County Council, is also said to be a strong man in the party, and may be induced to run.

MINISTER OF MILITIA COMING

Sir Frederick Borden Will Visit Peterborough This Month

Mr. J.H. McClellan has just returned from Ottawa, where he met Sir Frederick Borden, Minister of Militia, who stated that he would endeavor to visit Peterborough some time during the last week of the present month.

The Minister's visit is for the purpose of selecting a site for the new armory, which the Government propose to erect here. The Minister will be the guest of the officers of the 57th Regiment while in town. He will probably be accompanied by Lord Aylmer, Adjutant-General, and Col. Macdonald, head of the Militia Stores Department.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporters on Their Rounds

—Mr. Gliddon's orchestra will play at the Albany Club's rooms this evening.

—The adjourned annual meeting of the Albany Club will take place this evening.

—The inaugural meeting of the new Council will be held this morning at 11 o'clock.

—The Peterborough Typographical Union held its annual supper at Harry Long's on Saturday evening.

—There were registered at the Town Clerk's office during the year 254 births, 146 marriages and 174 deaths. In 1902 the figures were 231 births, 143 marriages and 185 deaths.

"Naval Engagements"

The society play "Naval Engagements" the plan for which opens this morning at Salisbury's, is an interesting and amusing bit of life in England in the early part of the 19th century. Under the able direction of Mr. Daly, of Guelph, himself an actor of repute, the local company is fast getting into shape. Without doubt a large audience will greet the players tomorrow evening, when with the assistance of "A Pair of Lunatics," and Mr. Gliddon's orchestra, an excellent entertainment will be given for the benefit of the Children's Aid Society.

A Good Snap Shot

The Times has received from Mr. John H Price, County Clerk of Erie County, N.Y., a couple of photos of the County Council and party taken at Buckhorn last summer. The party was standing on the bank of the canal, ready to embark for home, when Mr. Price and a companion happened along on the other side of the stream, and turned their kodaks on them. Strange to say the "machines" stood the strain, and a couple of very good pictures were secured. This is somewhat surprising, when it is known that the editor of this great family journal, occupied a prominent place in the foreground, with County Councillor Geo. W. Fitzgerald on his right. This g. f. j. hereby returns its thanks to Mr. Price for his thoughtfulness in sending us copies.

FAREWELL SERMON

Delivered by Rev. Mr. Armitage at All Saints

Rev. W. L. Armitage preached his farewell sermon at All Saints' church last night to a very large and attentive congregation.

Mr. Armitage had chosen as his text, Second Corinthians, chapt. 13, verse 11; "Finally, brethren, farewell. Be perfect, be of good comfort, be of one mind, live in peace; and the God of Love and Peace shall be with you." He dealt principally with young manhood and the great harvest in store for the church, by bringing youth to the Lord; he expressed deep regret at leaving Peterborough and the work here; he was was very grateful to the ladies and members generally for the abundant support given him. The All Saints quartette sang at both morning and evening services. The anthem for the evening was "Let Us go Unto Bethelehem." The Magnificat and Deus Misereatur were also beautifully rendered by the choir.

A farewell meeting will be held in the basement of the church this evening, when the congregation will have their last farewell words with Mr. Armitage.

MINER HIT

A Gold Miner on the Coffee Question

Many a rugged constitution has broken down by the use of coffee;

"I and my son are miners and have been strong coffee drinkers. I will add I followed mining for fifty years. Nearly three years ago my son had palpitation of the heart so bad that after a hard day's work he would be almost unable to get his breath when lying down, and I was a victim of constipation, headache, and could not sleep soundly.

"So I pulled up stakes one day and started to see a doctor, and curiously enough an old acquaintance I met on the way steered me off. We stopped and talked and told each other all the news and I told him about our troubles. He said it was coffee doing the work and that using Postum in place of coffee cured him of almost exactly the ailments I described.

"So instead of going to the doctor's I sent for some Postum although I did not have much faith in it, but to my great joy it turned out all right and after we quit coffee completely we both began to get well, kept it up, and are both of us strong, well men with none of the old troubles. A miner is supposed to be able to stand great hardships, but we could not stand coffee. It was killing us. Any one following the directions on the package of Postum will have a far better drink than he can get from the best coffee.

"I think every coffee toper should know Postum will cure him of his ailments, besides it is such a refreshing drink." Name given by Postum Co., Battle Creek, Mich.

Coffee hurts nearly all who drink it and soaks some people very hard. There is a sure way out of the trouble by quitting coffee and using Postum.

And "there's a reason."

Look in each package for a copy of the famous little book, "The Road to Wellville."

Love, like lightning, seldom strikes twice in the same place. Widows usually marry for money the second time.

No woman's waist can compare with the waste of time.

The man who blows his own horn is merely a self-entertainer.

An old toper says it's the drinking between drinks that hurts a fellow.

The poor man's story—usually the one next to the roof.

Probably there is nothing so uncertain as a sure thing.

A small boy's idea of forgiving an injury inflicted by another boy is to lick him first and forgive him afterward.

The man who is never idle has no time to be mean.

It is not the height some men attain that makes them giddy—it is looking down with contempt on the crowd beneath them.

A woman's esteem is almost priceless, but it may cost you her love.

Lots of people go to the opera who hardly know about music even to hold hands in time.

Only truth commands truth; he who lies will always be deceived.

Many well-meaning peacemakers make it their mission in life just to pour oil on the troubled flames.

An hour of passion is worth a year of experience, but it may prove even more expensive.

Lookers-on see most of the game, but they have to cultivate a wicked imagination sometimes.—R. H. St. Hill.

A love affair begins with two people wanting to give each other everything; it ends in both finding they are getting nothing.

Only death is free, and even that costs you life.

It is usually those who are least to be trusted who demand the most implicit trust. Naturally.

To some intellectual palates conscience is a matter of taste, remorse a mere condiment of life, while sin is as the perfume of a dying rose.—By. R. W. St. Hill.

FEMININE OBSERVER.

Laziness begins with cobwebs and ends in chains.

Point d'Arabe laces are very smart garnitures.

By refusing to listen to secrets one is saved unlimited trouble.

A woman who loves too much sometimes loses, but a woman who loves too little never gains anything worth losing.

Tiny golden circular clamps like coins are used on ribbon ends in place of the points, which were so popular.

It is ourselves who make circumstances not circumstances us, as often is affirmed.

To borrow is no harm; the disgrace lies in forgetting you did.

Courtesy is to man what daintiness is to woman—a beautiful thing to be known by.

A clear conscience can bear any trouble.

Common sense isn't so common that it is uncommonly common.

Marrying a man to reform him is like drinking whiskey to destroy it.

The more checks a spendthrift has, the faster he goes.

Table oil cloth is a sanitary substitute for wall paper in the kitchen.

OLD NUTMEG'S SAYINGS.

Dew all the good yew kin, but don't neglect yewr dewty tur dew it.

A dollar in the bank is wuth tew dollars on yewr back.

Many a man gits clus tur Natur' when he can't raise the price uv a lodgin'.

Ef the devil helps his own an' the Lord helps them who helps themselves, then ev'rybuddy orter be purty well supplied.

It would be much easier fur some people tew shun evil companions ef they could on'y git away from themselves.

It's a purty mean man who will break up a settin' hen in the mornin' then go an' set himself in a grocery store all day.—JOE CONE.

Whenever a woman who is carrying a fat baby meets a man leading around a little dog, she always looks indignant at him.

When a woman tells a man he ought to be ashamed of himself for doing something, half of the time it means that she would have been ashamed of him if he hadn't.

Nature never did betray the heart that loved her.—Wordsworth.

There are truths which are not for all men, nor for all times.—Voltaire.

A day for toil, an hour for sport, but for a friend a life is too short.—Emerson.

SEWING HINTS.

Always use double thread for gathering.

Always use as fine a thread and needle as the garment will allow.

When threading your needle make the knot on the end broken from the reel.

The rule for frilling is one and a quarter the length of the edge to be trimmed.

In facing a sleeve, turn it, and place the facing inside the sleeve before sewing it on.

Gathers should always be set on the right side, but never with a needle; use a large pin.

When sewing on a button place the knot on the right side of the cloth directly under the button.

In sewing a seam, put the stitches closely together, but lightly, into the cloth, being careful not to pull the thread tight, as this causes the seam to pucker.

Sunday consultations at the Paris hospitals were not well attended by the working classes, the workingman preferring to lose a day's work rather than a few of his hours of idleness on Sunday.

"You know him, then?" he questioned, huskily.

"I do—better than he knows himself He is my own dear boy, and he is here."

She reached up and kissed him, and then hurried from the room, leaving

ENGAGED.

Marriage is very largely an accident. In few cases do men or women set up a standard of manly or womanly excellence and choose by it. In most cases people become engaged as the result of propinquity rather than because of any deep rooted preference.

And so it often happens that the wife enters upon the obligations of maternity just as thoughtlessly as she entered on the marriage relation, because no one has warned her of the dangers she faces.

Thousands of women become invalids for lack of knowledge of themselves. It is to this large body of women that Dr. Pierce's Favorite Prescription comes as a priceless boon, because it cures womanly ills.

"Favorite Prescription" establishes regularity, dries weakening drains, heals inflammation and ulceration and cures female weakness. It makes weak women strong, sick women well.

"After my first child was born," writes Mrs. Jordan Stout, of Pawcettgap, Frederick Co., Va., "my health was very poor for a long time, and last winter I was so bad with pain down in back I could hardly move without great suffering. My husband got me a bottle of Dr. Pierce's Favorite Prescription and a vial of his 'Pleasant Pellets,' which I used as directed. In four days I was greatly relieved, and now, after using the medicine three months, I seem to be entirely well. I can't see why it is that there are so many suffering women when there is such an easy way to be cured. I know your medicines are the best in the world."

Dr. Pierce's Pleasant Pellets the favorite family laxative. One 'Pellet' a laxative, two 'Pellets' a cathartic dose.

LOST

On Tuesday evening in the northwest part of the town, a goat skin robe, with letters W. H. in black paint on red lining in the center. Finder will be rewarded by leaving the robe at this office.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. T A Somerville, of Hartney, Man., is visiting friends in town.

—Mr. John Lang, M.P., was in town Saturday.

—Mr. John Findlay, Norwood, Liberal candidate for East Peterborough, was in town Saturday.

—St Paul's annual treat to the scholars of the Sunday School will take place this evening. Tea will be served and a programme will be given, the chief feature of which will be a series of limelight views shown by Mr. Roy and Mr. Fife.

SISTERS in despair; speedy relief, abnormal suppression; any cause; write for remedy. Safe, sure. Dr. Martha Walker Co., 164 State, Chicago.

TO THE AFFLICTED

The following testimonial may be read with interest to sufferers from skin eruptions or eczema:

January 29th, 1902

Dear Sirs,—I notice your advt. in a paper about your wonderful eczema cure and I feel it my duty to tell you, that I was induced to try it as I had been afflicted with skin trouble in my hands for 14 years. I have tried several doctors and they done me no good. I only used one box of Dr. Clarke's Sure Cure for Eczema. It has made a complete cure. I recommend it to all suffering from skin disease. My hand was so bad that the nails used to come off. You can use my name if you wish.

Yours truly,

MR. JOHN WOOD,
Peake Station, P.E.I.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough, 50c. per box, or 6 boxes for $1.00.

Peter D. McFayden, Riverdale, P. E. I. writes: "I am very busy, but just drop a line to say I highly recommend your catarrh cure. It has done grand work for me. I am so much better."

Dr. Clarke's Sure Cure for Catarrh is also one of the best remedies on the market. We are daily in receipt of letters telling how much they have done for the afflicted. Miss Sarah Hill, 412, Front Street, Traverse City, Mich., writes "I have been wonderfully helped by the use of your catarrh cure; send me another dollar's worth."

Dr. Clarke's Sure Cure for Catarrh and Clarke's Sure Cure for Eczema, same price. $100 will be paid for any case that is not permanently cured.

RUSSIA AND JAPAN VIRTUALLY AT WAR NOW
RUSSIA SENDS 37,000 MEN TO MANCHURIA,
JAPAN HAS SAID HER LAST WORD TO RUSSIA

Both Japan and Russia Assume Strategical Position

Germany's Policy in the Far East if War Comes

New York, Jan. 10—The Herald's St. Petersburg correspondent cables: It is difficult today to discover a trace or sign of the possible maintenance of peace, whereas those of war are easily visible.

Foremost in seriousness is the fact as yet scarcely known, that the entire Tenth Army Corps at Kharkoff, consisting of the Ninth Division of the Infantry of Poltava, the Thirty-first Division of cavalry at Kharkoff and the Fifty-first Brigade of Reserve Infantry, (including artillery), has been equipped with baggage and the corps is ordered to be transported with the least possible delay to Manchuria.

The corps consists of 37,000 men. I am told that the estimated cost per man for the journey is 150 roubles, and more than 5,000,000 roubles—$250,000,000— has been appropriated for the same.

Simultaneously government agents are making enquiries for extensive transport accommodation, and leading shipping firms are asking for freight rates for the time when the ice clears, but such well-known houses as Messrs. Wilson and Messrs. Bornholdt have refused to give advance quotations.

Virtually At War Now.

I made a number of visits on the Russian Christmas among officials classes and found the opinion prevailing that Russia is today virtually at war with Japan, although what is actually being done in the way of assuming strategical positions is concealed by both sides. This is easy enough in view of the great distances over which operations are being conducted.

"When the time comes," Russians say, "you will find that just as many Russian troops have been smuggled into desirable points in Corea as Japanese who are here well known to be pouring in."

I also noted constant expressions of puzzled curiosity as to what Germany is doing. Evidently a strong suspicion exists in the minds of Russians. Added to the published fact that the latter portion of the German Emperor's speech at the Guards' barracks has been suppressed, it is stated here to have referred to Germany's policy in the Far East in the event of war.

The conviction prevails here that any aggressive action by the German Emperor in the present crisis would be a signal for France's immediate entry upon the scene.

Suspicious of United States.

From what I have heard, the official class has formed a conviction that the United States will morally and materially assist Japan when asked to.

Why? The typical Russian reply given was that in America no one person is omnipotent. Here it is perfectly well known that American popular sympathy is strongly pro-Japanese This would surely force the hands of the administration. Of England's action in supporting Japan, none have illusions.

Probably in a spirit of satire, the official journal publishes side by side with the declaration of the Japanese Minister here that Japan has no idea of sending troops to Corea, a despatch from Washington, stating "that the United States War Department has received news which has absolutely confirmed the contrary.

It is quite certain that Japan has realized the importance of placing on record that she is not the one that began the fight, and notes concerning the above denial were promptly sent to news agencies and also to the embassies in England and the United States to be disseminated.

USE
DIAMOND DYES
If Your Toboggan Suit is Soiled or Faded.

Thousands who love the sport that tobogganing affords are now using Diamond Dyes to renew and beautify last year's faded and dingy suits. Diamond Dyes dye anything any color. The only warranted dyes in the world.

Russia's last reply to Japan intimated that Japan's interests in Manchuria were identical with those of Great Britain, France, the United States and the Other Powers.

The Japanese Authorities promptly communicated this declaration to the powers directly concerned and asked what they were going to do about it.

BRITAIN REALIZES COLONIES VALUE

No Danger of Their Being Sacrificed for U. S.

THE MATTER OF EDUCATION

Canon Glazebrook Distinguished British Educationist Speaks on Political and Educational Topics

Toronto January 12.—Rev. Canon Glazebrook, head-master of Clifton College, England, and a leading educationist of the British Isles, is in the city, the guest of his brother, Mr. A. J. Glazebrook, 12 Brunswick avenue.

To a reporter, Canon Glazebrook stated that he had visited a number of the higher institutions of learning in Ontario, partly with a view to making a comparison between English and Canadian secondary education. As a result he said he was convinced that the English secondary education was considerably better than the Canadian. In fact, he was of the opinion that an educated English boy knew as much at sixteen as a Canadian boy at nineteen.

"What is your reason for that?" queried the reporter.

In answer the Canon stated that he had made a comparison of the examination ppapers, which he thought was a fair criterion of what the pupils were expected to know. He would, however, go into the matter with more detail when addressing the Canadian Club.

The Canon stated that he regretted very much to find that there was a feeling among some Canadians that Great Britain favored the United States rather than Canada. The people of Great Britain, he said, regarded the American Republic much in the same way as they did Germany or France, considering the Republic a commercial opponent that must be watched, but it was also the policy of Great Britain and Ireland to preserve the best of relations with all great nations, more especially as the British nation were great traders. It was not, however, to be supposed that Canada was to be sacrificed in order to maintain friendly relations with the United States. Indeed, in recent years the desire for some kind of an Imperial Council, which would be representative of every part of the Empire, had permeated all classes of society. The desire for closer ties within the Empire did not necessarily make every British voter a supporter of Chamberlain, in fact, it was held by many who were not his supporters. If the Alaskan bonudary decision had caused an unfriendly feeling among Canadians towards the Mother Country it was to be regretted, but after reviewing the evidence he could not see how any other decision could have been given. It was the fault of the treaties and agreements made in former years, and the time to object was when Russia parted with Alaska, and at that time the Hudson's Bay Company owned the country in dispute, not Canada, and the former should have objected. The reports of "Yankee worship" in Great Britain he attributed to the desire of newspapermen to send out news, for the great masses of Britishers were generally unaware of even the presence of distinguished Americans.

Speaking of Mr. Chamberlain's proposals for a preferential tariff, Canon Glazebrook said that while he took no active part in politics, still he believed he could say that Mr. Chamberlain had gone back somewhat recently. When the ex-Colonial Secretary had resigned from the Cabinet, he was stronger than today. The people appeared to desire Chamberlain to come to them with his schemes in a more practical way.

PURSUED BY MOB

American Autoist Has Thrilling Experience with Italians

Rome. January 12. — Edward R. Thomas, of New York, a son of the late General Samuel Thomas, and who is on an automobile tour of Europe, is reported by the police to have had a tragic experience near Gaeta. While riding over a country road it is alleged his automobile struck and killed a peasant women, the mother of four children. Mr. Thomas, according to the story told by the local authorities, stopped the car to learn the extent of the woman's injuries, but the threatening attitude of a number of shepherds who had witnessed the accident, caused him to re-enter his vehicle and ride away. Mr. Thomas subsequently embarked with his car for Marseilles.

SERVANT'S UNION MAKES DEMAND

Women's Club of Orange N.J. Checked by Organization of Domestics

WANT PIANO AND PARLOR

Require Eight Hour Day, No Non-Union Food and No Remnants to be Used

New York, January 12.—The Herald says,—

There is dismay among housekeepers of Orange, N.J., who have learned that a servant girl's union is forming as an offset to the Women's Club.

Some assert that the Women's Club is responsible, but the majority blame Mrs. Margaret Walsh, a labor organizer, who has been working quietly and effectively among the domestics of Orange.

Orange has been agitated by the servant problem for several months. Families have broken up housekeeping and fled from homes in the suburbs to flats in New York, because the demands of servants reached the extreme point.

It was only natural that at a recent meeting of the Woman's Club, called by its president, Mrs. Henry P. Bailey, the exile of so many should case the subject of the servant girl to be brought up for discussion. Things were said that bore the impress of having been long nursed in the speakers' inner heart.

ARMED IN DEFENCE.

How it got abroad no one knows, but soon the housemaids were arming in defence, Mrs Margaret Walsh appeared. The servant girls flocked to her standard, and hailed her as their champion. More than 100 girls have enrolled in the union, it is said, but membership in the organization and its meeting places are secret.

Among the demands formulated are these;

Smallest wages to be $25 per month.

Eight hours a day's work

Half a day off Thursday and all day Sunday.

The use of the parlor three nights a week.

The use of the piano for practice between 10 and 11 a.m.

Family breakfast to be served at 10 o'clock luncheon at 2 o'clock, and dinner when it is ready.

No non-union food to be handled, no remnants of meats to be saved.

One servant lady to be employed for every three members of the household.

FINE ENTERTAINMENT

Presented by Children of St. Paul's Sunday School

A very pleasing function was the annual Sunday school tea and entertainment under the auspices of St. Paul's Sunday School last evening; after refreshments had been served a very lengthy and interesting programme was presented in the lecture room. Addresses were made on the Sunday school work by the ministers present. The programme was as follows;

Piano solo ... ...Miss Mattie Robertson
Recitation... ... ... Charlie Bergoine
Piano solo ......Miss Genevieve Sanderson
Song ....John Markle
Piano solo ... ...Miss M. Meldrum
Recitation... ... .Miss Mabel Pringle
Piano Solo... ... ...Miss Gladys Seward
Piano duet...Misses Jean and Amy Hill

The limelight views presented by Messrs. Roy and Fife were very many and interesting, dealing principally with plant and animal life. The pleasant evening was brought to a close by singing the National Anthem.

Police Court

At the Police Court yesterday morning a wages case in which W. Lloyd was plaintiff and Jas. Flynn defendant, was discharged. Jas. Sorram and Jos. O-Toole of Ward 5, were found guilty of breaking a window in J. Stanger's shop on New Year's night. A fine of $5 was imposed, the costs were $4.50 and $1.50 was also added for compensation, making a bill of $11 to be paid by the two offenders in five days or twenty days in jail will result for each.

Bargains in Pianos

Japan's Next Act will Be a Physical One

Russian Troops Smuggled Into Corea

London, Jan. 10—Japan has said her last word. Her next act will be a physical one. That sums up the situation at the present moment in the Far East. It does not follow that war will begin at once. The Japanese will at least delay aggressive action until their newly bought warships have had an opportunity to get well started for Asiatic waters. Moreover, the first military and naval move will not be directed against Russia. It will be in the nature of occupation of Corea and Russia must take the responsibility of placing such construction as she pleases on the situation thus created.

Meantime, Great Britain and France are actively intervening in St. Petersburg and the United States is strongly presenting its treaty rights in Manchuria.

The new rapprochment with France has enabled the Marquis of Lansdowne Secretary of State for Foreign Affairs, to secure the energetic co-operation of M. Delcasse, the French Minister of Foreign Affairs. One version of the result of those efforts is the following communication of the Paris correspondent of the Sun at the Quai D'Orsay tonight:

"The situation has greatly improved The Japanese deny that they are sending troops to Corea. The Russian note, which evidently accepts the Japanese pretensions about Corea, makes military action unnecessary during the negotiations.'

Unfortunately, this optimistic view of the situation is not shared by the British authorities and cannot be accepted by anyone possessing full knowledge of the facts. It is quite true that the Russian reply contains certain concessions to Japan in Corea, but all demands in regard to Manchuria are rejected, and the reply, as a whole, is hopelessly unsatisfactory to Japan. Moreover, the writer has the highest authority for stating that the negotiations are ended,and that, so far as Japan is concerned, they can only be reopened by a voluntary conciliatory communication from Russia. There is no indication that Russia will adopt any such course; the probability, indeed, points in the opposite direction. Representations from other powers must obviously be of a very unusual character to induce Russia radically to change her policy in the present extreme emergency.

GERMANY WILL BE NEUTRAL.

London, Jan. 10—It is learned on the highest authority that it has been decided in the event of war between Russia and Japan, that Germany will maintain a strict neutrality and that other members of the Dreibund will observe a similar attitude.

The importance of this decision, which the Associated Press understands, will almost immediately be announced, in some official manner in Berlin, cannot be easily overestimated. It will in a measure ensure that hostilities will be confined to the two powers concerned and it will be certain to give a great stimulus to the efforts which France and Great Britain are making in St Petersburg and Tokio, respectively, in favor of peace.

The reassuring news that the Russian warships, which recently left Vladivostock, have returned there, is confirmed in a Vladivostock despatch received at St Petersburg. The despatch asserts however, that only the armored cruiser Gromovoi went to sea for a couple of days practice, the other ships of the fleet having remained at Vladivostock throughout.

Special despatches from Tokio are very warlike.

Anxiety is apparently felt in Tokio for the safety of the cruisers, Nissin and Kasuga, which left Genoa Saturday. The Genoa correspondent of The Daily Mail gives a curious, story to the effect that an iron bar was found in the ammunition hold of the Nisson, placed in such a position that it short-circuited the electrical apparatus with, it is suggested, the object of destroying the vessel, although there is no evidence to show that its being there was not accidental. No serious damage was done.

Seoul despatches report the arrival of additional Russian and Italian marines there.

The Daily Mail's Tokio correspondent asserts that the negotiations between Russia and Japan have passed beyond diplomacy, and states that some Corean officials have apppealed to the American legation at Seoul for protection, but that Minister Allen upbraided them for thinking of their personal safety at such a juncture.

A severe gale in the Mediterranean is greatly incommoding the Russian warships. The cruisers Nicholas I. and Nicholas II entered Ferrol for safety, and two Russian battleships and seven torpedo boat destroyers have been detained at Suda Bay since Friday, unable to proceed to the Far East.

Mr. J. Y. Hemming
Had
Inflammatory
Rheumatism
which
Baffled the Skill
of
Medical Men.

Mr. J. Y. Hemming, London, Ont., writes as follows about his marvellous cure;—"I suffered for years with inflammatory rheumatism which baffled the skill of medical men. I had every form of treatment known to specialists, and visited mineral springs, but obtained only temporary relief. Almost giving up in despair, I was asked to try Paine's Celery Compound, and I thank God such a blessing was brought to my notice. The use of three bottles of the great remedy gave me relief from pain, and I slept better. Ten bottles worked for me a complete cure. I have no hesitation in recommending Paine's Celery Compound to all rheumatic sufferers: it cures surely and permanently."

PAINE'S
Celery
Compound
Cured Him.

PETERBORO MAN'S SUCCESS

MR. M. T. OSTROM ORGANIZES A STRONG COMPANY

Half a Million Dollars Capital — Several New Features in Life Insurance

The North-Western Life & Securities Company has been recently organized in Canada, with its head office in Toronto, for the purpose of carrying on the business of life insurance and the investment of savings, by means of special systems, which have been copyrighted by the company. Many attractive forms of policies, providing safe and lucrative investments of terms from 5 to 30 years have been devised and have already attracted the favorable attention of investors. Companies established upon similar lines in the United States have proved eminently successful, and the North-Western Life & Securities Company will be the first to develop what is practically an unexploited field. The insurance policies, which the company's charter will permit them to issue, will, in addition to the ordinary forms of insurance include several others quite new and original, and especially attractive.

The capital stock has been disposed of within the short space of three months which is regarded as a record for rapid promotion among life companies. Well known business men, to whom the systems of the company have readily recommended themselves, have taken large blocks of the stock. Out of the issue of $500,000 offered for subscription, $450,000 has already been taken up, and by the time that the company commences active operations, the remainder will have been disposed of. The company begins work with a paid-up capital of $150,000 and a surplus of $37,500.

The Hon. J. Cochrane, M.L.A, mayor of Montreal, who is taking a keen interest in the inauguration of the company, has agreed to accept the presidency. Mr. T. M. Ostrom, a capable and experienced insurance man, is becoming the general manager, and to his untiring energy, supported by the whole influence of an able board of directors, is due the successful promotion of the new institution. Mr. Ostrom was a former citizen of Peterborough. Mr J. W. Lambly, the provincial manager of the Accident & Guarantee Company, of Canada, has been appointed manager for the province of Quebec, and under this gentleman's able management every assurance of success is promised. Dr G. A. Berwick, of Montreal, will be the company's local medical adviser.

The head office and local boards will be chosen from among the following provisional directors.

J. Cochrane, Esq., M.L.A, mayor of Montreal, capitalist.

Wm. Ross, Esq., M.P., for South Ontario, Port Perry.

Matthew Wilson, Esq., K.C., Chatham.

Henry Hamilton, Esq., of H. & N. E. Hamilton, Montreal.

Nicol Kingsmill, Esq., K.C., Toronto.

Norman Allen, M.D., C.M., M.R.C.S. Toronto.

Chas Hart, Hart & Tuckwell, Montreal.

Dr. W. W. Boyce, president Belleville Board of Trade, Belleville.

D. A Gordon, president and manager Wallaceburg Sugar Refinery.

Wm Scott, principal Normal School, Toronto.

Mathew Hutchinson, K.C., M.L.A, Montreal

J. W. Lambly, superintent of agencies Accident & Guarantee Company.

John F. Seitz, managing director United Typewriting Company, Toronto.

S. H. Wheeler, Electric Light Company, Toronto.

R. H. Graham, wholesale grain merchant, Toronto.

T. M. Ostrom, managing director, Toronto.

Medical adviser province of Quebec—Dr. G. A. Berwick.

Manager province of Quebec—J. W. Lambly.

Chief medical adviser—Dr. Norman Allen, M.R.C.S.

Managing director—T. M. Ostrom.

SHE WILL NOT GO FREE

London January 12—United States Ambassador Choate stated yesterday that there was absolutely no truth in the story published by a news agency that a conference between the Ambassador and the officials of the Home Office final arrangements were made for the release of Mrs. Maybrick, who had been sentenced to imprisonment for life for poisoning her husband, and that as a result of this conference Mrs. Maybrick would be liberated in April.

TERMS GOVERNING BRITAIN'S RELATIONS TO MIKADO'S EMPIRE

England is Bound to See That Japan is Given a Fair Show in a War with Russia

London, January 12.—Following is the text of the Anglo-Japanese agreement of January 30, 1902, which, in view of the crisis in the Far East, is of peculiar interest now;

The Governments of Great Britain and Japan, actuated solely by a desire to maintain the status quo and general peace in the extreme East, being moreover specially interested in maintaining the independence and territorial integrity of the Empire of China and the Empire of Corea, and in securing equal opportunities in those countries for the commerce and industry of all nations, hereby agree as follows;

1. The high contracting parties, having mutually recognized the independence of China and Corea, declare themselves to be entirely uninfluenced by any aggressive tendencies in either country. Having in view, however, their special interests, of which those of Great Britain relate principally to China, while Japan, in addition to the interests which she possesses in China, is interested in a peculiar degree politically, as well as commercially and industrially, in Corea, the high contracting parties recognize that it will be admissable for either of them to take such measures as may be deemed indispensable in order to safeguard those interests if threatened either by the aggressive action of any other power or by disturbances arising in China or Corea, and necessitating the intervention of either of the high contracting parties for the protection of the lives and property of its subjects.

2. If either Great Britain or Japan, in the defense of their respective interests, as above described, should become involved in war with another power, the other high contracting party will maintain a strict neutrality, and use its efforts to prevent other powers from joining in hostilities against its ally.

3. If in the above event any other power or powers should join in hostilities against that ally, the other high contracting party will come to its assistance and will conduct the war in common, and make peace in mutual agreement with it.

4. The high contracting parties agree that neither of them will without consulting the other, enter into separate arrangements with another power to the prejudice of the interests above described

5. Whenever, in the opinion of either Great Britain or Japan, the above-mentioned interests are in jeopardy, the two Governments will communicate with one another fully and frankly.

6. The present agreement shall come into effect immediately after the date of its signature, and remain in force for five years from that date. In case neither of the high contracting parties should have notified twelve months before the expiration of the said five years the intention of terminating it, it shall remain binding until the expiration of one year from the day on which either of the high contracting parties shall have denounced it. But if, when the date fixed for its expiration arrives, either ally is engaged in war, the alliance shall ipso facto continue until peace is concluded.

Trouble in South Africa

Believes That Another War is Still to Come in the Near Future—Not Satisfied with British Administration

Ottawa, January 12—Mr. Jan Johannesenn who went to Johannesburg ten years ago and served as a member of Joubert's and Dewet's staff, passed through Ottawa yesterday. He anticippates further trouble in South Africa owing to the influence of the "Afrikander Bund."

"The general Bund," he said, "is broken up, but at the same time, there is an organization among dissatisfied Boers which has for its object the creating of dissatisfaction against Britain's rule, and the ultimate freedom of the Transvaal and Orange Free State. This is an open secret in Johannesburg and Pretoria and yet no attempt is being made to stop its meetings.

"In fact they are advertised by hand bills and posters just the same as other meetings would be. The organization is known by different names in different cities, and apparently there is no connection between the different branches. In Johannesburg it is called the National Club, and among its members are some of the leading Boers. So far it has done nothing to complain of and it may be that the Government officers are watching it and will suppress it when it becomes obnoxious."

Mr. Johannesenn was not a member of the organization, but he had attended its meetings, which were of a semi-public character.

Personally, he said, he was perfectly satisfied with the British administration, and he believed that it would eventually prove the best thing for the country.

A CAMPBELLFORD FIRE

Four Stores Destroyed and Four Others Damaged

Fire broke out early Friday morning in J. A. Frederick's tailoring and gents furnishing store. Five streams of water were soon playing on it, but this building and the adjoining ones being frame, it soon spread, with the result that the stores occupied by Thomas Bros., grocers, Geo. Mills, boots and shoes, and R. N. Simpson, butcher, were all totally destroyed, along with their stocks.

Chas. Davidson, baker; J. E. Diamond, harnessmaker and furrier; F. C. Bonnycastle, photo studio, and Ackerman, barber shop, also suffered by smoke and water.

The insurance is as follows; Thomas Bros., stock, $1,250, loss about $3,000; R. N. Simpson, stock, $350; J. A. Frederick stock, $1,700, loss about $5,000; Geo. Mills, stock, $1,700, loss about $1,600.

The building occupied by Thomas Brown and R. N. Simpson was owned by P. W. Reynolds of Norwood, who has an insurance of $800. The building occupied by J. A. Frederick and Geo. Mills was owned by Mr. Frederick, with an insurance of $800. The origin of the fire is unknown.

ORGANIZE WOMEN'S UNION

Wives and Daughters of Male Members are to Form Trades Bodies.

Indianapolis, Minn., Jan. 12—Organized labor in Indiana is about to make a new departure by gathering all the wives and daughters of union men into unions, the object being to increase the influence of organized labor in this way. The leaders of the movement say that the wives of workingmen do nearly all the buying for the families,and that, if formed into unions, they would insist that everything they purchased should be union made, and thus the cause would be greatly strengthened.

It is also argued that the unions composed of wives and daughters would be a very material aid in all labor difficulties, as they would act in concert with the men and assist in moulding public sympathy in favor of the unions.

Edgar A. Perkins, President of the State Federation of Labor, is at the head of the movement.

PETERBOROUGH, JANUARY 12, 1904

SHALL METHODISTS DANCE?

To dance or not to dance is a question that Methodists have been asking themselves for some years, and at the last General Conference in Canada an effort was made to have the prohibition eliminated from the book of discipline, but it was defeated. It is quite an issue among the United States Methodists and it promises to be the subject of a lively discussion at the General Conference in Los Angeles in May next. In the United States the Methodist discipline prohibits church members from "dancing, playing at games of chance, attending theatres, horse racing, circuses, dancing parties, or patronizing dancing schools or taking such other amusements as are obviously of misleading or questionable moral tendency." The rule in the Canadian Methodist discipline is not in these words, but its meaning and intent are similar. The Canadian book of discipline, however, contains a foot-note to the rule, in which it is plainly stated that the games of chance referred to are games associated in any way with gambling. The specific prohibition was inserted in 1886, although the teaching of John Wesley was respected before that time. The Wesleyan rule forbids "buying or selling spirituous liquors or drinking them unless in cases of extreme necessity; the putting on of gold or costly apparel; the singing of those songs or reading those books which do not tend to the knowledge or love of God; laying up treasure upon earth and borrowing without a probability of paying." Some Methodists contend that Wesley's rule was sufficient and that the clause in the discipline was inserted before its effect and exact scope were clearly understood.

In Winnipeg recently a debate on the question was held in Fort Rouge Methodist church, when one of the speakers, Mr. Leech, said; "In the discipline are rules against dancing and theatre-going and many others which are systematically violated. Methodist people come out in indignation and blame the police commissioners for not enforcing the law while the laws of their own church remain dead letters." And he continued; "Look over the line of guests at the Government House balls. If you were to exclude from the Kingdom of Grace and Glory all who were there the other night, what would become of Grace church? There would not be enough people left to go to Grace church to generate animal heat." Rev. Dr. Stewart, however, held that the committee had discretionary power, and that the rules are "binding rules of conduct, but binding only in an advisory sense." "If one of these ladies should play," said the doctor, "and I should dance in this church, I might do it with perfect propriety and to the glory of God, and no one could reprove me of it." If my going to the theatre has not a questionable moral tendency, the Methodist church cannot discipline me for doing it. If I can show that there is no immoral tendency in my action there is no power under heaven that can discipline me for going to the theatre."

The Montreal Herald has sought to ascertain the views of some of the Methodist ministers of its city on the subject. Rev. Mr. Bland thinks there is a growing feeling in favor of its elimination. "Personally," he said, "I would favor the elimination of all prohibitions that do not deal with real sin, and I would be very much disposed to leave the question of amusements to the decision of the individual members. I think it should be a matter for a man's own conscience, and if he decides according to what he believes to be right he cannot go far astray." Rev. Mr. Bland fears, however, that to remove the rule might look like receding from a position once taken, which, he says, is not to be desired. Rev. Mr Graham thinks the rule is "a little more strict than is absolutely necessary," but says it is too early to discuss it. Rev. Mr. Sykes was of the belief that while the rule was not favored by many members of the church, to remove it now would be to give license rather than liberty. Such action might be interpreted as placing the stamp of the church's approval upon a practice of which it did not approve.

The prevailing opinion is that the matter will be brought up again at the next General Conference, and that it will be vigorously discussed before being voted upon. A very large body in the church contends that the discipline should be either enforced or amended, and that enforcement involves larger difficulties than amended.

AMERICA'S INTEREST IN THE ORIENTAL CONTROVERSY

Japan demands that Russia sign a treaty stipulating the independence of Korea.

Russia has expressed a willingness to sign a treaty with conditions, and the conditions are that Japan shall stipulate free rein for Russia in Manchuria, and, by implication, in other Chinese territory.

Japan has refused to accept any conditions, has declined to take any step which might be construed as a recognition of Russian sovereignty in Manchuria, and has insisted upon settlement of the question of the future status of Korea without involving that settlement with the status of the Chinese province.

In discussing the above, the Chicago Chronicle says: The Korean question is of peculiar interest to Japan because it had long been a settled policy of the Japanese to claim that Korea lies distinctly within their sphere of influence. This claim has been so thoroughly established in the minds of the people that a concession now would probably involve the government in serious domestic trouble. There is also a reluctance to dispose of the matter by agreeing to the Russian conditions as regards Manchuria, first, because the Japanese are excessively irritated by the remembrance that Russia, Germany and France deprived Japan of the fruits of her conquest in the Liaotung peninsula, which is part of the province, and, second, because Japan, like England and the United States, favors the open door generally in Chinese territory. This brings us to the very interesting point whether there is a community of interest which should incline us very decidedly to the Japanese side and lead to our taking part in the possible hostilities.

It is to be noted in this connection that we have recently secured treaty ports in Manchuria, and while a stipulation for a free rein for Russia, not only in Manchuria, but in other Chinese territory, might be acceded to by Japan, it could not of course bind this country. Moreover, any such stipulation would seem impossible in the case of the United States because of the stand taken in the official dispatches of the Secretary of State. One of these dispatches announced that our policy was to "preserve Chinese territorial and administrative entity, protect all rights guaranteed to friendly powers by treaty and international law, and safeguard to the world the principle of equal and impartial trade with all parts of the Chinese Empire." The other was a strongly worded protest against the granting of exclusive industrial rights or privileges in Manchuria to the Russians. Such grants, it was pointed out, would constitute "a monopoly which is a distinct breach of the stipulations of the treaties concluded between China and foreign powers, and thereby seriously affects the rights of American citizens." The Russian government was also reminded of its repeated assurances of an intention to follow the policy of the open door, as advocated by the government of the United States and accepted by all the treaty powers having commercial interests in the empire.

The developments depend entirely upon the extent of the Russian designs. By her investments and treaties and her interests along the border Russia has secured a certain pre-eminence in Manchuria which the other powers are not disposed to dispute. But it is reasonable to assume that a persistent policy of encroachment would arouse a determined spirit of resistance in the United States, in England and Japan.

EMPRESS TO MOVE IN AUTO

Modern Vehicles will Transfer Chinese Court to New Capital

Tacoma, Wash, Jan. 11—The steamship Tacoma brings news that the Chinese empress dowager is so weary of strife and worry at Pekin that she proposes to move in automobiles as soon as possible to Hsian, the capital of the Shensee province, which is to be renamed Changan, meaning "city of eternal peace."

That was the name of Hsian when it was the capital of China over 1000 years ago during the Tang dynasty. In mandarin circles it is believed that Pekin will soon be abandoned by the court, no matter how the Manchurian crisis ends.

Seven automobiles have been purchased in Europe for the trip of the empress. One for her personal use was set up and tried last month. It has a magnificent yellow satin chair in the center, with jeweled clocks, enameled frame, mirrors, reading lamp and a rich yellow brocaded curtain.

New York, Jan. 6— An amazing story of abuses prevalent in the Tombs prison during the closing months of 1903, is told by a convict recently released upon a certificate of reasonable doubt. It includes many gross infractions of the rules. The story was laid before Warden John H. Van de Carr and Warden William Flynn on Saturday. On Monday morning Warden Van de Carr handed in his resignation.

The story is told by a man who spent several weeks in the Tombs. He claims to have spent [illegible], or about [illegible] a week, for extra privileges.

"The day I entered the Tombs, toward the end of November, I was approached by a keeper and was told that for a consideration he would let me sit outside my cell longer than the others. He demanded $1. I gave him $1, and got on the right side at once. The next privilege I had was a feather pillow. I paid $1 for it, and it was worth it. The bunks in the cells hang on chains, and all you get is a straw pillow and a blanket.

"One evening a night keeper asked me to come to cell No. 124, where Larry Somerfield was at home. Larry is a good fellow, and he was liberally supplied by his racing friends. He kept half the prisoners in our section supplied with cash and extras and foods and drinks. At one time he had more than $100 worth of luxuries stowed away in his cell, and with the aid of a stove improvised from an old biscuit tin made omelettes and welsh rarebits, with which he regaled his friends.

"After my first visit to Larry Somerfield's cell we met every night about 7 o'clock in cell No. 122, which was empty, and which had been cleaned for our use at the order of the night keeper then in charge. It cost us $1 each and Larry usually invited half a dozen others in for company. As an absolute fact, many of the sentenced men have been permitted to assemble in this particular cell, play cards, drink whiskey, plan an escape, down Jerome, smoke, and swap yarns until 3 o'clock in the morning. I met there Bob Ammon, Max Kornfeld, who was convicted of presenting a false insurance claim; Henry Cottlieb, a lawyer, accused of forgery; Duncan Young, who killed a man while committing a burglary on Sixth avenue; Louis J. Rothstein, charged with fraud; and Joe Simpson accused of burglary."

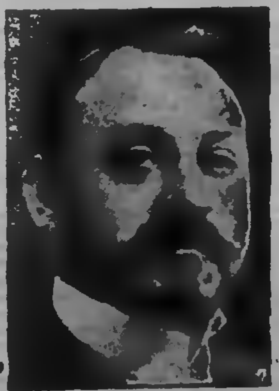
CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has



DR. S. GOLDBERG,
The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

[w]ith the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply Dr. S. Goldberg, 208 Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Dry Placer Mines, formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it now owns, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities [illegible] will save [illegible] per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small compact engine, using crude oil as fuel. A complete plant, capable of handling [illegible] tons per day will weigh less than 1,500 pounds.

So secure the gold only those placer lands could be worked which could command large supplies of water, hence the immense [illegible] of dry placer lands [illegible]

Fifteen Hundred Millions in Gold

[illegible]

[illegible] per cent. of the world's total gold supply has been taken [illegible] the values.

Simplicity of Working — Its Method of Operation

The machine is so extremely simple in construction and operation that any [illegible] [illegible] machine. It has solved the problem of [illegible] gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,500 pounds and can be easily moved [illegible]

The two greatest authorities in the world on the moving of material are [illegible] and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 20 feet [illegible] 12 cubic yards in 10 hours.

A well known engineer in the work for the U. S. Government [illegible]

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of [illegible]

Ten laborers can easily supply one machine with [illegible] cubic yards [illegible] would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock [illegible]

Every machine at work will increase the intrinsic value of the stock.

"Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value."

The Company intends to divide its net earnings every month, so that the stockholders may [illegible] monthly dividends in proportion to [illegible]

MEN AND WOMEN.

'Henry Fielding's Dream'

By CORTLAND MYERS.

before arisen to such a pitch as they did following these sentences. The listeners were all intent for more.

"But," he continued, "I wish to-night to register my name on the side of fairness and truth. There is sympathy for us, and I have discovered it. It is one of the brightest stars in our sky. It is brilliant with prophecy. It is the flashing jewel of hope in the night. We have been pleading for justice— let us give justice to others. That is the only way in God's government to secure it for ourselves. Our cause is lost if we are hypocritical and demand that which we are not ourselves ready to give. At all hazards let us have the truth.

"It has been said here to-night that all the rich are our enemies. I do not believe that. I have been thinking and studying in these last days. While there is selfishness and coldness in a large part of that society, let us not forget what some have done and others are doing. Call the other kind the rule, but do not become wilfully blind to the exceptions.

"Then it has also been said several times that the church is absolutely indifferent, and the workingmen are outside of the church because the churches are out of touch with them and do not care. It has just been said that one minister in the city ventured to show a shadow of interest in us last Sunday, and advertised our cause in his pulpit, but proved a traitor to us even then, and surrendered himself and the cause up completely to the good graces of the rich."

It was still as death, and every man was looking directly at the speaker, and most of them were not touching the backs of their chairs.

The [illegible], said then said: "I was there, and heard every word of it. He did not say just what I would have said, or what I wish he had said, but I am convinced that he was honest and true to his convictions, and more, I am sure, he is our friend. He stood up boldly, and said, without any reserve or hesitation, that Christ would join a labor union, and he pleaded for justice and liberty and salvation; justice for the toiler, liberty for society, and salvation for the man. He said that was the creed of the union to which Christ would belong. He was not unfair to either side, but a kingly man in his place. I know we misunderstand some of the churches and some of the ministers. They are not all alike in this respect any more than others, but they are coming toward us.

"Gentlemen, as we love our cause, let us go toward them. Go half way. Be fair. The church and the preacher of [illegible] our best friends. Anyway, here stands one man who will never condemn again until I know. I will be true if I die in this or any other cause, God help me."

There was not a sound of applause. Sometimes the impression is too great to admit an audible approval. It almost touches the sacred. Often the utterance of the soul closes in an environment of solemnity.

Who would dare say that Henry Fielding was not inspired.

What is present day inspiration?

Why not his great honest soul as well as that of a Phillips, or a Henry, or a Webster, or a Clay?

No one attempted to speak for a considerable [illegible]. Then the chairman of the meeting looked from one side of the room to the other, and said:

"I for one would be in favor of having that kind of minister come and speak to us right here. I don't see anything out of the way about that. Why not? I don't know to whom reference has been made, but I do not care who he is. I would like to hear him on that subject."

Henry rose again, and said:

"Do not misunderstand me. I am just as much of a fighter as any man of you, and am with you to the last chapter of our struggle. I am anxious that we take the right method always. A single mistake may lead us a long distance out of the way. If the Church and the ministers are the greatest moral and spiritual factors in society, why not get in right relation with them— at least one of mutual understanding? Misrepresentation may be our ruin. Perhaps we have said so many times they do not want us that we have come to believe it, and are believing a falsehood.

"I would like to make a motion that Rev. David Dowling, to whom we have referred, be invited to come to the next meeting, and address us."

Some one seconded the motion, and it was put to vote and carried by about two-thirds voting for it.

The meeting quickly came to an end, and most of them did not know what to think.

Henry Fielding had thrown a shell into the very centre of things, and it had burst with tremendous effect.

CHAPTER V.

In David Dowling's Study.

Mr. Dowling reached home about ten o'clock that evening. He threw off his overcoat and hat and walked directly through the hallway into his study, which was at the rear of the house.

He sat down in his accustomed place, but not to make sermons.

His eyes dropped to the floor, and his arm rested nervously on the arm of his chair. In a moment or two, he walked across the room and threw himself upon the lounge. That was not rest. Position is not rest. It asks for something more than a lounge. The downy couch of the king's palace is not named "rest."

There was a great burden upon him, an irresistible pressure. In that condition, a man might as well stand up as lie down—perhaps better.

His wife called to him from the head of the stairs, and when he answered, she said:

"I just wanted to know if you were in. I thought I heard you. Where are you?"

"In the study," he answered, "come down here."

When she entered he did not even turn his head toward here, and as she had before, ten thousand times, she asked:

"What is it troubling you? Oh, don't worry, I am sure you can't bear the whole burden of the world. Just throw it off now, whatever it is, and go right to your room and to sleep. But tell me, what were you thinking about?"

"Etta," said he, "you know me better than anybody else, and you know that I have conscientiously tried to do my work in the best way in order to reach men for Christ, and yet I am not satisfied; far from it, and farther than ever to-night. If somebody will only show me a better way, I will do it. I will give up anything. I will sacrifice every plan. I will do twice as much work, if possible, if only a better result can be attained."

"Well, David," said Mrs. Dowling, "if you do twice as much, you will have to have longer days and a shorter life. You work now fifteen hours a day, and seven days in the week, and that is a grave digger's shovel, and you begin to look like a ghost."

"But, maybe," said he, "I am not doing it in the right way. Perhaps the Church is off the track. Any way the results are not much, and they seem to get less each year."

"What brings this upon you with such force to-night?" asked she.

"It is not a sudden thing with me; only some new developments in it. I want to reach this great mass of workingmen, and men outside of the Church. The lodges and the clubs are crowded and increasing in number every hour. The labor unions have large and enthusiastic meetings, but the men are not in the churches, and many of them are more than indifferent. They are against us."

He then told her about his call on Elsie Fielding, and her sorrow about her brother, and his feelings concerning the Church, and also of another woman whom he had been that evening, whose husband was never at church, and who even took the children to the park on Sunday and away from Sunday school.

"Oh, David, you are looking on the dark side; you are tired, and it will not be foggy when the sun comes up. Go ahead and do the best you can, and let God take care of the result."

"That's not it," continued he. "This is a growing conviction. It is one of the most vital questions of the day for the Church and society both. What is wrong? If I only knew. There is one man in the world who would do what Christ ordered him to do, even

Curious Bits of News.

At a recent London wedding in high life, instead of pelting the bride and groom with showers of rice, miniature shoes and little horseshoes, made of silver paper, were thrown after them.

A strange freak was found in Vineyard Haven harbor this summer by a young woman who was in bathing. She saw a bottle on the bottom and dived for it. When it was brought to the surface it was found to contain a live lobster far too large to have crawled through the neck of the bottle. It is supposed that it got into the trap when it was a little fellow and was unable to find its way out, but how it got food enough to grow on is a mystery.

To be married three times to the same person is probably a unique experience. It was the fate of a lady who died the other day at Hamilton, Ont. Her first marriage, in Scotland, was a runaway affair. She was re-married to her husband when they fulfilled [illegible]. In time they both found their way back, and the third marriage was celebrated to please the lady's [illegible], who had become reconciled to the husband. It should be added that the husband pre-deceased the lady.

The most singular forest growth in the world is encountered in the Falkland Islands, a dreary region constantly swept by a strong polar wind. What appear to be [illegible] weather-worn and moss-covered boulders are scattered about, and when one of these curious objects is struck in an attempt to overturn it [illegible] are found to hold it down, these "boulders" being, in fact, native trees which the wind has forced to assume this shape. The wood appears to be a twisted mass of fibres almost impossible to cut up into fuel.

One of the greatest artistic marvels of the world is to be seen in the museum at Harvard University. This curiosity consists of hundreds of specimens of flowers and plants formed of glass, but with such complete fidelity to Nature that they appear to be real, every tint and marking, every tiniest detail, being faithfully reproduced. They are made by a secret process, the artists being a father and son in Germany, who, it is said, may let the secret die with them. As an instance of the wonderful workmanship it may be mentioned that the very hairs which appear on the stems on certain plants are reproduced on the glass imitations.

Turkey has a race suicide question, despite the provisions which the Prophet Mohammed made against that contingency. Fifty years ago the rule among Turks was to marry young and to espouse several wives, and as a rule families were correspondingly large. Now all this is changed. Marriages are late, and in the enormous majority of cases are monogamous, while families are becoming small to a degree which has alarmed the Government. The Sultan has recently [illegible] an irade on the subject, abolishing much of the expensive display connected with Turkish marriage, and condemning present tendencies as threatening to depopulate the empire.

Plant Used as a Rouge.

The Southern girl always had a pretty flush on her cheeks. She doesn't rouge, the other girls knew that, for the flush is far too natural to come from such an outside source. Yet the fact remains that she who last year was pale is this year rosy. One day her hostess went into the room where the Southern girl was making her toilet and found her rubbing a green leaf on her cheeks.

Of course, then explanations were in order. The green leaf, it seems, was just common burdock. The burdock has a fuzzy surface, which, rubbed on the skin, brings the blood to the surface most effectively. After it is applied, the more the cheeks are bathed the redder they become. Here's a rouge worth while. Of course the "feel" of the burdock is not the most agreeable thing in the world, but its effects make up for its disagreeable qualities. The Southern girl was having fresh leaves sent to her every day in the letters from home, and that is the way she managed to keep up her healthful glow.

When her nefarious practice was thus finally discovered, she explained that the recipe for making and retaining rosy cheeks was an old one in her family, had been handed down to her by her grandmother, who, in her turn in her young days, had used it, but that she was not unwilling to share the secret with her chums.—Waverley Magazine.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.66 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $62.65 and $78.66 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet more the tunnel will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group, is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Howitzers are steel breechloading weapons weighing 2,500 pounds and having a length of six feet ten inches.

The shipyards of Great Britain, all working together, could turn out a big steamship every day of the year.

Whatever the harm of sensational literature, it teaches the people to read.

Despite the defects of the American press, it holds up a mirror of the whole world's affairs. The mirror may not be the right kind, but its tendency is to lead the people to self-consciousness.

If you do not like vice and crime, change the light. If you look into a mirror and see a dirty face, do you wash the face or the mirror?

I do not want a press which shows up the virtues of humanity and not the faults; but let us have more truth, the whole truth and nothing but the truth.

GEMS OF THOUGHT

Deeds are greater than words. Deeds have such a life, mute but undeniable, and grow as living trees and fruit trees do; they people the vacuity of time, and make it green and worthy. Why should the oak prove logically that it ought to grow, and will grow? Plant it, try it; what gifts of diligent judicious assimilation and secretion it has, of progress and resistance, of force to grow, will then declare themselves.—Carlyle.

The longer we live and the more we think the higher value we learn to put on the friendship and tenderness of parents and of friends.—Dr. Johnson.

You may find two witty men, ten clever men, and twenty foolish men before you will find one prudent—or thrifty man.—Old Humphrey.

About any art, think last of what pays, first of what pleases. It is in that spirit only that art can be made. —R. L. Stevenson.

One more good man on earth is better than an extra angel in heaven.

Man thinks he knows, but woman knows better.

It is not the wine that makes a man drunk, it is the man.

Only imbeciles want credit for the achievements of their ancestors.

Eloquence is a painting of the thoughts.—Pascal.

All things come to him who makes other people wait.

The average woman has a lot more intimates than she has friends.

Women consider any brilliant man good-looking, and men consider any good-looking woman brilliant.

Notes Sent to Teacher.

These notes are declared by the Chicago "Inter-Ocean" to be authentic:

Teacher—What shall I do mit Charley? Me and my man can't nothing make of him. When we want to lick der little imp he gets the bed under where we can't reach for him and must put a hook on her bedroom door to hold him for his licking. Please soak him in school about as often as you got time.

Teacher—If Louis is bad please lick him until his eyes are blue. He is very stubborn. He has a good deal of the mule in him. He takes after his father.

Teacher—I dink you are a fool. You want my boy to read when he don't no alfarbits. Please teach him some.

Miss Brown—You must stop teach my Lizzie fissal torture she needs yet reading and figors mit sums more as that, if I want her to do jumpin I can make her jump.

Miss—My boy tells me when I trink beer der overcoat from my stummach gets too thick. Please be so kind and intervene in my family affairs.

Dear teacher—Please excuse Fritz for staying home he had der measles to oblige his father.

Teacher—Please excuse Rachel for being away those two days her grandmother died to obliged her mother.

Teacher—You must excuse my girl for not coming to school she was sick and lade in a common dose state for three days.

The Climax of Savagery.

Never have the natives of a State been treated with more hideous cruelty than those of the Congo Free State. It is under the personal rule of King Leopold, whose idea is that it should furnish him with money for his private purse, and money he is determined to make out of it, no matter how. Amongst other devices, vast areas are farmed out to companies, in which, unless greatly maligned, he is a large shareholder. These companies collect india-rubber. The custom is to force the natives to deliver a certain fixed amount. If a village does not do this, the hands of the men are cut off, the village is burnt, and the women and children given over to the tender mercies of some neighboring tribe of savages. This procedure is defended by the worthy monarch, in his reply to the English note protesting against such a regime, by the following economic doctrine:

"Natives cannot be exempted from all taxation when they benefit by the material and moral advantages introduced into their country. If they have no money, they must pay in manual labor." —London "Truth."

$400,000 was Produced from the properties
now owned by the

NEW YORK-GRASS VALLEY GOLD MINING CO.

above the 400 foot level, under the old management. During the last year the mine has been thoroughly opened up. New and richer ore bodies discovered. Large reserve now in sight.

Large and thoroughly complete Merralls mill now working. Besides this, six quadruple discharge stamps are now being installed. Each stamp will increase the present output at least 20 tons daily. The mine is now producing steadily and increasing output daily. As soon as the new stamps, now being installed, are running, the output will reach at least 135 tons daily. At a moderate estimate the monthly income should exceed

FORTY THOUSAND DOLLARS

During the coming year it is the intention of the management to install more stamps so that the output can be brought up to FIVE HUNDRED TONS DAILY.

Quick dividends are positively assured, and will most surely be large and continuous. The present Board of Directors is composed of competent business and mining men, who are giving their personal attention to the affairs of the Company.

The price of Stock will be advanced to 75 cents per share almost immediately.

This is your last chance to purchase into this producing mine at **30 CENTS PER SHARE** for cash or instalments. We have only a limited amount left at this figure, therefore **send your orders in early.**

REMEMBER IN BUYING THIS STOCK YOU ARE BUYING

INTO

A present producing property.

A mine that will pay large and handsome dividends, as the reserves of ore on hand warrant.

A property that has 600 acres, only a small area of which has been mined.

A proposition that can mine its ore cheaper than almost any other mine in the world, owing to free water power. Cost of mining and milling not being over $1.00 per ton.

We have just received the following telegram, under date of November 28th:

KAYE, DE WOLF & CO., New York City. Grass Valley, Cal., Nov. 28th.

Mill now running on medium grade ore from reserves. Latest mill returns forty ounces amalgam from batteries alone since sixteenth. The Perrin ore chute on fifth level has been reached. Expect the ore on this level will pay much better than any yet opened up. The bottom of the shaft is also in good ore. Recent developments fully justify the expectations that have been formed. All who visit property report a large dividend payer soon.

J. W. HEIBNER, Secretary.

IS THERE CERTAINTY

IN MINING

The Idaho Richmond Gold Mines Company says Yes

AND HERE IS THE PROOF

1st—By having a property located in a camp that has produced over sixty million dollars worth of gold.

2nd—By having a property that has produced over one hundred and fifty thousand dollars to the former owners.

3rd—By having over two thousand feet of development work done on the property in the way of tunnels and drifts.

4th—By having four different ledges on the property, varying in width from three feet to thirty feet, besides several smaller ones all rich in free gold.

5th—By having now on the dumps ore estimated to be worth over twenty thousand dollars, and all taken from development work.

6th—By having large amount of stoping ground opened up for the taking out of large quantities of ore.

7th—By being able to lease a mill that is located within two thousand feet of the property for the treatment of the ore, which will be done as soon as a small amount of the stock is sold to help defray the expenses of getting ready.

There is no promoter or gift stock, and there is yet over six hundred thousand shares in the Treasury.

We can prove to your satisfaction that we have a mine, and it will pay you to write for information, if you are looking for an investment that will pay you good returns.

Equitable Gold Mining Co.

H. C. LANE, President. S. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 585 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $165,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 300-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 6 claims, 600 x 1500 each. A 70 foot shaft on the Martha claim shows a vein of $30.32 ore 5 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.32 to $19,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay then $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address,

W. D. WALRATH,
NOTTINGHAM BUILDING, - SYRACUSE, N.Y.

THE BANNIE MINE

ONE OF THE BEST AND SAFEST INVESTMENTS EVER OFFERED THE CANADIAN PUBLIC.

The Bannie Gold Mining & Milling Company

Offers 20,000 shares of its treasury stock at

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-[illegible]-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,

KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th ecountry. The officers are all men of standing and good conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Prest.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock.

The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

EUCHRED

An Auld Body's Story.

"By JETNA."

WELL, I'm an auld body now, and the story I'm going to tell you happened long years ago, but it's a' fresh and clear still in my memory.

I was born and brought up in a quiet Scotch country village. I was never bothered much with book larnin' by my folks, but I was a great one for gardening, and the flowers I reared in our bit place—the country was prood o' them. I've heard tell the Scotch are considered unco' guid gardeners. My father was, an' he taught me. When he died our home had to be given up, and I went as nurse to Lord Grosvenor's two little daughters, up at the big house, remaining on as ladies' maid to them when they grew up.

They thocht a lot o' me; 'deed they did that, for I was a grand hand at the hair-dressing. Then, I was young and good-looking, though ye wouldna think so now. Seems to me an awfu' peety that youth and beauty go as time rolls on. But rich folks keep their looks in a wonderful manner nowadays, I'm thinkin'. Ay! Money can work wonders.

My young ladies were the bonniest in the whole countryside, especially Lady Marjorie. Her face was a garden; there were roses and lilies in it, and forget-me-nots lay in her eyes. Lady Sybil was dark—kind o' haughty like—a gallant girl. All the paint an' powder they used was good soap an' cold water. As for "switches" and "transformations," and these kind o' heathenish get-ups I whiles hear tell of those days, they didna even know the name o' them. Their hair was that thick and long I had hard work to dress it and keep it in good order.

We didna lead a very gay life. Lord Grosvenor was a bit cranky, and couldna be fashed wi' company.

The big house was a fine place: old-fashioned, with turrets and towers and lattice windows, an' it was fair smothered with rich old ivy. The swallows would dart in and out o' the overhanging eaves, an' on a bright summer's morning, well, seems to me that merely to live in such a place was a kind o' edication of itself—it was all so interesting!—a story book, I aye thocht. And the garden!—with its high boxwood hedges; and every kind o' color was blazin' there, not prim-like, as the gentry generally favor, but just all here and there, and everywhere them sweet, well-known flowers, an' that's the kind for me; though orchids and fashionable blooms get more talked about, an' are used at weddings and that now, I believe.

Often the young ladies would pop down to the housekeeper's room of an evening to have "a crack" wi' me. I'd sew my patch quilt or knit "cosies," as we called them—cross-over things to wear in winter against the cold. I'd tell them stories my father had told us, of their ancestors, an' whiles I'd sing to them or read their fortunes in a tea-cup. There was always a lover in Lady Marjorie's; with him she was to ride away. But she'd pout and sigh at that—they lived owar quiet, she said, for the fairy prince to find her.

But the fairy godmother appeared, anyway, shortly after that, and carried them off in a fine yellow chariot with a "rumble" behind for the footman to sit in. They went to London—principally to call on the Queen, and be introduced to her Majesty an' kiss her hand. And then their aunt got the fine English folk to invite them to balls and gay doings. I'se warrant ye, my young leddies took the shine out o' the others, wi' their natural beauty and winning ways.

When the "season," as they called it, was over they returned, and my! the grand clothes were a sight; and their mother's jewels had been divided between them—pearls and all kinds of precious stones, fit for the Queen o' Sheba.

Lord Grosvenor entertained a good bit after, an', *of course*, did it well. We had fine times.

I never lippened to the gossip I heard about handsome gentlemen comin' courtin' my mistresses. "Time'll tell," says I to myself, an' ye won't find me gabbling round.

But I had seen *one* comin' gey often—a tall, dark, black-eyed Sir Something or other, and 'twas Lady Marjorie he was keepin' company with, for he'd send her such beautiful flowers—orchids and the like. Now and then she'd wear them in her bonny brown hair in the evenings, but I liked it best snooded with a blue ribbon, just in its ordinar'. I told her so, an' she laughed, an' says she, "So do I." But weel I kent that laugh wasna frae the heart.

Some time after Lord Grosvenor told me his youngest daughter was to be married ere long to a very wealthy English baronet. I thocht it sort o' queer she had never said a word tae me aboot it.

Then a few days later Lord Grosvenor had an attack of sky-sky—a kind of rheumatism, anyway (an' I hope ye'll kindly excuse my poor way o' expressing mysel', for it's awfu' hard to keep the Scotch words frae slipping oot, now an' again). Well, he went up to London to consult a famous doctor. That evening Lady Madge, as we often called her, came down to see me.

She looked a bit worried like, an' her pretty color seemed leaving her. I saw something troubled her; she kept pushing a magnificent diamond ring up and down on her finger.

"Sing me something, Nursie," (for they'd nicknamed me that), says she. "Some of your old Scotch sangs." So I gave her all my cheery ones, "The Laird o' Cockpen," an' "A Hundred Pipers," an' "Within a Mile o' Edinboro Town." And then she says, says she, "Sing 'Jock o' Hazeldene,'" an' when I cam' to the words, "A chain o' gold ye shall not lack, nor braid to bind your hair," what did she do but fling the glittering ring away off her finger, where it fell ahint—I mean behind—the tall old clock, with a "clink."

"Let it lie!" she cried. "I hate it!" and wi' that she threw her arms aboot me an' sobbed out, "Oh! Ebbie! Ebbie!" (that's short for Elizabeth, for that was my name) "I'm so unhappy! Was ever girl more miserable?"

I soothed her as if she'd been my ain bairn. An' then, bit by bit, out it all came. "I've been weak, and vain, and he flattered me," she said. "I gave him my troth—he is enormously rich, and father urged me to accept him, though something in my heart whispered 'No.' Auntie says father has lost money lately, and that Sir Francis Anstruther has been generous and kind, and that I am so lucky to have secured such an eligible parti"—those were the very words."

"He may be eligible," says I, "but there's baith thunder an' lightning in yon black een, an' he's no the man for you, if that's what eligible means;" an' I spoke up quite bold-like.

"I don't love him," she kept repeating, "though I've tried to, for father's sake."

"Of course ye don't, dearie," I said then, "for ye canna love two men at the same time." And wi' that she gave me a frightened look, an' her cheeks turned pale as the gown she wore; for full well I knew that the young squire whose place lay a mile aboon the crossroads, was "cracked" about our bonny young leddy.

"You're a wonderfu' woman," she says, "for you never gossip, yet you find everything out." An' my! I felt prood. An' I told her that the squire was the brawest an' canniest young man that ever rode to hounds, and that brought a smile to her face, just like the sun on a woodland flower.

"He sold out of his regiment for my sake," says she, "but he was afraid to ask me to 'buckle to' (that means marry in high English) for he was not rich. He was too proud to speak, but the other evening at the 'gathering' somehow he couldn't help himself—and so—and so—"

I kent her people would think it a poor match for the like o' her, with her beauty and pedigree—besides having taken tea wi' the Queen, an' kissed her hand an' all that. I asked her plump and plain whatever made her lippen to the other, and she bridled her swanlike neck and made answer that I couldn't understand these things and mauna try to. I didna try to, for I'm one o' these folk who ne'er reach their hand out further than they can draw it back, an' these things beat me. She had met her true lover once or twice secretly, but when I begged her to confess all she trembled like an aspen leaf, an' said she was afraid, an' I mustn't betray her. Dear, dear! what was to be the end o' it all?

After that things were quiet. Lord Grosvenor was uncommonly good-tempered, and gey pleased at his daughter's approaching marriage, which was to be in spring.

The puir lamb would often come ben to my room. She was a slender scrap of a lassie, but ilka time I saw her she was thinner and paler. "An'," says I to mysel', "wae's me!"

• • • • • •

When the spring time set in I used to feel a queer sink-sinking o' the heart. I'd jump at my ain shadow, an' I couldna sleep. So I went ower to my auntie's, for a change the doctor said, an' my cousin took my place for a wee while.

I mind fine the day I went: the hedges were all sprouting fresh and green, an' the caller air was frae the west, an' I kept humming "O' a' the airts the wind can blaw," for my heart seemed lighter. My mither aye used to say, "Changes are lightsome." And they are.

There was a sturdy thorn tree, then thick wi' blossom, said to mark the border line betwixt England and Scotland, an' when I cam' to that (it was jist a mile and a bittock from the big house), the words, "She's *ower* the border an' awa'," got into my head, and I sang them over and over and over again. It's kind o' queer when—but ye'll see how it all turned out.

My auntie was an invalid, an' maist always upstairs in her room. Such a

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA

AND

BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000.00.
Par value $1.00. Full Paid and non-assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 1000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received

Investigate
to your heart's content,
and quickly, then let us
hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 196 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS.*

C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not A Gamble
but a
Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY, GIVEN

This proposition is better than that of mady companies selling stock at 50 cents a share, and will stand a thorough investigation.

WANTED—GOOD AGENTS IN EVERY CITY.

Are You Deaf?

Humdreds of perfect recoveries from impaired hearing and deaf ness are reported as a re.ult of the use of Catarrhozone

The result of actual experience proves that ninety cases in every hundred can be cured, and stay cured, of impaired hearing by the regular use of Catarrhozone.

Among the many prominent business men whose hearing has been restored by Catarrhozone, might be mentioned Mr. Geo. W. Warner, of 253 Wellesley street, Toronto, and Mr. William Jones contractor, of Halifax, N. S. Both these gentlemen have testified to the merits of Catarrhozone as a valuable cure for deafness, and their statements prove beyond all question that Catarrhozone cures impaired hearing and even total deafness.

The efficiency of Catarrhozone is placed beyond dispute by its long list of successful cures, and on the highest authority we can recommend it to our readers. It is a very simple remedy to use, and never causes confusion or gets out of order.

Catarrhozone inhaler is beautifully polished and made of hard rubber. It is suitable to carry in the vest pocket and can be used in the church, theatre street car, at any time, in any place. The complete outfit costs but $1.00 and lasts two months. Trial size 25c. Sold by druggists or sent to any address if price is forwarded to N. C. Polson & Co., Kingston. On.

LOST

On Tuesday evening in the northwest part of the town, a goat skin robe, with letters W. H. in black paint on red lining in the center. Finder willl be rewarded by leaving the robe at this office.

In Affectionate Memory

St. John's Mission Band will meet on Friday afternoon, after the Christmas holidays. In connection with this it was announced yesterday that there had been donated $5 per annum to the Mission Band, in loving memory of the late Mrs. Greenwood, who was a most active and successful president.

Death of Wm. Preston

It is our sad duty to record the death of William Preston, corner Park and King streets, who passed away on Saturday at the advanced age of 76 years A wife and several children are left to mourn the loss of a kind father. The funeral took place yesterday afternoon from the family residence and proceeded to Lakefield, where interment took place.

Election of Officers

At the meeting on Saturday evening last of Typographical Union, No. 248, the following officers were elected:

President—Mr. W. A. Smith.
Vice-President—Mr. W. Dredge.
Treas.—Wm. A. Lewis.
Fin.-Sec.—Mr. J. G Perry
Rec.-Sec.—Mr. B. Canniff
Sergeant-at-Arms—Mr. G. Paxman.
Executive Committee—Messrs. A. Martin, J. T. Canniff and C. H. J Mitchell

The Fenelon Falls Case

The case against Mary Worsley and John Prentiss for Bigamy was disposed of before Col. Denison at Toronto. Some funny eivdence was given. Col. Denison stood by the Criminal code and remarked that the Legislature had very little to do with the Bible, upon which the couple based their defence. Prentiss was sent to gaol for ten days, and the woman was allowed out on suspended sentence. Thos. Worsley, in his evidence, testified to having been married to Mary Elizabeth Hill at Fenelon Falls some twenty years ago, and that they separated by mutual consent about three years ago.

THE LIBERAL CONVENTION

Three Candidates in the Field For Nomination

The Liberal convention which assembles to-morrow will probably be a success, so far as numbers are concerned, as considerable canvassing has been done by the friends of those seeking the nomination. This means that the friends and supporters of each of the candidates will be out in force, so that if numbers are indicative of success, the Liberals will doubtless look hopefully forward to "redeeming" Peterborough from the thraldom of Toryism.

Mr. McClellan, who contested the riding on the last occasion, will be nominated and will have a strong support. He will claim, and not without reason, that he put up a fight three years ago, against heavy odds, when no one else would do so, and, therefore, he should have the refusal of the nomination on this occasion. Mr R. F. McWilliams, who headed the polls at the municipal elections for Aldermen, will also be nominated, and will be strongly supported. Mr. McWilliams is popular, he is a good speaker and is a young man whose character is above reproach. Mr. R. R. Hall, the third candidate, will be found to have a large following. Mr. Hall's great strength lies in the fact that he is a shrewd politician, and will win the fight if it can be won. He is also a good speaker, and like Mr. McWilliams, has no unsavory political record to combat.

It is understood that Mayor Roger will not be a candidate, or will Mr. Geo. E. Elliott. The convention assembles at the Opera House at two o'clock.

A PROMISING ENTERTAINMENT

To be Given in Aid of the Children's Aid Society

The entertainment to be given this evening in the Opera House by the Alexandra Dramatic club, promises to be a most enjoyable event. Mr. Charles Daly, late of New York, is director and has put a great deal of work on the plays. They are well put on and nothing will be spared to add to the complete success of the entertainment. The plan of the opera house can be seen at Salisbury's Bookstore. Tickets, 25 and 50 cents. Carriages may be ordered for 10.30

STEAMER WENT DOWN

Mrs. and Miss Gallately Who Once Resided in Town Said to be Drowned

News was received yesterday of the swamping of the steamship Clallam of the Alaska Steamship Company, in the straits of Juan de Fuca, Saturday morning. Among the passengers were Mrs. A. J. Gallately, wife of the manager of the Bank of Montreal at Victoria, and their daughter, Miss Gallately, both of whom were drowned along with fifty of the passengers and crew. At one time Mr. Gallately was manager of the Bank of Montreal here, and many friends will sympathize with him in his bereavement.

TWO CATHEDRAL WEDDINGS

Very Interesting Events Yesterday Morning at St. Peter's

St. Peter's Cathedral was the scene of two very interesting weddings yesterday morning. Thomas Barreth, son of Defior Barreth, was united in marriage to Miss Letitia Bouiget, daughter of Enedi Bouiget, both of Peterborough. Miss Annie Barreth, sister of the groom was bridesmaid while Mr. Hasannah Gordon, supported the groom. Mr. and Mrs. Barreth will reside in town.

A very pretty wedding took place yesterday afternoon at St. Paul's Cathedral when Miss Milbert Breault was made the bride of Mr. Dave Briland. The ceremony was performed by Rev. Father McColl, and only the immediate friends and relatives were present. The bride was attended by Miss Adelaide Guerin, while Mr. Percy Breault, brother of the bride supported the groom.

Mr and Mrs. Belland will reside in town until April, when they will depart for their future home in St. Louis.

At the second wedding Mr. Michael Garvey, son of Mr. Thomas Garvey, was married to Miss Minnie O'Brien, of Emily. The bride was attended by Miss Florence Corkery, while Mr. William Scully supported the groom. Mr. and Mrs. Garvey will reside in Emily.

Rev Father John O'Brien officiated at both ceremonies.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporters on Their Rounds

—The bazaar recently conducted by the young ladies of the George street church netted $120.

—The Times is indebted to Mr. D. W. Little, of the Singer Manufacturing Company for a very pretty calendar.

—The Manufacturers' Association has places for 4,376 employees. The soup kitchen days of the N.P. are no more.

—The monthly meeting of the Men's Guild of St. Luke's church was held last night, when arrangements were made for the Easter concert.

—The meeting of St. Luke's Girls' Guild, which was called for tonight, will be held on Friday night instead, at Miss Calcutt's residence.

—The joint installation in connection with Mount Hebron and Hiawatha Encampments of the I.O.O.F. will be held this evening, and of the two subordinate lodges on Friday evening.

—A session of the Mock Parliament was held last night in the George street church, under the auspices of the Young Men's Guild, when the Chamberlain policy was discussed. There was a good attendance.

—The C. P. R. deserves praise for prosecuting and securing the punishment of drunken engineers who place the lives of the passengers in jeopardy. Its determination not to tolerate drunkenness in any of its departments will meet with the hearty approval of the public.

—A great many farmers and others who have had stray animals come into their premises, have been under the impression that they can claim costs from the time the same animals came into their premises whether they advertised them or not. This is wrong. They can claim expenses only from the time they are advertised.

STATIONERY

When in need of anything in the line of commercial stationery, visiting cards, etc., leave your order at the Times job department. Workmanship unexcelled.

EVERYBODY READS THE TIMES.

THE BIG GAME TO-MORROW NIGHT

A Fast Game of Hockey Will be Served Up to the Spectators.

One of the largest crowds that has ever assembled in the Brock street rink to witness a hockey match, is expected tomorrow night when the Peterborough seniors will do battle with the Belleville seven, last years' champions of district No. 2. It will the hockey fast and furious from the ringing of the bell, as both teams are confident of victory, and the players have been putting in hard practice preparing for the fray. The game will start sharp on time, so as the spectators will not experience any unpleasantness in waiting as formerly and when the boys get going, the enthusiasm will reach such a point that the excitement will keep every person at fever heat. It will be a warm game. Peterborough will put the same team on the ice that figured in the game at Picton, but one or two changes may be made in the position of the players

Belleville will bring with them about the same team that defeated the seniors last year with the exception of "Roddy" McMillan who figured on the Cornwall and Smith Falls teams in the senior league

It will be a great game, and no one should miss it.

The Peterborough juniors play Belleville tonight.

TOWN COUNCIL'S INAUGURAL

Aldermen Make Required Declaration -Reduction of Committees

The inaugural meeting of the Town Council was held yesterday morning at eleven o'clock. In the absence of Mayor Roger, Ald. Best presided, and there were present also Aldermen R. F. McWilliams, Jos. Batten, Robt. Clinkscale, Adams, W. Scott, R. Hicks, E. F. Mason, H. Rush, M. A. Morrison, J. Edgcumbe and W. J. Johnston.

The minutes of the last meeting were confirmed.

A communication was read from Geo. K. Martin, asking to be reappointed town auditor.—Received.

Another was received from Jas. B. Haggart, declaring that he was not liable for dog tax.—Court of Revision.

ACCOUNTS.

R. H. Leary	2 75
Ormonde & Walsh	5 56
Nicholls Hospital	181 60

The by-law authorizing the purchase of the Hilliard property, and the expenditure of $10,000 for the same was introduced for its third reading and passed.

Ald. McWilliams moved, and Ald. Batten seconded, that the town Treasurer be authorized to issue a cheque for $10,000 in payment of the Hilliard property. —Carried.

Ald. McWilliams, with reference to the appointment of committees, expressed the opinion that there were too many, and that, if there were only six or seven, the business would undoubtedly be done quicker, and better, than had, in his experience, been the case. The smaller the committee, also the more effective the work would be. He moved that the Mayor Ald. Best, Morrison, and the mover be a committee to strike the standing committees, with authority to reduce the number and to recommend in other necessary appointments, such as representatives to the Board of Education and Board of Health and auditors.

Ald. Johnston seconded the motion.

Ald. Clinkscale moved in amendment that the striking committee consist of one man from each division. His Worship the Mayor, ex-officio, and Ald. Best Morrison Edgcumbe, and the mover and seconder.

Ald Adams, who seconded the amendment, held that there was practically no difference in the object of the committee. The question of reduction in the number of committees could be taken up.

The amendment carried.

Ald. Rush moved and Ald Batten seconded, That the clerk be instructed to write to Mr. Hilliard, informing him that the town had agreed to purchase the property according to option. —Carried.

The Council adjourned.

Splitting Headaches

CAN BE STOPPED AND THE CONDITIONS WHICH CAUSE THEM CURED BY FERROZONE

Poisons accumulate in the blood and spread with it every movement to all parts of the body. The brain becomes congested, the nerves irritated, and the result is that awful headache so well known to the female sex.

Most of these poisons are absorbed into the blood from the waste matter that has accumulated in the intestines resulting from indigestion. Matter which should be promptly passed from the system through natural channels.

Ferrozone cleanses the entire intestinal tract, and the liver and kidneys as well. It cures constipation and its many attendant evils. It makes the body strong and the blood pure, induces natural sleep and enables one to eat and drink anything at any time without risk of headache, nervousness or skin eruptions.

Ferrozone is nature's own remedy for headaches. It is a lasting potent tonic and the greatest health maker the world has ever seen. It masters all female derangements, and restores weak, sickly women to a healthy vigorous condition of mind and body.

No other remedy so effectually meets the requirements of a health giving tonic and regulator as Ferrozone. Every woman and growing girl can derive marvellous benefit from its regular use, and if you suffer from Chlorosis, Anaemia, Indigestion, Dyspepsia, Poor Appetite, Nervousness or female disorders of any kind, you can make no mistake in selecting Ferrozone for a cure.

Every reliable druggist recommends and sells Ferrozone for 50 cents a box. Be sure you get the genuine article, and refuse a substitute. Remember the name and insist on only Ferrozone. Sent to your address if price is forwarded to N. C. Polson & Co., Kingston, Ont.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

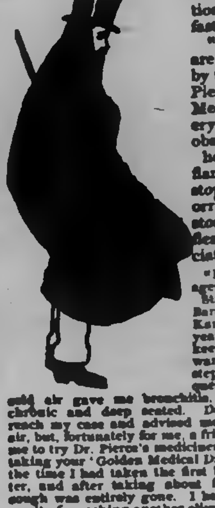
—Miss A. Beattie, nurse-in-training in Kingston General Hospital, is home for a short vacation.

—Miss Kate Hurley, organist of St. Peter's cathedral, left yesterday for Chicago, on her way to visit her brother Rev. Fr. Hurley, of La Porte, Texas, where she will spend some months.

—The many friends in town will learn with deep regret of the death of Miss Dorothy Pennington, neice of Mr. W. H. Dibben of the American Cereal Co., which occurred in Chicago over two weeks ago. Her illness was caused by diphtheria and was only of a few days duration.

CHILL WINDS

Are the dread of those whose lungs are "weak." Some fortunate people can follow the summer as it goes southward, and escape the cold blasts of winter and the chill airs of spring. But for the majority of people this is impossible.



Family cares and business obligations hold them fast.

"Weak" lungs are made *strong* by the use of Dr. Pierce's Golden Medical Discovery. It cures the obstinate cough, heals the inflamed tissues, stops the hemorrhage, and restores the lost flesh to the emaciated body.

"I am a railroad agent," writes J. B. Staples, Esq., of Barclay, Osage Co., Kans., "and four years ago my work keeping me in a warm room and stepping out frequently into the cold air gave me bronchitis, which became chronic and deep seated. Doctors failed to reach my case and advised me to try a higher air, but, fortunately for me, a friend also advised me to try Dr. Pierce's medicines. I commenced taking your 'Golden Medical Discovery,' and by the time I had taken the first bottle I was better, and after taking about four bottles my cough was entirely gone. I have found no necessity for seeking another climate."

Sometimes a dealer, tempted by the little more profit paid on the sale of less meritorious medicines, will offer the customer a substitute as being "just as good" as the "Discovery."

You get the People's Medical Adviser, the best medical work ever published, *free* by sending stamps, to pay expense of customs and mailing *only*. Send 31 one-cent stamps for book in paper covers, or 50 stamps for cloth-bound volume, to Dr. R. V. Pierce, Buffalo, N. Y.

RUSSIA THREATENS THE CHINESE CAPITAL IF ATTEMPS IS MADE TO FAVOR JAPAN

The War Believed to Have All But Begun

An Effort was Made to Destroy the Japanese Ships

London, January 12.—The Tien-Tsin correspondent of the Daily Mail says the Russian Government has sent to the Chinese Government a threat that Russia will immediately occupy Pekin if China joins forces with Japan. As a result the Grand Council has advised the throne to adopt a policy of neutrality.

Special dispatches from Tokio in this morning's newspapers are very warlike, but add little to the knowledge of the situation. Seoul dispatches report the arrival of additional Russian and Italian marines there.

The Daily Mail's Tokio correspondent asserts that the negotiations between Russia and Japan have passed beyond diplomacy, and that several Corean officials have appealed to the American legation at Seoul for protection, but that Minister Allen upbraided them for thinking of their personal safety at such a juncture.

JAPANESE FEAR FOR NEW BATTLESHIPS.

Anxiety is apparently felt in Tokio for the safety of the cruiser Nissin and Kasaga, which left Genoa Saturday. In connection with their departure the Genoa correspondent of the Daily Mail this morning gives a story to the effect that an iron bar was found inside the ammunition hold of the Nissin, placed in such a position that it short-circuited the electrical apparatus, with, it is suggested the object of destroying the vessel. No serious damage was done.

A severe gale in the Mediterranean is greatly incommoding the Russian warships. The cruisers Nicholas I. and Nicholas II. entered Ferrol for safety, and two Russian battleships and seven torpedo-boat destroyers have been detained at Suda Bay since Friday, unable to proceed to the far East on account of the weather.

GERMANY'S ACT MAY FORCE PEACE.

It is learned on the highest authority that it has been decided in the event of war between Russia and Japan that Germany will maintain a strict neutrality and that other members of the dreibund will observe a similar attitude. This decision in a measure will insure that hostilities will be confined to the two powers concerned and it will be certain to give a great stimulus to the efforts that France and Great Britain are making in St. Petersburg and Tokio, respectively in favor of peace.

At the Japanese legation tonight it was said that the far Eastern situation remained unchanged. No news had been received concerning the reported dispatch of Japanese troops to Corea.

Russian Warships Chase Japan's.

Rome, Jan. 10—The Italia says that Russian warships sighted between Genoa and Spezzia yesterday are believed to be spying on and following the newly purchased Japanese cruisers, Nissin and Kasaga, which had left Genoa, for Japan, by way of the Suez canal.

It became known today that unknown persons had attempted to set the Nissin on fire by tampering with the electrical appliances. The police have began an inquiry.

Czar's Land Force 200,000.

St. Petersburg, Jan. 13—The most reliable news received here is that the mass of Russian troops in the far east is concentrated at Vladivostock on the frontier of Corea. A traveler who lately returned from the far east estimates that between 100,000 and 200,000 soldiers were in the vicinity of Vladivostock. He surmised that the Russians would occupy northern Corea, but thought a collision was not imminent for a month or more, when taking into consideration the distance and the difficulties of marching.

British Flag Cannot Shield.

Commenting on the possibility of Japanese vessels employing the British flag, the Novoe Vremya contends that the custom of civilized states requires that warships sail under their own national flags. It adds: "One can run away, but not fight, under a foreign flag. According to international law, the British flag has not the power of protecting all the cowards who might hoist it."

Referring to the interest of the United States in the situation, the Novoe Vremya says: "Undoubtedly the United States above all powers, can confidently expect that its trade will not suffer by Russian possession of Manchuria, and it would be tactless on America's part to demand now what she could gain peacefully when everything quiets down."

Pits White Against Yellow Races.

The Novikrai urges the necessity of opposing a pan-European alliance to a pan-Asiatic alliance of the yellow race against the white race, which is at the point of ripening under a Japanese hegemony.

A telegram from Port Arthur says the United States and Japan are urging the immediate ratification of their respective treaties with China. In view of the probability that Russia will not consent to the opening of certain ports in Manchuria, the Chinese Foreign office is placed in a difficult position.

Chinese Are Panic-Stricken.

Pekin, Jan. 13—Predictions in the native press that a war is inevitable and immediate and that China will certainly be involved are causing great uneasiness. Many Chinese fear a repition of the scenes of pillage and murder which made the year 1900 memorable.

Numbers of the employes on the railroad between New Chwang and Shan-Hai-Kwan have deserted their posts, thinking that the country traversed by the railroad will surely be the scene of the fighting.

Reports from Manchuria are to the effect that there is great military activity there. The railroads are bringing troops from Russia and the women and children at Port Arthur and New Chwang are preparing to leave. The Russian General at New Chwang has been called to Port Arthur for service.

Reports Invasion of Corea.

Every steamer for Japan is carrying the Japanese from north China who belong to the reserves. The Japanese censorship of military news gives opportunity for all kinds of rumors, one of which is that Japanese troops have landed at Fusan, Corea. A cable communication with Corea is through Japan, it is impossible to obtain reliable news.

Tien-Tsin, Jan. 10—Russia has not yet carried out the expected military occupation of Niming-Ting.

The Chinese railways in Manchuria are congested with traffic, especially the lines to the Russian frontier.

POPE PIUS X. ON CAPITAL AND LABOR

His Holiness Publishes Rules For Christian Democracy

DUTIES OF CAPITALISTS

To Pay Just Wages and Not Bind Workers to Unsuitable Tasks

Washington, D.C., January 13.—Pope Pius X. has just made public a series of rules for the guidance of the Christian Democratic movement, by which it is proposed that the Catholic Church shall act uniformly in all parts of the world. The rules number in all nineteen, and embraces utterances in the encyclicals of Pope Leo XIII., together with instructions that were issued by the Pontiff from time to time. The rules govern the relations of labour and capital, of rich and poor, of employer and employe. The letter is addressed to all Catholic societies, unions, committees, and organized bodies, and closes with instructions to post them in a public place and read them often.

In a letter to Monsignor Falconio, His Holiness says; "In our first Encyclical to bishops of the world, in which we echoed all that our glorious predecessors had laid down concerning the Catholic action of the laity, we declared that this action was deserving of the highest praise that was indeed necessary in the present condition of the church and of society. And we cannot but warmly praise the zeal shown by so many illustrious personages who have for a long time dedicated themselves to this glorious task and the ardour of so many brilliant young people who have eagerly hastened to lend their aid in the same. The Nineteenth Catholic Congress, lately held at Bologna, and by us promoted and encouraged, has sufficiently proved to all the vigour of the Catholic forces, and what useful and salutary results may be obtained among the population of believers when their action is well-governed and disciplined and where unity of thought, sentiment and action, prevail among those who take part in it, and we realizing, like our predecessors before us, the great need that the Christian movement among the people be rightly governed and conducted, desire to have those most prudent rules exactly and completely fulfilled, and to depart from them in the smallest particulars.

"The following are obligations of justice binding on capitalists; to pay just wages to their workmen; not to injure their just savings by violence or fraud, or by overt or covert usuries; not to expose them to corrupting seduction and the danger of scandal; not to alienate them from the spirit of family life, and from the love of economy; not to impose on them labour or bind their strength to tasks unsuitable for their age and sex."

A GENERAL INSPECTION

Mr. Dryden will Further Assist the Cheese Industry

Hon. John Dryden, Minister of Agriculture, has announced that the work of inspecting cheese factories and the premises of the patrons throughout Ontario, which had been so successful during 1903, would be extended at once, and, if possible, made complete, so as to apply to the patrons of every factory. Mr. Dryden expressed great delight with the progress made in improving the dairy appliances all over the country as revealed by the reports of the sub-instructors. "The results are so gratifying," he said, "as to certainly warrant us in extending it further. My aim will be to reach the patrons of every factory as early as possible. The care of the milk and the improvements in the factories are two of the chief things to which we should turn our attention now. The enlargement of the field will require more inspectors, but there will be ample return in the improved quality of the cheese and general higher average."

BACK TO THE LAND

London, Jan. 11— Another practical turn is being given to the back-to-the-land movement. An influential repatriation committee is being formed, with the co-operation of the Lord Mayor, to replace on farm land, the unemployed who have drifted into the towns from country life. Relief operations are being confined at first to the unemployed of East and South London, but the Salvation Army experiments in Essex indicate the feasibility of a well-managed scheme, and when once started in conjunction with the Poor law authorities the scheme may go far towards solving a grave economic problem.

EVERYBODY READS THE TIMES.

CHAMBERLAIN AND DUKE OF DEVONSHIRE

Portentous Correspondent Published Between Unionist Leaders

THE TARIFF IS THE ISSUE

Mr. Chamberlain will Call Convention to Determine on Policy of the Association

London, January 13.—Correspondence is published today between Mr. Chamberlain and the Duke of Devonshire, which points to the reorganization or dissolution of the Unionist party. The correspondence is somewhat acrimonious, and is dated between October 23, 1903 and January 4, 1904.

The Duke in his first letter states that Mr. Chamberlain, in forcing his protection policy as the paramount issue in the next general election, places the Liberal-Unionist organization, of which he is president, in a position of great embarrassment. The organization disburses funds to local associations, and assists candidates in their campaigns. The Duke points out that the party is irreconcilably divided on the protection issue and does not see how the central Liberal-Unionist organization can usefully distribute funds among candidates who are antagonistic on the present question before the country.

Mr. Chamberlain, in a letter written December 22, 1903, advocates a conference of representatives of the Liberal-Unionist Association of London to vote on how to continue the central body, the minority to retire, and, if they wish, start a separate organization.

Under date of January 4, 1904, the Duke of Devonshire replied; "The Liberal-Unionist Association, which has done its work in averting home rule, and which has maintained the Unionist party in power for the greater part of seventeen years, should recognize that under present conditions its existance is no longer necessary, and should be dissolved with as little discrimination and bitterness as possible."

Mr. Chamberlain answered; "You are quite wrong in assuming that I have arrived at the conclusion that the continuance of the association is no longer possible." He then proceeded to declare that he proposes, on his own responsibility, to call a general meeting at an early date as possible to decide upon the course to be taken. If the meeting resolves to continue operations as an association, he does not feel that the resignation of some of its members would deprive it of its representative character.

Parliament meets on February 2 and the meeting will be held as soon as possible after that date.

AN ADDRESS AND PRESENTATION.

REV. W. L. AMITAGE IS HONORED AT ALL SAINTS'

Congregation Met and Said Farewell—An An Interesting Musical Program—Large Attendance.

On Monday evening the congregation of All Saints' church gathered in the school room to bid farewell to Rev. W. L. Armitage. There was a large attendance, the school room being crowded to the doors, to do honor to the departing Rector.

An enjoyable musical programme was presented, consisting of vocal numbers by Miss Rickey, Messrs. Allen, Edwards, and Legg and Mr. Rickey and selections by the orchestra. Mr. W. H. Dayman was chairman. At the conclusion of the programme the chairman asked Rev. Mr Armitage to come to the platform, and upon doing so the following address was read by Mr. G. S. Mullen, following which Miss J. Chamberlain made a presentation of a well-filled purse;—

Peterborough, Jan. 11, 1904.

Rev. W. L. Armitage, Peterborough.

Reverend and Dear Sir,—It is with sincere regret that we meet together this evening to bid farewell to you, who has labored amongst us for the past seven years as a pastor and friend.

Whilst with us in the parish of All Saints' you have practically begun and carried on a splendid work, which we regret you have not seen your way to continue. We desire, therefore, to congratulate you on this success, and whilst greatly deploring the loss which will be sustained by the parish at your departure from it, we earnestly hope that you may be taking a step that will be of advantage to you, and at the same time will assist you to go forward to still greater success in the glorious work which you have found to do. We now wish you God-speed and a large measure of success in your future sphere of labor, and as a mark of respect, appreciation and affection, we ask you to accept from us the accompanying purse, which may serve as a memento in the time to come of the days spent in the parish of All Saints', Peterborough.

We remain, on behalf of the congregation of All Saints',

Yours very sincerely
J. CHAMBERLAIN,
President of Women's Auxiliary.
H. E. CONNOLLY,
President of Brotherhood of St. Andrew.
W. H. DAYMAN
G. L. MAUGHAN,
Churchwardens.

Rev. Mr. Armitage replied in a fitting speech. He expressed his gratitude at the many kindnesses shown him during his ministry, but especially at the time of his farewell. He had experienced nothing but the most kindly feeling towards him at all times. He referred to the address presented him, stating that he did not claim the credit for the success of the work, which was due to the blessing of God and the co-operation of the people. In a minute way he pointed out the work which should be done by the people, and referred to the developments and possibilities before them. He also spoke of the various societies in connection with the church, and urged upon the members to be identified with some part of the church work, and hoped that everyone confirmed would realize their responsibility to the church. In reference to his successor, Mr. Armitage said he could not be too good a man for All Saints people. He hoped the congregation would appreciate the fact that he could not be expected to devote all his time to visiting if he were to prepare his Sunday work. He should also have time for the various parts of work and also for the affairs of the community generally. He thanked the Churchwardens and choir, and all the faithful workers, and prayed that every blessing and success would attend their efforts. He thanked all for their kind words regarding his work in Picton, and hoped he would be able to realize their hopes. He said the call from Picton had been most hearty and unanimous, and he felt there was good work before him.

Refreshments were then served and the congregation dispersed, after a final handshake with Rev. Mr. Armitage.

BOARD OF HEALTH

Annual Report of the Medical Health Officer for the Past Year

A meeting of the Board of Health was held at 11 o'clock this morning. There were present, Mr. Ayers, Dr. McNulty, Dr. Burnham, Mr. Schneider and Dr. Bingham, Medical Health Officer. In the absence of Mr. Neill, chairman, Mr. Eyers presided.

The minutes of the last meeting were read and confirmed.

A communication was received from Dr. Hodgetts, Toronto, acknowledging in the absence of Dr. Bryce, Secretary of the Provincial Board of Health, a letter respecting Peterborough well water,—Received.

Dr. Bingham reported that a number of fresh diphtheria and scarlet fever cases had been placarded. None of these were indigent cases.

Mr. Eyres said it would be well this year to consider fully what relation the Board held towards indigent patients going to the hospitals.

It was decided to leave these matters for a new board to deal with.

Dr. Bingham, Medical Health Officer, presented the following annual report;

To the Board of Health, Peterborough —

Gentlemen,—To give a detailed outline of the sanitary condition of the town, and of the work done by this Board and by your officers during the past year, would occupy too much space.

Throughout a portion of the year this Board met weekly to discuss the sanitary conditions of the town, and in the early spring the Chief and his men served papers on all householders instructing them to clean up, and afterwards a thorough inspection was made in order to see that the law laid down in the Health Act had been respected. The sanitary work must have had a salutary effect upon the health of the citizens.

Your sanitary inspector and health officer had constant employment in looking after infectious diseases, disinfecting houses and adjusting to the best of our ability all complaints brought to our notice. It is only fair to add that we found the citizens at all times ready to assist in all sanitary matters, to which their attention had been called. One hundred and seventy-four deaths were reported during the year. This makes 14 1-2 per thousand, if we reckon the population at 12,000, and in mortuary lists this is considered a low rate of mortality. Many different diseases are given as the causes of the deaths which occurred. They are as follows: Scarlet fever, heart disease, abcess, pneumonia, dyspepsia puerpural fever, Bright's disease, cancer, old age, paralysis, inflammation of the brain, consumption, blood poisoning hemorhage of the brain, abdominal tumor, bronchitis, goitre, accident typhoid fever, drowning, appoplexy, ulcer of the stomach, whooping cough, anaemia, diabetes, cerrosis of the lines of the liver, peritonitis, appendicities and dightheria. During the year we had 77 cases of scarlet fever and 12 deaths from that disease. Also during the year we had 68 cases of diphtheria, and 5 deaths registered against that disease. These are called preventable diseases and the strict isolation of all infectious diseases by this Board is doing much to prevent an epidemic outbreak of such diseases. It is encouraging to those who are engaged in sanitary work to know that the people generally are improving in sanitary knowledge and that they appreciate the fact that absolute cleanliness in all things is the surest road to good health. The water supply of the town is derived from two sources—river water and spring wells. Theoretical objections have been urged against both, but facts are more reliable than theories, and throughout the year we have not been unable to trace sickness in any part of the town either to the city water or to the wells, except in one case, a family in the south of the town was hardly ever free from sickness. We had the water tested, and it was found unfit for human use. The well was closed forthwith, and now the family enjoy good health. But neither the well nor the river can be absolutely from contamination, and we look forward to a time when the city of Peterborough will tap the neighboring hills and will bring the crystal stream of life to their homes, to impart health and vigor to the families.

Yours respectfully,
J. BINGHAM,
Medical Health Officer.

Jan. 9th 1904.

The report was adopted and the Board adjourned.

A RACE PROBLEM

Introduction of Chinese into South Africa Resented

London, Jan. 11 — Premier Seddon speaking at Wellington, N.Z., said the introduction of Chinese hordes into the Transvaal will be bitterly resented by the self-governing colonies.

Writing to a correspondent at St. Helen's, Premier Seddon says: "Whether or not they do anything in England, we will put an extra 10 per cent. on some lines, and 20 per cent. on others. We ought to give the British manufacturers a good show. He thinks the British manufacturer has much to learn in the matter of freights Germans or Americans ship goods to the extent of 20 or 50 per cent. less than the British. That the open door policy will help the British workingman is all nonsense. Trade does not follow the flag. People buy where they can get the best terms and the quickest service.

PROVINCIAL APPOINTMENTS

Registrar, Police Magistrate and Division Court Clerks

The following Provincial appointments have been made;—Charles E. Whitlan, St Mary's, to be Registrar for the South riding of Perth; Ernest Cruikshank, of Niagara Falls, to be Police Magistrate of that city, and the village of Fort Erie; Dr. S. N. Dalva Parry Sound, to be Associate Coroner for the district of Parry Sound, vice David Macfarlen, resigned; Thomas G. Clute, Sterling, to be Clerk of the Fifth Division Court of Hastings county, vice E. B. Parker, deceased. A. P. Monaghan, Sault Ste Marie, to be Clerk of the First Division Court of the district of Algoma, vice M. H. Biggings; T. F. Kavanagh, Bancroft, to be Clerk of the Twelfth Division Court of the county of Hastings, vice D. Kavanagh, resigned.

Charters have been issued to the following companies;— The Rainy River Curling Company, to operate a skating rink; Schierholtz Zknlam Co., Waterloo, to manufacture and deal in furniture and mattresses; the A. B. Saylor Canning Company, Bloomfield.

IN CASE OF WAR

Many Ladies Want to Go to Japan as Nurses

Ottawa, January 13.—Some applications have been received by the Militia Department from ladies who desire to go to Japan as nurses. One of the applications comes from New York. Evidently the idea has got abroad that nurses are being sent by the Government to Japan. The Department is replying in each case that the Government is not sending any nurses to Japan and has no intention of doing so.

KRUGER CONFESSES TO TWELVE MURDERS

Condemned Man Tells Story of His Numerous Crimes

WRECKED A RAILWAY TRAIN

His Confession Clears Up a Sensational Murder Mystery in Pennsylvania

Greensburg, Pa., January 13.—Charles E. Kruger, aged 21, who is to be hanged at Greensburg gaol next Thursday for the murder of a constable, who was attempting his arrest, has confessed to twelve murders and innumerable other crimes. One of the mysteries cleared up by his confession is the murder of City Treasurer John Blevins, of Newcastle, Pa., one of the most sensational crimes ever committed in this section of the country, and one that baffled the police five years.

Kruger's first murder was committed when he was fourteen.

Outside of homicides, his most desperate piece of deviltry was the destruction of a train of seventeen cars of the Pittsburg Western Railway, which he did to get even with the company for having thrown him off a freight train. He says he did not even read the accounts of the train wreck and does not know if he killed anybody or not on that occasion.

Nearly all the murders were committed to get even with somebody.

Kruger threw a detective under the wheels of a train because the detective interfered with his stealing rides.

He drowned a man in Ohio river because the man had not given him a proper share of the proceeds of robbery, and shot to death another man in order that there might be no witness to this murder.

Kruger has made two attempts to escape. He is heavily guarded.

PROTEST FROM PREMIERS

Wellington, New Zealand, Jan. 11.—Premier Seddon has invited the Premiers of Australia, Canada, Cape Colony, and Natal to unite in protesting to the Imperial Government against the introduction of Chinese labor in the Rand Mines, Transvaal Colony, South Africa.

SANTAL-MIDY
Standard remedy for Gleet, Gonorrhoea and Runnings IN 48 HOURS. Cures Kidney and Bladder Troubles.

BRITISH FORCE OF 3,000 DEFEAT 5,000 DERVISHES

Over One Thousand of the Enemy Killed in a Somaliland Fight

London, Jan. 11—A despatch to The Times from Aden, Arabia, says;

An engagement in Somaliland between a British force and the forces of the Mad Mullah has resulted in a severe defeat of the latter, who lost one thousand men killed. The British had two officers killed and nine officers severely wounded.

The War Office tonight gave out the following despatch, which had been received from Major-General Egerton, commanding the Somaliland expeditionary force, and which is dated from Jidballi, Somaliland, Jan. 11.

"Advanced this morning 1 miles to Jidballi. First brigade commanded by Manning second brigade under Faskin, and mounted troops under Kenna. Total strength of the regulars 2200, irregulars 1000. Jidballi held by 5000 Dervishes. Mounted troops enveloped enemy's right and infantry advanced within seven hundred yards of his position. Dervishes advanced, but were unable to face frontal fire, coupled with flank attack. Enemy broke and fled and was pursued 10 miles. Dervishes killed estimated at 1000, mostly in the pursuit. Many prisoners and rifles taken.

"I regret to report that two officers of regulars were killed, and nine officers wounded; five of the rank and file wounded; of native troops seven killed and 14 wounded. Of irregulars we killed and two wounded. Am inclined to think this is the Mullah's main force. The Mullah himself was not present, but was expected at Jidballi to-day."

RUSSIA MUST RECEDE, WAR APPEARS INEVITABLE

Even Premier Balfour Fears A War, Britain Would Localize the Effect

London Jan. 12—Premier Balfour, speaking at Manchester last night, referring to the Far Eastern situation said; "No one can contemplate hostilities between two great civilized countries without feelings of misgiving and depression."

RUSSIA MUST RECEDE.

London Jan. 12—The Times' Pekin correspondent, cabling under yesterday's date, says that the Chinese at Tokio, at the request of the Japanese Foreign Office, telegraphed the following communication to Prince Ching;

"The second Russian reply to the Japanese proposals has been received by the Chinese Minister at Tokio, but it is unfavorable, and cannot be accepted by Japan, who will, unless Russia recedes, be compelled promptly to resort to arms.

"In view of such an eventuality, Japan expects and urges China to maintain the strictest neutrality, to preserve order throughout the empire, to guard the foreigners resident in the territory, to take special care to preserve order in the Provinces of Shantung and Yunnan lest foreign powers might cease the pretext of disorder and make aggressive movements therein."

The correspondent says that the despatch has deeply impressed the Chinese who now believe war to be inevitable. He says that notes looking to the ratification of a treaty between China and Japan were exchanged yesterday afternoon.

PUBLIC LIBRARY BOARD

Annual Meeting and Election of Officers for 1904

The annual meeting of the Public Library subscribers was held Monday evening when the following directors were elected for the ensuing year.

T. A. S. Hay, W. H. Hill, T. Robertson, J. S. Knapman, Jas. English, Thos. Richardson, H. S. McDonald, all re-elected.

The new Board will meet on Monday night next and elect the officers for the year, and on the same evening, after the election the annual sale of periodicals will take place, to which the general public is admitted.

The report of the board of directors shows that 294 new books have been added during the year, and 14,313 issued.

The treasurer's statement shows a total revenue of $971.72 and payments of like amount.

The Game To-night

The Times received word from Belleville yesterday that in all probability a special train would be run to Peterborough and that about 300 people would accompany the team. The visitors are quite confident of victory and will back their team heavily. The line-up of the team will be about the same as last year with the exception of Reddy McMillan.

There will be a change in the line-up of the Peterborough team, Chris Graham taking a place on the forward line. The team will be as follows; Mercer, Howell, Cavanagh, H. Armstrong, Roy Armstrong, Whitcroft and Graham.

The Peterborough II. team won their first game in the Trent Valley League from Lakefield at the latter place on Monday night by a score of 16 to 1, the half-time score being 5—1.

The line-up was as follows;

Peterborough	Lakefield
Goal.	
J. Comstock	Quigley
Point.	
J. Macpherson	R. Meredith
Cover-point.	
McLean	H. Moore
Forwards.	
C. Graham	McGinnis
B. Ford	Simpson
G. Lee	Redpath
B. Cameron	Keneally
Goal umpire.	
W. A. Smith	C. Bickell
Time-keepers.	
V. Hamilton	Mr. Fitzgerald

Referee—Mr. McIntyre, of Keene.

After the game the two teams were entertained with a supper at the Craig House, at which short speeches were made by Mr. Fitzgerald, of Lakefield, Mr C. Graham, of Peterborough, and Mr McIntyre, of Keene.

The boys speak in the highest terms of the treatment received.

The Juniors were defeated at Belleville last night by 7 to 0.

CAMP SCHOOLS

London, Jan. 11 —President M. Jersey, of the Victoria League for the distribution of books among the Dutch in South Africa, says the camp schools will be carried on on lines happily worked by the Aberdeen Association of Canada.

EFFICIENT FIELD BATTERIES

Ottawa, January 13.—The general efficiency return of Canadian field batteries inspected during 1903 has just been issued by the Militia Department. The figures show that out of 840 marks obtainable, the Second Field Battery leads with the splendid total of 694, which represents the high average of 82.6 per cent. The batteries in order of merit are 2nd, Ottawa, 694.06; 14th, Midland, 629.21; 16th, Guelph, 624.84; 3rd, Montreal, 602.3; 4th, Hamilton, 582.90; 7th, St. Catharines, 565.22; 8th, Gananoque, 556.28; 11th, Guelph, 555.31; 13th, Winnipeg, 532.2; 15th, Shefford, Que., 502.7; 12th, Newcastle, 501.3; 17th, Sydney, 482.1; 10th, Woodstock, 482.7; 1st, Quebec, 444.9; 9th, Toronto, 440.46.

WILL STAMP OUT VICE

Winnipeg, January 12.—The keepers and inmates of houses of ill repute, some ninety persons in all, were brought before the police magistrate on Saturday and fined the keepers forty dollars and the inmates twenty dollars each. The fines were all paid, and the women, who are mostly Americans, say that they will leave the city. The authorities are determined to stamp out this form of vice in the city.

BOERS TAKE THE OATH

Bombay, January 12.—Nearly five hundred Boers have sailed for Durban, Natal. These are the last of the irreconcilables who were imprisoned at Ahmednagar. Lately they were induced by General Delarey to take the oath of allegiance.

DEWYRE'S CORNERS, DOURO.

—Plenty of cold weather and splendid sleighing.

—Mr. and Mrs. Patrick Dewyre spent last week the guest of the former's brother, Mr. John Dewyre.

—Miss Theresa Crowley has returned home, after spending her Christmas holidays visiting friends here.

—Mr and Mrs. John O'Leary, of Indian River, spent Christmas Day the guest of Mrs. William Quinlan.

—Mr. Andy Allen and his mother spent New Year's Day at Balsam Hill, the residence of Mr. and Mrs. John Dalton.

—Mr. William Dalton has returned from the lumber shanty. Will is hale and hearty, and speaks well of the woods.

—Mr Ed. Dalton, of Chicago, Illinois, has returned home, after a week's visit with his father and mother, Mr. and Mrs. Thos. Dalton.

—Mr. James Collins, with the assistance of his neighbors, has the brick drawn for his house. Jim is a hustler, and much credit is due himself and the neighbors who helped him.

—A very interesting event took place at the residence of Mr. Thomas Forsyth on New Year's night, when a sleigh load of young people went up from this place. The night was spent in dancing, playing cards, etc. The music was furnished by Mr. R. J. Barry and Mr. Frank O'Brien, of Hopeville, and all went home in the morning quite happy, with wishes for a very Happy New Year from Mr. Forsyth.

EVERYBODY READS THE TIMES.

PETERBOROUGH, JANUARY 13, 1904

MUNICIPAL PROGRESS

According to the records the municipal bodies were largely concerned, towards the close of the year, with questions which were referred to the people for approval or non-approval.

By the way these questions originated largely with the councils and not with outsiders. The presumption is that the men who are elected to serve the people should act on their own judgment and should be guided by their own common sense. Those who hesitated about adopting progressive measures, or who waited until some friend or political ally suggests action, will hardly be considered representative persons.

The desire of the people to run lighting systems was made manifest from the number of places in which plants have been either installed or are being considered, viz., Whitby, Iroquois, Ottawa, Palmerston, Bruce Mines, Guelph, Fort William, Berlin and St. Marys; and bylaws, authorizing procedure along this line, were passed on Monday at Ottawa, Owen Sound, Brockville, Perth and Brockville.

Waterworks were being constructed towards the close of 1903 at Whitby, Iroquois, Stratford, Strathroy, Kingsville, Elmira, Ottawa, and St. Marys, and on election day bylaws were passed in Wingham Oshawa, Lindsay and Waterloo.

At three places the question of purchasing gas plants was voted on by the people, and approvingly, as follows: Owen Sound, Belleville and Ingersoll.

At many places there were bylaws affecting local industries and contracts, and most of them were carried. Goderich considered aid to the cloak company; Stayner to a cement works; Chatham to a pork packing establishment and radial railway; Strathroy to a handle manufacturing shop; Peterborough to the radial railway and the street railway; Collingwood to an elevator; and Welland to an implement works. Two places directed the purchase of land for municipal and industrial expansion. Peterborough and Petrolea. Two places will issue debentures and with the proceeds lay permanent walks. These are Dundas and Stayner. One city and one town incurred, by general vote, the liability of erecting public libraries, namely Woodstock and Perth.

The world moves, and some municipalities are quite willing to move with it.

LESSONS IN OWNERSHIP

The Ottawa Free Press commissioned a representative to investigate municipal affairs in Port Arthur and Fort William. These places have been operating, municipally, street cars, electric light and telephone plants, and the report respecting them is a revelation.

"The history of these undertakings," says the Free Press, editorially, "is the old familiar story of breakdown of plants, unskillful management, insufficiency of capital, and disasters of various kinds, until huge mountains of indebtedness were piled up, from whose crushing effects there seems no possibility of escape. Yet the people are as fascinated by the municipalization ideals as they were in the beginning, deluded and buoyed up by the belief that some day the undertakings which have cost them so dear will bring relief from all kinds of local burdens."

There is a lesson in this for Peterborough. The average municipal committee is not the safest kind of management. It has not the time or taste for details. It changes too often. Devotion to policy and principle may not be in order. Experience teaches that the water and light departments should be directed by men of fixed plans. The committee should be as nearly permanent as possible, or the works being municipally operated should be managed by commissioners. The report from Port Arthur and Fort William is sufficient to make men think and study before going too deeply into municipal ownership.

NORTH AMERICAN FISH AND GAME PROTECTIVE ASS'N.

Fourth Annual Meeting to be Held in Portland, Maine, on January 20 & 21, 1904

[Miramichi Advance, Chatham, N. B., December 31st, 1903.]

The fourth Annual meeting of the North American Fish and Game Protective Association is to be held at the Falmouth Hotel, Portland, Me., on Wednesday and Thursday, 20th and 21st January next.

The Association is composed of citizens of Canada and the United States, whose efforts are directed towards the harmonizing of the fish and game laws of the different Provinces of Canada and contiguous States of the American Union; the preservation, propagation and protection of fish, game and bird life and the maintenance and improvement of laws relating thereto, and mutual assistance in enforcing game and fish laws on the borders of the various States and Provinces; the preservation of forests; the promotion of fish-culture, the introduction of new species and varieties of fish, game and useful birds, and the dissemination of information relating thereto.

At the annual meeting the members are hard workers. Three sessions are held each day and in addition to the discussion of many questions which are submitted by members for the purpose of eliciting information from the experienced men assembled, many of whom are experts of international reputation, papers are read, which are valuable contributions to the literature of the subjects treated. At the Ottawa meeting last January, which was presided over by Hon. F. R. Latchford, of Ontario, papers were read on matters pertaining to fish and game protection, on "The Stocking of Inland Waters with Black Bass," on "Big Game in Ontario," and one entitled, "Notes from the Standpoint of an observing Layman" by Professor Macoun, of the Geological Survey of Canada; one on "Trout Fishing on the Nipigon" and many others, and very full discussion of all the subjects introduced was had.

The meeting at Portland next month will, doubtless, be of equal interest. The area of the country represented in the organization is indicated by the list of its officers, who are as follows:

PRESIDENT;

L. T. Carleton, Augusta, Me.

SECRETARY-TREASURER;

E. T. D. Chambers, Quebec, Canada.

VICE-PRESIDENTS

H. O. Stanley, Dixfield, Me.
J. Fottler, Jr., Boston, Mass.
R. E. Plumb, Detroit, Mich.
A. T. Dunn, St. John, N. B.
N. Wentworth, Hudson Centre, N. H.
C. H. Wilson, Glens Falls, N. Y.
G. A. McCallum, Dunnville, Ont.
J. T. Finnie, Montreal, Que.
Gen. F. G. Butterfield, Derby Line, Vt.
C. S. Harrington, Halifax, N. S.
S. A. McGrath, Franklin, Pa.

EXECUTIVE COMMITTEE;

Chas. E. Oak, Augusta, Me.
E. S. Hodges, Boston, Mass.
Henry Russell, Detroit, Mich.
D. G. Smith, Chatham, N. B.
N. Wentworth, Hudson Centre, N. H.
J. H. Seymour, New York, N. Y.
R. T. Bamedo, Toronto, Ont.
C. E. E. Ussher, Montreal, Que.
F. L. Fish, Vergennes, Vt.
H. M. Wallace, Halifax, N. S.

Men interested in the objects of the Association should, if possible, assist the work by being members. The entrance fee is $2 and annual dues $3—that is, $5 for the first year and three dollars yearly thereafter. Anglers and sportsmen who can do so would find great advantage in joining the Association and attending its annual meeting this year, especially when it is being held at so convenient a point as Portland. Meetings have, since the organization, been held at Montreal, (2); Burlington, Vermont, and Ottawa. Portland is quite as convenient as any of these to the majority of the members belonging to the Upper Provinces of Canada, while it is more so to those of the Maritime Provinces. Citizens of the United States who are interested in the fish and game regions of Canada take a great interest also in the Association, and a greater number of the residents of the Maritime Provinces should show a similar disposition to assist in promoting the work of organization.

Applications for membership should be addressed to the Secretary-Treasurer, Mr. E. T. D. Chambers, Quebec; or if they are entrusted to any of the other officers they will be glad to see them properly forwarded.

DISTRICT NEWS

DEWYRE'S CORNERS, DOURO.

—Plenty of cold weather and splendid sleighing.

—Mr. and Mrs. Patrick Dewyre spent last week the guest of the former's brother, Mr. John Dewyre.

—Miss Theresa Crowley has returned home, after spending her Christmas holidays visiting friends here.

—Mr. and Mrs. John O'Leary, of Indian River, spent Christmas Day the guest of Mrs. William Quinlan.

—Mr. Andy Allen and his mother spent New Year's Day at Balsam Hill, the residence of Mr. and Mrs. John Dalton.

—Mr. William Dalton has returned from the lumber shanty. Will is hale and hearty, and speaks well of the woods.

—Mr. Ed. Dalton, of Chicago, Illinois, has returned home, after a week's visit with his father and mother, Mr. and Mrs. Thos. Dalton.

—Mr. James Collins, with the assistance of his neighbors, has the brick drawn for his house. Jim is a hustler, and much credit is due himself and the neighbors who helped him.

—A very interesting event took place at the residence of Mr. Thomas Forsyth on New Year's night, when a sleigh load of young people went up from this place. The night was spent in dancing, playing cards, etc. The music was furnished by Mr. R. J. Barry and Mr. Frank O'Brien, of Sloperville, and all went home in the morning quite happy, with wishes for a very Happy New Year from Mr. Forsyth.

RICH COAL FIND

A Seam in Scotland Believed to Run Whole Width of Firth of Forth

London, Jan. 11— A happy change of opinion on the part of what is known as the South Staffordshire mortgages committee is likely to lead in the immediate future to one of the largest mine drainage operations on record. In South Staffordshire, under which there lies some forty or fifty million tons of coal.

For a quarter of a century these flooded pits have been idle, and their vast stores of mineral wealth inaccessible. The coal area, which roughly lies under Tipton, Wednesday, and Bilston, is split up into various ownerships, and before the South Staffordshire mines drainage commission came into existence each owner was supposed to pump the water from his own pits. While some of them conscientiously did this, others were content to profit by the fruits of their labors. But a time came when the pumping owners struck, and in the end the whole of the pits were abandoned and since 1872 the flood waters alone have filled the galleries and shafts.

The drainage commissioners, however, have not only obtained powers to pump out the pits, but have secured from the public works loan commissioners a loan of [illegible] to do it with. Only the mortgage committee stood in the way, but it is now announced that they are prepared to consider the scheme of the commissioners, and there is reason to believe that they will approve it. The project is an extensive and difficult one, but mining experts declare that it offers no obstacles which modern engineering resources are unable to conquer.

The re-starting of the pits means, of course, a large access of prosperity to a district which stands in urgent need of it, and the prospect of restoring this long-abandoned industry is creating immense interest in the neighborhood. A valuable seam of coal of great thickness, estimated to yield 1,000 tons a day, has been discovered under the Thorntree golf course, near Cockenzie on the Firth of Forth. It is believed that the seam runs the whole width of the Firth of Forth, and joins the Fifeshire coal deposits.

RED ROSE TEA is composed entirely of the delicious teas of India and Ceelon

oup of Mines

AN INVESTORS

at is known as the STORM KING GROUP ...ve and safe investment. The property is the ...we believe it would be difficult to secure an invest- ...r returns. The following is a description of the mines ...Paul, whose reputation as an expert in mining mat- ...d near.

s are situated in the Cable ...ing District, about fifteen mil... ...th of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $42.68 and $79.08 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district,

(Signed) CAPTAIN A. M. PAUL.

HOW TO LIVE WELL

FOR THE LEAST MONEY AT LAST TO BE SOLVED.

Professor Atwater, as Special Agent of the Department of Agriculture in Conducting a Series of Food Investigations With That End in View.

Uncle Sam is looking into his housekeeping. He has a big and varied family, of many tastes and several colors, and he is at present engaged in spending $17,500 in finding out what this big family eats.

He is going about his investigation in a systematic way, looking into family larders, state by state and section by section, and jotting down in his notebook item by item what these people of these United States eat.

Not only what they eat, but what they waste; how much they pay for their food, how much nourishment they get from it, and how much energy; how much they overeat and how much they undereat; and all with the purpose of bettering the condition of the people.

Professor H. O. Atwater, as special agent of the department of agriculture is with this sum conducting a series of food investigations in this country.

He has already made studies of the dietaries of the people of nine states and one territory, and he has so far discovered, among other things that:

The people of the United States are the most abundantly fed and the most wasteful.

That they have the greatest variety of food.

That, as a rule, it is poorly cooked and worse served.

That palate and convenience are considered in the selection of food before wholesomeness, nourishment and economy.

That the dietary that most nearly approaches the scientific standard of a man's food requirements is the dietary of the most isolated, the most hated, the most barbarous foreigners in the United States—the Chinese.

That the smallest sum any man has been actually found living on in this country is three and one-half cents per day.

Professor Atwater's investigations have a range that swings from the dietaries of university students' clubs to the dietary of the cotton field negroes and the tortilla frying natives of New Mexico, from families who live on $100 a month to families who live on $100 a year.

Strangely enough he found families living on $100 a year better fed—from the scientific point of view—than families who have $100 a month.

A man, says science, requires so much of carbohydrates in order to live and work.

The protein, or nitrogenous portion of food, is the muscle-forming constituent and of it all the working machinery of the body is composed.

The fat and carbohydrates are necessary to supply the heat and energy, and a certain amount of fat is necessary for storage against the rainy day of illness or other overdraft.

The physical equilibrium depends upon the proper proportions of these food constituents taken into the system.

By investigation and comparison science has determined that the average normal man requires these constituents in his daily food in these proportions:

The man with little physical exercise requires 3.20 ounces of protein, the same amount of fat, and 10.56 ounces of carbohydrates, which together have a fuel value of 2,450 calories.

The calorie is the unit of heat or energy.

The man with active work requires 5.28 ounces of protein, the same of fat, 17.60 ounces of carbohydrates, and receives 4,060 calories in fuel value.

For improvidence and ignorance and uninvitingness of food the palm goes to the tenement districts of Chicago and New York.

The families in the congested districts of these cities live with a certain similarity. The same improvident feature is characteristic of both—that of buying food in small amounts, sending out just before a meal for only enough for a meal, and considering the taste and convenience only.

The Bohemians, who manage to live on an average of 11 cents per man per day, are conspicuous for their judicious marketing, buying food in which there is the least waste and which there is the least waste and most nourishment, and, until they get accustomed to the prodigality of the new country, squandering very little on such luxuries as green vegetables and fruits.

The Italians, Uncle Sam finds, are very conservative in their diet, sticking to the chestnuts cheese wine and macaroni of their own country, and even refusing to go to hospitals or other public institutions for fear of the strange foods. In spite of the prices they must pay for their imported foods, the Italians manage to live and find sufficient nourishment on a fraction of what the American mechanic or laborer can.

The happy-go-lucky darky of the Alabama cotton fields has perhaps the least variety and the meagrest supply of food of any human being in the United States.

The darky who lives in a little log cabin on a one-mule or two-mule or three-mule farm, who has nothing to cover him but a hickory shirt and a pair of blue jeans trousers, whose offspring gambol in the light and inexpensive attire afforded by a gunnysack, can live contentedly on a dietary that includes not more than three or four articles of food and that costs per man per day but three cents.

It does not matter whether you preach in Westminster Abbey or teach a ragged class you are faithful. The faithfulness is all.—George McDonald.

Write on your doors the saying wise and bold,
"Be bold! be bold!" and everywhere "Be bold!
Be not too bold." Yet better the excess
Than the defect; better the more than less;
Better like Hector on the field to die,
Than like perfumed Paris turn and fly.
—Longfellow.

Equitable Gold Mining Co.

R. C. LANE, President. W. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the little winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 265-tunnell; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

THE PETERBOROUGH BROKERAGE CO.

FISCAL AGENTS

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 6 claims, 600 x 1500 each. A 70 foot shaft on the Martha claim shows a vein of $30.82 ore 5 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.87 to $19,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay then $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address.

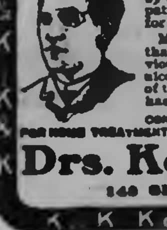
BLOOD DISEASED MEN

If you ever contracted any blood disease you are never safe unless the virus or poison has been eradicated from the system. Have you any of the following symptoms? Sore throat, ulcers on the tongue or in the mouth, hair falling out, aching pains, itchiness of the skin, sores or blotches on the body, eyes red and smart, dyspeptic stomach, sexual weakness—indications of the secondary stage. Don't ruin your system with the old fogy treatment—mercury and potash—which only suppresses the symptoms for a time only to break out again when happy in domestic life. Don't let quacks experiment on you. Our New Method Treatment is guaranteed to cure you. Our guarantees are backed by bank bonds, that the disease will never return. Thousands of patients have been already cured by our New Method Treatment for over 20 years. No names used without written consent.



Mr. E. A. C. writes: "Your remedies have done me more good than Hot Springs and all the doctors and medicines I had previously tried. I have not felt any of those pains or seen any ulcers or blotches for over seven years and the outward symptoms of the loathsome disease have entirely disappeared. My hair has grown in fully again and I am married and happy."

CONSULTATION FREE. BOOKS FREE. WRITE FOR QUESTION BLANK FOR HOME TREATMENT. CURES GUARANTEED OR NO PAY. 25 YEARS IN DETROIT.

Drs. Kennedy & Kergan,

148 SHELBY STREET. DETROIT, MICH.

$400,000 was Produced from theroperties

now owned bythe

NEW YORK-GRASS VALLEY GOLD MINING CO.

above the 400 foot level, under the old management. During the last year the mine has been thoroughly opened up New and richer ore bodies discovered. Large reserves now in sight.

Large and thoroughly complete Merralls mill now working. Besides this, six quadruple discharge stamps are now being installed Each stamp will increase the present output at least 20 tons daily. The mine is now producing steadily and increasing output daily. As soon as the new stamps, now being installed, are running, the output will reach at least 125 tons daily. At a moderate estimate the monthly income should exceed

FORTY THOUSAND DOLLARS

During the coming year it is the intention of the management to install more stamps so that the output can be brought up to FIVE HUNDRED TONS DAILY.

Quick dividends are positively assured, and will most surely be large and continuous. The present Board of Directors is composed of competent business and mining men, who are giving their personal attention to the affairs of the Company.

The price of Stock will be advanced to 75 cents per share almost immediately.

This is your last chance to purchase into this producing mine at . . . **30 CENTS PER SHARE** for cash or instalments. We have only a limited amount left at this figure, therefore **send your orders in early.**

REMEMBER IN BUYING THIS STOCK YOU ARE BUYING

INTO

- A present producing property.
- A mine that will pay large and handsome dividends, as the reserves of ore on hand warrant.
- A property that has 600 acres, only a small area of which has been mined.
- A proposition that can mine its ore cheaper than almost any other mine in the world, owing to free water power. Cost of mining and milling not being over $1.00 per ton

We have just received the following telegram, under date of November 24th:

KAYE, DE WOLF & CO., New York City. Grass Valley, Cal., Nov. 24th.

Mill now running on medium grade ore from reserves. Latest mill returns forty ounces amalgam from batteries alone since sixteenth. The Perrie ore chute on fifth level has been reached. Expect the ore on this level will pay much better than any yet opened up. The bottom of the shaft is also in good ore. Recent developments fully justify the expectations that have been formed. All who visit property report a large dividend payer soon.

J. W. H[illegible], Secretary.

Send for prospectus and full information to KAYE, DE WOLF & CO., 39 Cortlandt St., New York, or to PETERBOROUGH BROKERAGE CO., Canadian Fiscal Agents.

IS THERE CERTAINTY

IN MINING

The Idaho Richmond Gold Mines Company says Yes

AND HERE IS THE PROOF

1st—By having a property located in a camp that has produced over sixty million dollars worth of gold.
2nd—By having a property that has produced over one hundred and fifty thousand dollars to the former owners.
3rd—By having over two thousand feet of development work done on the property in the way of tunnels and drifts.
4th—By having four different ledges on the property, varying in width from three feet to thirty feet, besides several smaller ones all rich in free gold.
5th—By having now on the dumps are estimated to be worth over twenty thousand dollars, and all taken from development work.
6th—By having large amount of stoping ground opened up for the taking out of large quantities of ore.
7th—By being able to erect a mill that is located within two thousand feet of the property for the treatment of the ore, which will be done as soon as a small amount of the stock is sold to help defray the expenses of getting ready.

There is no promoter or gift stock, and there is yet over six hundred thousand shares in the Treasury.

We can prove to your satisfaction that we have a mine, and it will pay you to write for information, if you are looking for an investment that will pay you good returns.

EGBERT CHAMBERLAIN, - - - - - NEW YORK
Dry Placer Miner, formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

CURES in 1 to 5 days. Guaranteed not to stricture. Prevents Contagion. THE EVANS CHEMICAL CO. CINCINNATI, O. U. S. A.

MEN AND WOMEN.
Use Big G for unnatural discharges, inflammations, irritations or ulcerations of mucous membranes. Painless, and not astringent or poisonous.

'Henry Fielding's Dream'

By CORTLAND MYERS.

if he carried another cross up Calvary. You know you had the door bell fixed Saturday. When I came downstairs the electrician had the outside wires and buttons off, and had changed the batteries in the cellar and been working at the whole of the machinery for a couple of hours, but could not find out what the trouble was. He told me his dilemma, and I said to him that he was the electrician, but I was the sermon maker. He must take care of his end of it, and I would take care of mine. He went at it again and called me afterward to tell me in partial anger and partial delight that just where the wires were attached to the bell, the point of contact was missing, almost like a hair for distance apart, and yet there could be no sound without it. In a few seconds he brought them together, and the bell rings now. I wonder if that is not just the trouble with the Church. The machinery is all right. The batteries of theology are all right. It is the point of contact, Etta; that is the trouble. We are out of touch. Jesus touched the leper and the blind, and all classes of men. That is the very genius of Christianity, and we have lost it. The only way to make music in this world of discord is to furnish the point of contact by divinest sympathy and Christ-touch of love. I believe that is the whole fault. This mission business and all that which only gives a hungry man food, or a beggar money, is not enough either. That is only the means or opportunity. Money given to men, if that is all, makes them curse the giver and pass by the Church. It is only the heart contact with the money. We are never going to reach the workingmen and save them by our present cold and formal methods. I must come down off my high pulpit to get hold of their calloused hands, and let them see my large heart almost bursting through my vest."

Mrs. Dowling interrupted to say:

"You are the most consecrated man in the world, anyway, and I don't know how you can be any better."

"So you say, Etta, but I have to show that to these men who don't know me or understand me. We must not talk longer to-night, but this is my determination, and I will not yield if I die. It is the result of months of experience and thought and prayer. At all hazards I am going to let the workingmen of this city know that I am in sympathy with their cause, and will do all in my power to help them. I will not preach it all of the time, but I will live it all of the time, and preach it fearlessly when the hour demands it. I can live on half of my salary, but I cannot live on duty neglected or feared. I am going to get hold of these men and show them that Christ would join a labor union. I have taken His name as mine. Then I must be a Christ to them. It may take time, but I will help in the revolution. There is one man I am going to touch anyway. I have promised it, and I will begin with him. I could tell when I saw him to-night that I had seen some of the best material in the human family made up in him. I want you to help me pray for him. Christ took one at a time. This is my Nicodemus."

She knelt at his side, and the study walls never echoed a more earnest prayer than the one David Dowling breathed out to God that night.

There was something else to take place in that study before Saturday night.

Henry Fielding had been appointed a committee of one to carry the invitation to the minister to speak at the next union meeting, and while Mr. Dowling was now in his study, Henry was at home at the same hour, and remaining sleepless for a long time.

He marveled at himself. He wondered about the speech he had made and the criticism he had aroused. He said over and over again: "I know they have and will misunderstand me, but I am going to be true at any cost, and I will prove to them that I am their best friend yet. Some of them carried a sneer at my sentiments and opposed the motion about the minister, and I heard remarks afterward—yes, I suppose there were many I did not hear. Anyway, I will stand by it whatever it costs."

He tossed from one side to the other and tried to use will power to keep his eyes closed, but they saw more than they ever saw when open and in the brightest light.

"Even Richard," thought he, "did not give much encouragement. He voted for it, but that was about all. I suppose the fellow did not know what to make of it, or what to do. He will be all right and stand by, I know; but what days these have been, not great outward changes, but there is a marked difference in me somehow."

It does not take long to change an honest man's mind. He is even more ready to move his position than a knave. There was more than one new element in the life of Henry Fielding. The new truth had captured him, he was its slave. That is the largest freedom in the world.

But another throne was rising up before him, and upon it was a queen of the truest royalty.

He had suddenly met his ideal womanhood.

Was it only a dream, or was there some reality in it?

His mother and sister were dearest to him of anybody in the world, and he had never cared for another, only the boy's devotion to a school-girl, but that had vanished like a spring rose in the heat of summer and the cold of winter.

Yet the root, and life, and nature were there waiting to blossom again after the storms.

"What I fool I am," thought he, and almost said it aloud that night at twelve o'clock. "She is a million miles away from me, and I am kept awake by the lack of brains. The white matter is loose in my cranium, and cannot rest because of too much room to float about. Here goes for sleep and some common sense," as he took a new turn on the couch.

But some giants and armies are more easily conquered than thoughts and dreams. They fall only to rise again and renew the battle, even if it takes all night.

Henry had only seen Grace Chalmers for a few moments, but something more than a rich girl with attractive ways had crossed his path.

There is something about these sudden meetings of life that we cannot plan, and whose power we cannot measure. It was more to him than if an angel had stopped him on his way and revealed something strange and startling to him. He could not explain it, and would not dare tell it but can any one think less of him who knows the human heart and the wonders of life and love? Yes, they are one and the same. Life is love, and love is life. Each four letters, and they begin and end the same.

These new thoughts and conquering fears in his heart give greater admiration for Henry Fielding.

Emerson says: "All the world loves a lover."

There is a great void in any young man's life who has never experienced the hours through which he was now passing.

Just before he entered into a restless sleep, he received comfort from calling himself insane to think of her. "And still," said he, "she was mighty attractive in her way, and treated me as her equal. It is her own fault if a fellow, with only a workingman's wages, and a sister to support, thinks of it. She did it. Why did she not toss her head, and almost refuse to speak, as I thought every girl of her kind would?"

He passed into a surface sleep, and if Elsie had been awake in the next room she might have heard him say aloud in a partial dream:

"Anyway, I would like to see her again."

The week passed uneventfully, but in the secret silence of his own soul he carried the most sacred thoughts of his life. This is the holy of holies of the human heart, and not even a mother or sister can enter the sanctuary. It is the inner temple, and the holiest visitor is the first and purest thought of love.

Offend anything else under heaven, or even in it, before offense is given to that, because God is Love, and the devotion of human hearts ought to be a part of the Divine.

Saturday evening came, and found him not ready for his errand, but it must be done. He was in it, and was man enough not to back out.

The call upon the minister had to be made, and the invitation given.

Immediately after supper and after a wandering of conversation, be-

(To be continued.)

Curious Bits of News.

At a recent London wedding in high life, instead of pelting the bride and groom with showers of rice, miniature shoes and little horseshoes, made of silver paper, were thrown after them.

A strange freak was found in Vineyard Haven harbor this summer by a young woman who was in bathing. She saw a bottle on the bottom and dived for it. When it was brought to the surface it was found to contain a live lobster far too large to have crawled through the neck of the bottle. It is supposed that it got into the trap when it was a little fellow and was unable to find its way out, but how it got food enough to grow on is a mystery.

To be married three times to the same person is probably a unique experience. It was the fate of a lady who died the other day at Hamilton, Ont. Her first marriage, in Scotland, was a runaway affair. She was re-married to her husband when they reached Canada—for safety's sake. In time they both found their way back, and the third marriage was undertaken to please the lady's parents, who had become reconciled to the husband. It should be added that the husband pre-deceased the lady.

The most singular forest growth in the world is encountered in the Falkland Islands, a dismal region constantly swept by a strong polar wind. What appear to be weather-worn and moss-covered boulders are scattered about, and when one of these curious objects is seized in an attempt to overturn it strong roots are found to hold it down, these "boulders" being, in fact, native trees which the wind has forced to assume this shape. The wood appears to be a twisted mass of fibres almost impossible to cut up into fuel.

One of the greatest artistic marvels of the world is to be seen in the museum at Harvard University. This curiosity consists of hundreds of specimens of flowers and plants formed of glass, but with such exquisite fidelity to Nature that they appear to be real, every tint and marking, every tiniest detail, being faithfully reproduced. They are made by a secret process, the artists being a father and son in Germany, who, it is said, may let their secret die with them. As an instance of the wonderful workmanship it may be mentioned that the very hairs which appear on the stems on certain plants are reproduced on the glass imitations.

Turkey has a race suicide question, despite the provisions which the Prophet Mohammed made against that contingency. Fifty years ago the rule among Turks was to marry young and to espouse several wives, and as a rule families were correspondingly large. Now all this is changed. Marriages are late, and in the enormous majority of cases are monogamous, while families are becoming small to a degree which has alarmed the Government. The Sultan has recently promulgated an Irade on the subject, abolishing much of the expensive display connected with Turkish marriage, and condemning present tendencies as threatening to depopulate the empire.

Plant Used as a Rouge.

The Southern girl always had a pretty flush on her cheeks. She doesn't rouge, the other girls know that, for the flush is far too natural to come from such an outside source. Yet the fact remains that she who last year was pale is this year rosy. One day her hostess went into the room where the Southern girl was making her toilet and found her rubbing a green leaf on her cheeks.

Of course, then explanations were in order. The green leaf, it seems, was just common burdock. The burdock has a fuzzy surface, which, rubbed on the skin, brings the blood to the surface most effectively. After it is applied, the more the cheeks are bathed the redder they become. Here's a rouge worth while. Of course the "feel" of the burdock is not the most agreeable thing in the world, but its effects make up for its disagreeable qualities. The Southern girl was having fresh leaves sent to her every day in the letters from home, and that is the way she managed to keep up her healthful glow.

When her nefarious practice was thus finally discovered, she explained that the recipe for making and retaining rosy cheeks was an old one in her family, and had been handed down to her by her grandmother, who, in her turn in her young days, had used it, but that she was not unwilling to share the secret with her chums.—"Waverley Magazine."

THE BANNIE MINE

ONE OF THE BEST AND SAFEST INVESTMENTS EVER OFFERED THE CANADIAN PUBLIC.

The Bannie Gold Mining & Milling Company

Offers 20,000 shares of its treasury stock at

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 1-20-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th ecountry. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Prest.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 1-23-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

bonny cottage! as sweet and clean as could be—its plot in front full of cabbage roses, and sweet-william, and wallflowers, and dusty millers, and bachelors' buttons, when the summer came. And we had beehives, too. Then, inside, it was that quaint, like a picter, with its wide old window seats, and the ingle-neuk to sit by o' an evening, and the chintz curtains, blue and white convolvulus trailing over them, dim with many washings; an' the old brown jug on the mantelpiece, with father's ale mug beside it. Ay! picters like that are ne'er forgotten.

Ofttimes Lady Madge would drive or walk over and see me, and have tea oot o' the willow pattern cups she'd sic a fancy for. Once he rode over wi' her. She looked so handsome in her blue cloth riding-habit an' plumed hat! She was keen to come in, but when she gey timidly said she was thirsty, he hurried her away. I noticed the blitheness was gone from her voice and the sunshine frae her face.

Two days afore the wedding she came to bid me good-bye. I wasna strong enough to go to the big house for the grand doings, though I was pickin' up fine.

She'd come through the woods, an' her tunic was full o' yellow primroses she had plucked. An' there was a big bunch stuck in her broad-brimmed hat. She looked like an angel, in her soft white tamboured muslin, only that angels have no occasion to wear hats or crinolines.

"Haste to the wedding," says I, sort o' joking-like, an' she said nothing; but she began to deck up the room wi' the primroses till it looked quite gay and bridal like. "See, Nursie!" she cried, an' though she smiled bravely there were tears in her voice and in her eyes, though I didna take notice, an' her face was workin' so I felt fear'd for her. My ain lips were tremblin'.

Then we had some oat cakes and honey, bit it was pitiful to see the effort she was makin' to be cheery.

"What's that?" says she, suddenly, putting down her glass o' buttermilk (she was aye fond o' buttermilk). I told her "that" was what we called a box-bed—some folks ca' it a "press-bed." It's just built into the wall, like a closet or "press," as Scotch people say for cupboard. It's a queer bit o' furniture, an' looks like part o' the wainscotting. It has folding doors, which stand open at night for air, ye ken, an' the mattress rests on a shelf jist as lang as the press. The pillows are ahint short print curtains. (There's a braw one in the cottage o' "Robbie Burns"—I've seen it.) There's a small press, with shelves for dishes or onything, at the outside end o' that, which opens intil the passageway of course.

To this day the scent o' primroses brings back tae me the look on her face as she whispered, "'Twould be a good hiding-place, Ebbie." As sure's death, 'twas no helpin' hand she got frae me, as far as thinkin' went, but I couldna help mysel' saying, "Graund!" an'—an'—I've never been sorry for it.

• • • • • •

Weel, I saw the presents. My! they were fit for the Princess Royal—fair wonnerfu', but my Lady Marjorie didna fash much aboot them.

The Scotch are unco' superstitious, an' I'm a firm believer in dreams an' signs, though whiles there's naething in them.

However, what happened after this confirms me (as the meenisters say) in my belief.

The night before the weddin' there was a big ball up at the house, an' I was sittin' up thinkin' how I'd like fine to hae seen them dance the "Reel o' Tulloch."

Aboot twelve o'clock I heard a hurried step, an' then—my sakes! My heart went pit-a-pat, for there came a low tap-tap at the window, where the can'l was burning. I threw down the sock I was knitting (I mind it was o' heather mixture fingering), an' when I got the length o' the door I heard, "Ebbie! Ebbie!" and then I kent.

In she swept, an' her eyes were brighter than the diamond stars in her hair, but her face was pale—white as the pearly satin o' her rich gown. She threw off her heavy dark cloak and sank down on it, exhausted like.

I knelt down beside her. It wasna my part to speak first. She grippit my hands an' clung to me as if she'd never let go, an' for a few minutes—weel, we just grat thegither.

I think we baith forgot she was a lady o' high degree, in her grand attire an' jewels, and I but her servant, in my dark linsey-woolsey—for in matters o' the heart station doesna count, an' a' the world's akin.

The can'l burnt out, an' the moon rose high, ere she let me take her in beside the kitchen fire. I pushed aside the gathering coal and threw on some peat to make a "low" (that's a blaze, I mean); an' I forced her to swallow some hot toddy (that's whiskey an' water, though I dare say ye ken that). It did her a power o' good, though she pushed it away an' called it horrid stuff.

I put the best lavender-scented linen sheets I could find in the kist on my bed, an' when I got her finery off and she was resting, she told me she had pleaded feeling ill at the ball an' so got away. "He was enraged at Grouse (her pet dog) yesterday," says she, "because he wouldn't follow him; so he kicked him, oh! so savagely. He denied it," she said, wi' her eyes full o' tears, "but I saw him do it. He is cruel an'—an' I've made up my mind I shall not marry him. I have written Jack to come here for me. The other will follow me, I know, to-morrow morning to this cottage, and, Nursie," says she, gripping my hand hard, "you'll hide me so he shall not find me, won't you?"

And says I, "That I will!"

• • • • • •

I hear there wad be a stramash up at the house next morning when they found out Lady Marjorie had fled. So I kept looking oot an' alang the straight road. I saw Sir Francis Anstruther come driving in his high phaeton, sort o' reckless, for it was just about the hour he should have been married—a beautiful morning—the sixteenth of May—though there's a common sayin' in Scotland, "Married in May, repent it for aye," because Mary Queen of Scots was married in that month.

Up I ran to my lady, quick as lightning! She'd had a good breakfast—I saw to that—an' it had strengthened her a bit.

"Haste ye, my lady," says I, "for there's somebody comin' ye'd best no see. Leave him to me. I'll manage him."

She understood—an' just for one second I was feared she would faint; then she pulled herself together, and, thanks to that blessed box-bed, by the time Sir Francis reached our cottage door no' a trace o' the bed, far less Lady Marjorie, was to be seen. Jist like a piece out o' the "Arabian Nights"—sort o' magic.

Scotch folk are aye fond o' a joke, so I mind whispering, as I closed the doors, "Ye may keek through the chinks, but dinna sneeze."

I felt gey shaky, though, when that fierce rat-tat sounded, and in he strode, without as much as "Good mornin'."

"What's your wull?" says I, dropping him a curtsey; an' he snapped out: "What, my good woman?"

"What's your pleasure, sir?" I repeated. An' wi' that he says, "Pleasure be," something or other (he used a word that's no in the dictionary, I'm sure) An' then he began to rampage up an' down the floor like a daft body, saying what a trick had been played him, at the eleventh hour, by that little jade an' miscalling oor young leddy in an awfu' way.

"She's in this cottage," he says, "so tell no lies about it."

"If she's in this cottage," says I, "ye'd better find her; an' as for telling lies, I leave that for folk that isna above it."

His face grew as dark as my dress. He saw he'd met his match.

"Hoity-toity!" he says. "Ye're not afraid to speak up to your betters, my good girl. Your manners need improving!"

"Tastes differ," I made answer, feelin' as if I could have struck him, "but I've met nobody better than mysel' since yesterday."

He laughed—an' then he asked if he might look thro' the house, an' poked his nose here an' there an' everywhere.

I was a bit put out when he noticed a wee white satin slipper lying ahint a chair, but I says, "My mistress left that the last time she was here." (I couldna tell a lie aboot it, though I'd have gone through fire an' water for Lady Marjorie.) "It's a pattern for the silk stockings I'm gaun to knit for her ladyship," says I, for I was loath to mak' him suspicious; but I spoke the plain truth all through.

He blustered an' swore a wheen after that. My! little did he ken how [illegible] what he was looking for was to him. I had never favored him, or I might hae felt sorry, for I suppose he loved his promised bride in his ain way.

Weel, to mak' a lang story short, awa' he went, after a while, sair crestfallen. He flung a crown piece on the table as he was going. "There's five shillings for your civility, my good girl," says he, but I up and sent it spinning after him, I was that thrawn. "Keep your crown piece! It might be something like yersel'—no quite sterling," an' I sneckit an' bolted the door. And then—

There's no muckle mair to tell. Seems to me now, when I look back on my long life, I've seen a good deal of sadness an' mirth too, but I dinna think I ever laughed as heartily as when I shut that door ahint Sir Francis Anstruther. My certie! but I laughed till the tears ran down my face. Maybe it was wicked—ye see, 'twas the way we two had outwitted him that tickled me. My conscience was clear, though—folk like him dinna die for love for ithers—they're ower fond o' themselves. An' siller?—why, siller's mighty convenient, but it's a heart o' gold a woman should look for, no a purse o' it. Love o' money is a cryin' evil these days o' gold mines, an' speculatin', an' stocks, that the papers talk aboot.

I must be stoppin', an' I'll only add **that when a true and gallant gentleman came for his bride he found her—and she, her heart's desire.**

• • • • • •

And Miss Marjorie, that's their eldest daughter (her mither's livin' image), she ofttimes comes an' has a crack wi' me, as my lady used to. I'm going doon the hill noo, an' it cheers me, ye see. Gey often she'll say, "Ebbie, sing me 'Jock o' Hazeldene,'" an' then she laughs kind o' slyly—for I'm thinkin' she kens an auld body's story.

ORGANIZE WOMEN'S UNION

Wives and Daughters of Male Members are to Form Trades Bodies

Indianapolis, Minn., Jan. 12—Organized labor in Indiana is about to make a new departure by gathering all the wives and daughters of union men into unions, the object being to increase the influence of organized labor in this way. The leaders of the movement say that the wives of workingmen do nearly all the buying for the families, and that, if formed into unions, they would insist that everything they purchased should be union made, and thus the cause would be greatly strengthened.

It is also argued that the unions composed of wives and daughters would be a very material aid in all labor difficulties, as they would act in concert with the men and assist in moulding public sympathy in favor of the unions.

Edgar A. Perkins, President of the State Federation of Labor, is at the head of the movement.

Bindery Girls Wanted

Two or three smart girls wanted at The Times' bindery. Apply at once at Times Bookbindery.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $[illegible]
Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over [illegible] feet in addition to other claims approximating a total acreage of [illegible] acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 12½ tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is to-day giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 196 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable galena ore, the point of intersection being 400 feet beneath the surface. We have 800 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*

C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not A Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO.,
FISCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.

The Peterborough Brokerage Co., Local Agents.

WANTED—GOOD AGENTS IN EVERY CITY.

BRONCHITIS

Catarrhozone cures Bronchitis of three years' standing after four Doctors Failed

A Remarkable Case

"I feel it my duty," writes Mrs. Boyd, of Leonardville, N.B., "to let you know that I have been cured of Bronchitis of three months' standing, by Catarrhozone.

"With the least change in temperature or exposure to inclement weather, I was attacked with bronchial discomfort, wheezing in the chest, hoarseness, sore throat, partial loss of voice, and stuffiness of the head. I consulted four doctors and was treated by them all without any benefit.

"Catarrhozone was strongly recommended to me by several persons whom it had benefited, and was induced to give it a good trial."

"It quickly relieved my difficult breathing, so I got the complete outfit, hard rubber inhaler, etc., and I began systematically the Catarrhozone treatment.

"In a few days the huskiness and hoarseness disappeared, and my voice became stronger. The running of the nose, and 'stuffiness of the head,' feverishness, difficult breathing, were all done away with before I had been using Catarrhozone very long.

"About six weeks' treatment was sufficient to do more for me than four doctors failed to do in three years' time. It cured me and I don't believe there is another such a remedy on earth. Its action is speedy, pleasant and permanent."

Catarrhozone is a new, scientific treatment, and is guaranteed to cure Bronchitis, Asthma, Catarrh, Cold, etc., or money refunded. It contains nothing injurious and can be used by the infant as well as by the adult.

It is both a local and a constitutional remedy. The Inhaler supplies abundance of medicated air, which spreads through all the air passages, killing germ life, and healing sore spots as it goes.

The impurities in the blood are driven off by Ferrozone tablets which strengthen and build up the system to such a healthy condition that disease simply can't exist.

Catarrhozone is recommended by doctors and druggists for all respiratory diseases. It relieves quickly and cures permanently. Complete outfit costs $1.00; trial size 25c. At Druggists or N. C. Polson & Co., Kingston.

Lost

On Tuesday evening in the northwest part of the town, a goat skin robe, with letters W. H. in black paint on red lining in the center. Finder will be rewarded by leaving the robe at this office.

An Illustrated Lecture

A very interesting lecture was delivered last night in the Charlotte street church, by Mrs. Cuthburt on "A Trip to California and British Columbia," embellished with limelight views. There was a fair attendance.

Strayed or Stolen

From 78 Weir street, a young black and tan fox hound, full grown, answering to the name "Duke." A reward will be given for any information leading to his recovery. Any person harboring the dog will be prosecuted. Any information leading to his recovery may be left at this office.

Broke His Leg

Yesterday Conductor Steve (better known amongst his many friends as "Pete") Brophy, met with a painful accident in having his leg broken, while on duty. Particulars of the accident are not to hand. The accident occurred west of Lindsay. He was taken to Lindsay Hospital. Mr. Brophy is on the Toronto-Belleville run, by way of Peterborough.

The Late Mrs. McGinty

The sympathy of the citizens generally will be extended to Mr. Charles McGinty, police constable, in the great loss which he has sustained through the death of his wife, which occurred at Pickering, where she was visiting her daughter. Mr McGinty went to Pickering on Monday. The funeral will take place to-morrow upon the arrival of the body by C.P.R.

ALEXANDRA DRAMATIC CLUB ENTERTAINMENT

PRESENTED IN THE OPERA HOUSE LAST NIGHT

To a Large Audience—The Opera House Comes in for Some Severe Criticism

The concert last evening in the Opera House for the benefit of the Children's Aid Society was fairly well attended. The Alexandra Dramatic Club were in charge of the evening's entertainment and each and every member deserves great credit for the manner in which they performed the character assigned them.

Miss Edith Barlee and Mr. J. Lawrence presented a very amusing one act comedy entitled "A Pair of Lunatics." Miss Barlee as Miss Clara Manners, was given a very hearty reception and she most certainly made the most of her role. Mr. Lawrence, as George Fielding, was also a decided favorite with the audience. His acting was fine and one often times has seen professionals who were no match for Miss Barlee and Mr. Lawrence. At the conclusion of their sketch they were compelled to respond to a much deserved curtain call.

The orchestra under the direction of Mr. Gliddon played several selections during the course of the evening's entertainment and added much to the enjoyment of those present. Their numbers were splendidly rendered and Peterborough has every reason to be proud of her musicians who would do credit to a much larger city.

The second part of the programme was heartily applauded, the two act comedy drama "Naval Engagements," being presented. Mr. Eardley-Wilmot in the role of Admiral Kingston, met with well merited applause, as also did Mr. R. N. Hamilton as the Irish waiter, while Mr. Hughes-Charles made a great hit in the role of Short. The other characters were also heartily applauded, while Mr. Daly's criticism of the play house and its equipments was also well received.

IN THE HANDS OF HIS FRIENDS

Mayor Roger Has Not Declined the Liberal Nomination

His Worship Mayor Roger called on The Times yesterday in regard to the statement which appeared in yesterday's issue to the effect that he would not be a candidate for nomination today at the Liberal convention. The Mayor says he will leave himself in the hands of his friends. If they see fit to tender him the nomination, and it is endorsed by the convention, he will accept, and go in to win.

AN INTERESTING WEDDING

Nuptials of Miss Eloise Glover and Mr. John I. Wood, of Toronto

Yesterday afternoon the home of Mr. and Mrs. Peter Glover, Mark street, Ashburnham, was the scene of a very quiet and pretty wedding when their daughter, Miss Eloise was married to Mr. John I Wood, of Toronto, Superintendent of Construction for the Canadian General Electric Company. The ceremony was performed by Rev. J. G. Potter, of St. Andrew's Presbyterian church There were no attendants and only the intimate friends of the bride were present.

Mr. and Mrs. Wood will reside in Toronto. The Times joins their numerous friends in town in wishing them many years of wedded happiness.

An Omission.

In the report of St. Paul's Sunday school entertainment, in yesterday's issue we did not mention the distribution of prizes for good attendance during the year. Esther Davidson, Madeline Baptie, and Maxwell Smith were each presented with handsome Bibles for being present every Sunday last year. Madeline Baptie was also presented with a Presbyterian Book of Praise, having attended every Sunday during the year 1903. The prizes were distributed by Rev J A Wilson.

Elections of Officers

The annual meeting of the District Orange Lodge met last night in the Orange Hall, Simcoe street. A large gathering of the members from the Primary Lodges were present. After the General business was transacted the following officers were duly elected;

Dis Master—Bro. R. Wilson, No. 60

Dep. Dis. Master—Bro. F A. Young, No. 173.

Dis. Chaplain—Bro. J. A. Armstrong, No 467.

I'is. Rec. Sec—Bro Geo. Bartley, No 60

Fin. Sec.—Bro. John Waldie, No. 321

Treas.—Bro. Chas. Kitney, No. 321

Div. of Cer.—Bro S. Stinson, No 173

Lecturer—Bro. Ernie Elliott, No. 60.

The newly elected officers were then installed by Bro. J. B. McWilliams, Past Provincial Deputy Grand Master, Ontario East.

OUTDOOR LIFE

Will Not Offset the Ill Effects of Coffee When One Cannot Digest It

A farmer says;

"It was not from liquor or tobacco that for ten years or more I suffered from dyspepsia and stomach trouble, they were caused by the use of coffee until I got so bad I had to give up coffee entirely and almost give up eating. There were times when I could eat only boiled milk and bread and when I went to the field to work I had to take some bread and butter along to give me strength.

"I doctored with doctors and took almost everything I could get for my stomach in the way of medicine but if I got any better it only lasted a little while until I was almost a walking skeleton.

"One day I read an ad for Postum and told my wife I would try it and as to the following facts I will make affidavit before any judge;

"I quit coffee entirely and used Postum in its place. I have regained my health entirely and can eat anything that is cooked to eat. I have increased in weight until now I weigh more than I ever did; I have not taken any medicine for my stomach since I began using Postum. Why, I believe Postum will almost digest an iron wedge.

"My family would stick to coffee at first, but they saw the effects it had on me and when they were feeling bad they began to use Postum, one at a time, until now we all use Postum." Name given by Postum Co., Battle Creek, Mich.

Ten days trial of Postum Food Coffee in place of ordinary coffee proves the truth, an easy and pleasant way. There's a reason.

Look in each package for a copy of the famous little book, "The Road to Wellville."

Time seems most untimely when he brings a woman to the turn of life. Life is or should be at its ripest and best for her, and she approaches this change with a dread of its effect born of her knowledge of the sufferings of other women at this season.

There is not the slightest cause for fear or anxiety at this period if Dr. Pierce's Favorite Prescription is used. It gives health of body and cheerfulness of mind, and by its aid the pains and pangs of this critical period are prevented or cured.

Dr. Pierce's Favorite Prescription is woman's medicine with a wonderful record of cures of womanly diseases. Diseases that all other medicines had failed to cure, have been perfectly and permanently cured by the use of "Favorite Prescription."

"I feel it my duty to write you as I have received so much benefit from the use of your medicine," says Mrs. Lizzie A. Bowman, of New Matamoras, Washington Co., Ohio. "I have taken four bottles of 'Favorite Prescription' for female weakness and change of life. Before I began taking it I could not do anything. I had such pains in my head and in the back of my neck that I thought I would lose my mind. Now I can work every day. I recommend 'Favorite Prescription' to all females suffering in the period of change of life. It is the best medicine I have found."

"Favorite Prescription" has the testimony of thousands of women to its complete cure of womanly diseases. Do not accept an unknown and unproved substitute in its place.

Keep the bowels healthy by the timely use of Dr. Pierce's Pleasant Pellets.

Only 20 Cents

Dainty cloth bound books by best known authors, regularly sold at 35 cts. each; have been reduced for our January sale to 20 cents each. Times Bookstore.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporters on Their Rounds

—No Police Court yesterday.

—Times Bookstore for novelties in bric-a-brac.

—A Burns' concert is on the tapis for January 25th.

—The Young Ladies Mission Band of St. Andrew's church met last night.

—Deloraine Advertiser: Sid Tivy, of Winnipeg, spent a few days of last week in Deloraine.

—And now for the Liberal convention. Dollars against doughnuts that two men at least will be disappointed.

—The annual meeting of the Little Lake Cemetery Company will be held on Monday next.

—The water in the river has been very low, being held back by the ice, but is now running more freely.

—Do you want a crokinole board? See the one we sell for one dollar at The Times Bookstore.

—The Charity Board met in semi-monthly session last night in the Town Clerk's office.

—Toronto News—"The Midland City." How would that do for Peterborough's alternative title.

—Lindsay Post—"Mr. Jack Morrison, our local boxer, who lost his bout with Jones, an old-timer, in Peterborough, on Wednesday night, attributes his defeat to lack of training and experience, it being only his second appearance in the ring, while he had only seven days time in which to train for the event. As he had to perform his regular duties each day, he showed considerable pluck in entering the ring to give battle to a well-trained man."

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—We regret to learn that Mr. Duncan Fraser, of Lakefield, is seriously ill with pneumonia.

—Mrs Clarence W. Fitzgerald, nee Miss Edna Hannah, will be at home to her friends on Wednesday and Thursday, Jan. 20 and 21, at 233 London st.

—Lindsay Post—Mr. Peter Connors returned Friday evening from Peterborough, where he attended the winter races. He says the races were the best he had ever witnessed.

—Dr. Neill, the well known dentist, leaves this evening for the North-West. His many friends in Peterborough will hope for his return in a few months, greatly improved in health.

A Wedding Au Naturel.

There was a wedding yesterday in Graceless Church.

Lord Baldknob of Kiltshire, England married Miss Sallie Panhandle of East Pittsburg.

The bridal party, including the attorneys for both sides, formed in the alcove promptly at 11.30.

At 11.45 the real estate in the bride's name was transferred to his lordship.

At 11.50 a million dollars in legal tender changed hands.

At high noon all the railroad first mortgage bonds known to be in the bride's possession were handed over.

A vote of thanks was then passed to his lordship for leaving the bride's father enough to live on comfortably until the next rise in Wall street, which is predicted for next spring.

At 12.15 two bishops, four clergymen two real estate lawyers and a barrister, representing the plaintiff, pronounced the benediction.

The groom will pass the next three weeks with his bride at his estates in England, after the roof has been repaired.

After this, it is understood, they will separate and enter society.—"Life."

Liberal - Conservative Association

—OF—

West Peterborough

A MEETING

OF THE

Liberal - Conservative Association

Of West Peterborough will be held in the Opera House, Peterborough on

Saturday, Jan. 16

at two o'clock p.m, for the election of officers and for organization.

Addresses will be delivered by

DO YOU FEEL SEEDY?

If You are Nervous, Depressed, Sleepless, and Suffer from Sick Stomach, Headache, Constipation and Indigestion, You need a Good Tonic like Ferrozone to Build Up the System.

Thousands are in this dreadful condition, only half alive, unable to stand the strain of work and worry. There is no sense or reason in trying to be comfortable with the idea that it will pass off, and that you are going to be better soon. Unless the system is cleansed of the impurities that poison the blood, you will never be better.

The best remedy is Ferrozone. It achieves marvellous results in chronic wasting diseases, nervous prostration, faulty nutrition, heart disease and stomach troubles.

Ferrozone promotes healthy digestion which results in all food being assimilated. Nutrition is vastly improved, the blood grows rich and red and gives stability to the entire system, the store of nerve energy and force increases daily by the use of Ferrozone. The process of waste is arrested, and in its place a rebuilding of the whole system takes place.

Diseased conditions cannot exist where Ferrozone is used. It attacks disease at its very foundation, and by keeping the body well nourished and supplied with strong blood and a powerful nervous organization prevents and keeps away all manner of sickness.

There is no blood builder, nerve tonic and strength producer that can equal Ferrozone, and few people are so well that could derive great benefit from its use. It is valuable in Nervous Dyspepsia, Anaemia, Weakness, Impure Blood, Bronchitis, Neuralgia and Rheumatism. It is prepared in the form of a chocolate coated tablet and is both pleasant and convenient to use.

Ferrozone produces that high standard of health so much desired by everyone. It brings back the rosy tint to the pale cheeks of the Anaemic girls and women. It puts grace and elasticity into their movements, gives lustre and brightness to the eye, and symmetry and roundness to the form. It gives a man new strength and energy with which to pursue his daily toil, and can be relied upon at all times to benefit and give perfect satisfaction.

You can't invest half a dollar to better advantage than in a box of Ferrozone. Your druggist has it, or it will be mailed to your address if price is forwarded to N. C. Polson & Co., Kingston, Ont.

MR. R. R. HALL THE LIBERAL NOMINEE.

He Is the Choice of the Great Convention Held Yesterday Afternoon

> "I want to proclaim to the people in the name of the Living God that there is only one saviour for the Country, and that is Sir Wilfrid Laurier."

The above proclamation emanated from a voice at the back of the hall, suspiciously like that of Wm. Condon, of Douro, at the great Liberal Convention held in the Opera House yesterday afternoon. The time was the interval between the counting of ballots for nomination and the announcement of the results. As the hall was at that moment possibly filled with none but Reformers, the tumultuous cheering and applause which followed the above travesty on Scripture can better be imagined than described.

THE CONVENTION.

Was the biggest, most enthusiastic and most representative one ever known in the history of Liberalism in Peterborough. Some 800 men crowded into the the opera house, which during the whole proceedings vibrated with an air of boisterous good humor and a determination to go into the next political fight with a degree of vigor and energy hitherto foreign to Dominion election contests in this Riding. While five candidates were duly nominated and seconded, there were really but two factions to be taken into consideration—the supporters of Mr. R. R. Hall and of Mr. R. F. McWilliams. Still, however, a spirit of unity in the Liberal cause permeated the building, no matter who the nominee; and each speaker expressed confidence in the redemption of West Peterborough by the Liberals at the Dominion Election next June, while each candidate for nomination pledged himself to give his unqualified support to the choice of the Convention for standard-bearer in the coming campaign, which was freely characterized as the greatest opportunity in 25 or 30 years for West Peterborough Reformers to elect a member for the Dominion House.

The Convention opened at 2.15 and continued until 6.40, amidst the greatest enthusiasm and good humor. In the absence of President Peter Hamilton, the Vice-President, Mr. A. J. Gough, of the well known firm of Gough Bros., presided. Mr. Gough, popularly known as "Gus" made a very efficient and acceptable chairman, and displayed considerable tact in keeping the huge convention under control. Some confusion prevailed during the distribution and collection of ballots, but that was perhaps unavoidable on account of the big crowd present. On the platform were seated Hon. J. R. Stratton, who was greeted with a perfect storm of applause, Richard Hall, R. R. Hall, J. J. McClellan, Wm. Anderson, M.P.P. for East Peterborough, R. F. McWilliams, Mayor G. M. Roger, Wm. Eyers, Thos. Hunter, E. M. Elliott, Wm. Crough and Robert Kerr, acting secretary.

Mr. A. J. Gough, in opening the proceedings, said he regretted the absence of the President, Mr. Peter Hamilton, a stalwart Liberal and a tower of strength to the party. He didn't think such a mammoth convention as the present one had ever before been seen in Peterborough, and he hoped the nominee would be put at the head of the poll on election day. The country had never been in such a prosperous condition as it is today under a Liberal administration — we see it all around us, and he could see no reason why West Peterborough should not send a Liberal representative to Ottawa this election.

At this juncture the following resolutions were unanimously adopted;

CONFIDENCE IN STRATTON.

Moved by Mr. T. M. Hunter, seconded by Thos. Hall, and resolved that this convention of Liberals of West Peterborough take this opportunity of reiterating our confidence in our worthy representative in the Local Legislature, Hon. J. R. Stratton, Provincial Secretary, of expressing our appreciation of the very important services he has rendered this riding, and that we resent the vindictive attacks made upon him for party purposes, and that we trust that he may be long spared to give capable and energetic service to this riding and to the Province, such as he has so efficiently given in the past.

CONFIDENCE IN SIR WILFRID.

Moved by E. M. Elliott, of Smith, seconded by Mr. McCann, and resolved, that this convention of the Liberals of West Peterborough, desire hereby to very heartily express their complete confidence in our great Liberal leader, Sir Wilfrid Laurier, and in his Cabinet, under whose administration the country has for the past seven years, enjoyed a degree of prosperity and progress, unprecedented in the history of the Dominion, and to bear testimony to the fact that at the same time by the offer of a tariff preference to British products, the trade between Canada and the Mother Country has greatly increased, and the improved relations of Canada to the Mother Country and to the Empire, and the world at large are evidenced by the increased prestige this country has gained, and now enjoys, among the nations of the world; that this convention heartily endorses the transportation policy of the Government, especially that of the new Continental railway, as a necessary means for developing the immense resources of the great North-West, with resultant benefit to every interest of the older settled portions of Canada, and that this convention pledge themselves to every legitimate effort to perpetuate good and progressive government by the election of a supporter of the Laurier government in the person of the nominee of this convention.

CONFIDENCE IN ROSS.

Moved by William Eyers, seconded by William Crough, and resolved, that we, the Liberals of West Peterborough, in Convention assembled, desire to express our entire confidence in Hon. G. W. Ross the great and eloquent leader of the Liberal party in this Province, and in his Government, the application of whose progressive and energetic policy has done so much to advance the development of our great provincial resources and to retain the Province in the leading position it has long held under Liberal rule in regard to material development and increase of population. That we endorse the policy of the Provincial Government as the greatest, most progressive and most important member of the Canadian confederation, and of the great Empire of which it is our pride to form a part, and that we believe a continued application of the forward policy of the Ross Government especially in opening out and developing our newer areas is designed to yield important results, not only in increase of population but in creating conditions that will benefit all the older portions of the Province.

Mr. T. M. Hunter, of North Monaghan in moving his resolution in eulogy of the Provincial Secretary, said the Hon. J. R. Stratton had proved himself one of the best men the Province had ever had in public life. It is true, the Conservatives are throwing stones at him, but we must remember the most sticks are always found around the best tree in the orchard. (Cheers) He thought Mr. Stratton a stronger man in the Riding today, than ever before.

Vice-President, A. J. Gough, in putting this resolution, remarked that Mr. Stratton is very nearly as popular in Toronto as in Peterborough. "We're getting to know him there, and the more we know of him, the better we like him." (Prolonged cheers.)

This resolution was carried by a standing vote and three cheers for the Provincial Secretary.

THE NOMINATIONS.

The following nominations were then received:

R. F. McWILLIAMS, nominated by E. Cookson, seconded by Ald. W. J. Johnston, both labor men.

R. R. HALL, nominated by McFarlane Wilson, seconded by Hugh Darke.

J. H. McCLELLAN, nominated by Jas. Middleton, seconded by J. F. Collins.

G. M. ROGER, nominated by Wm. Eyres seconded by V. Eastwood.

GEO. E. ELLIOTT, nominated by T. M. Hunter, seconded by Lewis Byres.

Mr. Geo. E. Elliott thanked his nominator and seconder, but said he was not in the field this time.

Each of the candidates was then given 6 minutes in which to address the convention.

Mr. J. H. McClellan attributed the fight he had put up last campaign for the growth of enthusiasm in the party, as evidenced at this convention.

Mayor G. M. Roger said that while he was not actually seeking political honors, still, should he be the convention's choice he would not shirk the responsibility. He thought the time ripe for the Liberals to carry this Riding.

Mr. R. R. Hall made a powerful and convincing speech in the five minutes allotted him. He said victory is in the air, and the Liberals are bound to redeem West Peterborough if they go into the fight in the right spirit. He had not been seeking political honors, but had been intent on attending to his own business, building up the resources of the town and bringing manufactories to Peterborough. He would endeavor, to the best of his ability to secure the election of the nominee, whoever he be, and he felt that should the choice fall upon him, he could, with the convention's assistance, secure the return of the standard-bearer of the Liberal party as the representative of West Peterborough. (Prolonged applause.).

Mr. R. F. McWilliams was enthusiastically received. He eulogized Sir Wilfrid Laurier and his government, and was delighted to see so large and representative convention. "I cannot claim to be a very old man, but I am older than was the most successful man this Riding ever sent to Parliament, when he first stood for election—Mr. Stratton. (Cheers.) "And many people think the experiment might with satisfaction be repeated." Mr. McWilliams pledged himself, whether the nominee or not, to leave no stone unturned to achieve the result for which the Liberals are at present aiming. (Prolonged applause)

HON. J. R. STRATTON

Here took the platform. He had never, he said, attended a convention in any part of the Province at which so much interest was taken as manifested at this convention in Peterborough. He believed that the interests of the Town of Peterborough and county had been neglected by not sending a Liberal representative to Ottawa. He thought this defect would be remedied this time, and he would give his hearty support to the nominee, whoever he might be. He thought he might claim to have paved the way for so many young friends seeking nomination. He believed the Laurier administration are prepared to so arrange matters as not to prejudice the best interests of the Town and County of Peterborough. He did not think that any manufacturer in Peterborough can say that his business has not been larger the past 8 years than the 8 years previous. The country itself, the treasury of the Dominion, the business men and working men, are in a better condition today that when the Laurier Administration came into power. The hon. gentleman then went on to thank one and all for the resolutions adopted. It is true he said, we would like a bigger majority at Toronto, but Mr. Ross with a majority of three and a speaker can manage the affairs of this province better than Mr. Whitney could without any majority at all. (Laughter.). The Provincial Secretary next eulogized the Premier of Ontario for his honesty of administration. "In the whole course of my political experience I have never heard him suggest anything that was not in the best interests of the province. No government has ever put forth and carried to a successful issue so many measures in the interests of Ontario than the Ross Government." In conclusion, Mr. Stratton urged that after the nomination his hearers bury any hatchet they may have and give their fullest support to the nominee. He resumed his seat amidst a storm of applause.

THE BALLOT.

Was here proceeded with, but some confusion arose over the fact that some 25 or 30 Italians were in the hall, and no one could vouch whether they were on the voters list or not. The uncertainty, however, was set at rest by the Italians not being allowed to vote. Mr. J. H. McClellan had withdrawn in favor of Mr. R. R. Hall, thus leaving three in the field—Mayor Roger, R. R. Hall and R. F. McWilliams. The result of the first ballot was as follows;

R. R. Hall	291
McWilliams	289
G. M. Roger	58

It will be perceived that there was a difference of but two votes between Messrs. Hall and McWilliams.

Mr. E. B. Edwards here moved, seconded by Mr. Wm. Eyers,—That as there was apparently a dead-lock, the proceedings be adjourned and settled at a delegated convention to be held at a later date.

The Mayor here suggested a compromise by both the other candidates retiring in his favor. They were both young men and could afford to wait four years. (Laughter.)

The motion was voted down by the convention, and the second ballot taken with the following result, Mayor G. M. Roger's name being dropped;

R. R. Hall	412
R. F. McWilliams	361

THE NOMINEE.

As the count of the second ballot gave Mr. R. R. Hall a majority of 51, he was declared by the chairman to be the convention's choice for nominee to contest West Peterborough at the coming Dominion elections.

MR. R. R. HALL

On rising to give thanks for his nomination, was greeted with prolonged and enthusiastic applause. In accepting the nomination, he hoped that all differences that may have arisen would be buried in a unity of all Liberals for the good of the cause. We have a number of warriors in our ranks, he said, and in Mr. R. F. McWilliams we have a fighter who would have put up a strong and creditable fight in the interests of Liberalism. On this account I feel that I have accepted a great responsibility in undertaking the task of seeing that the Liberal standard no longer drags in the dust. It is to the interests of the town to have as many manufactories as possible coming here, thus affording more employment to the working classes. I have been associated more or less in the work of getting industries to locate in Peterborough. One of the most crying wants in this Riding, however, is the early completion of the Trent Valley Canal, and, if elected, I will urge upon the government the necessity of taking immediate steps in this direction. Another important matter requiring looking after is the improvement of navigation all along the line, it is a crying shame to have our boats bumping on the rocks in the Trent water way. He hoped the electors would recognize the necessity of having a Liberal representative at Ottawa from West Peterborough, for from all over the country comes the report that Sir Wilfrid Laurier and his government will be returned. Mr Hall then went on to show the growth of trade and commerce under the Liberal Administration. The gross increase in trade under the 18 years' Conservative rule was $100,000,000, while the gross increase under Sir. Wilfrid Laurier's Administration was $220,000,000. In conclusion Mr. Hall pledged himself to put forth his utmost efforts to redeem West Peterborough in support of Sir Wilfrid Laurier. He also eulogized Mr. R. F. McWilliams as a young man of whose nomination he would have been proud and whom, had he been the choice he would have been glad to support. Mr. McWilliams will one day be member for West Peterborough. (Cheers.)

MR. R. F. McWILLIAMS

Returned thanks for the support given him and pledged himself to heartily support his late opponent, Mr. R. R. Hall in the coming campaign. (Cheers)

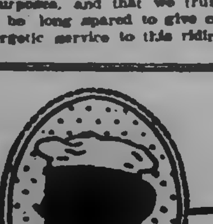
NOMINATION UNANIMOUS.

Mr. R. F. McWilliams, with commendable spirit in the true interests of Liberalism, moved, seconded by the Mayor, that Mr. R. R. Hall be the unanimous choice of the Convention.—Carried.

The meeting then adjourned after giving three cheers for the Premiers, the Provincial Secretary, the candidates and the chairman.

ANIMALS ATE MASTER

Penetanguishene, Ont., January 13.—Neil Kelly, an elderly bachelor, living on the fourth line, near here, was found dead recently. He lived alone and had not been seen since before Christmas. His nephew, B. J. Kelly Phillistone called at the house, and found Kelly's body partly eaten by a cat and dog or rats. It is supposed that his death took place from the natural causes or that he was frozen and the animals being confined in the house so long, became ravenous for food and attacked the old man's body. He was about 70 years of age.



Cleveland's Baking Powder is a pure, cream of tartar powder,—no alum. It does perfect work every time,—no failures. The housewife who uses Cleveland's Baking Powder knows the pleasure of serving the finest hot-breads, cake and pastry.

BRITISH SYMPATHY IS WITH JAPAN

Public Opinion Rife For Britain to Help Her Ally

IS DROPPED BY UNIONISTS

The Chamberlain Forces are Gaining Control in Ministerial Forces

London, January 14.—The best information available here this morning points to the imminence of war in the Far East. Never was England's sympathies with Japan keener. It is already evident that British neutrality may soon be put to a severe strain in the event of hostilities. Influential journals supporting the Ministry find many reasons why Great Britain should not leave Japan single-handed in her attempt to check a Russian exclusiveness and aggression which is as hostile to British as to Japanese interests. The British Ministry's desire evidently is to kepp the ring clear of third powers, itself maintaining a strict neutrality, but Governments in England are peculiarly dependent on public feeling. Even the Times admits that if Japan proves a weaker combatant, Great Britain could not afford to see Dominion in the Far East pass into the hands of a single power, which is not friendly to Great Britain. Other enemies of Russia here anticipate that Japan's greatest ally will be Russian domestic revolutionaries, who, by civil war, may hamstring Admiral Alexieff from behind. What is quite certain is that all England's hopes are with Japan if war must come.

THE DUKE OF DEVONSHIRE.

What about the Duke of Devonshire? That is the question of the moment in home politics. A leading North Country Liberal-Unionist, one of the famed Pease family, has had the astounding courage to start a movement to drive the Duke from the Unionist party because he refuses to countenance Mr. Chamberlain, and even goes so far as to advise Liberal-Unionists to vote against every candidate who is not openly a Chamberlainite. Similarly the Duke's colleagues in opposition, Lord George Hamilton and Winston Churchill, each have received what amounts to a notice to quit from the official Unionist organization in their constituencies. Rumors even have been afloat that Lord Rosebery and the Duke of Devonshire are drawing together again with intentions of forming a coalition party with opposition to Chamberlainism as its one unalterable creed.

But the Whiggism of the Devonshire type must always be whole worlds removed from the ardent radicalism from whose ranks come the only really fighting Liberals of the present day. This strenuous Liberalism is nearer akin to the Labor party with its certain advancement of a root and branch land reform as the only true antidote to Chamberlainism and imperial protection. If official Liberalism could bring itself to franker and friendlier recognition of labor members, its electoral chances would be greatly enhanced. It must come to that, sooner or later, if Chamberlain is to be met in anything like an equal fight. For the moment, however, his enemies are hopelessly divided, and Mr. Chamberlain makes the pace.

BACK TO THE LAND.

Another practical turn is being given to the back to the land movement. An influential repatriation committee is being formed with the co-operation of the Lord Mayor to replace on farm land the unemployed who have drifted into the towns from country life. Relief operations are being confined at first to the unemployed of east and south London, but the Salvation Army experiments in Essex indicate the feasibility of a well-managed scheme, and when once started in conjunction with the Poor Law authorities, the scheme may go far towards solving a grave economic problem.

LOST HIS IDENTINY

Birmingham England Man has Lost his Memory

London Chronicle.

The latest case of sudden obliteration of memory, that of a gentleman at Birmingham, will cause speculation as to the possible effects of the wear and tear of modern life on the mental vitality of individuals. Very little information is obtainable regarding the antecedents of the gentleman who suddenly lost his memory in the streets of Birmingham on Christmas Eve. He is understood, however, to be a medical man in local practice. His habits of life were regular, and afford no clue to the mystery. It is stated that he recently suffered a severe illness, and this may account at all events, as a contributory cause for the strange phenomenon. He appears to have left his rooms in the suburbs and walked into the city where all consciousness of his identity left him. His queer demeanor, as he paced aimlessly to and fro, attracted the attention of passers by, and eventually a policeman approached and interrogated him. The gentleman could not tell who he was, or how he came there. He had no idea what to do next, and the constable solved the immediate problem by conducting him to the nearest police station. He was a gentleman rather over middle-age, and evidently of superior education. He looked very ill and dazed, and pathetically pressed his hands to his brows in a vain struggle to regain his faculties. He apparently had a clear mind for all things present; things past were entirely blotted out. He was seen by the deputy chief constable, (Mr. McManus) who, having satisfied himself that it was a genuine case of loss of memory, unconnected with Christmas festivities, gave directions that the gentleman should be comfortably housed in the hope that recollection might return under favorable conditions. There were papers in his pockets, but none affording any clue to his identity, and the deputy chief constable took steps to publish a description of him, in the hope that his friends might see it. It was thought the aberration might be due to pneumonia, or perhaps some fever, but there were no external evidences to support this theory. On the following morning the cloud had not cleared, and the gentleman was removed to the General Hospital for treatment. There he said he did not know what his name was or where he lived, in fact, he knew nothing at all about himself beyond a faint recollection of having once lived at Peterborough. He was carefully attended in hospital on Christmas Day, and on Saturday dim recollections began to return. Gradually he was able to inform the hospital authorities who he was, and on the same day he returned home.

CHINESE IN THE COLONIES

London Times wants the Question to be Decided

London, Jan. 12— The Times trusts that Premier Seddon's invitation to the Prime Ministers of the self-governing colonies of the Empire to protest against Chinese labor for the Rand will not be accepted. If the Transvaal people are favorable, it says, why should the home Government thwart their wishes? Such a course would upset the constitutional principle of the right of the colonies to settle their own affairs.

The Australian Government is strongly urged to join in Premier Seddon's protest. Members of the Australian condingents declare that they did not fight for the Rand millionaires, but for a white man's Africa depression.

MR. MELTON PRIOR VISITS CANADA

He is on His Way to Japan as a War Correspondent

HAS REMARKABLE RECORD

His Campaigning Began in 1873 and Has Since Been Almost Uninterrupted

Montreal, January 14.—Seated quietly in the rotunda of the Windsor today reading a paper was a small, well built Englishman. That was Mr. Melton Prior, the doyen of war correspondents and famous for many years as the special artist of the Illustrated London News.

To a press representative Mr. Prior chatted away about the condition of affairs in the east the probability of war, the exodus of his fellow craftsmen from London to the front, and the enthusiasm in England for the "plucky little Japs you know." He is a remarkable conversationalist and his memory storehouse is filled with the experiences of the score of campaigns through which he has passed.

"You're going through to Japan, Mr. Prior?"

"Oh yes. We are all heading in that direction just now, you know. Bennett Burleigh is already on the spot and the others are now on the way."

"And do you look for an early outbreak of hostilities?"

The blue eyes of the war correspondent twinkled, and he almost gave vent to a chuckle. "What do you think about it?" he asked.

"I am not Mr. Melton Prior," ventured the press representative.

"Well," said Mr. Prior, "I for one do not look for a clash just yet. Old England is holding Japan back. You know," he continued confidentially, "in the event of war England is certain to be dragged into it somehow. She can't help it, you know, and she is not very anxious for that sort of thing just now."

"When, where and how are you going?"

"Thursday, Vancouver, C.P.R.," was the terse reply.

"And you expect to get there in time to see the opening battle?"

"Oh, I can't say that, you know. The scene in the war drama changes each day with such startling rapidity that it is so very hard to form any certain opinion as to what is going to happen. Really I hope to get there with lots of time to spare," and with a wave of the hand Mr. Melton Prior passed out of the swinging doors to keep an appointment with Sir Thomas Shaughnessy.

Of his famous career as a war correspondent Mr. Prior rarely talks. His record in the field includes the Ashanti war, of 1873; the Carlist rising, 1874; the Herzegovinian, Servian, Turkish, Kaffir Basuto, Zulu and the (first) Boer wars. He did remarkable work in the Egyptian campaign of 1882, and his other campaigns include the Soudan and Nile expedition, the Burmese war, the disturbance in South Africa, in 1896, at the time of the Jameson expedition, the Greco-Turkish war and the Tuchim rising, 1897.

In addition to his work in the battlefield, Mr. Melton Prior has attended every state ceremony that has occurred during his brief stays in England. He went to Athens with the Prince of Wales suite, in 1875, and accompanied the Marquis and Marchioness of Lorne on their first visit to Canada.

During the recent Boer war he did some remarkable work and had some thrilling experiences. He was with Baden Powell in the siege of Ladysmith and with G. W. Steevens when the latter died.

In the autumn of 1901 Mr. Melton Prior was in Canada and was one of the party of journalists who accompanied the present Prince and Princess of Wales on the Royal tour.

EVERYBODY READS THE TIMES.

CONCENTRATION OF RUSSIAN TROOPS JAPANESE MAY ATTACK PORT ARTHUR

Commander of the Seventh Brigade Goes to Select Site of Immense Camp

THE HOPES OF THE CZAR FOR PFACE DIMINISH

Port Arthur, January 14.—It is reported here that owing to threatening news received from Corea the commander of the Seventh Russian Brigade has gone to the Yalu River to select temporary camps and effect a concentration of troops.

Owing to the apprehensions of a daring coup on the part of the Japanese at Port Arthur, the authorities here have taken extraordinary precautions in and about the town and along the whole line of the Manchurian Railway.

Rumours were circulated some time ago that the Japanese intended to take advantage of the festivities incident to the Russian Christmas, and surprise the warships here. Consequently, a vigilant watch was kept night and day.

The whole Russian fleet is now in fighting trim.

THE CZAR LOSING HOPE.

Paris January 14. — Prince Louis Napoleon who is in this city for the purpose of attending the final interment of the remains of Princess Mathilde, says the Czar is doing everything in his power to maintain peace, but has begun sadly to resign himself to the probability of war.

"Before I left St. Petersburg I had a long talk with Emperor Nicholas, the Prince confidentially told a few Bonapartists last night. At the bottom of all the Czar's inclinations for peace is the knowledge that he must some day fight Japan. Many of Nicholas' closest advisers believe there is nothing to be gained from shirking the present issue. The St. Petersburg Government is now in the attitude of calmly awaiting the Japanese declaration of war. One thing, however, will not be endured—a continuation of the Japanese expedients to gain time for further preparations. The Czar will not permit such a policy much longer. Personally I believe war all but inevitable."

PREMIER BALFOUR'S SPEECH.

London, January 14.—Mr. Balfour's bare and emphatic statement, in his speech at Manchester, that Great Britain "would carry out its treaty obligations with regard to the allies," has made a deep impression. It is regarded as confirming the unofficial reports that Lord Lansdowne is taking a strong line in the support of Japan's claims in the Far Eastern dispute, and has informed Russia that any serious disturbance of the balance of power in the Yellow Sea would be extremely disquieting to the British Government.

Resentment of a curt and significant character is expressed by the Russian element here, including the Czar's officials. With regard to the Premier's utterances, it is maintained that King Edward's chief minister should have said either more or less and not have flung forth a statement susceptible only of an anti-Russian reading.

BARON HAYASHI TALKS.

London, January 14.—Baron Hayashi, the Japanese Minister to Great Britain, said today that he had communicated to the British Foreign Office, the action of Japan in urging Chinese neutrality. The minister added that the words "promptly resort to arms" used in the London Times despatch from Pekin to-day appears to be a mistake, which he attributes to mistranslation by the Chinese officials.

"What we have done," said the minister, "is to urge neutrality upon China in the event of war, so as to minimize the disturbance of trade, avoid internal disorders in China, guard foreigners resident in the interior, and avoid unnecessary complications of China's finances and for the purpose of limiting, so far as possible, the theatre of war, should war result.

Baron Hayashi's view of the Russian circular referring to treaty rights in Manchuria is that it is contradictory.

BAD MINE FIRE

Fire Continues to Burn in the Mine At Joggins

Halifax, N. S., January 14.—The fire which broke out in the Joggins coal mines, in Cumberland County, at 6 o'clock on Sunday night at the 3,000 foot level, was caused by an open lamp in the hands of the pumpman at the lower level who was going from one level to the other, coming in contact with an inflammable canvas bratice used to direct an air current. The canvas burned with great rapidity and emitted dense volumes of smoke, and the fire spread extensively. The man with the fatal lamp and the pumpman at the 2,500 foot level, just above, were the only men in the mine at the time. They gave an alarm at once, and a force of men set to work doing what they could to stop the fire. Nine horses, all that were in the pit, were suffocated. All night and all yesterday great efforts were made to smother the fire, but without avail. Deputy Commissioner of Mines Gilpin and E. H. Poole, Halifax, were sent for, and arrived at the Joggins mines last night. What methods they will adopt in fighting the flames has not been announced. There has been several slight explosions of damp, but the danger from this source is not considered to be very great. The number of men out of work on account of the fire is 175. The whole mine is in a state of idleness.

—St. Johns Sunday School teachers met last night.

THE ELECTIONS WILL NOT TAKE PLACE UNTIL JUNE

This is The Latest Report From a Prominent Liberal source at Ottawa

Special to The Times:

Ottawa, January 14.—Your correspondent has just been informed that it is practically decided that the elections will not take place until June. The report that Sir Wilfrid Laurier had decided to go to the Southern States on a trip extending over a period of a few weeks, is credited. The decision was made in consequence of a consultation, at which, by the way, Hon. A. G. Blair was present. Mr. Blair, it is alleged, was asked his opinion as to the merits of an election, or a session at the present juncture. It is stated that he urged the view that the election should take place.

Hon. Wm. S. Fielding, it is understood, cast in his choice with Mr. Blair, respecting an immediate dissolution. The views of these gentlemen did not prevail, however, and the prospects are that another session of Parliament may be announced very shortly.

Sir William Mulock has announced his intention of going to Chicago almost immediately.

It looks as if another session of Parliament will be held before dissolution.

ACCIDENTALLY SHOT

Was Found Dead with a Rifle by His Side

Vankleek Hill, Ont., January 13.—Mr. James Molloy, postmaster of Sandown, ten miles from here, was found dead in his room, with a terrible wound in his left side. Near him lay a Snider rifle. Mr. Molloy had been in poor health for several months and has been worried over his business affairs. He was a middle aged man, and leaves a widow and four children. Besides being the postmaster of Sandown he conducted a general store in that place. He was widely known in Eastern Ontario.

FOUND FAULT WITH LORD MINTO

Toronto, January 14.—In an address before the Ministerial Association, yesterday, Rev. T. Albert Moore, assistant secretary of the Lord's Day Alliance, found fault with Lord Minto for travelling and hunting on Sunday. He thought the Governor-General was setting a bad example.

A BUNCH OF DRUNKS

A Large List of Cases Before the Police Magistrate Yesterday

At the police court yesterday, Timothy Kearns was up on three different charges, viz.: Drunk, vagrancy, and buying liquor during prohibited hours. To the first he pleaded guilty; he was allowed to go on the second charge on promising to go to work, and the third was dismissed.

J. Montgomery was charged with being drunk and disorderly, and of buying liquor in prohibited hours. He was discharged in both cases.

A. Mitchell, J. E. Haggart and D. Meharry were accused of buying liquor in prohibited hours. All were discharged.

A hotelkeeper was charged with selling liquor during prohibited hours, but was discharged.

David Meharry was found guilty of taking part in an affray. He was fined $5 and costs, amounting to $10.25 altogether.

Charles Beavis had to pay $2 for drunk and disorderly conduct.

OFFICERS INSTALLED

Annual Meeting of the A. O. U. W. Held Tuesday Evening

The annual installation of officers in connection with the Ancient Order of United Workmen took place Tuesday evening, and resulted as follows:

Harry Williams—Past Master Workman.
J. J. Turner, sr.—Master Workman.
John Reid—Foreman.
Wilbert O'Neill—Overseer.
T. G. Gillespie—Recorder.
S. A. Oke—Financier.
Wm. Barrie—Treasurer.
James Collinson—Guide.
T. Williams—Inside Watchman.
H. H. Miller, Outside Watchman.

After the installation the members adjourned to Bro. Harry Long's [illegible] Parlors where refreshments were partaken of.

WEAVERS ON STRIKE

Sherbrooke, January 14. — About a hundred weavers at the Paton Mill are out on strike. They claim they have a grievance against their boss. The matter is being taken up by the management and it is expected the men will soon return.

PETERBOROUGH, JANUARY 14, 1904

A GOOD SPIRIT

John D. Spreckels, Jr., of San Francisco has begun to learn his father's business "from the ground up." Young Mr. Spreckels is at present a clerk in the office of the Oceanic Steamship Company, and his duty is to sell tickets, hand out folders, hear complaints, do a good day's work, and demonstrate that it is a young man's duty to labor even if his father does happen to be a multi-millionaire.

The young man says of himself and his work;

"You see, I want to learn the steamship business from top to bottom. I want to learn every branch of the service. I am selling tickets here because that is a department I did not know anything about. Lots of people come in here with complaints—they have something to kick about. Now I hear all these complaints and I learn what action should be taken in regard to them. I hope some day to follow in my father's footsteps. * * * I am fond of pleasure the same as anybody else, yet I know of no reason why I should not work because I happen to be a rich man's son. I want to be in such a position that my father shall have the utmost confidence in my ability. I am willing to check freight, and I don't care what it is. I think that the only way to be successful in any business is to learn it from the ground up."

That is the right spirit for any young man, rich or poor. To overdo it would easily be possible, and there is nothing less creditable than making one's self a slave to business or money-making beyond the point of necessity; but the spirit which wishes to do a good share of work of some kind and do it well is th salvation of humanity.

IRRIGATION IN ALBERTA

The Canadian Pacific Railway has decided to call for tenders at once for the construction of the main canal in connection with its irrigation work in Alberta. It will be thirty-five miles long, 60 feet wide at the bottom, and will have a depth of water of 10 feet. This canal, we are told, will carry the water to supply the secondary canal which will be, when ultimately completed, one hundred and fifteen miles long. To make the main canal 750,000,000 cubic feet of earth will have to be removed and the work will have to be done by power plants such as steam shovels, railways, etc. The project is designed to make useful for agriculture and grazing some 3,000,000 acres of land now lying waste, owing to the lack of moisture, the region being subject to cycles of extreme drought. Of the tract to be reclaimed, it is estimated that 1,500,000 will be rendered fit for growing cereals of all kinds, the balance to be devoted to grazing and cultivation of grasses. At present, however, the company's plans are to bring but 300,000 acres under irrigation, and after colonizing that, to extend the works gradually until the system covers the entire area.

SUCCESSION DUTIES IN ONTARIO

The returns to the Province of Ontario from succession duties during the year 1903 have exceeded the amount of the estimated receipts by $49,000. The total receipts were $389,000. Refunds will amount to be about $2,400, so that the net returns will be about $387,000. In 1902 the receipts were $322,000, and in 1901 $378,000. In other years they were much smaller. The total receipts by the Province since the enforcement of the act in 1892 are $3,493,700. During 1903, says a Toronto report, the department has received an unusual number of large checks. From Sir Frank Smith's estate $42,000 was received during the year, making the total from the estate $87,000. Other large checks received were; George Cook estate, Toronto, $38,000; Robert Ferguson estate, Kent, $15,000; Henry Cargill estate, Cargill, $36,000; A. T. Wood estate, Hamilton, $34,000. There have been over 300 estates closed, which have paid succession dues. The greater portion of these were estates of over $100,000. Estates under $100,000 do not pay anything if left to immediate relatives. Estates of over $100,000 and those under that sum left to other than immediate relatives pay five per cent.

EDITORIAL COMMENT

If the elections don't come on, a lot of candidates will get out of breath running for such a long time.

Now they are talking of sending Cartwright to the Senate. Soon most of the Old Guard will either be in the Senate or out on strike.

The address in the Ontario Legislature is to be moved by Mr. C. N. Smith, member for Sault Ste. Marie. For this honor Mr. Smith has to thank the public-spirited electors of North Renfrew,

---

When the news gets to New York that Toronto is keeping the husband of a Countess in gaol when the drawing rooms yawn for him, the New Yorkers will have a poorer opinion of Canada than ever.

The dogs of war will soon be let loose in the far East, and the world's population be considerably lessened before long. May the Japs dance merrily on the Bear's wishbone. That's the worst luck we wish the subjects of the Mikado.

Recent investigations made by surgeons in the French army in all parts of the world demonstrate, to their satisfaction at least, that the prevalence of appendicitis is in exact proportion to the prevalence of meat-eating. This may or may not be true, but a person who is suffering from appendicitis or any other disease will not lose anything by abstaining from the use of meat for a time and noticing the effect on his complaint. This much may be said even if vegetarianism is a delusion.

It would be interesting to know the inside working of the pull which has been at work for years past to secure the release of the American murderess, Mrs Maybrick, in England. Apparently it has been crowned with success as it is announced that the woman is to be released in April. She was first sentenced to be hanged, but the sentence was commuted to imprisonment for life in 1889 and she has served fifteen. The crime was one of the most cold-blooded description, consisting in slowly poisoning her husband with arsenic. There was absolutely not a redeeming feature in the case, yet influences in the United States have been steadily at work since her sentence to secure her release. For no reason which appears on the surface the case has taken on all the importance of an international episode and revision after revision of the evidence has been obtained without effect, until at last the murderess is to be let out on a straight pardon.

WILL STAMP OUT VICE

Winnipeg, January 12.—The keepers and inmates of houses of ill repute, some ninety persons in all, were brought before the police magistrate on Saturday and fined the keepers forty dollars and the inmates twenty dollars each. The fines were all paid, and the women, who are mainly Americans, say that they will leave the city. The authorities are determined to stamp out this form of vice in the city.

BOERS TAKE THE OATH

Bombay, January 12.—Nearly five hundred Boers have sailed for Durban, Natal. These are the last of the irreconcilables who were imprisoned at Ahmednagar. Lately they were induced by General Delarey to take the oath of allegiance.

You are Weak
Instead of Strong

A Weak, Pale, Despondent, Specimen of Humanity, Lacking in Vigor, Strength and Ambition.

Make Yourself a New Being;—Renew, Revitalize, Reinvigorate Your Lost Strength.

You're a discouraged, weak, miserable wreck—old before your time. Instead of a place of happiness the world is full of strife, worry and distress.

You are sick and not aware of it, just able to drag yourself around, but totally incapable of exertion or hard work.

Your stomach is crying out for assistance. Hadn't you better give it some Ferrozone?

Your nerves require a good bracing tonic, and the best thing for them is Ferrozone. Why don't you use this sovereign remedy? It is intended for cases just like yours.

Ferrozone is superior for the blood and nerves to any curative agent the world has ever known. Its recuperative powers are beyond description as a trial will demonstrate.

With the use of Ferrozone comes strength to overcome the difficulties and battles of life. Digestion and assimilation will improve, appetite soundly, and presto—before long you will be healthy, strong and well.

These blessings are all obtained by the regular use of Ferrozone, and can be purchased at any reliable drug store for 50c., or three boxes $1.25. Sent by mail to your address if price is forwarded to N. C. Polson & Co., Kingston, Ont.

A RACE PROBLEM

Introduction of Chinese into South Africa Resented

London, Jan. 11 — Premier Seddon speaking at Wellington, N.Z, said the introduction of Chinese hordes into the Transvaal will be bitterly resented by the self-governing colonies.

Writing to a correspondent at St. Helen's, Premier Seddon says: "Whether or not they do anything in England, we will put an extra 10 per cent. on some lines, and 20 per cent. on others. We ought to give the British manufacturers a good show. He thinks the British manufacturer has much to learn in the matter of freights. Germans or Americans ship goods to the extent of 20 or 30 per cent. less than the British. That the open door policy will help the British workingman is all nonsense. Trade does not follow the flag. People buy where they can get the best terms and the quickest service.

KRUGER CONFESSES TO TWELVE MURDERS

Condemned Man Tells Story of His Numerous Crimes

WRECKED A RAILWAY TRAIN

His Confession Clears Up a Sensational Murder Mystery in Pennsylvania

Greensburg, Pa., January 13.—Charles E Kruger, aged 21, who is to be hanged at Greensburg gaol next Thursday for the murder of a constable, who was attempting his arrest, has confessed to twelve murders and innumerable other crimes. One of the mysteries cleared up by his confession is the murder of City Treasurer John Blevins, of Newcastle, Pa., one of the most sensational crimes ever committed in this section of the country, and one that baffled the police five years.

Kruger's first murder was committed when he was fourteen.

Outside of homicides, his most desperate piece of deviltry was the destruction of a train of seventeen cars of the Pittsburg Western Railway, which he did to get even with the company for having thrown him off a freight train. He says he did not even read the accounts of the train wreck and does not know if he killed anybody or not on that occasion.

Nearly all the murders were committed to get even with somebody.

Kruger threw a detective under the wheels of a train because the detectives interfered with his stealing rides.

He drowned a man in Ohio river because the man had not given him a proper share of the proceeds of robbery, and shot to death another man in order that there might be no witness to this murder.

Kruger has made two attempts to escape. He is heavily guarded.

An Illustrated Lecture

A very interesting lecture was delivered last night in the Charlotte street church, by Mrs. Cuthburt on "A Trip to California and British Columbia," embellished with limelight views. There was a fair attendance.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $3.66 to $30 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $41.88 and $79.06 respectively, thus being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group, is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

The Unpopularity of Whiskers.

Commenting on the fact that Governor Alexander Monroe Dockery has just divested his countenance of a celebrated and almost immortal set of whiskers, the New York "Sun" says: "The twentieth century is beginning somewhat as the nineteenth century began, though, of course, not so strictly and universally smooth, but it is doubtful if it will run parallel through all its quarters with its predecessor. There were no mustaches, no beards, when the nineteenth century dawned. Side whiskers began to curl and sprout before it had run far in its course, and they grew bolder after a time and encircled the throat and chin, leaving bare the upper lip. The lip was submerged about 1860, and in the later years of destruction was last to yield to the assaults of the barber. The human countenance began to exhibit itself again not long after the war, and from that time down to the very recent past the unsupported mustache was the prevailing mode. Now fashion is changing again, so that the young men are commonly completely shaved, and their fathers have covered lips. The youth of to-day have the weight of civilized precedent with them. An examination of the family albums of the last four centuries will demonstrate that the unwhiskered have had by far the better of it. For nearly two hundred years of that time the beard was not permitted to sprout. A great deal of encouragement for the shaven but ambitious young man may be found in the Presidency of the United States. From the beginning with Washington down to Lincoln's time whiskers found lodgment in the White House only three times, and in every case they were of the remote variety known as sideboards, which offered no considerable obstruction to the observation of the faces to which they were linked. John Quincy Adams presented a stubborn pair, Martin Van Buren's were amiable in their moods, and Zachary Taylor's were evidently the unobtrusive expression of a fancy for trimmings. Lincoln inaugurated the bearded era, which was carried on by Grant, Hayes, Garfield, Arthur (with Dundrearys), and Harrison, though Harrison yielded not a little of his expanse before he retired from office. Cleveland was the first mustached President and Roosevelt the second, while McKinley preserved the tradition of the smooth face.

Already Provided.

A certain small village, far removed from the noise and bustle of commerce, boasts a female preacher, and the lady's duties are many. One day she may visit the sick, another attend a funeral, and the next baptize a baby. One afternoon she was preparing the sermon for the following Sabbath when she heard a timid knock at the parsonage door. Answering the summons she found a bashful young German standing on the step and twirling his straw hat in his hands.

"Good afternoon!" the preacheress remarked. "What do you wish?"

"Dey say der minister lifed in dis house, hey?"

"Yes, sir."

"Yess! Vell, I vant me to kit merriet."

"All right; I can marry you," she said. The lady's hair is beginning to silver, and the German glanced at it. Then he jammed his hat on his head and hurried down the path. "What's the matter?" she called after him.

"You vite no chance mit me," he called back. "I don't vant you; I hef got me a girl already."—"Modern Society."

A Lesson in Tact.

A few weeks ago, says James MacArthur in "Harper's Weekly," I quoted some passages in these columns from the correspondence between the Brownings in the days of their early acquaintance on Carlyle's strong dislike of poetry. I have just heard of a new story on the same theme which is told by Professor Goldwin Smith. It appears that Professor Smith was once a visitor with Carlyle at Lady Ashburton's house when Tennyson was one of the circle at "The Grange." Tennyson was asked to read one of his own poems aloud, but, to the surprise and disappointment of his gentle hostess and her company, he refused—a thing he was never apt to do. Looking across the room, Professor Smith saw the cause of the difficulty. Close to Tennyson sat Carlyle, who was wont to make a universal sweep of poetry in its relation to common sense when aroused by the proximity of the Muse. Professor Smith, devoting himself to the public good, and, we may add, in courteous consideration of his hostess, crossed the room, and invited Carlyle to take a stroll in the grounds. The Sage accepted the invitation, and, during the stroll, the poet brought off his reading.

For the Farmer.

Beets, turnips and carrots can be kept in bins in the barn or cellar. A layer of carrots and a layer of dry oats or corn, or even of sand, will dry them at an even temperature and prevent sudden freezing and thawing. The same applies to potatoes or other root crops. Cold does not do them as much damage as warmth. It is when they thaw suddenly that they begin to decay.

Cows That Are Thieves.

"If the 'man behind the cow' in Kansas would do his part no unprofitable animal would masquerade under the fictitious appellation of 'milch cow,' and she would either go to the butcher's block or be made to return a profit by more intelligent care and management," says Secretary Coburn in the last quarterly report of the Kansas Board of Agriculture. "It passeth understanding why theft by a cow should be tolerated more than theft by a human. In effect the result to the loser in either case is the same. Our Government has found it wisdom to study and establish far-reaching methods for the detection and the repression of the latter; and by the same token why should our farmers and dairymen be less vigilant in regard to this possible proclivity in their cows—beasts described as dumb, yet outwitting their owners? So long as cows of this class are permitted in the dairy herd, so long will there be dissatisfaction and failure. Improvement is the route to success, whether by breeding, better management, or other ways, and intelligence in our cowmen is the power that will force advancement in the right direction. Dairying has come to be one of the most important factors in Kansas agriculture, and, rightly conducted, is one of the surest money-makers of our varied industries. It is incomparably more rational than any one-crop system, or even general farming, as its practice tends to rotation of crops, maintains or increases the fertility of land, and affords steady employment with returns remunerative according to the brains mixed with the business."

Equitable Gold Mining Co.

R. C. LANE, President. S. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,050 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 300-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

FISCAL AGENTS

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 6 claims, 600 x 1500 each. A 90 foot shaft on the Martha claim shows a vein of $30.83 ore 5 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.83 to $19,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay then $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address,

ARE YOU A PRISONER?

THOUSANDS of men are prisoners of disease as securely as though they were confined behind the bars. Many have forged their own chains by the vices of early youth, exposure to contagious disease, or the excesses of manhood. They feel they are not the men they ought to be or used to be. The vim, vigor, and vitality of manhood are lacking. Are you nervous and despondent? tired in the morning? have you to force yourself through the day's work? have you little ambition and energy? are you irritable and excitable? eyes sunken, depressed and haggard looking? memory poor and brain fagged? have you weak back with dreams and losses at night? deposit in urine? weak sexually?—you have

Nervous Debility and Seminal Weakness.

K&K K&K K&K K&K K&K K&K

$400,000 was Produced from the Properties
now owned by the

NEW YORK-GRASS VALLEY GOLD MINING CO.

above the 400 foot level, under the old management. During the last year the mine has been thoroughly opened up. New and richer ore bodies discovered. Large reserves now in sight.

Large and thoroughly complete Merralls mill now working. Besides this, six quadruple discharge stamps are now being installed. Each stamp will increase the present output at least 20 tons daily. The mine is now producing steadily and increasing output daily. As soon as the new stamps, now being installed, are running, the output will reach at least 125 tons daily. At a moderate estimate the monthly income should exceed

FORTY THOUSAND DOLLARS

During the coming year it is the intention of the management to install more stamps so that the output can be brought up to FIVE HUNDRED TONS DAILY.

Quick dividends are positively assured, and will most surely be large and continuous. The present Board of Directors is composed of competent business and mining men, who are giving their personal attention to the affairs of the Company.

The price of Stock will be advanced to 75 cents per share almost immediately.

This is your last chance to purchase into this producing mine at **30 CENTS PER SHARE** for cash or instalments. We have only a limited amount left at this figure, therefore **send your orders in early.**

REMEMBER IN BUYING THIS STOCK YOU ARE BUYING

INTO
- A present producing property.
- A mine that will pay large and handsome dividends as the reserves of ore on hand warrant.
- A property that has 600 acres, only a small area of which has been mined.
- A proposition that can mine its ore cheaper than almost any other mine in the world, owing to free water power. Cost of mining and milling not being over $1.00 per ton.

We have just received the following telegram, under date of November 24th:

KAYE, DE WOLF & CO., New York City. Grass Valley, Cal., Nov. 24th.
Mill now running on medium grade ore from reserves. Latest mill returns forty ounces amalgam from batteries alone since sixteenth. The Ferris ore chute on fifth level has been reached. Expect the ore on this level will pay much better than any yet opened up. The bottom of the shaft is also in good ore. Recent developments fully justify the expectations that have been formed. All who visit property report a large dividend payer soon.
J. W. [illegible], Secretary.

Send for prospectus and full information to KAYE, DE WOLF & CO., 39 Cortlandt St., New York, or to PETERBOROUGH BROKERAGE CO., Canadian Fiscal Agents.

IS THERE CERTAINTY
IN MINING
The Idaho Richmond Gold Mines Company says Yes
AND HERE IS THE PROOF

1st—By having a property located in a camp that has produced over sixty million dollars worth of gold.
2nd—By having a property that has produced over one hundred and fifty thousand dollars to the former owners.
3rd—By having over two thousand feet of development work done on the property in the way of tunnels and drifts.
4th—By having four different ledges on the property, varying in width from three feet to thirty feet, besides several smaller ones all rich in free gold.
5th—By having now on the dumps are estimated to be worth over twenty thousand dollars, and all taken from development work.
6th—By having large amount of stoping ground opened up for the taking out of large quantities of ore.
7th—By being able to ease a mill that is located within two thousand feet of the property for the treatment of the ore, which will be done as soon as a small amount of the stock is sold to help defray the expenses of getting ready.

There is no promoter or gift stock, and there is yet over six hundred thousand shares in the Treasury.

We can prove to your satisfaction that we have a mine, and it will pay you to write for information, if you are looking for an investment that will pay you good returns.

Dry Placer Miner, formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine—Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary boxes of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

'Henry Fielding's Dream'

By CORTLAND MYERS.

cause his mind was upon the errand, and what he was to say, Henry started out, only to hear Elsie say:

"I am glad you have to go. I know you will like him better. I never had a pleasanter call than the one he made here."

David Dowling had just said to his wife:—

"I am to stay home for once tonight, I hope no one will ring that perpetual- motion bell. I almost wish the electrician had not found his point of contact."

He turned from the hall into his study, to pick up a new book which had been waiting for this evening, or some other, when the music of the bell was heard.

It was discord to him, and almost made him feel unministerial and unchristian. It was only momentary though, and the usual cordial manner and smile came home, and they told him a young man wanted to see him a moment.

He called out:

"Have him come right in here."

When Henry walked toward the study, Mr. Dowling came to the door to greet him He said:

"Why, I am surprised to see you, but I am delighted," and he was.

The other spirit was human, this was the Christ and the better nature, and the most of it was in him.

"I would not have ventured to call," said Henry, "and I now dislike to disturb you, but I have a message for you, and will detain you only a moment."

"You are welcome as long as you can remain. I will not let you go right away," replied Mr. Dowling.

"Thank you," said Henry, "but I came from one of the labor unions, Union No. 10, to which I belong, and the men want you to attend our next meeting and speak for us."

A new color came into the minister's face, and a puzzled expression gathered. In a moment of surprise, he hardly knew what to say. Then he asked:—

"What night is it to be?"

It was only a question to take time and give him an opportunity to think. He asked where it was, and if this was an innovation, etc., only for the same reason, and then said:

"I would like to do anything I can for your cause in as far as it is right, and I will do this if it will help in any way."

Henry replied emphatically that it would, and said he had been the instigator of it.

"The men," he went on, "are out of touch with the Church, and I believe they are out of relation with that force in society which can and ought to help them most. Understand me. I am not, and I don't believe most of them are far away from the Church. They are only waiting for the opportunity to come to show their true spirit."

"Is it true," said Mr. Dowling, "that they sneer at the Church and applaud the name of Christ?"

"No," said Henry, "I have not heard that, and if that is done it is the exception, not the rule. They simply stand one side and carelessly stay away from the Church. They claim that the preacher is out of sympathy with them, and does not care about their burdens, and I will have to confess to that as my own fault for a long time."

Henry blushed a trifle as he looked toward the floor and said:

"I used to go to church and to Sunday school up in the country. I never joined the Church, but sometimes thought I was a Christian. When I reached here and entered into this great whirlpool of humanity, struggling against wrongs and for rights, dying in the almost useless effort, I became cold and indifferent to everything which went by the name of religion. It didn't seem to me there was much in it."

Mr. Dowling interrupted to say:

"Tell me all about it. I am interested and even anxious to find out my own fault in the matter."

"Well," said Henry, "I have told you about all. I confess to fault on my part, but I tell you there are many things that ought to be made right, and the Church ought to do its part at least, to bring Christ into the everyday life and business of the world. There is not much chance for a man in these days. The odds are so great. I had bright dreams when I came down here, and have done my best, but wages half the time have been cut down, and sometimes we have been out on a strike, and then I have a sister to care for. There has been almost enough in all this to keep me away from the Church; yes, I might as well say, 'Away from God.' If I am honest, as I must be, I am quite sure 'away from church,' means in most cases, 'away from God.'"

"Do you feel just the same now, Mr. Fielding, as you always did?" asked Mr. Dowling.

"Well, I can't say that I do. There has been no outside change in my life, and yet I am coming to look at some things differently. At least, I am realizing my own fault more, and seeing the Church, yes, seeing you in a little better light. That sermon last Sunday morning has done something for me. I am sure, and that is what makes me want you to give something of the same kind to the other men. I believe they will receive it and get great profit from it."

"Just what do you want me to talk about?"

"Oh," said Henry, "I leave that to you. You know best; only show them that the Church and the ministry are in sympathy and will help in any way possible—at least that they will be just to both sides and all men. They believe that you bow and bend to the rich, even at the sacrifice of truth."

"I will be there," said David Dowling, as he struck the study table with his hand, "and I will have them know that that is not true. If it has been, by God's grace, it never will be again."

"Thank you," said Henry, "I am glad to carry that report, and must go now."

"Don't hurry. I want to hear a little more about yourself. I wish I could do something for you. I have been thinking about you all week, and praying for you. I believe God sent you here to-night. I wanted this evening alone, but I would a million times rather have you here, and that is honest."

Henry had risen to go, but almost unconsciously settled back in his chair again.

"If you and I could understand each other, that would be a splendid beginning," continued Mr. Dowling. "A mustard seed, with magnificent possibilities in it. I do not want to go to your union unless I feel that I have one friend and helper in the cause."

"Oh, you can count on me for that," said Henry.

"But I mean more than you think. What a wonderful thing it would be if you were a Christian man yourself, and carried the influence of Christ into the organization, and did your part, which would be a great part, in swinging the Church around toward the workingmen. They never can be reached in any other way than by some manly fellows, like yourself, being the leaven in their society. I come, and no matter how warm my heart is, they say it is cold, and I am only a religious professional. Here is the combination that will do it. Some of their own kind and the preacher with them. Oh, how God would move this part of the world if only some of you men and the ministry were banded together. I, for one, promise to go to the very end of duty's path. I do not care where it leads me. I have not been just right either. Love and sympathy and interest must play a greater part in my life than sermons in the future."

"I do not know just what you mean," said Henry, "but I will do my part."

"Be careful how you say that Mr. Fielding. Cannot I call you Henry. Your sister told me the name."

"I would rather have you address me that way," said Henry.

"All right," replied Mr. Dowling. "Now I will go on. Be careful how you say that: 'Your part'—'your part.' No man can do anything for others, who is not first right with God himself. That is the Divine law. Any one who neglects a personal duty, cannot influence others for the right. Any man who has lost himself cannot point out the way to others. Love for God precedes love for man. No, not just that. They are one and the same. You have said here to-night, Henry, that you are

(To be continued.)

New Fashions in Jewelery.

The new season's jewelry promises to be more artistic in design and fascinating in variety than that of the last, declares the "Manufacturing Jeweler." The tendency has been toward a wide departure from the beaten tracks of gold or silver ornaments set with precious stones, and the more unique a design for belt buckle, brooch or chain, the better it has been liked. Dull finished metals with uncommon jewels and colored enamels in Celtic and Oriental forms are leading.

Diamonds and rubies hold their place, but they are worn so commonly that women who pride themselves on being original demand novelties that are uncommon. They would rather have the soft-hued, uncommon-colored stones that must be brought from the far corners of the earth, the finest specimens of which are so seldom found that there are not many duplicates.

Big sums are paid for green garnets, for orange-tinted zircons, for rose-pink topazes and peridots, whose glint is the color of the young spring buds. These warm-colored stones are becoming and can be got in hues that harmonize particularly well with the shades of favorite costumes. Many women have a favorite color and wear only the jewels that accord well with it.

A nouveau art necklace, a gold chain studded with uncut turquoise or sapphire stones, a matrix pin—any one of these will stamp the wearer as decidedly up to date. Bracelets, charms and lockets of jade are very popular. Coral, either rough or in polished bead form, is much worn. Semi-precious stones are seen to a great extent, topaz being prominent among them Oriental jewelry in the shape of girdles and necklaces is beautiful, but not every woman can wear it.

A necklace of uncut turquoise has a gold bead between every two blue stones, and another pretty combination is pink coral alternating with white sapphires. One beautiful and elaborate necklace seen recently was made of two rows of seed pearls, with pendant gems hanging at intervals all the way around. In the center, forming a pendant, was a quaintly-shaped, rather large baroque pearl, and among the other stones were sapphires, amethysts, topazes and moonstones.

Some final enamel work is shown in personal ornaments of dark blue enamel, or in silver with wild briar rose painted thereon. Various shades of gold and colored enamel traced in finest designs form the setting for the uncommon gems.

A stone of amethyst tint will be set in silver of a dull shade, enriched with tracery of purple and white enamel; a yellow diamond will have its gold framework varied and heightened with orange and pearl enamel. Often a fine topaz of uncommon hue will have all the gold work of its setting overlaid with enamel frosted with fine lines of diamonds.

Dull silver-looped settings are effective, too, with a mixture of coloring taking on the hue of the stones. The combinations of color are often those to be found in nature's water products. Some shells from the salt water have the metallic lustres and colors that are most sought after in animal jewelry and dress accessories.

New necklaces have the appearance of natural vines with leaves and tendrils of greenish gold and orange or coral-colored stone for the fruit Pendant grapes and delicate flower pieces are simulated in parti-colored gold, glistening enamel and gems of appropriate character.

Clearly Defined.

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-20-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,
R. N. FREDERICKS, Cashier.

Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 28th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-22-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 21, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,
ED. BLOCK.

Address all communications to Robert Kidd, Fiscal Agent, Peterborough, or to W. J. WILSEY, Prescott, Arizona.

A FORTUNE AWAITS YOU

INVEST NOW IN THE

North Carolina Gold Fields

BUY

Rodman Mining & Milling Co's Stock

AT 50 CENTS PER SHARE

DIVIDENDS IN SIGHT

Three developed mines with more than $500,000.00 worth of ore on the dumps and an inexhaustible supply in the mines, assaying as high as $100.00 per ton, with an actual mill test of seven tons running

$24.65 PER TON IN GOLD

One mill completed ready for operation and another being built. One and one-half miles from the main line of the Southern Railroad, cheap lumber, cheap fuel. Plenty of water and a climate allowing operations 365 days per annum, are a few of the advantages that go to make this one of the most valuable mining properties today in the country.

Send for free copy of the "Gold Nugget" and learn something about the North Carolina Gold Fields that produced all the gold in this country before '49 and that are today attracting the attention of the world.

Rodman Mining and Milling Company

367-373 FULTON STREET, BROOKLYN, N. Y.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price that will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

Peterborough.

bonny cottage! as sweet and clean as could be—its plot in front full of cabbage roses, and sweet-william, and wallflowers, and dusty millers, and bachelors' buttons, when the summer came. And we had beehives, too. Then, inside, it was that quaint, like a picter, with its wide old window seats, and the ingleneuk to sit by o' an evening, and the chintz curtains, blue and white convolvulus trailing over them, dim with many washings; an' the old brown jug on the mantelpiece, with father's ale mug beside it. Ay! picters like that are ne'er forgotten.

Ofttimes Lady Madge would drive or walk over and see me, and have tea oot o' the willow pattern cups she'd tae a fancy for. Once he rode over wi' her. She looked so handsome in her blue cloth riding-habit an' plumed hat! She was keen to come in, but when she gey timidly said she was thirsty, he hurried her away. I noticed the blitheness was gone from her voice and the sunshine frae her face.

Two days afore the wedding she came to bid me good-bye. I wasna strong enough to go to the big house for the grand doings, though I was pickin' up fine.

She'd come through the woods, an' her tunic was full o' yellow primroses she had plucked. An' there was a big bunch stuck in her broad-brimmed hat. She looked like an angel, in her soft white tamboured muslin, only that angels have no occasion to wear hats or crinolines.

"Haste to the wedding," says I, sort o' joking-like, an' she said nothing; but she began to deck up the room wi' the primroses till it looked quite gay and bridal like. "See, Nursie!" she cried, an' though she smiled bravely there were tears in her voice and in her eyes, though I didna take notice, an' her face was workin' so I felt fear'd for her. My ain lips were tremblin'.

Then we had some oat cakes and honey, bit it was pitiful to see the effort she was makin' to be cheery.

"What's that?" says she, suddenly, putting down her glass o' buttermilk (she was aye fond o' buttermilk). I told her "that" was what we called a box-bed—some folks ca' it a "press-bed." It's just built into the wall, like a closet or "press," as Scotch people say for cupboard. It's a queer bit o' furniture, an' looks like part o' the wainscotting. It has folding doors, which stand open at night for air, ye ken, an' the mattress rests on a shelf jist as lang as the press. The pillows are ahint short print curtains. (There's a braw one in the cottage o' "Robbie Burns"—I've seen it.) There's a small press, with shelves for dishes or onything, at the outside end o' that, which opens intil the passageway of course.

To this day the scent o' primroses brings back tae me the look on her face as she whispered, "'Twould be a good hiding-place, Ebbie." As sure's death, 'twas no helpin' hand she got frae me, as far as thinkin' went, but I couldna help mysel' saying, "Graund!" an'—an'—I've never been sorry for it.

* * *

Weel, I saw the presents. My! they were fit for the Princess Royal—fair wonnerfu', but my Lady Marjorie didna fash much aboot them.

The Scotch are unco' superstitious, an' I'm a firm believer in dreams an' signs, though whiles there's naething in them.

However, what happened after this confirms me (as the meenisters say) in my belief.

The night before the weddin' there was a big ball up at the house, an' I was sittin' up thinkin' how I'd like fine to hae seen them dance the "Reel o' Tulloch."

Aboot twelve o'clock I heard a hurried step, an' then—my sakes! My heart went pit-a-pat, for there came a low tap-tap at the window, where the can'l was burning. I threw down the sock I was knitting (I mind it was o' heather mixture fingering), an' when I got the length o' the door I heard, "Ebbie! Ebbie!" and then I kent.

In she swept, an' her eyes were brighter than the diamond stars in her hair, but her face was pale—white as the pearly satin o' her rich gown. She threw off her heavy dark cloak and sank down on it, exhausted like.

I knelt down beside her. It wasna my part to speak first. She grippit my hands an' clung to me as if she'd never let go, an' for a few minutes—weel, we jist grat thegither.

I think we baith forgot she was a lady o' high degree, in her grand attire an' jewels, and I but her servant, in my dark linsey-woolsey—for in matters o' the heart station doesna count, an' a' the world's akin.

The can'l burnt out, an' the moon rose high, ere she let me take her in beside the kitchen fire. I pushed aside the gathering coal and threw on some peat to make a "low" (that's a blaze, I mean), an' I forced her to swallow some hot toddy (that's whiskey an' water, though I dare say ye ken that). It did her a power o' good, though she pushed it away an' called it horrid stuff.

I put the best lavender-scented linen sheets I could find in the kist on my bed, an' when I got her finery off and she was resting, she told me she had pleaded feeling ill at the ball an' so got away. "He was enraged at Grouse (her pet dog) yesterday," says she, "because he wouldn't follow him, so he kicked him, oh! so savagely. He denied it," she said, wi' her eyes full o' tears, "but I saw him do it. He is cruel an'—an' I've made up my mind I shall not marry him. I have written Jack to come here for me. The other will follow me, I know, to-morrow morning to this cottage, and, Nursie," says she, gripping my hand hard, "you'll hide me so he shall not find me, won't you?"

And says I, "That I will!"

* * *

I kent there wad be a stramash up at the house next morning when they found out Lady Marjorie had fled. So I kept looking oot an' along the straight road. I saw Sir Francis Anstruther come driving in his high phaeton, sort o' reckless, for it was just about the hour he should have been married—a beautiful morning—the sixteenth of May—though there's a common sayin' in Scotland, "Married in May, repent it for aye," because Mary Queen of Scots was married in that month.

Up I ran to my lady, quick as lightning! She'd had a good breakfast—I saw to that—an' it had strengthened her a bit.

"Haste ye, my lady," says I, "for there's somebody comin' ye'd best no see. Leave him to me. I'll manage him."

She understood—an' just for one second I was feared she would faint; then she pulled herself together, and, thanks to that blessed box-bed, by the time Sir Francis reached our cottage door no' a trace o' the bed, far less Lady Marjorie, was to be seen. Jist like a piece out o' the "Arabian Nights"—sort o' magic.

Scotch folk are aye fond o' a joke, so I mind whispering, as I closed the doors, "Ye may keek through the chinks, but dinna sneeze."

I felt gey shaky, though, when that fierce rat-tat sounded, and in he strode without as much as "Good mornin'."

"What's your wull?" says I, dropping him a curtsey; an' he snapped out: "What, my good woman?"

"What's your pleasure, sir?" I repeated. An' wi' that he says, "Pleasure be," something or other (he used a word that's no in the dictionary, I'm sure). An' then he began to rampage up an' down the floor like a daft body, saying what a trick had been played him, at the eleventh hour, by that little jade, an' miscalling oor young leddy in an awfu' way.

"She's in this cottage," he says, "so tell no lies about it."

"If she's in this cottage," says I, "ye'd better find her; an' as for telling lies, I leave that for folk that isna above it."

His face grew as dark as my dress. He saw he'd met his match.

"Hoity-toity!" he says. "Ye're not afraid to speak up to your betters, my good girl. Your manners need improving!"

"Tastes differ," I made answer, feelin' as if I could have struck him, "but I've met nobody better than mysel' since yesterday."

He laughed—an' then he asked if he might look thro' the house, an' poked his nose here an' there an' everywhere.

I was a bit put out when he noticed a wee white satin slipper lying ahint a chair, but I says, "My mistress left that the last time she was here." (I couldna tell a lie aboot it, though I'd have gone through fire an' water for Lady Marjorie.) "It's a pattern for the silk stockings I'm gaun to knit for her ladyship," says I, for I was loath to mak' him suspicious; but I spoke the plain truth all through.

He blustered an' swore a wheen after that. Myt little did he ken how near what he was looking for was to him. I had never favored him, or I might hae felt sorry, for I suppose he loved his promised bride in his ain way.

Weel, to mak' a lang story short, awa' he went after a while, sair crestfallen. He flung a crown piece on the table as he was going. "There's five shillings for your civility, my good girl," says he, but I up and sent it spinning after him, I was that thrawn. "Keep your crown piece! It might be something like yersel'—no quite sterling," an' I sneckit an' bolted the door. And then—

There's no muckle mair to tell. Seems to me now, when I look back on my long life, I've seen a good deal of sadness an' mirth too, but I dinna think I ever laughed as heartily as when I shut that door ahint Sir Francis Anstruther. My certie! but I laughed till the tears ran down my face. Maybe it was wicked—ye see, 'twas the way we two had outwitted him that tickled me. My conscience was clear, though—folk like him dinna die for love for ithers—they're ower fond o' themselves. An' siller?—why, siller's mighty convenient, but it's a heart o' gold a woman should look for, no a purse o' it. Love o' money is a cryin' evil these days o' gold mines, an' speculatin', an' stocks, that the papers talk aboot.

I must be stoppin', an' I'll only add that when a true and gallant gentleman came for his bride he found her—and she, her heart's desire.

* * *

And Miss Marjorie, that's their eldest daughter (her mither's livin' image), she ofttimes comes an' has a crack wi' me, as my lady used to. I'm going doon the hill noo, an' it cheers me, ye see. Gey often she'll say, "Ebbie, sing me 'Jock o' Hazeldene,'" an' then she laughs kind o' slyly—for I'm thinkin' she kens an auld body's story.

IN CASE OF WAR

Many Ladies Want to Go to Japan as Nurses

Ottawa, January 13.—Some applications have been received by the Militia Department from ladies who desire to go to Japan as nurses. One of the applications comes from New York. Evidently the idea has got abroad that nurses are being sent by the Government to Japan. The Department is replying in each case that the Government is not sending any nurses to Japan and has no intention of doing so.

EFFICIENT FIELD BATTERIES

Ottawa, January 13.—The general efficiency return of Canadian field batteries inspected during 1903 has just been issued by the Militia Department. The figures show that out of 840 marks obtainable, the Second Field Battery leads with the splendid total of 694, which represents the high average of 82.6 per cent. The batteries in order of merit are: 2nd, Ottawa, 694.66; 14th, Midland, [illegible].61; 16th, Guelph, 674.54; 3rd, Montreal, 662.8; 4th, Hamilton, 662.20; 9th, St. Catharines, 648.22; 5th, Gananoque, 554.22; 11th, Guelph, 556.21; 13th, Winnipeg, 552.2; 15th, Shefford, Que., 503.7; 12th, Newcastle, 501.3; 17th, Sydney, 493.1; 10th, Woodstock, 462.7; 1st, Quebec, 444.9; 8th, Toronto, 440.65.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,500,000.00. Par value $1.00. Full Paid and non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 5000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,000,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 150 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable galena ore, the point of intersection being 100 feet beneath the surface. We have 300 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS.*

C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not A Gamble
but a
Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a smal block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO.,
FISCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.

IT CURES

Colds

Coughs

Catarrh

Asthma

Bronchitis

Pneumonia

Consumption

Actual size.

CATARRHOZONE INHALER is the greatest invention of the century for the cure of diseases of the respiratory organs. It is sure to cure because it cannot fail to reach the germs in the air passages that give rise to the diseased conditions.

The antiseptic vapor of Catarrhozone is inhaled at the mouth, and after permeating the air cells and passages of all the respiratory organs, is exhaled slowly through the nostrils. It goes everywhere the air we breathe goes, and is certain to reach the seat of the disease no matter how remote.

AN ORDINARY COLD lasts about one day if Catarrhozone is inhaled five minutes every hour.

CATARRH and BRONCHITIS are relieved at once and cured for all time, by the persistent use of Catarrhozone.

CATARRHOZONE OUTFIT consists of a beautifully polished hard rubber inhaler and sufficient liquid for recharging to last two months. Costs $1, or trial size 25c. Sold by Druggists and N. C. POLSON & CO., Kingston, Ont.

STATIONERY

When in need of anything in the line of commercial stationery, visiting cards, etc., leave your order at the Times job department. Workmanship unexcelled.

Home Circle Meeting

Bro. J. M. Foster, B.A., of Toronto, Supreme Secretary of the Order of Canadian Home Circles will attend the meeting tonight of Peterborough Circle, No. 123, in the Langton Foresters' Hall, George street, (over the Bankrupt Stock store.) There will be an installation of officers and initiations. All members are requested to attend. Bro. W. G. Walker, of Winnipeg, will also be present. Refreshments served during the evening.

No Dull Season

Formerly the weeks following the holidays were regarded as a dull season. Thanks to the influence of advertising, there is no longer a dull season. Every enterprising merchant has a variety of goods to be disposed of at a bargain, and his announcements fill the store with people who have learned to save money for bargains. These people search the advertising columns more eagerly now than during the period of holiday trade. All progressive business men use the advertising columns of The Times.

A BIG GAME OF HOCKEY AT THE RINK LAST NIGHT

Hundreds who Sought Admission were Turned Away--Belleville Defeated by 7-4

Peterborough—7

Belleville—4

The much talked of hockey match is over and the 3000 people who gathered at the rink last night to witness the game saw one of the hardest, fastest and most exciting games of hockey ever played in Peterborough. It was a stubbornly contested game and the winners are deservedly due the honors won by them. That last year's champions of district No. 2 have a crack team, is putting it mild, but Peterborough's seniors proved themselves to much for the visitors.

Never before did the spectators seem have so much at stake and the supporters of both teams (for about 300 people came from Belleville) strained every nerve and went fairly wild and at any particularly critical stage of the game the uproarious noise could be heard for blocks around and any visitor who happened to strike town about the time of the game would think that Peterborough had been turned loose. The match was one of the greatest battles for supremacy ever witnessed in Peterborough and no small amount of endurance was displayed by the players of both teams who played like demons never letting up until the sound of the bell for time. The Petes went on the ice as slight favorites, but the betting was at even money, although a few gave odds at 5 to 4, a number also betting that Peterborough would win by 2 goals.

THE CROWD ARRIVED EARLY.

Long before the doors were opened the small boy to the number of about 100 had gathered at the entrance eager to have just a "look in." About 7.30 the people began to crowd in and long before eight o'clock every bit of available seating capacity was taken and the people were packed in like sardines, but they were a good natured crowd and did not seem to mind it. They were there to see the game. They were very patient for a wait of over 40 minutes took place—an hour or more for some who had reached the ice shortly after seven o'clock to obtain a seat—the game being called for 8.15 but did not start until a few minutes to nine, the Belleville special which carried the players and supporters being late.

About five minutes to nine the players came on the ice, the home team making their appearance first and were greeted with great applause. From the sides words of encouragement were shouted by the excited throng of spectators. Then Belleville came on and received their share of the ovation.

The visitors were slightly heavier than the home team being a very husky bunch. They were without the assistance of McGuire, who was replaced by Burns at centre who made a very creditable showing.

Peterborough played the same team as played at Picton with the exception of Morgan, who was unable to play. Chris. Graham going on to fill up the vacancy and filled the position creditably.

The locals went on the ice determined to win—at the same time knowing what they were up against and what was expected of them to defeat the visitors. The combination of the forwards was like lightning and close and accurate and when they broke away—look out for the ville net! Their shots were also swift. The defence was almost impregnable and to pass Cavanagh and Howell Belleville could not figure how it could be done. Mercer played an excellent game in the nets having a very keen eye.

Belleville passed long, sometimes taking in about three-quarters the length of the rink and time after time their passes were without effect, as Cavanagh and Howell were always there to eat them up, or the forwards were hot after them to spoil anything that looked dangerous. The visitors' defence was strong, but to cope with the fast forwards of the Peterborough seven kept them going. Even the famous "Reddy" McMillan at point, wore that worried look when they came to fast for him.

THE FIRST GOAL.

But the game is going! Whitcroft has the puck and down to the Belleville goal it goes, a pass to Graham, and in the net it lands and the crowd goes wild—but the puck went in from an off side, which when learned by the spectators subsides the tremendous uproar, which only commences again, for Whitcroft on a pass from Graham scores the first goal for Peterborough in 30 seconds, and Oh, my, the noise was deafening. In three minutes it was Belleville's turn, the rubber dropping over the back of the net and rolled in. The game was just nicely started but Peterborough was playing winning hockey and their combination was grand, shot after shot being poured in on Winchester, who saved the score from being much larger against the visitors. The game was delayed for a few seconds by Fred. Whitcroft breaking his skate, but a Belleville player went off to even up, and the game was again in progress.

In this period Cavanagh and Roy Armstrong were sent to the fence for two minutes as were also two of the visitors for slight offences. The referee, Dr Wood, of Toronto, let nothing pass, and as a consequence players decked the boards frequently. The rubber went down the ice into Belleville's territory, and on a hot shot from H. Armstrong the puck went in. Time, 9 minutes. Score 2—1.

The fourth and fifth also went to Peterborough, Chris Graham and Roy Armstrong locating the nets in 5 minutes and three-quarters of a minute respectively. This ended the scoring in the first half and Peterborough enthusiasts were simply mad with excitement, saying nothing of how the Belleville crowd felt. In this half seven were penalized for slight offences—3 of the visitors and 4 of the locals.

In the second half Belleville started out at a terrific pace, but the locals would not be outdone and soon took matters in their own hands, and in three minutes Whitcroft, who was playing a brilliant game, scored on a pass from Roy Armstrong. Score 6—1. Cheering which was loud and long then came from the spectators. Belleville then went at it hard. All through the match would come the cry from the audience, "Look out Eddie," or "look out Bill," and they did look out, for up the ice it would come and then, "Shoot 'Mag'" or "Shoot Harold" for the forwards continued to land it at the nets, but "Reddy" McMillan sent it down the ice and Belleville scored. Time 5 minutes. Score 5—2.

Peterborough scored two more in the last half, Whitcroft and H. Armstrong doing the trick, the visitors also adding two to their number, making the score at the finish 7—4.

This ended one of the fastest and cleanest games of hockey ever played in Peterborough.

The result was a great surprise for the Belleville people who were quite confident of their team's success. Towards the close of the last half the ice got soft and sticky and had a tendency to tire the players, although the Belleville team, who practice day and night, and pushed freight cars around before the season opened, were in great shape, but the players of both teams endured the strain well. Referee Wood, of Toronto, handled the players well and penalized freely, thus keeping the game free from roughness and making both teams play hockey.

For the visitors, Winchester, in goal, played a star game and stopped shot after shot, which otherwise would have punctured the net. McMillan, at point, also played an excellent game and made frequent rushes up the ice. He was the most dangerous man the visitors had. Towards the end of the match he made a rush down the ice, but on meeting the invincible Howell fell and had to be carried off the ice, Graham going off with him to even matters up. Burrows and Kennedy also played well for the visitors, but their forward line lacked the speed the locals had.

On the home team it would be hard to distinguish one player more than another. Every man played a horse of a game. Mercer, in goal, took almost everything thrown at him despite the fact that he has been laid up from injuries received at the game in Picton. Eddie Howell, at point, is hard to beat, and understands how to play his position. He is an excellent stick handler and made many onslaughts on the visitors nets. Cavanagh, who played cover-point, was a hard man to get past, checking hard and using his body well. He also figured prominently in rushes up the ice to land on the nets. Harold Armstrong, as rover, never played a better game. He acted as playing captain of the team in the absence of Harry Morgan. "Mag" Whitcroft at centre, Roy Armstrong and Graham on the wings, are a trio hard to beat and did excellent work, their combination being very sure and speedy and close.

SUMMARY OF GOALS.

Following are the goals and the time in which they were scored by the respective teams;

First Half.

1 Whitcroft, Peterborough, 1 minute.
2. Belleville 3 minutes.
3. Peterborough, H. Armstrong, 9 minutes
4. Peterborough, Graham, 5 minutes
5. Peterborough, R Armstrong, 3-4 minute

Second Half.

6. Peterborough, Whitcroft, 3 minutes
7. Belleville, 5 minutes.
8. Peterborough, Whitcroft, 10 minutes.
9. Belleville, 1 minute
10. Belleville, 4 minutes.
11. Peterborough, H Armstrong, 3 minutes

THE TEAMS.

The following was the line-up;

Belleville		Peterborough
	Goal.	
Winchester		Mercer
	Point	
McMillan		Howell
	Cover-point.	
Brown		Cavanagh
	Rover	
Burrows		H. Armstrong
	Centre.	
Burns		Whitcroft
	Right Wing	
Kennedy		R. Armstrong
	Left Wing.	
Marks		Graham
	Goal Umpires	
A. McFee		H. R. H. Kenner
	Timekeepers.	
G. McFee		E. Wasson

Referee—Dr. Wood, of Toronto.

Picton defeated Port Hope at the latter place last night by 13—3.

GIVES "GO"

Food That Carries One Alone

It's nice to know of food that not only tastes delicious, but that puts the snap and go into one and supplies staying power for the day.

A woman says; "I have taken enough medicine in my time to furnish a drug store but in later and wiser years I have taken none but have depended, for the health I now enjoy, on suitable and sustaining food of which I keep on hand a tested variety, plain but nourishing.

"Of these my main dependence is Grape-Nuts, especially if I have before me a day of unusual effort either mental or physical. In this case I fortify myself the first thing in the morning with about 4 teaspoonfuls of Grape-Nuts moistened with cream and not much else for breakfast and the amount of work I can then carry through successfully without fatigue or exhaustion is a wonder to those about me and even to myself.

"Grape-Nuts food is certainly a wonderful strengthener and is not a stimulant for there is no reaction afterwards but it is sustaining and strengthening as I have proved by long experience." Name given by Postum Co., Battle Creek, Mich.

There's a reason four teaspoonfuls of Grape-Nuts and cream will add more strength and carry one further than a plateful of coarse heavy food that is nearly all waste. Grape-Nuts food is condensed, pre-digested and delicious. It contains the parts of the Wheat and Barley grains that supply the rebuilding parts for Brain and Nerve Centres.

Look in each pkg. for a copy of the famous little book, "The Road to Wellville."

THE WATERS OF THE OTONABEE

Meeting of the Conservation Association Called for Jan. 21

The Times is requested to state that a meeting of the members of the Trent Water Conservation Association will be held on Thursday, January 21st, at 10 a. m., in the Council Chamber here, to receive the report of the deputation to the Ontario Government, and to arrange, if possible for the better preservation of waters in the northern reservoirs this coming spring.

Vessel owners are particularly requested to be present.

A MAN CAN'T swim in shackles. It isn't a question of his winning a race, but a question of being able only to keep afloat. The man who is suffering from malnutrition is like the fettered swimmer. His stomach and its allied organs of digestion and nutrition are diseased. It is not a question with him of winning in the race for business but of simply keeping up under any circumstances.

Whatever disease affects the stomach it is affecting also the blood and the health of every organ of the body. For blood is only food converted into nutrition and nutrition is the life of the body and every organ of it.

Doctor Pierce's Golden Medical Discovery cures diseases of the stomach and other organs of digestion and nutrition. It purifies the blood and enables the perfect nutrition of the body which means perfect health.

"For six long years I suffered with indigestion and my liver and kidneys, which baffled the best doctors in our country," writes E. L. Ransell, Esq., of Woolsey, Prince William Co., Va. "I suffered with my stomach and back for a long time, and after taking a 'cart-load' of medicine from three doctors I grew so bad I could hardly do a day's work. Would have death-like pains in the side, and blind spells. I began taking Dr. Pierce's Golden Medical Discovery and 'Pleasant Pellets.' Before I had taken half of the second bottle I began to feel relieved. I took six more bottles and used them, and am happy to say I owe my life to Dr. Pierce."

Accept no substitute for "Golden Medical Discovery." There is nothing "just as good" for diseases of the stomach, blood and lungs.

The Common Sense Medical Adviser, 1008 pages, in paper covers, is sent free on receipt of 31 one-cent stamps to pay expense of customs and mailing only. Address Dr. R. V. Pierce, Buffalo, N. Y.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporters on Their Rounds

—All Saints choir will practice on Friday evening at 7.30 o'clock instead of Wednesday night of this week.

—Play for the district championship will open at the Curling Rink today. Eight clubs will compete and the winner will play in Toronto for the Ontario Tankard.

—A meeting of the Women's Auxiliary of St. Luke's Church will be held this afternoon at 3.30. The Girls' Mission Band meets at 4.15 today in the school room.

—The evangelistic services at the Park street Baptist church are full of interest and blessing. Subject for to-night "Adman and Zeboin." These are Old Testament subjects illustrating and enforcing New Testament truth.

—A service of praise was held in the George street church last night.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Dr. McWilliams, Keene, was in town yesterday.

—Mr. Stephen Nicholls, of North Smith, was in town yesterday attending the convention.

—Lindsay Post—Mr. Wes. Wilson, of Messrs. Creagman & Co.'s staff, Peterborough, visited his parents in the south ward.

—Mr. Arthur Fletcher and daughter, Miss Muriel Fletcher, of Goodlands, Manitoba, are visiting his parents and friends at Bensfort.

—Dr. Fred H. E. Burnham and wife, who have been for the last two years in Europe are visiting Mr. W. H. Cluxton. Dr Burnham will proceed to Winnipeg where he will reside in future. He returns fully equipped in the practice of surgery.

THE DEFENCE COMMITTEE A BOND OF EMPIRE

Premier Balfour is Sanguine of the Successful Result of New Step

THE GREAT AIM OF THE BRITISH GOVERNMENT

Is to Leave Canada Free, But to Offer Advantages to Her Troops

London, January 15—Premier Balfour's speech at Manchester yesterday is calculated to make a stir in Canada. He set forth a closer defensive union of Canada and Great Britain as being equally feasible with fiscal union. He related how he, as head of the new committee of imperial defence, consisting of the chief members of the British Cabinet and the permanent heads of the War Office and Admiralty, had invited Sir Frederick Borden, when in London to discuss the Canadian problems which had brought him to England, not with the War Office alone, but with this Imperial committee; not as witness, not as a supplicant, but as a member. Sir Frederick Borden had agreed and Mr. Balfour states that the discussion was most useful, friendly and fruitful.

MR. BALFOUR IS HOPEFUL.

For the first time, declared Mr. Balfour on that particular date in the history of the Empire machinery was found by which a representative Minister of one of the colonies sat with us to discuss common questions of imperial defence. I am sanguine enough to hope that this meeting will be found of general, indeed universal application, in the not distant future, making the machinery we now have in operation a bond of union so far as defence is concerned between the mother Country, the Colonies, India, and any portion of our extended Empire."

MINISTRY'S INTENTION.

It is significant that Mr. Balfour made this pronouncement despite the published reports from Ottawa that the Canadian Government has decided to reject the suggestion of Mr. Arnold-Foster that the Dominion raise a regiment to send to India. The cablegram says Sir Wilfrid Laurier fears militarism and does not wish to take any step that could afterwards be construed as making it obligatory on Canada to participate in Great Britain's wars or send troops abroad. I have good authority that Mr. Arnold-Foster and the British Ministry generally had no intention of asking Canada to undertake any such obligation. Whatever Canada does will be quite voluntary, and entirely in her own interests as a part of the Empire without the slightest compulsion from the British authorities.

THE INDIAN SUGGESTION.

The Indian suggestion was one of several proposals made simply in order to enable the Canadian officers and men to perfect their military education, if they so desired in the most economical fashion India paying the bill and thus equipping them for the highest military commands in Canada and making them competent to defend Canada's own interests against all comers. The last though of the British Ministry would be to attempt to force Canada one inch further than she herself desires to go. In fact it is clearly realized here that Sir Frederick Borden's action can only prove the germ of a new advisory bond of union betwen the Colonies and the Mother Country, if the British Ministers eschew Mr. Broderick's had example and leave the pacemaking in these phases of Imperialism to Colonial Ministers.

RUSSIA DEFIES THE WORLD.

Lets America Open Chinese Ports, But There Concessions End

Washington, Jan. 14—By an authority conversant with Russia's position in the far east and her attitude toward American interests there, the Associated Press today was given a statement which may be regarded as an official declaration of the Czar's representatives.

"In view of the wide circulation given reports without basis, in fact," says this informant, "charging Russia with hostility to American interests in the far east, it seems expedient that the attitude of Russia should again be defined. Russia has repeatedly expressed her intention of assisting in the development of commercial interests in Manchuria, knowing that the Chinese policy of the United States government is guided merely by an aim to develop trade, and not by political ambition. Russia has shown her good faith by refraining from any action which would endanger the conclusion of the American-Chinese commercial treaty signed Oct. 8.

"That treaty has been ratified by the throne at Pekin and thus through the medium of the United States the important ports of Mukden and Antugn in Manchuria are opened to the commerce of the world. This is the 'open door' which has been a part of American and Russian policy since the 'Boxer' outrages which necessitated the intervention of the owers and which materially changed conditions in Manchuria.

"Russia will certainly not submit to dictation at the hands of any power as to the protection of her legitimate interests in Manchuria.

FORBIDS CONDITIONS LIKE SHANGHAI'S.

"Negotiations are in progress between St. Petersburg and Pekin in the effort to reach an agreement adequately protecting the special or predominant influence exercised by Russia in Manchuria, which has been recognized by all the powers signatory to the peace protocol verbally or in writing. At the time of the signing of that convention it was Russia's hope that she could with safety withdraw her forces from Manchuria last October and leave the protection of her interests to China.

"Meantime, however, it was clearly demonstrated that the guarantee offered by China was wholly insufficient and it became necessary for the Russian government to ask additional guarantees. Until these have been arranged for the Russian government cannot be expected to withdraw from Manchuria and thus menace the many Russian lives and forfeit the $150,000,000 which we have spent there in the civilization and development of that province.

BOUND TO CONTROL LAND NEAR SIBERIA.

"Russia is ready and anxious to stimulate the development of foreign commerce in Manchuria. The growth of trade means the success of the Siberian railway. Russia believes, however, that this commercial development is possible without the establishment of spheres of influence in the open ports. Russia's political influence in this territory, which lies on her borders is, and must be considered predominant, and its effectiveness would be impaired by the creation of any form of foreign political influence in the shape of extraterritorial government or municipal control and regulation of certain districts within these open ports similar to conditions such as, for example, exist at Shanghai. But no trouble is anticipated on this score, as the American-Chinese commercial treaty providing for the setting aside of certain districts in Mukden and Antung as places of international residence and trade and the provision for their regulation is not considered as tending toward the establishment of a system like that surrounding foreign interests at Shanghai.

"Russia does not propose to discuss the negotiations now in progress. But it should be realized that she is availing herself of every reasonable means to reach an agreement by diplomacy.

"It will be an interesting bit of information to the Russian government to know the primary object of the Tokio negotiations so far as Japan is concerned in the protection of American and English interests in the far east. Russia had supposed that Japan was influenced by less unselfish motives."

REFUSE LOAN TO RUSSIA

Paris Banks Decline to Furnish Money to Czar's Government

New York, January 15.—It was learned positively today from several trustworthy sources that Russia tried to negotiate a war loan with the Paris banks and failed. The French banks offered no encouragement whatever and intimated that it would be useless to consider the matter at this time. The three Paris banks mentioned as having declined to consider a Russian loan are the Credit Foncier, the Credit Lyonnais and the Comptoir d'Escompte.

International banking houses with close European affiliations were in constant communication today with correspondents at prominent foreign centers over the far eastern situation and the likelihood of an early declaration of war. While the trend of opinion favored an early outbreak, some usually well-informed quarters intimated that the case must not be regarded as hopeless, since no one in this country could understand the enormous pressure that was being exerted to bring about a peaceful adjustment of existing differences.

Good Year For Game

The Ontario Game Commission held a meeting in Chief Game Warden Tinsley's office, Toronto, on Tuesday, to consider their annual report. The reports from the deputy wardens indicated that the past year had been a good one for sportsmen as game was plentiful. The complaints for illegal hunting were not so numerous as usual. The report will be printed and submitted to the Legislature.

EVERYBODY READS THE TIMES.

NOVEL MINER'S STRIKE

The Men Refuse to Carry Their Own Picks

Amherst, N. S., January 15.—The 200 men employed in the Chignecto coal mines in Cumberland County have gone on strike because the management refuse to send their picks into the pit for them. The management hold that each man should carry his own pick the same as is done in other collieries in Nova Scotia.

IN BRITISH TERRITORY

Immense Mineral Wealth Near Portland Channel

Ottawa, January 15.—The receipt at the Canadian Exhibition offices of several collections of minerals from the islands and mainland in the vicinity of the Portland channel, Observatory Inlet, Port Simpson, and Kitimat Arm, denotes that the country abutting on part of the territory recently in dispute between the United States and Canada is very highly mineralized. Sets of minerals from all the properties will be included in the Canadian mining exhibit at the St. Louis Exposition.

NEED NOT GIVE NAME

Newspaper Correspondent May Remain Anonymous

Mr. Justice MacMahon, at Osgoode Hall, delivered a judgment of considerable interest to newspaper publishers, when he held that an editor was not bound to reveal the identity of a writer whose contribution is called into question.

The Sutton correspondent of The Newmarket Express-Herald, in his weekly letter to that paper, made a statement which Miss Eva Marsh, of Sutton, declares reflected unfavorably upon herself. A suit against the paper followed, and yesterday Mr. T. H. Lloyd moved before Judge MacMahon for an order compelling Mr. McKay, the editor, to disclose the name of the writer. Mr. S. B. Woods appeared on behalf of the editor, and the court declared that such information was private and confidential, and need not be disclosed.

AMONG THE LOST

A Lady Well Known in Peterborough on Pacific Steamer

In the list of those lost off the steamer Clallam appears the name of Mrs. S. E. Bolton, Alberta, who was on her wedding trip. A year or two ago S. Edward Bolton, of the legal firm of Jackson & Bolton Gananoque, went to Alberta and entered upon the practice of his profession in that district. A few weeks ago friends in Gananoque received announcements of his marriage, and it is feared that it is his bride who lost her life. The despatches state that Mr. and Mrs. Bolton were returning from a honeymoon trip to California. Her husband saw her placed in the second boat and then stood back to take his lesser chances with the other men. He saw the boat swept away in the darkness and engulfed. He himself was picked up out of the sea by the Holyoke's crew an hour later.

The deceased lady had a number of friends in Peterborough, having visited this town on several occasions, the guest of her friends.

THE TWO ROUTES

Toronto Star Has Something to Say on Trent Canal Matter

Toronto Star; Two possible routes for the connection of the Trent Valley Canal with Lake Ontario are at the present moment engaging the attention of the interested localities. One of the proposed routes is via Trenton and the Bay of Quinte; the other from the westerly end of Rice Lake to Lake Ontario at or near the town of Port Hope. The local public are each strongly contending in favor of their own route and advancing such arguments as the circumstances appear to warrant. But the question does not seem to us to be a purely local one; on the contrary, it materially concerns the general public outside of those locally interested.

If the route selected should be by the Bay of Quinte, it is urged that the canal will serve no interests east of the County of Hastings, while on the other hand, if the canal be connected with Lake Ontario at or near Port Hope, the Trent Valley canal system will not only confer a much greater benefit upon the country served by the canal, but will also benefit Western Ontario. There is a very considerable interchange of trade between Toronto Hamilton, and other trade centers and Western Ontario on the one hand, and on the other Peterboro, Lindsay, and the districts connected with the Trent Valley Canal waters. At present the transportation trade between these two districts is conducted wholly by rail. If the canal connects Lake Ontario at Port Hope, the advocates of this route argue that during the period of navigation trade will have the advantage of a competitive water route, with a most beneficial effect on regulating railway rates, whereas if it should happen that the canal outlet is made at the Bay of Quinte, then the whole trade of that district will be with the East.

It is contended by Port Hope that their route is the cheaper and the better one. If so, it should, in the general public interest, be adopted. In the meantime, there should be a most thorough investigation by competent and disinterested persons as to the merits of the two routes, or any other possible routes that may be suggested, so that no mistake be made. A large sum of public money has already been expended in the construction of the Trent Valley Canal, and a considerable sum must yet be expended to bring it to the front. We submit, therefore, that the interests of the general public should be paramount to local considerations, and if the Port Hope route is feasible and reasonably cheap, and at the same time is most useful, it should in the interests of the general public be selected.

WILL FILL VACANCIES

Eight in the Commons and Three in the Senate

A SESSION NOW CERTAIN

Hon. Mr. Emmerson Sworn in Minister of Railways and Canals

(Special to The Times.)

Ottawa, Jan. 15—Hon. Mr. Emmerson has entered on his duties as Minister of Railways and Canals. This gives New Brunswick a representation in the Cabinet.

THE VACANCIES.

There are now eight vacancies in the Commons, and three in the Senate. In Mr. Emmerson's case it is not likely that there will be any opposition in Westmoreland. Moncton is the principal town in the riding, and as it is the headquarters of the Intercolonial Railway it would be hopeless to offer any opposition to his return upon accepting a portfolio.

The other vacancies in the Commons are, Bruce East, caused by the death of Mr. Cargill, Hochelaga, Mr. Madore being appointed a judge; Lambton East, owing to the death of Mr. Simmons; Montmagny, on account of the death of Mr. Martineau; St. James, Montreal, Mr. Brunet's election being declared void; Queen's West, Prince Edward Island, by the death of Mr. Farquharson, and St. John, N.B., through the resignation of Mr. Blair.

The three vacancies in the Senate are, one in Nova Scotia, to replace the late Senator Dickey; one in Ontario to replace the late Dr. Landerkin, and one in Quebec for the seat of the late Senator Cochrane.

Mr. Curry, who was appointed for Nova Scotia before the last session of Parliament, has not yet taken his seat in the Senate.

A SESSION CERTAIN.

The Times' correspondent has it from high authority that the House will be called together in February for a short session previous to dissolution.

"MISUNDERSTOOD"

A New Book by Evangelist H. D. Kennedy of Peterborough

We are in receipt of a copy of Evangelist H. D. Kennedy's book entitled, "Misunderstood." The Christian Guardian says:

Mr. Kennedy is pretty well known throughout the Methodism of Ontario, having labored very successfully in our churches for a number of years. Though we had known him for some time, and been associated with him to some extent in evangelistic work, we confess to a feeling of pleasant surprise in reading the pages of this little book. Its six chapters have this unity of trough, that they look at the Master in the different phases of his life and work as the Misunderstood One, aiming not only to give a better understanding and appreciation of what He was and did, but also to bring home to our own life many lessons of wisdom and of comfort. There is clear thinking and earnest application of truth, with a certain simple eloquence of expression that makes very pleasant reading indeed.

For sale at The Times Bookstore. Price paper cover, 50c.; cloth, 75c.

LIVE LAKEFIELD LOCALS

Items of Interest From Our Pretty Northern Village

—Mr. R. Bravender, who was in Lakefield, attending the annual meeting of the shareholders of the Portland Cement Co., returned last week to Hudson, N.Y.

—Miss Leyelle, who passed the recent Model School examinations held in Norwood, has been appointed teacher of the Smithtown school.

—Mrs. Kerlin, of Calgary, and Mrs. H. M. Davidson, of Winnipeg, are visiting their parents, Mr. and Mrs. C. Quinn, of Lakefield.

—The funeral of the late Mr. Samuel Nelson took place Sunday afternoon at 2.30 and was one of the largest seen here in many years. The service was held in the English Church, the Rev Mr. Warren officiating. The L.O.L., of which deceased was a member, marched in the procession. Mr. Nelson was actively engaged in business in Lakefield for many years, and will be missed by a wide circle of friends.

—A meeting of the village council was held in the Town Hall Monday evening.

—A sleighload of young people from Warsaw drove down to Lakefield Tuesday, and spent the evening at Darcy's skating rink.

—Mr. N. Nichols has purchased from Mr. T. Z. Webster that desirable property at the corner of Queen and Reid streets. The corner shop is to be used by Mr. Nichols as a barber shop, and is being renovated by Mr. E. J. Quinn.

—At Darcy's skating rink Monday night, there was a hockey match between the Peterboroughs and the local team. Though the visitors were too strong for our boys, the spectators were well pleased with the game.

—Mr. John Findlay, of Norwood, the Liberal nominee for East Peterborough was in town Monday.

—Several of our local sports took in the Belleville-Peterborough hockey match at Peterborough Wednesday night.

—Mr. Stewart Fraser, who has been ill with rheumatism since last September, is now, we are pleased to say, convalescent.

—Mrs. F. M. Dela Fosse, who has been indisposed for some time, left Thursday afternoon for Toronto, where she will undergo treatment.

—There was a meeting of the Curling Club in the Town Hall on Tuesday evening. The skips and rinks for the season were chosen.

—Mr. John Cooper's new residence on Queen street is now practically completed. It is one of the most commodious and up-to-date houses in the village. Mr. James Moore, of Lakefield, was the architect and contractor.

—Two rinks from our local Curling Club drove down to Keene Wednesday morning. The skips were Messrs. R. C. Strickland and W. J. Baptie. Mr. Strickland's rink was defeated by 3 and Mr. Baptie's by 4.

RESOLUTION OF CONDOLENCE

Passed by Court Peterboro Canadian Order of Chosen Friends

At a recent meeting of Court Peterborough, Canadian Order of Chosen Friends, the following resolution of condolence in the death of Zetta Jamieson, daughter of Mr. and Mrs. F. J. Jamieson, members of the Court, was passed:—

Mr. and Mrs. Jamieson;

Dear Friends,—We, the members of the C.O.C.F., Court Peterborough, extend to you our deepest sympathy at your very recent bereavement. We do not say sad bereavement as we rejoice to know that some are entertaining angels unawares.

She is not dead, the child of our affections,
But gone unto that school
Where she no longer needs our kind protection,
But God Himself doth rule.

And in the lonely hours through which we must all pass, may you feel that underneath are the everlasting arms of God, who will bear you up to meet your loved one.

Signed on behalf of Peterborough Council.

M. A. ANDERSON, C.S.

Local Sporting News.

The Peterborough II team will play Lakefield here in the return game of the T.V.L. series.

Port Hope juniors play here next Monday. The seniors go down to Port Hope the same evening, and Belleville plays in Picton.

The standing of the teams in this district is as follows.

	Won.	Lost.
Picton	3	0
Peterborough	1	1
Belleville	1	1
Port Hope	0	1

The P.C.I. hockey team challenges the senior team of St. Andrew's Junior Guild to a friendly game on the Brock street rink as soon as possible.—R. Todd, Secretary.

—The receipts of Wednesday's hockey match amounted to $540.

SNOW FLAKES VS. WEST ENDERS.

The West Enders and Snow Flakes came together at the Brock street rink last night. The young juveniles went at it hard and gave quite an exhibition of how the game should be played. The half time score was 1—0 in the Flakes' favor. In the second half the West Enders started out to do or die, and before the expiration of time had scored two goals, the Flakes failing to add to their number. Score 2-1.

CHALLENGES.

The Iroquois hockey team challenge the Snow Flakes to a game of hockey, for Saturday, Jan. 23rd.—A. Cameron Peterborough.

The Young Nationals challenge any team under 14 years old. Omer Giroux.

NATIONALS VS. GILMOUR STREETS

On Friday night the Young Nationals beat the Gilmour Streets by 2—0. The game was hot from start to finish. The Young Nationals' combination was of high variety. The first goal was scored by M. Nicholl on a combination down the ice between O. Giroux, Coughlin and Nicholl. The next goal also went to the Young Nationals, O. Giroux doing the trick on a pass from Coughlin. The Gilmour streets lacked combination and shooting ability. The line up was—Young Nationals—Goal, L. Giroux, point, B. Fowler; cover-point, F. Hefferman; forwards, E. Coughlin, W. Nicholl, C. Conroy and O. Giroux. Gilmour Streets—Goal, A. Dawe; point, J. O'Brien, cover point, R. Robertson; forwards, G. Gormin, G. Cummings, T. Gormin, C. McNicholl.

DISTRICT NEWS

KEENE.

—Mrs. M. Galvin, who has been visiting her father for a few weeks, returned to her home in Toronto on Tuesday.

—Miss Mabel Harrison returned to her studies at the Whitby Ladies College, after spending the holidays with her parents.

—Mr. C. Bell spent a couple of days with his father last week.

—Mr. Stuart Fife, of Edmonton, is visiting his father at present.

—The Horticultural Society held their annual meeting on Wednesday, when the election of officers took place.

—Miss Margaret Mulcahey returned home on Wednesday, after spending a week with friends in Peterborough.

—Mr. J. Moore's sale was well attended, and everything brought good prices horses and cows bringing exceptionally high prices. Mr. Moore has moved into his handsome residence on High street.

—We are pleased to report that Miss Willena Miller is recovering from a very severe attack of pneumonia.

—Mr. C. Bell is getting in large quantities of grain from across the lake, at the elevator. He shipped four carloads of hogs on Wednesday.

—Mr. Harry Elmhirst is seriously ill at present with appendicitis. We trust he will speedily recover.

—Four rinks of Lakefield curlers drove down and played a friendly game with the Keene clubs, and both rinks were defeated.

—The hockey team are getting in shape for the game with the T.A.S. on Friday evening.

—Mr. C. Bell is in Hastings this week.

—The Council held their first meeting on Monday, when some important business was disposed of. They decided to enlarge the town hall by tearing out the porch and making one outside. They will also cut out the two posts and put in a trestle in place. The stage is to be moved to the north end of the hall. These improvements will result in increased seating capacity.

—Mr. Edgar Ruth, of Peterborough, spent Sunday in the village.

—The snow storm yesterday caused the trains to be late.

WEATHER NOTES

Friday—Continued cold.

TOWN COUNCIL APPOINT COMMITTEES FOR 1904

The Otonabee Power Company Renew Their Offer for Street Lighting--The Engineer's Report

The Town Council of 1904 held its second meeting last night, when there were present Mayor G. M. Roger, presiding, and Aldermen Johnston, Morrison, Rush, E. F. Mason, Hicks, Scott, Adams, Batten, Clinkscale, McWilliams and Best.

The minutes of the inaugural meeting were confirmed as typewritten and distributed.

COMMUNICATIONS

From Denniston, Peck and Stevenson asking that owing to the fact that no material had been purchased for the street railway by reason of the uncertainty of the by-law, the time for the completion of the extension lines be extended to September 1st next.—Referred to the Committee on Franchise.

From F. E. Bell, applying for the position of auditor—Received.

From Rev. J. C. Davidson, inviting the Mayor and Aldermen to attend divine services in St. John's on Sunday evening, January 17th. It was also proposed to invite the members of the Board of Education and other public bodies.—Received.

From J. Ross Robertson, urging an appeal in behalf of the Hospital for Sick Children—Received.

From F. W. Doan, for the Bell Telephone Co., asking permission to erect three poles on George street between Edinburg and Antrim streets.—Referred to the Board of Works.

From the Best Stove Co., asking that the Town's patronage for Hardware, etc., be more fairly divided—Received.

From the Corporation Trust Company, Montreal, making a proposition with regard to heat, light and power, under the supposition that steam power was used or that the Town was buying the electricity required.—Committee on Franchise.

From T. G. Quartermaine, applying for a position as auditor.—Received.

From the Central Charity Board, recommending that the Relief Officer's salary be raised to $300, and that owing to union with Ashburnham, the Board would require an increase of their grant to $800.—Referred to the Finance Committee.

From James Drain, applying for the appointment of Auditor.—Received.

From J. J. Turner and Son, asking for a fixed assessment for ten years on $2,600, the price paid for the land their factory is erected upon.—Received.

ENGINEER'S REPORT.

Town Engineer, T. A. S. Hay, submitted his annual report of which the following is a synopsis of the work done in 1903 under his supervision:

The total length of sewers laid was 4190 feet, equal to 79-100 of a mile; the total cost of the same was $5,153.64. The total length of sewers in use is 11.14 miles. The total length of concrete walk was 12,305 feet, or 2.33 miles, making a total now in use of 53,400 feet, or 10.11 miles; the total cost of walks laid was $11,803.08. The amount chargeable to street cleaning for 1903 was $715.78; and for the removal of snow and ice $591. The total cost of general repairs to streets was $2841.22. The total amount expended on road making was $4535.19 and the total length of road made was 6710 lineal feet. The total amount chargeable to bridges is $573.04. The cost of repair to wooden sidewalks amounted to $1530.95. The total output of the stone crusher during the year was 3064.10 cubic yards, at a cost of $3067.52. The total amount chargeable to street watering was $1248.50.—This report was referred to the Board of Works.

ACCOUNTS.

A few accounts were referred to the Finance Committee.

OPENING SPEECH

The Mayor here expressed his regret that he was absent from the inaugural meeting. He would, he said, take this opportunity of congratulating his colleagues on their election, and was specially pleased to see so many of the old aldermen returned to office. He was sorry that some who had rendered valuable service to the Town had been dropped, although he recognized the wisdom of the people's choice of representatives in their place. His Worship then went on to outline a portion of the bill of fare before the Council this year. A number of details in connection with the union of Ashburnham will have to be disposed of, and some problems arising therefrom solved. The matter of sewerage for Ward 5 will have to be taken up at once, and also the question of street lighting. As to street improvements the Town has during the past few years adopted a progressive policy with very satisfactory results, and he thought the present Council should continue that policy. He opined that the purchase of the Hilliard Estate will prove a valuable asset, and facilitate rapid and economic work on the streets in the direction of permanent improvements. "An all important question to be dealt with at an early date will be that of providing accommodation for the care of infectious diseases as both hospitals have practically closed their doors to such patients, for whom they are now temporarily charging a fixed tariff until such time as the Town can make other arrangements. The purchase of the Hilliard Estate affords a site for an isolation hospital, should the Council decide to move in that direction. Then the matter of providing better fire protection will have to be looked into, as the Town's rating is lower than many places in the province, owing to our present obsolete fire alarm system. His Worship also drew attention to the fact that as the Bell Telephone Co.'s Franchise in the Town expired some three months ago the Council will have to take some action on that question. As to pole rights, no company today has any rights on our streets; provision should be made, he thought, by which the Town would have the power to take over the poles on its streets, should the Council see fit at any time to go into municipal ownership requiring the use of poles and wires. In conclusion he was pleased to welcome the representatives from No. 5 Ward, (Ashburnham) and felt that they would prove valuable members of the Civic Board.

STANDING COMMITTEES.

Ald. Best submitted the following:

Gentlemen,—Your Special Committee appointed to name the Standing Committees, beg leave to report and recommend as follows—

1. That the Standing Committees be rearranged and composed as follows—

Board of Works—Ald. Best, chairman; McWilliams, Clinkscale, Edgcumbe, Scott and Batten.

Manufacturer's—Ald. Morrison, chairman; Rush, Hicks, Adams and Best.

Finance—Ald. Adams, chairman; Best, Clinkscale, Mason and Johnston.

Legal and Court of Revision—Ald. McWilliams chairman; Mason, Johnston, Edgcumbe and Adams.

Property—Ald. Batten, chairman; Rush Scott, Hicks, and Clinkscale.

Fire, Water and Light—Ald. Edgcumbe, chairman; Batten, Morrison, Hicks and Johnston.

Supervision—Ald. Rush, chairman; McWilliams, Scott, Morrison and Mason.

2. That F. J. Jamieson and Peter Hamilton be appointed High School Trustees.

3. That F. M. McNulty and Dr. George Burnham be appointed members of the local Board of Health.

4. That the usual grant of $250 be given to the Mayor to defray the contingent expenses of his office.

All of which is respectfully submitted.

The report was adopted as read.

RULES OF ORDER.

A by-law to amend the standing rules of order of the Council passed its several readings. One amendment defines the particular duties of each committee and another provides that no resolution involving the expenditure of money shall except by leave of the majority of the whole Council, be introduced or read in Council, unless written notice thereof specifying the amount and purpose of the proposed expenditure shall have been given at the last preceding meeting of the Council.

STONE CRUSHING.

Ald. Best moved, seconded by Ald. McWilliams,—That the Treasurer be authorized to pay for stone crushing on the certificate of the Street Commissioner, at the rate of $3 a cord.

WILL GO TO CHURCH.

Ald. Morrison moved, seconded by Ald. Johnston,—That the Council accept the invitation of Rev. J. C. Davidson to attend St. John's Church on Sunday evening next.—Carried.

STREET LIGHTING.

A communication was read from the Otonabee Power Company renewing their offer to do the street lighting at $1000 a year less than the Peterborough Light and Power Company will do it for under the contract provided for at present under appeal. The communication then went on to review the whole proceedings connected with the street lighting question up to date, for the benefit evidently of the new members of the Council. This matter was merely received.

HOUSE CLEANING.

Ald. Batten moved, seconded by Ald. Clinkscale,—That the Chairman of the Property Com. be authorized to arrange for the cleaning of the Town buildings, and that the Treasurer be authorized to pay for such work on certificate of the chairman.—Carried.

SHORT MEASUREMENT.

Ald. Johnston here remarked that complaints had been made to him of people being taken advantage of on the market when purchasing wood, in the way of short measurement. He wanted to know whether it was the duty of the market Clerk to look after this matter.

Ald. Johnston was informed that there is a by-law governing such matters, and Ald. Batten, chairman of the Market Committee, was instructed to see that the by-law is lived up to.

CLOSED MEETINGS

Ald. McWilliams moved, seconded by Ald. Johnston,—That the specific rule excluding reporters from Committee meetings be amended, and that they be allowed to be present on such occasions, any committee, however, having the right to exclude the press if deemed desirable. Considerable discussion took place on this question with the result that the motion was voted down.

Council then adjourned to meet in Committee of the Whole on the Town's application for legislation on certain questions.

APPLICATION TO PARLIAMENT

The Town Council Sat in Committee of the Whole on the Proposed Application to Special Legislation

The City Fathers met in Committee of the whole at 10 o'clock last night, when they considered clause by clause their proposed application to Parliament as published in The Times of January 5th.

The press were admitted.

The majority of the Council did not appear in favor of seeking incorporation as a city. Ald. Hicks said now that Ashburnham and Peterborough are annexed, we should go slow. We could seek incorporation any time; but could not return very readily to the status of a town. Ald. Morrison and McWilliams were strongly in favor of immediate incorporation, by which we would reap many advantages. The matter was allowed to stand for the present.

Clause 2, to declare that it has been and shall be lawful for the Commissioners of the Peterborough Town Trust, with the approval of the Municipal Council, to invest a portion of the sinking fund received by them in the purchase of the buildings and other permanent improvements erected and made by tenants under lease from the Commissioners on any land vested in the Commissioners—Carried.

Clause 3, to put the property of Ashburnham on the same footing also carried.

Clause 4, to authorize Council to borrow sums not exceeding $15,000 in any one year for extensions of, and improvements and repairs to, the water works, without appealing to the people, carried.

Clause 5, to ratify a by-law fixing the assessment of the Colonial Weaving Co. was allowed to stand over for the present.

(Continued on page 4.)

LEAVING PETERBOROUGH

GOUGHS "GOOD-BYE" SALE NOW ON

LePlante, a dozen of children's caps; Mr. Turnbull, large parcel of children's clothing and sundries; Miss J. McKenzie, one dozen of pillowshams; a Friend, $2; Mrs. J. C. Sullivan, large basket of oranges, nuts and raisins; Mr. Long, a large cake; a Friend, $5; Mr. LeBrun, large parcel of clothing for men; Mrs. Mercier, clothing for children; a Friend, ham and bacon; a Friend, ham; Mr. Gough, $3.50, a Friend, $1; Mrs. Garvey, $5; Mr. B. Fitzgerald, $2; a Friend, a large quantity of note paper.

Nervous Dyspepsia

A Disease very common to the American people, but now quickly remedied.

A SURE CURE.

In a case of Nervous Dyspepsia a doctor sees two things, first, that the digestion is deranged, and second that the nerves are in a starved, irritable condition.

If abreast of the times, and in touch with the latest discoveries the doctor is sure to advise Ferrozone, which is now universally prescribed in cases of acute Indigestion and Dyspepsia.

Ferrozone is prepared specially for diseases of the stomach and bowels, and as a sure cure for Nervous Dyspepsia has proved itself a thousand times to be superior to all others.

Where Ferrozone is taken after each meal, it is impossible for Dyspepsia or Indigestion to exist. It digests the food before it has had time to ferment in the stomach, and by its regular use one is enabled to eat and drink anything at any time, without fear of bad results.

Ferrozone relieves that distressing headache, and burning feeling in the stomach peculiar to dyspepsia. It regulates the action of the bowels, kidneys and liver; strengthens the nerves and makes the sad looking dejected dyspeptic feel like a new man in twenty-four hours.

The general manager of a Toronto Manufacturing Company, who used Ferrozone with very marked results, says: "The strain of conducting a large business brought on a siege of Nervous Indigestion about a year ago, which I endeavored in vain to shake off. Doctors told me only a complete rest would cure me, but not being able to spare the time, I used Ferrozone instead. It perfectly restored my good health in a short time. I have confidence in the merits of Ferrozone, and am pleased to recommend it."

What Ferrozone can do for you can be best proven by giving it a trial. Every reliable druggist recommends and sells it, price 50c. a box, or three boxes for $1.25. Sent to your address by mail if price is forwarded to N. C. Polson & Co., Kingston, Ont.

EVERYBODY READS THE TIMES.

DOURO COUNCIL MEETING

Important Inaugural Session Held on Monday Jan. 11th.

The Council elect for the current year met at the Town Hall on January 11th, 1904. Present, the Reeve, James McClig-gott, and Councillors, Frank Moher, John R. Allen, B. Leahy, and Thos. Ed. Jorey. After having subscribed to the declarations of qualifications to office, the Reeve in the chair. On motion, the the minutes of December 16th, 1903, and December 28th, were read and confirmed.

Moved by Mr. Moher, and seconded by Mr. Allen—that Maurice Condon and Geo. Brooks be auditors for the current term.

On motion of Mr. Leahy, and seconded by Mr. Jory—David Darling was appointed a member of the Board of Health for three years.

On motion of Mr. Moher, seconded by Mr. Allen—the bylaw appointing auditors was read and passed.

On motion of Mr. Jory, and seconded by Mr. Leahy—a by-law appointing a member of the Board of Health for three years was read and passed.

On motion of Mr. Allen, and seconded by Mr. Moher—Robert Aiken was appointed an assessor at a salary of $40, Mr. Allen to place the names on the assessment roll in alphabetical order. The yeas and nays were taken on this resolution, Yeas—F. Moher, John R. Allen, B. Leahy. Nays—Thos. E. Jorey.

On motion of Mr. Moher, and seconded by Mr. Allen—Mr. E. O'Brien was appointed a collector of taxes for the year 1904 at a salary of $60.

On motion of Mr. Leahy, and seconded by Mr Jorey—Michael Mahoney was appointed caretaker of the Town Hall at a salary of $9.

On motion of Mr. Allen, and seconded by Mr Moher—the by-law appointing a collector of taxes was read and passed.

Moved by Mr. Jory, and seconded by Mr. Leahy—that the collector be paid $25, part of salary for 1903.

On motion of Mr. Moher, and seconded by Mr. Allen—the reeve and clerk were instructed to consult legal advice re the opening up of the recently surveyed line of road between concessions 3 and 4, also the Buckley's Lake drainage by-law, and that the clerk give the necessary notice that it is the intention of the council to pass a bylaw establishing and legalizing the opening up of line of road between concessions 3 and 4, from lot 22 to Clear Lake.

On motion of Mr. Moher, and seconded by Mr. Allen—the clerk was instructed to send minutes of each council meeting to the three Peterborough papers and Lakefield News for publication, and that the clerk be allowed the sum of $5 for this work.

Moved in amendment by Mr. Jorey, and seconded by Mr. Leahy—that the clerk get the minutes of each council meeting published in one of the Peterborough newspapers.

On motion of Mr. Allen, and seconded by Mr. Jorey—the reeve and clerk were appointed to contract for printing and stationary for 1904, also to see that the school debentures re S. S. No. 12 are prepared according to law.

Moved by Mr. Moher, and seconded by Mr. Jorey—that the reeve order the payment of $5 to the clerk to procure six copies of the Municipal World for use of members of council.

Moved by Mr. Moher, and seconded by Mr. Jorey—that the council take no action re the appeal for charity from J. Ross Robertson, chairman of the Hospital for Children, Toronto.

On motion, the council adjourned to the 13th inst., then to meet at nine o'clock a.m.

Bargains in Pianos

There are some first class bargains to be had in some new and second hand pianos and organs, at W. O. Landrum's, 190 Charlotte street, agent for Heintzman & Co., Toronto. Call and see for yourself.

HALF MILLION ACRES

Are Actually in the Hands of Ontario Veterans

With the end of the year the Crown Lands Department have figured roughly the business done in giving land grants to the Veterans of 1866 and of the South African war, who have applied. Since November 1, 1901, the department have sent out no less than 10,750 certificates, entitling each recipient to 160 acres of land for service to his country. Of those so favored, some three thousand have already selected their land. This would mean the actual taking up of 480,000 acres, of twenty-one townships, if the settlement were solid, but as only one veteran may locate in each square mile these locations must be scattered over eighty-four or more townships. The Government set apart one hundred and thirty-six townships in New Ontario from which the veterans might choose land, and besides many townships in the northern parts of old Ontario.

Altogether the department received about 20,000 applications and letters from those who thought they were entitled to grants. Thousands were, of course, not sustained, and some remain to be decided. The time for making applications expired on December 31st, last, so that the arrears of applications will likely be dealt with before long. The Crown Lands Department have no statistics of the number of veterans who have actually settled on their land. The Province of Quebec is now undertaking the granting of land to veterans, doubtless following the example of Ontario.

Good Year For Game

The Ontario Game Commission held a meeting in Chief Game Warden Tinsley's office, Toronto, on Tuesday, to consider their annual report. The reports from the deputy wardens indicated that the past year had been a good one for sportsman as game was plentiful. The complaints for illegal hunting were not as numerous as usual. The report will be printed and submitted to the Legislature.

Parting.

It has always been a moot point whether absence really does make the heart grow fonder, or whether there is not more truth in the saying, cynical though it be, "Out of sight, out of mind." I am inclined to think, from what one knows of the world, and of the people in it, that the latter solution is the true one. An imaginative person, cherishing fondly a supremely impossible ideal, may no doubt become more and more impressed by the perfections of the loved one, as he—or she—creates and nurses a delusion—a delusion which time and distance may tend to preserve from being destroyed by the rude shock of reality.

But to the unimaginative, matter-of-fact majority, the past is nothing, the future unheeded, while the present is everything. "Time's busy fingers are not practised in resplicing broken ties," they say, in effect, when they mean to excuse their forgetfulness or inconstancy. But whether people are merely superficial in their emotions or are possessed of real, deep feeling, there must of necessity be a certain amount of melancholy tenderness about a parting which "may be for years," or may, indeed, be "for ever."

And then, with regard to the manner of parting. Is it better to linger over the "sweet sorrow," or to get it over as quickly as possible with one sharp, sudden wrench? Byron says, "Let's not unman each other—part at once: All farewells should be sudden;" and Shakespeare expresses a like sentiment:

"Adieu! I have too grieved a heart
To take a tedious leave;"

though elsewhere he gives us a perfect picture of a reluctant, lingering parting linked sweetness long drawn out, of a surety:

"We're thus two friends condemn'd,
Embrace and kiss, and take ten thousand leaves,
Loather a hundred times to part than die."

I think this is typical of many lovers' partings, where "he" and "she" are saying good night "till it be morrow."

A Polite Prisoner.

The lady who was visiting the jail had been much impressed with the appearance and behavior of the prisoners, and she took occasion to express her approval to the warden.

"They seem as courteous as anybody," she said, enthusiastically, "even if they don't say anything."

"Yes, they're polite enough," assented the jailer. "But I'm a little suspicious of too fine manners."

"I don't see how you can be!" exclaimed the lady.

"Well, I am," declared the warden, "and I have been ever since one of the smoothest of them broke out of jail and left a note for me in which he wrote, 'I hope you will pardon me for the liberty of taking.'"

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers as attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9,68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $3,76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12,50. This being a general sample taken from the dump. The other two assays are $62,68 and $73,06 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Roosevelt and the Senate.

President Roosevelt called an extra session of Congress for the purpose of passing the Cuban reciprocity bill, an act demanded by "national honor," etc. The House passed the bill, but the Senate decided not to take final action until December 16, by which date the regular session should be well under way. To the appeals of the Speaker, the President and the criticisms of the Congressmen the Senators turned deaf ears. They proposed to adjourn on Wednesday last until it was time for the regular session of Congress to commence, but the House balked that plan, and adjournment was made until *yesterday only*. All sorts of plans are being matured to "bring the Senators to time," one being to adjourn for three days at a time and still calling it an extra "session," until the Senators surrender, but it looks as though they will have their own way. The Washington correspondent of The New York Times several days before the adjournment of Wednesday sent to his paper the following story of the situation, which loses nothing of its interest, because it was much in the nature of a prediction. So far the *prediction* has been fulfilled to the letter:—

The "true inwardness" of the three-cornered controversy between the President, the Senate and the House over the question of adjournment next Wednesday has been that some of the Senators desired to put the President "in a hole," that the Speaker desired to protect him from the experience, and that the President has recognized the futility of opposing the wishes of the Senate, and has yielded. The President called an extra session of Congress to pass the Cuban reciprocity bill. The House passed it. The Senate decided not to pass it until the regular session. The Speaker opposed this on the ground that it would convey to the country the impression that there never had been any reason for an extra session, and that the President had acted rashly and without sufficient consideration in calling one. That is just the impression which those responsible for the adjournment programme wished to convey. There has been a feeling among many Senators and Representatives that the call for one was a case of unnecessary "strenuosity," and that the bill could just as well have been passed in a regular session. This feeling has not been so widely diffused in the country at large as some Senators would like to have it.

The present programme is to have the extra session adjourn sine die on Wednesday. Then the bill is to be voted upon and passed in the Senate on December 17 (December 16 was the date decided upon), ten days after the regular session opens. In this way the gentlemen originally responsible for the adjournment will, they hope, have made another demonstration of Mr. Roosevelt's tendency to perform official acts out of mere desire to be "always doing something," as Senator Gorman puts it. The plan originated with the Democratic Senators, and the Republican Senators are about to avow that they had no hand in it, and would have liked to remain in session until the bill was passed, if the Democrats had only permitted them to do so. Nobody can produce absolute proof that this is not true, but the fact that the Republican side is fairly honeycombed with Senators who enjoy *nothing* more than "teaching the President a lesson," as they put it, lends color to the belief that their instantaneous surrender to the Democratic demands was not very painful to them. It is, in fact, a united Senate which has carried through the adjournment programme. The Democratic ultimatum was simply that if Congress was kept in session, they, the Democrats, would talk up to the time of the adjournment, and that therefore the bill could not be passed at the extra session anyway; but that if an adjournment was taken they would offer no opposition to the taking of a vote early in the regular session. The Republican leaders promptly agreed, and all arrangements were being made accordingly when the Senate struck a snag in the quarter where one was least expected—the House.

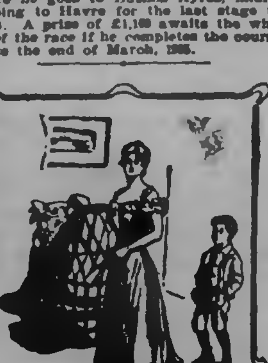
Speaker Cannon flatly declared that Congress should not adjourn. The deferential submission of the House to the Senate in past years has been such that the Senators were astonished at the revolt, but found no way to overcome it. It was a perfectly plain proposition that the Senate could not terminate the session against the will of the House, and the plan to hold the President up to the country as an unduly strenuous person seemed in danger of collapsing. The Speaker took his stand purely as a defender of the President. He told the Senators that it was very nearly an insult to the President, when the latter had summoned Congress to transact certain business, to adjourn twelve days before the time for convening the regular session without making even an attempt to transact that business.

"The House," he said, "has done its part. The Senate should at least make an attempt to do its part."

Argument with the Speaker failed. He told the Senators that he would not permit the President to be so cavalierly treated, and that only by getting Mr. Roosevelt's consent to the plan could they change the attitude of the House. The result was a number of conferences, in which the *President*, the Speaker, and the Senate leaders participated. At first the President stood by the Speaker, but he gradually came to take the Senate view that there was no use in keeping Congress here when it was certain that nothing could be done. The President, having given up his opposition, the Speaker no longer had any reason for standing out, and the adjournment programme will be carried through. The only extra session called in President Roosevelt's Administration will adjourn without having enacted any legislation whatever, and the legislation which he recommended will come up in the regular session.

Walking Round the World.

M. Consigny, one of the enterprising fourteen competitors who set out from Paris in March, [illegible], to walk round the world, has reached England with his trainers, according to papers of the week beginning November 15. The race was organized by the Touring Club de France, and the route laid down was to Marseilles, thence by steamer to Cape Town, and then to Spain, Morocco, Algiers, Tunis, Turkey, Russia, Germany, Austria, the Balkans, Italy, Switzerland, Belgium and England. M. Consigny is the first of the competitors to reach London, and the second man is reported to have proceeded only as far as Austria. M. Consigny now has to make his way to Liverpool, where he will embark for Philadelphia. From Philadelphia he walks to San Francisco, thence he goes to Buenos Ayres, finally shipping to Havre for the last stage to Paris. A prize of £1,100 awaits the winner *of the race* if he completes the course before the end of March, 1905.



THE WORM AT HOME.

Didactic Mamma—Now, then, Charlie, don't you admire my new silk dress?

Charlie (with emphasis)—Yes, mamma.

Didactic Mamma—And, Charlie, all the silk is provided for us by a poor worm.

Charlie—Do you mean dad?—Illustrated Bits.

Explained.

Hostess—Of course the dinner is given for Miss Purdy, but I can't let you take her in because you never will take the trouble to be agreeable except for a pretty woman.

Reggy Westend—Whom do I take in, then?

Hostess—Mrs. Farris.

Reggy Westend—But she's uglier than Miss Purdy.

Hostess—I know that, but she's married and used to being neglected.

Equitable Gold Mining Co.

R. C. LANE, President. **E. F. NORTON**, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves: thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,350 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, up rises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $4.25 per ton as cost of mining and milling. One-half of all over and above this $4.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 265-tunnell; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

THE PETERBOROUGH BROKERAGE CO.
FISCAL AGENTS

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 16th from 5 cents to 10 cents per share. This company owns 6 claims, 600 x 1500 each. A 70 foot shaft on the Martha claim shows a vein of $30,82 ore 5 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.62 to $15,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay then $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address,

K&K K&K K&K K&K K&K K&K

$400,000 was Produced from the Properties
now owned by the
NEW YORK-GRASS VALLEY GOLD MINING CO.

above the 400 foot level, under the old management. During the last year the mine has been thoroughly opened up. New and richer ore bodies discovered. Large reserves now in sight.

Large and thoroughly complete Merralls mill now working. Besides this, six quadruple discharge stamps are now being installed. Each stamp will increase the present output at least 20 tons daily. The mine is now producing steadily and increasing output daily. As soon as the new stamps, now being installed, are running, the output will reach at least 135 tons daily. At a moderate estimate the monthly income should exceed

FORTY THOUSAND DOLLARS

During the coming year it is the intention of the management to install more stamps so that the output can be brought up to FIVE HUNDRED TONS DAILY.

Quick dividends are positively assured, and will most surely be large and continuous. The present Board of Directors is composed of competent business and mining men, who are giving their personal attention to the affairs of the Company.

The price of Stock will be advanced to 75 Cents per Share almost immediately.

This is your last chance to purchase into this producing mine at . . . . **30 CENTS PER SHARE** for cash or instalments. We have only a limited amount left at this figure, therefore **send your orders in early.**

REMEMBER IN BUYING THIS STOCK YOU ARE BUYING

INTO
- A present producing property.
- A mine that will pay large and handsome dividends, as the reserves of ore on hand warrant.
- A property that has 600 acres, only a small area of which has been mined.
- A proposition that can mine its ore cheaper than almost any other mine in the world, owing to free water power. Cost of mining and milling not being over $1.00 per ton

We have just received the following telegram, under date of November 24th:

KAYE, DE WOLF & CO, New York City. Grass Valley, Cal, Nov. 24th.

Mill now running on medium grade ore from reserves. Latest mill returns forty ounces amalgam from batteries alone since sixteenth. The Ferris ore chute on fifth level has been reached. Expect the ore on this level will pay much better than any yet opened up. The bottom of the shaft is also in good ore. Recent developments fully justify the expectations that have been formed. All who visit property report a large dividend payer soon.

J. W. HAIBNER, Secretary.

Send for prospectus and full information to KAYE, DE WOLF & CO., 39 Cortlandt St., New York, or to PETERBOROUGH BROKERAGE CO., Canadian Fiscal Agents.

IS THERE CERTAINTY
IN MINING
The Idaho Richmond Gold Mines Company says Yes

AND HERE IS THE PROOF

1st—By having a property located in a camp that has produced over sixty million dollars worth of gold.
2nd—By having a property that has produced over one hundred and fifty thousand dollars to the former owners.
3rd—By having over two-thousand feet of development work done on the property in the way of tunnels and drifts.
4th—By having *four* different ledges on the property, varying in width from three feet to thirty feet, besides several smaller ones all rich in free gold.
5th—By having now on the dumps are estimated to be worth over twenty thousand dollars, and all taken from development work.
6th—By having large amount of stoping ground opened up for the taking out of large quantities of ore.
7th—By being able to ease a mill that is located within two thousand feet of the property for the treatment of the ore, which will be done as soon as a small amount of the stock is sold to help defray the expenses of getting ready.

There is no promoter or gift stock, and there is yet over six hundred thousand shares in the Treasury.

We can prove to your satisfaction that we have a mine, and it will pay you to write for information, if you are looking for an investment that will pay you good returns.

Dry Placer Miner, formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. W invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 200 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of this stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

'Henry Fielding's Dream'

By CORTLAND MYERS.

not right with God. You have been away from the Church for years. You have been even on the verge of infidelity."

"No, I cannot say that last," said Henry. I will not own to that. I always believed——"

"Hold on a minute," said Mr. Dowling. "Infidelity has as much to do with the heart and life as with the head. You might say there was a God, and yet be an infidel to Him, having no fidelity to Him or His cause, disloyal and untrue to Him, and to the best that is in you. Anyway, Henry, you would not say that you were a Christian, and that is what I want you to be— saved by Christ's blood, and that alone, and then you could be able to help the laboring men in Christ's way— not simply to live a moral life, but just surrender to the Saviour, and help Him make the Church what it ought to be. He, through you, will save society, and that is the only way it ever will be saved. It will take time, but His spirit is destined to conquer. He needs you."

"I have never looked at it just like that," said Henry. "I have thought I was as good as church folks, and as good as I could be under the workingman's circumstances, and that was all that was necessary."

"Oh, no, Henry, every line in the Bible is contrary to that. If you could save yourself, for what did Christ come to the world and die! His blood was necessary to your pardon and your trust in him and surrender to Him and confession of Him. Make it yours now and forever. That is the meaning of being born again, and the Church is His agent upon earth to bring this to the hearts and lives of men. Put your immortal soul and earthly life in Christ's hands, Henry, and you will be a new man. Oh, what a mighty influence you can wield in Union No. 10. A thousand times more than I can. I have even wished that I was a workingman, and could belong to the union in order to touch and reach other men."

Henry leaned with both elbows on the arms of his chair, and looked intently upon the floor, as if he was counting every thread in the carpet. He was in the deepest thought of his life, but he really wanted to go, and almost wished he had not come. He did not expect quite as much as this.

Mr. Dowling, with more feeling in his voice, continued to tell him that it was not following the example of Christ in order to be saved or help men most. "It was the atonement for sin that was the saving power in the world, and the only power." He pleaded with him to look at it right and to act according to his best convictions at any cost. He told him not to be anxious, simply to touch the surface of the trouble in his own life or in the labor union.

"You need Christ," he said, "and so does your union— the Carpenter of Nazareth, but also the Saviour of Calvary. Now, Henry, will you do your part?" he said, after a moment's pause.

Henry hesitated, and then replied: "I cannot promise anything tonight. I thank you for the interest, and really think more of you for talking this way, but I am not ready to say just now."

"I wish you would," said Mr. Dowling, anxiously. "We may never have the chance to talk again."

"I hope we will," replied Henry.

"So do I," said Mr Dowling; "but in this world you cannot tell. You will promise me to think about it. Yes, more— to pray about it."

Henry would rather have been out on the street just then, but he said in a manly way, and meant it, too: "I will."

"Take my hand on that," said Mr Dowling. "We are friends; your name will be in my prayer every day."

Henry Fielding passed out into the dark— no, it was the dawn. It is darkest just before the dawn.

CHAPTER VI.

The Telegram From Home.

The next Wednesday evening, according to appointment in the Sunday school the Sunday previous, Grace Chalmers was to call on Elsie to talk with her about a committee in the church, on which they wanted her to work— a committee in the Young Women's Organization.

Elsie was not anxious to have her come, but her apartment never looked so attractive and spotless as it did that evening.

She was alone, and waited patiently, supposing that Grace would come early, but it was now after eight o'clock, when she heard her step in the hallway.

She had already told her of the stairs, and their home, so different from hers, and that changed the situation by creating no surprise and calling for no apology.

Grace Chalmers always carried the same charm with her, and adapted herself to every condition with an art passing the work of painter or musician.

The greatest artist in the world may never have known a more skillful touch upon canvas or keyboard.

No one was better named than Grace Chalmers. They must have had the prophet's vision when they called her Grace.

It does not seem possible that the same spirit would be equally as beautiful and attractive in that palace of the rich and the single room of the poor; but it was and is always.

Elsie's room was midway between poverty and riches, and it was no exception to the law of the world.

She entered now, as always, with a delightful familiarity which effectively destroyed formality. It was not condescension, but recognition of the real worth of the world as being that of character. She considered Elsie as her equal, and the surface circumstances of money or home was not able to destroy that divine equality in human society.

This is the only aristocracy. This is the only Christianity. This is the only solution of the social problem.

Grace Chalmers carried the key to the secret.

"What!" said she; "are you all alone! I rather expected to see your brother here, too."

"He is usually with me," replied Elsie; "but he is away more lately because he is so interested in these questions, and especially now because of the great strike in the city, and they are expecting trouble in their own manufactory. I believe they call it a 'lock-out,' but I don't know as I understand what that means. Anyway, we won't talk about that to-night."

"Why, yes, we will," said Grace, "because I am interested in it, and more since Mr. Dowling preached that sermon and we have had so much talk about it. You know I told you rather did not agree with the sermon, but that is not strange, and whether his conscience has been troubling him or not, he has brought it up for discussion a half-dozen times since. I have argued with him about the minister having the right and duty to preach about it, and he told me this morning that I and the pastor had both better find out where our bread and butter came from. Perhaps I might better keep still and leave him to do all the talking, but I cannot help standing by the people who have the least, if they are at all in the right. I am really glad your brother is interested in the solution of these important questions, and I hope the men will receive what belongs to them. I would rather have my father do just right by the workingmen and give me only half of what he now does, than not show the spirit of Jesus every hour and minute of the day. I have been in the homes of these men enough to know just how they feel about the rich Christians and the churches."

Elsie interrupted to say:

"I did not intend to start our conversation in this channel. You came here for something else, and we girls do not know much about the labor question."

(To be continued.)

Poultry For England.

The Department of Agriculture has received the following communications from British dealers who desire to purchase Canadian poultry. One of the dealers is at present in Canada negotiating for the shipment of poultry. He writes the department as follows:—"I am in Canada soliciting consignments of poultry to England. My name has been before your department for several years as a large importer of poultry. You have sent me consignments of chickens. I should be glad if you would name the Canadian poultry shippers and mention my name if possible, so that they may commence to ship early in December. Yours truly (Signed) James Blackburn."

For four years the Department of Agriculture has exported chickens fatted at the illustration stations to Mr. Blackburn. His address is Wholesale Fish Market, Manchester, England. The dealings have been perfectly satisfactory, and the prices obtained for the chickens have been profitable. Mr. Blackburn stated that he would like to handle 3,000 cases of chickens per week. The department has also received a letter from Mr. William Rothwell, Manchester. Mr. Rothwell says; "There seems to be a very good prospect for all kinds of poultry this Christmas. If you can give or have any consignments sent me, you can rest assured of the utmost value being obtained. Cash and sales sent immediately goods are disposed of. The probable prices are as follows: large cock turkeys, plucked, 14 to 18 pounds, 9d to 10d per pound; plucked turkeys, 12 to 13 pounds, 8 1-2d to 9d per pound; plucked turkeys, 9 to 11 pounds, 7 1-2d to 8d per pound; plucked chickens, 8d per pound; plucked ducks, 7d per pound; turkeys in feather, 6 1-2d to 7d per pound. I trust that I may have consignments from Canada."

Mr. Hare, chief of the Dominion Poultry Division, stated that these approximate prices should offer substantial inducements to Canadian exporting firms to ship poultry to Great Britain. The poultry should be forwarded in a steamship equipped with cold-storage. Even on small consignments the freight charges will not be over one cent per pound.

British Object to Mixed Lots.

Writing to the fruit division, Ottawa, Mr. A. W. Grindley, inspector of the Department of Agriculture in Great Britain, quotes as follows from a letter received from a firm of fruit importers: "If your department, through a circular, could induce shippers to use some common sense in sending apples, you would do them much good financially. For instance, yesterday the Tunisian was cleared up, the bulk having been disposed of earlier in the week, and in the catalogues there were over 1,250 lines under 10 barrels each (we should guess averaging two and three barrels), of different varieties. We do not know of any trade where so much money is being wilfully thrown away."

Regarding this point, Mr. Grindley refers to one lot of apples catalogued on October 23, in which there were 30 varieties in a lot of 41 barrels, and says that no buyer will pay top prices for these mixed lots, and that the shipper loses heavily every time. The establishment of co-operative packing and shipping houses, advocated by Mr. MacKinnon, is pronounced by Mr. Grindley a splendid idea, and one that, if carried out, would, to a large extent, do away with the small lots of mixed varieties of which importers complain.

Verily a kiss through a veil is like taking champagne through a straw.

He who findeth an American wife findeth a good thing—yes, and a costly.

Courtship may be termed a beau knot that marriage pulls into a hard knot, and, occasionally, a very hard knot.

Roosevelt's Proclamation.

President Roosevelt's Thanksgiving proclamation, issued October 31, named Nov. 26 as "a day of praise and thanksgiving to God. In no other place and at no other time," says the President, "has the experiment of government of the people, by the people, for the people, been tried on so vast a scale as here in our own country in the opening years of the twentieth century. Failure would not only be a dreadful thing for us, but a dreadful thing for all mankind, because it would mean loss of hope for all who believe in the power and righteousness of liberty. Therefore, in thanking God for the mercies extended to us in the past, we beseech Him that He may not withhold them in the future, and that our hearts may be roused to war steadfastly for good and against all the forces of evil, public and private. We pray for strength and light, so that in the coming years we may, with cleanliness, fearlessness and wisdom, do our allotted work on the earth in such manner as to show that we are not altogether unworthy of the blessings we have received."

Perhaps the Colombians do not believe in "the power and righteousness of liberty," or perhaps President Roosevelt made a mental reservation in regard to American republics other than his own, in view of the report that the Administration knew weeks ago that the Panama revolution had been planned.

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Prest.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

Address all communications to Robert Kidd, Fiscal Agent, Peterborough, or to W. J. WILSBY, Prescott, Arizona.

A FORTUNE AWAITS YOU

INVEST NOW IN THE

North Carolina Gold Fields

BUY

Rodman Mining & Milling Co's Stock

AT 50 CENTS PER SHARE

DIVIDENDS IN SIGHT

Three developed mines with more than $500,000.00 worth of ore on the dumps and an inexhaustible supply in the mines, assaying as high as $100.00 per ton, with an actual mill test of seven tons running

$24.65 PER TON IN GOLD

One mill completed ready for operation and another being built. One and one-half miles from the main line of the Southern Railroad, cheap labor, cheap fuel. Plenty of water and a climate allowing operations 365 days per annum, are a few of the advantages that go to make this one of the most valuable mining properties today in the country.

Send for free copy of the "Gold Nugget" and learn something about the North Carolina Gold Fields that produced all the gold in this country before '49 and that are today attracting the attention of the world.

BRITISH SYMPATHY IS WITH JAPAN

Public Opinion Rife For Britain to Help Her Ally

IS DROPPED BY UNIONISTS

The Chamberlain Forces are Gaining Control in Ministerial Forces

London, January 14.—The best information available here this morning points to the imminence of war in the Far East. Never was England's sympathies with Japan keener. It is already evident that British neutrality may soon be put to a severe strain in the event of hostilities. Influential journals supporting the Ministry find many reasons why Great Britain should not leave Japan single-handed in her attempt to check a Russian exclusiveness and aggression which is as hostile to British as to Japanese interests. The British Ministry's desire evidently is to kepp the ring clear of third powers, itself maintaining a strict neutrality, but Governments in England are peculiarly dependent on public feeling. Even the Times admits that if Japan proves a weaker combatant, Great Britain could not afford to see Dominion in the Far East pass into the hands of a single power, which is not friendly to Great Britain. Other enemies of Russia here anticipate that Japan's greatest ally will be Russian domestic revolutionaries, who, by civil war, may hamstring Admiral Alexieff from behind. What is quite certain is that all England's hopes are with Japan if war must come.

THE DUKE OF DEVONSHIRE.

What about the Duke of Devonshire? That is the question of the moment in home politics. A leading North Country Liberal-Unionist, one of the famed Pease family, has had the astounding courage to start a movement to drive the Duke from the Unionist party because he refuses to countenance Mr. Chamberlain, and even goes so far as to advise Liberal-Unionists to vote against every candidate who is not openly a Chamberlainite. Similarly the Duke's colleagues in opposition, Lord George Hamilton and Winston Churchill, each have received what amounts to a notice to quit from the official Unionist organization in their constituencies. Rumors even have been afloat that Lord Rosebery and the Duke of Devonshire are drawing together again with intentions of forming a coalition party with opposition to Chamberlainism as its one unalterable creed.

But the Whiggism of the Devonshire type must always be whole worlds removed from the ardent radicalism from whose ranks come the only really fighting Liberals of the present day. This strenuous Liberalism is nearer akin to the Labor party with its certain advancement of a root and branch land reform as the only true antidote to Chamberlainism and Imperial protection. If official Liberalism could bring itself to franker and friendlier recognition of labor members, its electoral chances would be greatly enhanced. It must come to that, sooner or later, if Chamberlain is to be met in anything like an equal fight. For the moment, however, his enemies are hopelessly divided, and Mr. Chamberlain makes the pace.

BACK TO THE LAND.

Another practical turn is being given to the back to the land movement. An influential repatriation committee is being formed with the co-operation of the Lord Mayor to replace on farm land the unemployed who have drifted into the towns from country life. Relief operations are being confined at first to the unemployed of east and south London, but the Salvation Army experiments in Essex indicate the feasibility of a well-managed scheme, and when once started in conjunction with the Poor Law authorities, the scheme may go far towards solving a grave economic problem.

BAD MINE FIRE

Fire Continues to Burn in the Mine At Joggins

Halifax, N. S., January 14.—The fire which broke out in the Joggins coal mines, in Cumberland County, at 6 o'clock on Sunday night at the 3,400 foot level, was caused by an open lamp in the hands of the pumpman at the lower level who was going from one level to the other, coming in contact with an inflammable canvas brattice used to direct an air current. The canvas burned with great rapidity and emitted dense volumes of smoke, and the fire spread extensively. The man with the fatal lamp and the pumpman at the 2,500 foot level, just above, were the only men in the mine at the time. They gave an alarm at once, and a force of men set to work doing what they could to stop the fire. Nine horses, all that were in the pit, were suffocated. All night and all yesterday great efforts were made to smother the fire, but without avail. Deputy Commissioner of Mines Gilpin and E. H. Poole, Halifax, were sent for, and arrived at the Joggins mines last night. What methods they will adopt in fighting the flames has not been announced. There has been several slight explosions of damp, but the danger from this source is not considered to be very great. The number of men out of work on account of the fire is 175. The whole mine is in a state of idleness.

A BUNCH OF DRUNKS

A Large Grist of Cases Before the Police Magistrate Yesterday

At the police court yesterday, Timothy Kearns was up on three different charges viz.: Drunk, vagrancy, and buying liquor during prohibited hours. To the first he pleaded guilty; he was allowed to go on the second charge on promising to go to work, and the third was dismissed.

J. Montgomery was charged with being drunk and disorderly, and of buying liquor in prohibited hours. He was discharged in both cases.

A Noted Actor.

Mr. J. M. Barrie, whose new play, "Little Mary," was produced in London on Thursday night, says The London Chronicle, has been so much accustomed to praise for many years past that he has probably forgotten the very first critical appreciation he received. When he was a schoolboy at Dumfries he contributed to a manuscript comic journal got up by his schoolmates of the Academy, and called "The Clown." Young Barrie wrote a series of articles under the heading of "Reckolections of a Skoolmaster," in which, with Artemus-Wardian spelling throughout, he thus introduced himself to his readers:—"When yoo reed the following artickles I think I hear yoo exklaim, 'Who is this grate literally genus appeering before our eyes and takin our harts by storm?'" The juvenile editor of "The Clown" seems to have been a person of discrimination, for in his "Answers to Correspondents," dealing praise and blame alike to contributors, he says in response to J. B.: 'Your 'Reckolections' are exceedingly well composed. Many thanks for both No. 1 and No. 2. We shall be very glad to hear from you again soon." Some of these "Reckolections" were reproduced in a local paper ten years ago, on the occasion of a visit Mr. Barrie paid to his old school. They showed how effectively the lad could reproduce a conversation, and there is a certain crude humor in process of development to be traced in them.

Some Historic Places.

For ages antiquary after antiquary found himself baffled by a simple problem at the Tower. How in the old days, did the garrison get a supply of drinking water? The antiquary, says The St. James' Gazette, could show you the original fireplace at which William the Conqueror warmed his hands, could point approximately to the spot on which the murdered Princes fell; he could lead you to the place where Henry VIII.'s Queens were butchered, and to the tombstone that collapsed upon their poor bones; he knew the tiny dungeon in which Sir Walter Raleigh spent twelve dreadful years hidden from the light, and could have you in a twinkling in the stone dog kennel, where still remains the ring to which they chained Guy Fawkes. But how these unfortunates and their janitors drank, none could tell. The Thames, hard by, was not the source, they were sure. Organised search was vain. Then there came a thick-headed, unimaginative mason, to whom and his fellows the work of converting certain of the historic dungeons into storehouses for war material meant ninepence-halfpenny an hour and no more.

His pick struck through the flooring of the corridor from which the prisoners used to enter their cells. Behind these latter, and corresponding with the main one, ran, and still remains, the little secret corridor along which eavesdropping officers tip-toed to listen to conversations between captives, for the purposes of evidence. A few blows from the pick brought to light the mouth of a pit. Sixty feet down was water—thirty feet of it. The mason had happened upon the historic well for which search had been made in vain for centuries! It was as perfect as the day that the Conqueror sunk it. To-day it still carries its thirty feet of sweet spring water, and should ever the Tower be beleaguered, its garrison would still be independent of outside supply. We have our holy wells, our miracle-working wells, and wells of medicinal waters. If this historic old shaft which the mason brought to light were distant ten thousand miles, Londoners would make pilgrimages to drink its waters.

Ran Away.

The young lady who made seven hundred words out of "conservatory" last summer has run away from home. Her mother wanted her to make three loaves of bread out of flour.

A St. Bernard.

One dog of the Convent of St. Bernard is said to have saved more than forty human lives.

ACCIDENTALLY SHOT

Was Found Dead with a Rifle by His Side

Vankleek Hill, Ont., January 12.—Mr. James Molloy, postmaster of Sandown, ten miles from here, was found dead in his room, with a terrible wound in his left side. Near him lay a Snider rifle. Mr. Molloy had been in poor health for several months and has been worried over his business affairs. He was a middle aged man, and leaves a widow and four children. Besides being the postmaster of Sandown he conducted a general store in that place. He was widely known in Eastern Ontario.

[illegible]

Penetanguishene, Ont., January 12.—Neil Kelly, an elderly bachelor, living on the fourth line, near here, was found dead recently. He lived alone and had not been seen since before Christmas. His nephew, R. J. Kelly Phillistone called at the house, and found Kelly's body partly eaten by a cat and dog or rats. It is supposed that his death took place from the natural causes or that he was frozen and the animals being confined in the house so long, became ravenous for food and attacked the old man's body. He was about 70 years of age.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA

—AND—

BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000.00. Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 1000 feet in addition to other claims approximating a total acreage of 240 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 200 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 175 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 800 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*

C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not A Gamble

but a

Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY, GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO.,

FISCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL

The Peterborough Brokerage Co., Local Agents.

WANTED—GOOD AGENTS IN EVERY CITY.

Mr. Richard McCallum

A well known citizen of Stirling Ont., cured of Chronic Catarrh and Irritable Sore Throat by Catarrhozone.

A Remarkable Case Exciting Great Interest in Stirling, which, if Possible adds to the Popularity of Catarrhozone as a cure for Catarrh, Bronchitis and Throat Trouble

Catarrh is one of the most disagreeable and at the same time hardest to cure disease. This has been Mr. McCallum's experience.

"For many years," he writes, "I have suffered from Catarrh, and continually hawked and coughed, so that my throat was always in an inflamed irritable condition.

"Doctors' medicines did not help me in the least, and all other remedies I used were quite useless. In one case it was time wasted in snuffing powder up the nose; in another using a greasy ointment, and so on. Not one of them was the least bit of good.

"I heard Catarrhozone favorably spoken of, and tried a sample, and it really benefitted me more in a few hours than years of treatment with doctors' and other so called remedies.

"Receiving such immense benefit from the sample size I got the complete outfit, large Hard Rubber Inhaler, etc., and but a few weeks of its use completely cured me of Catarrh and throat trouble.

"I recommend Catarrhozone as the most satisfactory Catarrh remedy on the market. Every word said about it is true.

(Signed) "Richard McCallum."

Now perhaps you need a remedy like Catarrhozone. It is the only treatment that is applied locally as well as constitutionally. The Inhaler clears the air passages, stops hawking and spitting, and purifies the breath.

The Ferrozone Tablets which are used in conjunction with Catarrhozone Inhaler, drive all the poisons from the blood and build up the system to a healthy, vigorous condition.

The complete outfit costs $1, at all druggists; trial size 25c. by mail from N. C. Polson & Co., Kingston, Ont. Buy Catarrhozone to-day.

Morning Times

PETERBOROUGH, JANUARY 15, 1904

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

Bridge Now Completed

The track over the Cereal Company's new dam has been completed and Grand Trunk cars are now passing over it.

Roof Completed

The new iron roof on the new building for the Canadian General Electric Company, has been completed. The work of installing the new machinery will now begin.

Too Much Snow

Reports indicate that lumbering operations are greatly hampered by the heavy snow in the woods. The lumber cut is rather lighter than usual this winter, in any case, but the difficulty in breaking roads for hauling to the skidways will make this even less.

Primary and Junior Union

It is requested that there be a full attendance of those interested in primary and junior work at the business meeting to be held on Friday evening in the Board room of the Y.M.C.A at 8 o'clock. Election of officers and the advisability of continuing the Union will be fully discussed.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. H. P. Kennedy was in Montreal yesterday.

—His Worship, Mayor Roger, is suffering from a cold.

—After five weeks' illness the genial proprietor of the Cavanagh House, is again able to be about.

—The many friends of Mr. W. J. Pearson the well known horse buyer, will regret to learn that he is confined to his room at the White House, with a severe cold.

—Toronto News.—The announcement has been made in Peterborough of the engagement of Miss Lena Bourchier, daughter of Mr. Geo. M. Bourchier, and granddaughter of the late Admiral Sir George Bourchier, K.C.B to Mr. Peat.

—BEGINS—

Monday, January 4 1908

Day and Night Classes.

It is desirable that all who purpose entering the school should do so on the above date.

WM PRINGLE,
Opposite Post Office, Principal.

DEATH OF DR. DUNCAN FRAZER

One of the Best Known Physicians of the District

Dr. Duncan Frazer of Lakefield, who was taken of pleura-pneumonia on Sunday evening, died yesterday (Thursday) morning at 11.30. Among the physicians in attendance was his nephew, Dr. Frazer, of Toronto. But though the best medical skill was available, nothing could stay the hand of death.

The deceased was born at North East Hope, near Stratford, 67 years ago, where he received his early education, and also taught school for a number of years. He then attended Trinity Medical College, Toronto, graduating therefrom in 1874, and winning the silver medal. In the same year he also had the additional distinction of capturing the silver medal given by the Toronto Medical college.

After practicing in Lakefield for a few years he went to England and entered on a post-graduate course in London, taking his M. R. C. S. degree. He subsequently made an inspection of the principal hospitals in the different countries of Europe. Following this, he spent two years as surgeon on one of the P. & O. steamers, which plyed on the east coast of Africa. At the time of the Russo-Turkish war, the Dr. saw considerable service, having joined a military expedition under the late Sir William MacCormack. Sir William was at that time President of the Royal College, and also physician to the Queen.

The deceased had intended to practice in South Africa, but, changing his plans, he returned to Canada and entered into partnership with Dr. John Clark, of Peterborough. After working up a lucrative practice, he bought out Dr. Armour, of Lakefield, and has resided there continuously for over 30 years. The greater part of this time he has been connected with the Public School Board, having been chairman of that body for four or five years.

The Dr. was a life-long Liberal, a P.M. of Clementi Lodge, A.F. & A.M., and Associate Coroner for the County of Peterborough, and also Medical Health Officer of the village. He was considered one of the leading physicians of the county, and will long be remembered for his exceeding great charity to the poor.

This is the first break in a family of seven. The other members are: Dr. B. B. Frazer, Stratford; James F., of Stonewall, Man.; R. A., of Toronto; Alexander of New Hamburg; John A., and Mrs. Mein of North East Hope.

The Masonic brethren will have charge of the funeral, which will take place from his late residence, to-morrow (Saturday) afternoon, at 2 o'clock and proceed to the Hillside cemetery, where the interment will take place.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporters on Their Rounds

—Handsleighs for boys and girls at very low prices at Times Bookstore.

—Mr. Dan Coughlin, carpenter, is building a new brick veneered house in Ashburnham.

—Twenty-five sheets of best quality note paper, either ruled or plain for five cents at Times Bookstore.

—At the convention of Ontario Architects, which was held in Toronto yesterday, Mr. John E. Belcher, of Peterborough, S. G. Curry and W. R. Gregg, of Toronto, were elected to fill three vacancies on the Council.

—The people who have been eating brown bread, although they did not like it, because they thought it was healthy, will be surprised to hear, on the authority of Mr. G. Nasmith, M.A., Ph D., of the Provincial Health Department, that they should not eat brown bread, if they can get white, because the latter is the more nutritious.

SALVATION ARMY BAND

The New Instruments Have Arrived for the S. A. Band

The new instruments for the Band of the Salvation Army have arrived, and are on exhibition in the window of China Hall. They cost $500, the amount being raised by subscription from the friends of the Army in the town and surrounding district.

The instruments were obtained from the Salvation Army Headquarters, London, Eng., and are said to be of the very best. There are twelve in the lot, but from the fund was also purchased a mellophone from Wetherburn and Gliddon, Toronto. The new outfit consists of two b flat cornets and e flat soprano trumpet, one b flat flugal horn, one "Triumph" e flat solo alto horn; two e flat altos, one baritone, one solo euphonium, one e flat bombardell, one e flat slide trombone, and one base drum. An acetylene torch has also been purchased as a requisite for street playing.

The officers of the Band are making preparations for the presentation of the instruments on Monday, Feb. 1st., The Salvation Army Band will now be well equipped for some very choice music.

FOR THE TANKARD

Peterborough Thistles Win from Lindsay Yesterday

Peterborough curlers were again defeated in the Tankard Competition. The competition took place yesterday, and resulted as follows;

Granites	Lindsay
Dr. Wightman	T. Burke
S. T. Medd	L. V. O'Connor
R. Waddell	G. A. Little
G. H. Giroux, sk 15	W. McLennan, sk 12
W. Thompson	L. McIntosh
G. Hay	R. H. Cuthbert
J. Connal	N. F. A. McIlweyn
W. G. Morrow, sk 11	J. D. Flavelle, skp25

Peterborough, total 30; Lindsay, total 37. Majority for Lindsay, 7 shots.

Cobourg	Whitby
C. McCallum	A. Robb
J. Henderson	J. S. Ballantyne
A. Pratt	J. E. Willis
W. L. Allen, sk. 13	F. Paxton, sk 15
O. G. Johns	P. Mathewson
A. R. Dundas	W. Hood
J. Bulger	J. Mitchell
R. W. Hargraft, sk. 24	J. Tweedie, sk 15

Cobourg, total, 37; Whitby, 30. Majority for Cobourg, 7 shots.

THE AFTERNOON

At the afternoon match the Peterborough Thistles won by two shots. The following is the score;

No. 1 Rink.

Thistles	Lindsay
R. Sturgeon	T. Burke
Fred Dixon	L. V. O'Connor
R. J. Frost	G. A. Little
R. Neill, sk. 18	W. McLennan, sk 14

No. 2 Rink.

A. Blade	L. McIntosh
Geo Brown	R. H. Cuthbert
D. Davidson	F. A. McIlweyn
J. Knapman, sk. 14	J D. Flavelle, sk 16

PETERBOROUGH WINS AT NIGHT.

In the game last night between two rinks of the Peterborough Thistles and two rinks from Bobcaygeon, the Thistles won by 7 shots. The local rinks will be in the finals to be played off in Toronto.

THE TOWN COUNCIL

(Concluded from page 1.)

Clause 6, to ratify the by-law and authorize the purchase of the Hilliard Estate and the selling of any portion thereof, carried.

Clause 7, to authorize the erection of an Isolation Hospital, carried. In this connection His Worship explained that the Town must, by law, make provision for contagious diseases, and that the hospitals are at present charging the Town $1 a day for each patient, under a temporary arrangement.

Clause 8, to confirm the purchase by the Little Lake Cemetery Co. of certain property within the corporation, carried.

Clause 9, to make alterations in the number, term of office, manner of appointment and duties of the Town Trust Commissioners was allowed to stand till next meeting.

Clause 10, to provide for the reduction of the number of members of the Board of Education, carried.

Clause 11, to provide for the election of Aldermen for a term of two years and for one half of the members of the Council retiring each year, carried. Ald. McWilliams thought this system would insure more intelligent discrimination on the part of the voters. There would only be six names to be selected instead of 12, and last year he knew for a fact that the average elector only voted for six men, when eleven men were to be returned. Ald. Morrison thought it would be better to revert to the old ward system, and divide the town into six wards.

Clause 12, to provide for the appointment by the Council of a Court of Revision consisting of three members, none of whom shall be a member of the Council, carried.

Clause 13, to ratify the exemption of the Dickson Co. and the Canadian Ultimator Co. from taxes, except school taxes, met with strong opposition on the part of Ald. McWilliams and Best. The former claimed that the Dickson Co.'s exemption was not approved of by the majority of the Ashburnham electors, who made it an issue at the polls, in opposition to Ald. Adams and Scott. Ald. Best expressed the fear that if Legislation was secured confirming this matter, the Town would have to treat all comers alike. Where are we going to stop? He could not see the justice in giving exemption to rich industries, while less fortunate concerns went abegging. He did not like the idea of the Dickson Co.'s exemption having been rushed through at the close of the year, after "union" had been consummated.

Ald. Adams explained that this question had been before Ashburnham for months. The reason of the delay was that the Council awaited the decision of the Legislature, as to whether they were going to rescind the power invested in municipal councils to give exemption. Immediately it was decided to allow that power to stand good till the end of 1904, Ashburnham Council took decisive action.

This clause was allowed to stand till Monday night, when the Committee well meet again.

Leon Hayard, better known as "Napoleon Hayard, Emperor of Hawkers," is dead, and all the Paris "camelots" are in mourning, for their sovereign was a charitable man and never turned a deaf ear to an appeal for help. On August 15 last he was knocked down by an automobile, and he died the other day from the results of the injuries he then received. It was Hayard who supplied all Paris "camelots" with their wares; he was both an inventor and an editor. Lampoons and cartoons, songs and satires on the topic of the moment were his specialty—the "last will and testament" of dead celebrities, songs on Boulanger, Kruger, King Edward and the Humberts. Everything gave him a text, and his knowledge of the fads of the public was unerring. Besides he supplied "applause" and "cheers" at public meetings. On one occasion a debate had been organized, and both candidates came to Hayard for the support of his "camelots." Hayard booked both orders, and paid his men twice the usual fee. When the meeting took place they cheered the ministerial candidate for the first hour and his opponent for the second!

First Citizen—We shall have to have these resolutions of thanks about the new library of ours done all over again. Second Citizen—What's the matter? First Citizen—Why, by a clerical error the name of the Lord was placed before that of Andrew Carnegie.

Mr. Jones—That young Snodgrass seems like one of the family. His Only Daughter How so, papa? "Why, he looks scared when your mother's anywhere near."—Exchange.

"Did you give that woman two good eggs for her five cents?" asked the corner-grocer of the new boy. "I did, sir." "You're discharged. You should have sold her two bad eggs, so that she'd come back to kick, and give me a chance to sell her a porterhouse steak."—Baltimore "News."

HARD TO LEARN

Takes Hard Experience to Teach People Some Truths

Many people jeer at the idea that coffee causes the aches and ails they suffer from and often such people will go on for years sticking steadfastly to the coffee and suffering month in and month out, but maintaining "Coffee don't hurt me."

Only an actual test will open their eyes to what they throw away when they cast aside the richness and power of health for a cup of coffee now and then. A lady says;

"I did not learn the real truth until I made the change, but I can now positively state that the headaches I had for about seventeen years were caused by drinking coffee for when I changed and gave up coffee and used Postum in its place I experienced entire relief; I have not been troubled with headache since I began Postum in 1896.

"This in brief has been my experience on the coffee question. Among my friends I have seen many other wonderful instances of the power of this food drink when used in place of the drug drink coffee. Among my friends there are those who tell me of relief from kidney trouble, neuralgia and eczema by leaving off coffee and using Postum and I have even known it to ease rheumatic pains in the limbs.

"I readily believe these statements for since I cut out coffee and used Postum I never seem to have an ache or pain and I would not dare go back to the old coffee again. Not only myself but my family use Postum exclusively and we know there is no hot beverage that can take its place. Nearly seven years steady use of Postum convinces me I know what I am talking about when I say it is food as well as drink and most valuable to build up the system." Name given by Postum Co., Battle Creek, Mich.

"There's a reason."

Look for the little book, "The Road to Wellville" in each pkg.

$500 REWARD FOR WOMEN

WHO CANNOT BE CURED.

So uniformly successful has Dr. Pierce's Favorite Prescription proven in all forms of Female Weakness, Prolapsus, or Falling of Womb, and Leucorrhea, that, after over a third of a century's experience in curing the worst cases of these distressing and debilitating ailments, Dr. Pierce now feels fully warranted in offering to pay $500 in cash for any case of these diseases which he cannot cure.

IT STANDS ALONE.—The "Favorite Prescription" stands alone, as the one and only remedy for these distressingly common forms of weakness, possessed of such positively specific curative properties as to warrant its makers in proposing, and binding themselves to forfeit, as we, the undersigned proprietors of that wonderful remedy hereby do, to pay the sum of $500 in legal money of the United States in any case of the above diseases in which after a fair and reasonable trial of our treatment, we fail to cure. No other medicine for the cure of woman's peculiar ailments is backed by such a remarkable guarantee; no other medicine for woman's ills is possessed of the unparalleled curative properties that would warrant its manufacturers in making such an offer; no other remedy has such a record of cures on which to base such a remarkable offer.

Therefore, *insist* on having Dr. Pierce's Favorite Prescription and turn your back on any unscrupulous dealer who would insult your intelligence by attempting to foist upon you some inferior substitute, under the plea that "it is just as good." Insist on having the article which has a record of a third of a century of cures and which is backed by those willing to forfeit $500 if they cannot cure you.

In cases attended by a leucorrheal drain a solution of Dr. Pierce's Lotion Tablets should be used conjointly with the use of the "Favorite Prescription." They are sold by all druggists, or sent post-paid to any address, on receipt of 25 cents in stamps. Send 50 cents in stamps for Dr. Pierce's Common Sense Medical Adviser. Address WORLD'S DISPENSARY, Buffalo, N. Y.

Weak and sick women are invited to consult Dr. Pierce, by letter, *free*. All correspondence is held as strictly private. Address Dr. R. V. Pierce, Buffalo, N. Y.

Dr. Pierce's Pellets cure biliousness.

RUSSIAN TERMS ARE REGARDED BY JAPANESE AS MOST INSOLENT

England and France Are Jointly Endeavoring to Bring About a Settlement of the Difficult

Japan Remains Firm and Russia Must Recede

WAR MAY COME QUICKLY

The Only Hope For Peace is in the Action of the Powers

London, January 16. — The correspondent of The London Times at Pekin says the terms of Russia's proposals to Japan, as announced at Berlin, are regarded as substantially correct. It is believed that Russia selected this way of giving publicity in order to test the opinion of the world. The clause stating that Russia accepts no condition in reference to Manchuria but is ready to accord Japan and the other powers representation for their commercial interests in Manchuria, is consistent with the frequent intimations of the Russian Minister that Russia would never tolerate the interference of a third power in questions affecting Manchuria. These terms are regarded, even by friends of Russia, as impossible of acceptance, and are characterized as insolvent. Japan's position at Pekin now is remarkable, and the change of attitude of China now is striking.

The policy of Russia, in not only violating her pledges, but re-occupying the chief city of Manchuria, appears to have deceived China and thrown her into the arms of Japan.

The Times' correspondent at Berlin says the general expectation in Germany is that an outbreak in the Far East is not to be apprehended in the immediate future, and may be postponed for months. It is worth noting that the Berlin bourse, which during the most exciting days of the crisis was comparatively firm, now appears to reckon on a prolonged period of anxiety, since it has become dull and reserved.

The preparations of Japan are complete. Her intelligence service is singularly effective. Russia is not ready, and the confusion on the railway in Manchuria is great. For some time, owing to the difficulties around Lake Baikal, few Russian troops have come by land to the Far East.

The military strength of Russia east of Lake Baikal is exaggerated by the continental papers.

The Times' Moscow correspondent says he hears the Government has claimed the services of the entire volunteer fleet.

A despatch from Tokio to Reuter's Telegram Company, says that Japan's answer to the last Russian note was handed yesterday afternoon to Baron De Rosen, the Russian minister, and that negotiations will be continued without any time limit being set for their termination.

The demands which Japan is said to have made, according to reports published abroad, have caused some surprise in Tokio according to the despatch and it is now stated that Japan never asked for the evacuation of Manchuria, but on the contrary frankly recognized Russia's special interests there, and her right to protect them. Japan only demanded the realization of Russia's voluntary pledges respecting China's territorial integrity in Manchuria and the freedom of residential rights and international trade therein.

RUSSIAN WAR VESSELS.

Port Said, January 16.—The Russian warships, Dmitri, Donskoi, and Aurora, and seven torpedo boat destroyers, arrived here yesterday, and began their passage through the Suez Canal, en route for the Far East. The Oslyabya and other vessels of the Russian fleet are expected momentarily. The new Japanese cruiser Kasaga has arrived here, and the Nisshin is expected at any time. The arrival of the Kasaga evidently caused much admiration aboard the Russian vessels, which began signalling vigorously. It is assumed that the idea of the Russians is to sandwich the Japanese vessels in the canal, with a view of possible developments. The Russians seemed to have scored hitherto in the game of shadowing the Japanese ships since they left Genoa. If the latter had got through the canal first they would have stood a good chance of outrunning the Russians, as it is believed that they are capable of considerably more scheduled speed.

JAPANESE IN DISGUISE

Liverpool, January 15. — An interesting statement in connection with the strategic value of the trans-Siberian railway was made today by Fulford Bush, a member of a British mercantile firm at New Chang. He said that his own observations, coupled with trustworthy native information, convinced him that at least 300 Japanese military engineers disguised as Chinese coolies, barbers, and other menials, had already been distributed at points along the railroad and that it would not be a fortnight after the declaration of war before the line would be blown up at least in a dozen places.

IMPRESSED INTO THE SERVICE.

San Francisco, Cal., January 16.—A cablegram to the Pacific Mail Steamship Company, announced that the Japanese Government had impressed into the transport service the three steamships of the Oriental Steamship Company, plying between this city and the Far East. The vessels are the Nippon Maru, Hong Kong Maru, and the American Maru. They are fast boats, built in 1898, and have been under Japanese subsidy. A few months ago they passed Government inspection.

The Nippon Maru and Hong Kong Maru are each of 4,8?1 tonnage, and the American Maru 5,540. The American is due here next Saturday, and will be sent back when discharged. The Nippon left here December 30, and the Hong Kong is now in Japanese waters.

It is likely to include suggestions that the outside powers consider that the main questions are susceptible to pacific adjustment. The exchanges of views have thus far been confided mainly to London and Paris. But throughout the exchanges there has been a strong sentiment that the united influence of Europe and the United States will give no small amount of support to the efforts to avert a conflict. This has been one of the main factors in the strong belief in official quarters during the last few days that the Russo-Japanese issue could not eventuate in war.

The opinion today continues to be that the parties themselves will succeed in averting a conflict, and that until it becomes manifest that they are unable to do so no action will be taken from the outside.

A diplomatist interviewed by the Echo de Paris, says that the French engagements with Russia do not include military intervention in the Far East, but that in the extremely unlikely event that Great Britain would be obliged to help Japan according to their treaty engagements, France and Russia would take measures to safeguard their interests as provided by the convention signed in March, 1902.

THE JAPANESE CRUISERS.

Port Said, January 16— The new Japanese cruiser Kasaga —which arrived at Port Said yesterday for Genoa— has left for Suez.

The Japanese armored cruiser, Nisshin—which sailed from Genoa with the Kasaga—has just arrived here.

It is stated by the officers of the Nisshin that the reports of an attempt to destroy their ship at Genoa are entirely false.

RUSSIAN GARRISON INCREASED.

Tien Tsin, January 16— A telegram to the Railway Administration here received yesterday from New Chwang says Russia is increasing the garrison there.

In the next few days, 1,?00 more troops are expected to arrive.

St. Petersburg, January 15.—War-like talk fills the air, but in Government circles the fact seems driven home that Russia is confronted by too many difficulties in the Far East to warrant the violation of the irreducible minimum of Japan's demands. At all events, the peace party is more hopeful today that the Czar will compel his ministers to make the concessions necessary for the avoidance of war. The latest check to the war coterie is due to the new legal obstructions that America and Japan have succeeded in putting in Russia's path to Manchuria.

JAPAN'S ANSWER IS FIRM.

Tokio January 16.—It is said that Japan's answer to Russia's latest note is not in the form of any ultimatum, and it is described as moderate in terms but resolute in tone. It is said to be largely devoted to a discussion of affairs connected with Corea, Japan having been strongly advised not to fight over Manchuria alone. Foreign Minister Komura visited successively the Marquis Ito, Chief of the Privy Council; Premier Katsura, and the Emperor. He subsequently called upon Baron de Rosen, the Russian Minister, and it is generally believed handed him in person the Japanese reply.

Paris January 16.—The intention on the part of certain European powers to find means to prevent the Russo-Japanese controversy drifting into actual war, as intimated in these despatches yesterday, has begun to assume definite proportions though until today these means were confined to an exchange of views between the Cabinets as to what course was desirable, and it can be asserted positively that no tender mediation or good offices has yet been made to Japan or Russia, as it is an accepted view that a grave moment which would warrant representations from the outside has not yet been reached. On the contrary, the official view here continues to expect a peaceful solution without outside pressure.

The Cabinets of London and Paris have arrived at a quite clear understanding as to what will be done if eventually war becomes imminent. This will not be done by a tender of mediation, as this is considered to be too extreme a step in diplomatic procedure when two of the foremost powers are the disputants, but will be a tender of good offices, giving friendly advice for the maintenance of peace.

CANADIAN EXHIBIT AROUSES IN EREST

Canada's Furniture is Special Feature at Crystal Palace

LADY CAMPBELL'S FUNERAL

Army and Navy Gazett Praises Canada's New Militia Proposals

London, January 16— The Canadian furniture exhibited in the Canadian Court at Crystal Palace is proving a great attraction for visitors. J. H. Cosens manager of the Crystal Palace Company, is taking a special interest to make the Canadian exhibit a feature at the Palace.

THE CANAIDAN MILITIA.

The Army and Navy Gazette says; "There is virtue in the new system of the Canadian Militia. It provides the right machinery for utilizing the spirit gained in the schools. There is no reason why such an organization should not be provided in England."

LADY CAMPBELL BURIED.

Lady Campbell, the widow of Sir Alex Campbell, Canada's first Postmaster-General since Confederation, was buried yesterday at Kensal Green Cemetery. Very many handsome wreaths from friends in Canada were laid on the casket.

TO-DAY'S CONVENTION

Conservatives Will Meet This Afternoon At Two O'clock

The Conservatives of West Peterborough will meet in the Opera House this afternoon, for the purpose of electing officers and organizing for the approaching elections for the House of Commons.

Nothing is said in the advertisement calling the meeting about selecting a candidate, and is therefore probable that another meeting specially for this purpose will be held at an early date.

There seems to be considerable doubt as to who the candidate will be. Mr. James Kendry, it is said, is not anxious for nomination, as his business interests prevent him giving the time required for Parliamentary duties at Ottawa. Mr. J. W. Garvin is mentioned as a possibility as also is Mr. Geo. W. Fitzgerald. There is, we understand, a "dark horse," in the person of Mr. Hugh Waddell. Mr. Waddell is a man who would enthuse the party and revive hope in the hearts of the faltering ones. He is well and very favorably known throughout the riding, and his candidature would be hailed with delight by many who desire pure politics.

No doubt Mr. Kendry will be tendered the nomination, and his acceptance would be satisfactory to a large majority of the party.

WEDDING BELLS

Mr. Herbert Fallis of Bethany, Weds Miss Lizzie M. Irwin, of Peterborough

On Thursday evening at 7.30 a very pretty wedding took place at 19? Simcoe street, the residence of Mr. W. Cornell, when Miss Lizzie Irwin, of Peterborough, was united in marriage to Mr. Hubert Fallis, of Bethany. The ceremony was performed by Rev. W. J. Jolliffe B.C.L., and only the immediate friends were present. The bride was attended by Miss Lillie Fallis, of Franklin, sister of the groom, and both wore handsome costumes of crepe de chene with Persian trimmings. Mr. J. Irwin, of Toronto, brother of the bride, was groomsman. Little Ruby Irwin, neice of Mrs. W Cornell, was maid of honor and was attired in white silk. The bride's bouquet was of white carnations and the bridesmaid's pink carnations.

A dainty wedding dejeuner was served at the conclusion of the ceremony after which the happy young couple left on the nine o'clock G.T.R. train for their honeymoon tour. Mr. and Mrs. Fallis will reside in Bethany.

Italians Arming for Fight

Labor Troubles At Copper Cliff Expect to Reach Head To-day

Sault Ste. Marie, Ont., Jan. 15 —At the request of Captain Cressy of the Sudbury Company of the 97th Regiment, Col Fiset, the commanding officer, is shipping from the stores here 500 rounds of gallery ammunition to be supplied to the Sudbury militiamen, who are in readiness to turn out to quell the riot among the Italian laborers at Copper Cliff. It is expected the trouble will reach a head to-morrow, and the authorities are preparing for it.

A dozen or more Italians, arrested a couple of days ago in connection with the disturbance following a reduction in pay for loading coke cars, will get a trial before Magistrate Brodie, and it is thought this may be the occasion of a demonstration on the part of the Italians who have bought all the firearms and knives procurable in the neighborhood and are vowing vengeance. The Soo company of the 97th will be ready to go in an emergency. A special train is ready at Sudbury to rush the militiamen over to Copper Cliff, if needed.

BURLEIGH S PROGRESSIVE SPIRIT

No Chance of Railway They Will Build Good Road.

With commendable enterprise, the municipality of Burleigh and Anstruther is considering the advisability of submitting a by-law to the ratepayers to provide funds for the purchase of a stone crusher. The chief object is to build a good road through the municipality towards Peterborough, connecting with the stone road to Lakefield. It is expected that the Government and county council will assist by substantial grants.

We think it is a great mistake that no effort is being made to get a railway into our back country. Peterborough has too long remained apathetic to the value of our northern trade. We will probably wake up some day and find that the proposed road from Norwood is to be built, and the trade, which naturally belongs to Peterborough has gone from us forever. The Board of Trade should look into this matter without delay.

JAPAN IS RESOLUTE BUT MODERATE.

Negotiations by no Means at an End in the Far East

The War Cloud Appears To-Day to Have Lifted

London, Jan. 16—The Shanghai correspondent of the Daily Mail reports the gradual and extensive movement of Chinese troops towards Shan Hai Kwan in Chi Li Province, probably with the view of securing the harbor of Ching Wan Tao, on the Gulf of Liao Tung, and the coal mines thereabouts against Russian seizure.

The Daily Telegraph's Tokio correspondent says that the Japanese Government as a part of its program in naval extension has placed a contract in England for a 16,000 ton battleship.

WAR LOOKED FOR.

Pekin Jan. 14—The expectation of war is greatly increased in diplomatic circles here. The German Minister now regards war as a probability, although not despairing of a settlement at the eleventh hour. One legation has received a despatch from Tokio, saying that Foreign Minister Komura, Jan. 11, represented to the diplomats that he expected peace to be maintained.

EXPECTS WAR SURE.

Paris Jan. 15—Prince Louis Napoleon has informed a friend that he expects to be called to Russia immediately, adding that war is expected by all. "In case of mobolization," said the Prince, "my command would be one of the first to start. The whole of the Russian army is ready. The army does not desire war, but considers that it is inevitable. It is due to the Czar alone that hostilities have not already broken out." Prince Louis Napoleon is a major-general in the Russian military service and commands the cavalry division of the Caucasus at Tiflis.

TRIED TO POISON HER MOTHER

Vancouver, B.C., January 16.—A strange case of attempted murder was brought to light here. Gracie Hewittson, a pretty girl of fifteen, was in the habit of playing "hooky" and roaming the streets. The mother was constantly admonishing her. Last night Grace sent her six year old brother to a drug store for poison. The boy got it and Grace put it into the tea pot. Happily, as the mother was about to drink the tea she fancied she smelled a strange odour in the steam. She rushed at her daughter with a whip. The daughter confessed. Grace was arrested and refused to give any evidence beyond saying that she was unhappy. Grace was locked up. She says she will get even with her mother yet.

EVERYBODY READS THE TIMES.

LABOR'S TROUBLES

The Great Livery Strike Again Opens in Chicago

Chicago, January 16.—The strike of livery drivers began anew today. After a truce of fifteen days, following the Iroquois Theatre fire, ninety-five per cent., of the sixteen hundred drivers of carriages and hearses are said to be out and once more the back undertakers waggons were put into service in lieu of hearses at funerals, while mourners were obliged to resort again to the street cars in journeying to the cemeteries.

Failure of employers and employes to agree on a wage scale was the cause of the resumption of the strike.

PLUNGED DOWN THE SHAFT

Foolish Action of Shoe Workers Cause Eight Deaths

St. Louis, Mo., January 16.—A crowd of employees pressing against the elevator gate last night on the sixth floor of the Brown Shoe Company, at 11th street and Washington avenue, caused the gate to give way, and ten persons were plunged down the shaft. Six were taken out dead, and the other four seriously injured, were hurried to the city hospital, where two died later.

One of the injured died soon after reaching the hospital, without regaining consciousness.

The employes were waiting for the elevator to take them down. The elevator was at the seventh floor when those on the sixth floor, eager to be into the cage, began to push forward, breaking the gate, and sending ten persons down the shaft.

James Johnson, the elevator operator, was arrested. Johnson said the elevator gate did not break, but that it had been raised by employes and that suddenly those in the rear pushed those in front down the well. Factory Superintendent Pray corroborated Johnson's story.

Local Sporting News.

The T.A.S. played their return game in the T.V.L. at Keene last night, and were defeated by 8—5. Mr. W. A. McIntyre, of Bobcaygeon, refereed the game.

CHALLENGE ACCEPTED.

The West Enders hereby accept the challenge of the Young Nationals to play a game of hockey. Place and time to be arranged by the managers of the respective teams. Otto Stortz, Secretary.

PORT HOPE ON MONDAY.

The seniors go down to Port Hope on Monday night to play the team of that place. A special train will be run, leaving here at 5.30 and reaching Port Hope about 6.30. The team should have a large crowd accompany them. The fare will be $1.10.

STOUFFVILLE WON AT HOME.

Stouffville, Jan. 14—Stoffville defeated Lindsay in the intermediate series, O.H.A., here this evening by a score of 12 to 4. Mr A W. McPherson refereed the game he also officiated at a game between Markham and Uxbridge last night at the latter place. "Mac" is greatly in demand having obtained a great reputation for his ability as a referee.

ANOTHER HOCKEY FAMILY.

Newmarket, Jan. 14—Referring to the despatch from Perth in reference to the challenge of the Maclaren brothers to play any other seven brothers a hockey match, the town of Newmarket is the proud possessor of seven hockey brothers which would be glad to hear from the Perth seven. They are the Doyle family. Six of the boys are at home here, while Edward lives in Brantford. The line-up will be as follows. Goal Larry, point, Fred; cover-point, Frank forwards, Ern, Harry, Edward and Tom.

President J. Ross Robertson, of the O.H.A., with Mrs. Robertson, left yesterday for Boston, whence they sail by the Romanic for Gibraltar, Algiers, and Egypt. The tour will occupy about three months.

WEATHER NOTES

Saturday—Little higher temperature.

PANAMA EXPECTS BATTLE WITH COLOMBIAN TROOPS

May be Marching Upon Isthmus and Opposing Army is Ready for Hostilities

New York, Jan. 15—Authentic information from the frontier is anxiously awaited here, as the belief is widespread cables the Herald's Panama correspondent that the Colombians have already started to march upon the isthmus.

The Panamanian troops are ready to leave on a moment's notice. The conscription has been completed, and 12,000 fighting men can be placed in the field.

Colonel Barette of the Panamanian army, said; "Four hundred to five hundred men, stationed in the only three passes available, can defeat an army. We have all the men we actually need. We expect to repel invasion without calling out the available troops. The Indians will certainly fight on our side."

REPLY TO RUSSIA IS NOT AN ULTIMATUM.

But It is Regarded as a Step Farther in a Less Hopeless Direction

Tokio Jan. 14—It is said that Japan's answer to Russia's latest note is not in the form of any ultimatum, and it is described as moderate in terms, but resolute in tone. It is said to be largely devoted to discussion of affairs connected with Corea, Japan having been strongly advised not to fight over Manchuria alone.

Foreign Minister Komura visited successively today, the Marquis Ito, chief of the Privy Council; Premier Katsura, and the Emperor. He subsequently called upon Baron de Rosen, the Russian Minister, and it is generally believed here handed him in person the Japanese reply.

It Is Not an Ultimatum.

London January 14 —Minister Hayashi received this morning the text of the Japanese reply to Russia's last note.

It does not contain an ultimatum, but reiterates Japan's original demands with, what Baron Hayashi terms, a modification upon a minor point.

The question of Chinese sovereignty in Manchuria and Japan's sphere of influence in Corea are reinsisted upon.

Minister Hayashi said today; "So far as I can see, the relations of the two Powers regarding the dispute practically are unchanged. I have no indication of the reception this note is likely to meet at the hands of the Russian Government, but I expect the negotiations will continue for several weeks."

MORE RUSSIAN TROOPS.

Constantinople, Jan. 16— Two large vessels belonging to the Russian volunteer fleet, carrying troops, passed through the Bosphorus today, bound for the Far East.

STILL RUSHING FORCES.

Tien Tsin, Jan. 14—A telegram to the railway administration here, received yesterday from New Chwang, says Russia is increasing the garrison there. In the next few days 2000 more troops are expected to arrive.

JAPANESE BOATS ARRIVE.

Port Said, Jan., 16—The new Japanese cruiser Kasaga, which arrived at Port Said yesterday from Genoa, has left for Suez. The Japanese armored cruiser Nisshin which sailed from Genoa with the Kasaga has just arrived here. It is stated by the officers of the Nisshin that the reports of an attempt to destroy their ship at Genoa are entirely false.

40,000 TONS OF COAL.

Detroit, Mich, Jan. 16 — A Detroit firm owning coal mines near Norfolk, Va., has received an order for 40,000 tons of Pocahontas coal for the Japanese government.

THE CZAR WILL TAKE STEPS FOR PEACE

Slaughter the Foreigners---All American Women at Seoul Ordered to Remain In Doors

London, Jan. 15— A St. Petersburg correspondent says;

The Japanese Minister today handed the Japanese reply to the Foreign Office here.

The diplomats here regard favorably the suggestion to transfer the Russo-Japanese negotiations to St. Petersburg, as it would remove the negotiations from the hands of the war party, represented by Admiral Alexieff, the Russian Viceroy in the Far East, and enable the Czar and Foreign Minister Lamsdorf to more closely control them.

"I desire, and intend to do all in my power to maintain, peace in the Far East."

These were words the Czar spoke to the members of the diplomatic corps at the New Year's reception, held in the winter palace at noon yesterday.

Keen curiosity was exhibited all over the room when His Majesty approached Mr. Kurino, the Japanese Minister to Russia. The conversation was cordial. The Czar emphasized the high value which he places upon the good relations between Japan and Russia.

Mr Kurino left the reception profoundly impressed with the Czar's words.

Will Not Initiate.

The Japanese Minister, Baron Hayashi, said this morning;

"It is practically certain that any declaration of war will not emanate from Russia."

The British Foreign office officials said last night, after reading the Japanese reply to the last Russian note, that it only takes the crisis a step further in a less hopeful direction.

A Berlin message says; The Japanese Minister and all the staff of the Legation attended the Russian Ambassador's New Year's reception yesterday.

Japan's reply, as outlined in these despatches yesterday, is considered as offering Russia a way out of the difficulty without loss of prestige.

The Seoul correspondent of the London Daily Mail says that the Native press is advocating the slaughter of all foreigners. United States Minister Allan has ordered all American women and children to remain indoors.

The Daily Telegraph's Tokio correspondent says that the Japanese Government, as a part of its programme in naval extension, has placed a contract in England for a 16,000-ton battleship.

The report that the British Government has notified Japan that any attempt of the Russian Black Sea fleet to pass the Dardanelles would be checked by decisive action is untrue. Foreign Secretary Lansdowne today expressed disbelief that Russia had any intention of trying to send a fleet through the Dardanelles, adding that it would be an obvious breach of treaty to which Great Britain could not possibly acquiesce.

Ottawa, Jan. 14— The intimation that a new tariff arrangement between Canada and Germany would involve the extension to Germany of the privileges enjoyed by France under the so-called French Treaty, is described as a relatively insignificant feature of the negotiations. The point of consideration is the granting to Canada by Germany of the privileges of the minimum German tariff and the removal by Canada of the surtax on German goods. That point being adjusted, Germany would fall naturally in a sort of favored-nation column, and would almost as a matter of course, enjoy the privileges of the French Treaty, which is the only special treaty Canada owns, and represents, in a sense her lowest tariff. The treaty is already enjoyed by France, Argentina, Austria, Bolivia, Colombia, Salvador, Sweden, Spain and Russia. It calls for reductions in Canadian duties on wines, castile soaps, nuts, almonds, prunes and plums. Germany was in the favored-nation column under the French Treaty until the British preference was granted, and the German and Belgian treaties abrogated. As the result of a friendly readjustment of the present differences, she would return to the favored nation column as a matter of course.

TRIUMPH FOR CHAMBERLAIN.

London, Jan. 16— The Birmingham Post says if it be true that the German Government has given way to Canada, Mr Chamberlain will be entitled to claim that his fiscal proposals have already borne practical fruit. This concession removes one of the chief obstacles to preferential arrangements with the colonies. As Germany has given way, it is unlikely that any other commercial nations will stand out against us.

London, Jan. 16— The Times says of the tariff commission, which holds its opening session to-day; "It is the most representative and authorative body of business experts ever brought together in this country and will afford time and materials for mature consideration. The commission will not in the least way dictate to the colonies what the nature of the colonial preference should be. Canada finds an able representative in Mr. J. G. Colmer. The commission is one of inquiry, but its object is to work out the details of Mr. Chamberlain's proposals."

At the tariff commission banquet last night Mr. Chamberlain described it as a business commission for business men and said that Chairman Pearson was the greatest hustler he had ever known.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's *Diseases in Their Own Homes.*

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says. Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

PETERBOROUGH, JANUARY 16, 1904

BUILDING A CANAL

State governors are peculiar officials under the United States system. They manage details of the legislature. They even exercise their influence in favor of certain legislation. They lead in the discussion of state affairs. They sometimes caucus with their political friends, and without creating any scandal.

The position of governor Odell, of New York state, is especially notable. He championed the Erie canal's enlargement. He had it referred to the people, and his advocacy largely secured the approval of the scheme by the people. The expense is great—$101,000,000 without interest. The proposal was that the bonds should run for eighteen years, and the interest account was figured at $54,540,000. It is this last item that worries the governor and sets him thinking. In his late address to the legislature he suggests something new in financing.

The plan is to defer the payment of bonds and interest their maturity. Mr. Odell realizes that they will not be attractive or salable, so he suggests that the counties be assessed for the costs of the canal and take the bonds as security. The counties will be asked to put up $10,000,000 annually for five years, in proportion to the assessed valuation. To this the state will contribute $5,500,000 from indirect revenues, and the work will be fully provided for.

The governor has been credited with a feasible and practical plan of going on with the canal. Its success depends on how the $5,500,000 is to be raised annually. Every extra tax proposed in recent years has been voted down. The success of the governor now depends on his selection of something which will stand the burden reasonably and fairly.

JAPAN IN TURMOIL

It is not often that a nation is contemplating a war without the guidance of a parliament and a government which reflects its mind. But this is the position of Japan. In December the Diet was in session and the Mikado sent it a message which implied that the relation of the empire with the other powers were of the most friendly character, and that the maintenance of peace in the Orient was a matter of great importance.

The reply of the Diet was a shock to the Mikado. It intimated that the empire was in its best position, that its power and existence were threatened, that the government was temporizing with its interests, and that the situation should be reviewed by the emperor. The address was referred to the Mikado, and by him back to the Diet. The idea was that the house would catch the spirit of the ministry and talk peace while every preparation was being made for war. But the house declined to modify its expressions. The country was clearly for war. It was eager for a conflict which promised the more for success the sooner it were undertaken.

There was no help for it, therefore, but dissolve the Diet. This occurred last month, and the elections will not be until February. Meanwhile the Mikado and his ministry are considering Russia's advances, and the wisdom of annexing Corea and making it part of the Japanese empire.

THE ALASKA TRIBUNAL

The turmoil over the Alaska Boundary award has ceased, and it is well to set down with coolness and deliberation the point of view from which Canada regards the episode. In the United States, and also in Great Britain, the prevailing attitude at the time of the explosion was that our protest was an outbreak of momentary irritation at the fact of having lost, and that reflection would bring calmness and acquiescence. Later, an examination of the territory in question by competent British soldiers disclosed the fact that the islands awarded to the United States are useless from a military point of view. This discovery has strengthened the expectation of persons outside of Canada that we will drop our protest against the award. Before the matter is forgotten in other portions of the Empire, it is desirable to restate the Canadian position, and to indicate the settled point of view from which Canadians will regard the action of the Tribunal.

EDITORIAL COMMENT

It is not the peace of Asia, but a piece of Asia, that the Czar wages at present.

The Czar's fleet is now under way. If we are to believe the Japs, it won't be long before the fleet will be way under.

The report that Russia is sending troops to meet the British expedition in Thibet will tend to relax the grasp which John Bull has on the collar of "the little Jap," who wants to go bear-hunting.

Statistics gathered by Attorney General Gunter, of South Carolina, show that in the past sixteen years there have been 3,781 murders committed in that State. The greatest number in any one year were committed in 1896, when 247 were killed. The number in 1903 was 203.

Male "housemaids" are the most recent contribution to the solving of the servant problem in Great Britain. It seems several thousands of foreign young men have recently been transported to London to engage in general domestic work in British households. So far, nothing but commendation is heard on the subject. These men-servants, say their employers, do the work that has generally been alloted to women in a cleaner, quicker and more thorough fashion than the sex they have displaced. They waste less time, have no grievances, no "visitors," ask no higher wages, and do not bother about "evenings out." Altogether, if the future carries out the prophecy of the present it will not be long before the reign of women workers in the "essentially womanly field of housewifery" will be quite eclipsed by the masculine superiority therein shown.

Horse breeders want an increase of the minimum tariff on horses coming into Canada. A recent delegation to the Ottawa Government asked for the imposition of a duty of $30 per head on horses brought into Canada in order to prevent this country being made a dumping ground for culls. It was also represented to the Government that Canadian accept certificates from American registers not recognized by the American Government and suggested the custom officers be supplied with lists of the recognized registers, and be instructed to admit only animals appearing on such free of duty. They also asked that every stallion or mare imported for the purpose of improving Canadian stock be compelled to be registered in a national stud book, to be opened, or pay the full duty. It was pointed out that Americans refuse to recognize Canadian stud books, and a measure of retaliation was asked.

APPLICATION TO PARLIAMENT

Notice is hereby given that an application will be made on behalf of the Town of Peterborough to the Legislative Assembly of the Province of Ontario at the next session thereof for an act for the following purposes;

1. That the said Town of Peterborough may be incorporated as a City, with all the rights, powers and privileges of cities under The Consolidated Municipal Act 1903.

2. To declare that it has been and shall be lawful for the Commissioners of the Peterborough Town Trust, with the approval of the Municipal Council, to invest a portion of the sinking fund received by them in the purchase of the buildings and other permanent improvements erected and made by tenants under lease from the Commissioners on any land vested in the Commissioners.

3. To provide for the vesting of the real estate and sinking fund which belonged to the Corporation of the former Village of Ashburnham in, and the management of the same by, the Commissioners of the Peterborough Town Trust.

4. To amend section 3 of 2, Edward VII., chapter 50, so as to authorize the Council without the assent of the electors to borrow sums not exceeding $15,000 in any year for the purpose of making extensions, repairs, improvements and alterations in the waterworks, and to pass by-laws for that purpose.

5. To ratify and confirm By-Law number 1053 of the Corporation of the Town of Peterborough, entitled, "A By-Law to aid the Colonial Weaving Company" being a By-Law to fix the assessment of the said Company at $4,000 for a period of ten years from the first day of January, 1904, upon the conditions in said By-Law mentioned.

6. To ratify and confirm By-Law number 1056 of the said Corporation, being a "By-Law to authorize the purchase of certain real property required for the use of the Corporation of the Town of Peterborough and to borrow the sum of $10,000 to pay for same and to authorize the sale of any part of said land not required for Municipal purposes."

7. To authorize the Council, without the consent of the electors, to borrow money for the purpose of erecting an Isolation Hospital or Hospitals, and to pass By-laws for that purpose.

8. To confirm the purchase by The Little Lake Cemetery Company of part of Lot number Forty-six and Lots numbers Forty-seven and Fifty-seven on Registered Plan No. 59 for the Town of Peterborough.

9. To make alterations in the number term of office, manner of appointment and duties of the Town Trust Commissioners.

10. To provide for the reduction of the number of members of the Board of Education.

11. To provide for the election of Aldermen for a term of two years and for one half of the members of the Council retiring each year.

12. To provide for the appointment by the Council of a Court of Revision consisting of three members, none of whom shall be a member of the Council.

13. To ratify and confirm By-Laws passed by the Council of the late Village of Ashburnham exempting the property of The Dickson Company, of Peterborough, situated on Burnham's Point, and the property of The Canadian Ultimator Company, Limited, situated on the south side of Elizabeth Street, from taxes, except school taxes, for a period of ten years, upon the conditions in said By-Law mentioned.

Dated at Peterborough this sixth day of January, 1904.

E. H. D. HALL,
Solicitor for the said Town.

How Are Your Kidneys?

This Simple Test Will Tell.

If any of your family have been troubled with kidney disease, make a test of the urine, and satisfy yourself whether you need a food remedy before the disease has caused serious complications.

To-morrow morning put some urine in a glass or bottle, and let it stand for twenty-four hours. If it shows particles or germs floating about, is milky or cloudy, or contains a reddish sediment, then your kidneys are diseased.

Commence at once to take Ferrozone to arrest these unnatural conditions. Ferrozone is especially intended for the immediate relief and cure of kidney and bladder troubles, and its health giving, strengthening properties will be felt at once in new pure blood, healthy circulation, good color, increased vigor, and a general strengthening of the system.

Ferrozone quickly corrects urinal disorders, headache, and pain in the back. It improves the appetite, digests the food, and makes it nourish the nerves, makes them strong and enduring, and fits one for lots of hard work.

Don't be misled by cheap so-called kidney cures offered by dealers for the sake of extra profits. There is only one safe and reliable specific for Bladder, Liver, and urinal troubles, and its name is Ferrozone.

Refuse point blank to accept a substitute, and insist on your druggist supplying the genuine Ferrozone; it is the best. Price 50 cts. per box, or three boxes for $1.25. At all druggists or by mail from N. C. Polson & Co., Kingston, Ont.

The Ontario Game Commission held a meeting in Chief Game Warden Tinsley's office, Toronto, on Tuesday, to consider their annual report. The reports from the deputy wardens indicated that the past year had been a good one for sportsman as game was plentiful. The complaints for illegal hunting were not so numerous as usual. The report will be printed and submitted to the Legislature.

Dry Placer Miner, formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine—Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

'Henry Fielding's Dream'

By CORTLAND MYERS.

"I know this," said Grace, "that that is the great barrier between the working people and the church. I hear it wherever I go among them. If they had better pay, and some of them less hours of work, and could wear good clothes, and always have their Sundays, they would come to church. Anyway, many of them who don't now would I know. Of course, some of that class of people are not honest in saying that, but many of them are. If I get a chance, I am going to ask your brother to do his best to right every wrong, and in some way help to get all these thousands in touch with the churches. My mission work does not amount to much as it is now. All my giving and service is but a drop in the large ocean of need. There is a great principle which needs to be thrust into the heart of this trouble."

"That is what he says," replied Elsie, "and that is what they are all saying, I know; but what about that work you want me to do in the church. I have been wondering what it is. You did not tell me, only made me inquisitive."

"Well, you know we have a Young Women's Organization. It is something like the King's Daughters, but does not go by that name. We have various committees, and each with their own specific work; some to help in the church, and others to come in touch with the work in the city, and to help the poor. I am chairman of the Missionary Committee, and we have confined it almost entirely to helping the needy right here in the city. I want you to be on my committee, and we can accomplish more together in this work, I know."

"I am willing to do anything I can," said Elsie; "but you want to be sure that I am the right one."

"I am sure of that already," said Grace, "and I have talked it over with Mr. Dowling, and he said you are just the one."

"I do not know as I understand what I am to do."

"Why, I do visiting and come in touch with these people. I find out their real need, and then help them, or have the society help them. But what they need most is what they get last, and that is somebody's love and sympathy. Christ did not have any money to give to men, but he just touched them and really loved them out of their sin, and made them able to help themselves."

"Well," said Elsie, "you show me how, and I will try."

"What is that?" asked Grace. "It sounds like rain, and I thought I heard it thunder, too."

"It is raining, I guess," replied Elsie, going to the window at the same time and raising the curtain to look out.

As she did so, there was a faint flash of lightning.

"It must be only a shower," she said.

"Yes," said Grace, "because it did not look much like rain when I came out, and I even hesitated about bringing my umbrella."

"You wait, and it will soon pass over, and Henry will be in presently to see you home all right if it does keep on."

"Oh, no, I will not wait for the rain or an escort either. I am used to going alone, and it is early and not far, and the streets are all light."

She had scarcely finished the last sentence when Elsie turned toward the door and listened a moment.

"Oh, yes, it is his step; I know it way at the foot of the stairs. He must have hurried, too, on account of the storm."

Grace did not speak for a moment. She was thinking what she would do now.

Henry was at the door before the decision was made, but she arose just as he entered, and said she must go, as she turned to speak to him.

He appeared surprised for a moment, but it was only on the surface, and if the truth was plainly told, it was not the rain which had driven him home early. He was quite willing to be there before Elsie's caller had gone. He said she need not go just because he came. If they had not finished their conversation, he would agree not to listen or interrupt, or he would go in the other room.

"Oh, no," answered Grace, "it is all over, and you will never know what it was. It is a secret, and very important, too. Isn't it, Miss Fielding?"

"I will agree not to tell him either."

Grace was buttoning her jacket and making preparation to go, but Henry was not making any preparation to stay. He was in a great quandary. So much so as not to be able to think for a thing to say.

He wanted to go home with her, but did not know whether he even dared to ask her. "She would not want to be seen with him," and a thousand like suggestions flashed through his mind, to make the moments seconds, and his knees almost knock together.

What should he do? Oh, if Elsie would only come to the rescue, and say, "Henry, you go home with Miss Chalmers!" "I would be a willing slave, and not say a word," thought he. But Elsie seemingly could not understand, or else did not care.

He tried to motion to her without being seen, but his deaf and dumb signs were unread, and something had to be done, and done right away.

Grace said that she had had a delightful call, and turned to Elsie to say good-night, and then toward Henry, but he interrupted.

"You are not going alone this stormy night. You need not say good-night to me. You can do that at your father's door."

She began by saying that it was not necessary for him to go, but ended nearer her heart than the first sentence, by adding that "he could have his way about it."

There are moments in life which have years in them, and are like the acorn as the forerunner of the mighty oak.

Henry Fielding had never passed such a moment in feeling or in fortune. He could not explain it or even understand it. It was a puzzle to himself.

No young woman had crossed his path before with more than a passing notice from him, but here was a rich girl meeting him by the merest chance and an impassable chasm between them. He never could bridge that, and in the silence he had said a score of times: "I am such a fool!" He had said also: "She would mock the thought of being seen in my company," but here they were passing out of his own house together. "By force," he [illegible] to himself. It was only like her father's coachman taking her home in the storm.

When they reached the street it was raining harder than ever. She drew her garments closely about her. And Henry could hardly believe it—he had almost unconsciously offered his arm. It was not courage, because that was not up to the necessary mark. It was more excitement than anything else. And when she accepted, as she touched his sleeve, it was like an electric shock. Was it the lightning of the storm?

Anyway, Henry was struck.

She said, as they hastened on:

"This is so kind of you, Mr. Fielding, to come right out again in this dreadful storm for my sake. The next time I come I will do it in the starlight."

Henry suddenly replied:

"I will pray, then, for a sudden shower. I am satisfied with this, if it was not for you getting wet."

In a few moments Grace had turned their conversation toward the Church, and said:

"I hope you are going to be a regular attendant now at our church. I know you will enjoy the services, and you cannot help but like Mr. Dowling."

"I do," answered Henry; "I admire him very much. He is a minister to command respect, and I think he is on the right track now to reach the men. That sermon of his has occasioned a vast amount of discussion and healthy argument. I hope he will keep on in that way."

"So do I," said she, with an emphatic tone. "It takes courage on his part, but everybody respects him more. If there are wrongs burdening the workingmen it is the Gospel which ought, and which only can right them. The ministers ought to preach it, and the members of the Church ought to live it. That may sound strange from me, considering who I am, but I love Christ enough to be true to Him in everything, even sometimes against my people. My sympathy is always with those who have the least in this world, if they are not deep in sin and guilty of

(To be continued.)

The Farmer's Foes

are weeds. Unless they are kept down, they divert the nutrition which the soil provides from the growing crops and ruin their productiveness.

Diseases are to the body what weeds are to the soil. They divert the nutrition which is necessary to sound health, and the body, instead of being strong and hardy, drags out a sickly existence. When the stomach is diseased, and the other organs of digestion and nutrition are involved with it, there is a constant loss of nutrition by the body. The stomache and its allied organs are not able to convert the foods into nourishment, and hence the body and its several organs are deprived of the necessary elements of vitality. What is known as "weak" heart or "weak" lungs, "weak" nerves and other forms of so-called weakness, are generally caused by "weak" stomach. When the stomach and the other organs of digestion and nutrition are cured, then the other diseases are cured with it. Diseases which are caused by a diseased condition of the stomach are cured through the stomach. Dr. Pierce's Golden Medical Discovery cures diseases of the stomach and its associated organs of digestion and nutrition. It cures through the stomach diseases of heart, lungs, liver and other organs. It increases the activity of the blood-making glands, so that the whole body is nourished by an abundant supply of pure blood, rich in the bright red corpuscles of health.

There is no alcohol in "Golden Medical Discovery" and it contains neither opium, cocaine, nor any other narcotic. It is strictly a temperance medicine.

Persons suffering from chronic forms of disease are invited to consult Dr. Pierce by letter *free*. All correspondence strictly private. Address Dr. R. V. Pierce, Buffalo, N. Y.

Suffered for Years.

"My gratitude to you and your 'Golden Medical Discovery' is so great," writes Mr. Ross Martin, of Arlee, Mason Co., West Virginia, "that I am at a loss to find words to express my true feeling. I had suffered for a number of years with lung and throat troubles, and doctored with specialists, but got no better. Then I decided to try Dr. Pierce's Golden Medical Discovery, and after using it I was greatly relieved. I have all faith that it has saved my life.

"I have one of your medical books and think it a grand work."

Torpid Liver Cured.

"I was a sufferer from torpid liver for over a year," writes Mrs. Nora Willis, of Wheatfield, Jasper Co., Ind., "and could not sleep, nor eat but very little, and then it would cause me great distress. I tried several doctors but got no relief. Was advised by a friend to write to Dr. Pierce, which I did, and in a few days I received a letter advising me to take his 'Golden Medical Discovery' and also his 'Pleasant Pellets.' After I had taken only half a bottle I was greatly improved. I only took three bottles of the 'Golden Medical Discovery' and two vials of the 'Pellets' and, thanks to Dr. Pierce and his wonderful medicine, I am as well as ever in my life, and feel that life is worth living after all.

"Last winter I took a severe cold which resulted in pleurisy. Tongue can not tell what I suffered. For two nights and two days I could not move without it nearly killed me. I told my husband I could not endure another night of suffering. The weather was so cold and stormy that it was almost too bad for any one to go six miles to town, but he went, and got a bottle of Dr. Pierce's Extract of Smart-Weed, which gave me instant relief. I can say that for all pains that I have tried it for it has worked like magic. We keep a bottle of the 'Smart-Weed' in the house all the time. I cannot thank Dr. Pierce enough for what he has done for me."

Constipation has almost countless consequences. Dr. Pierce's Pleasant Pellets cure constipation and cure its consequences. They should always be used with "Golden Medical Discovery," when the use of a laxative is indicated.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jennie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $80 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $3.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jennie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.60. This being a general sample taken from the dump. The other two assays are $42.64 and $78.08 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1880, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

For the Farmer.

The process of tearing down, or what is commonly termed "wearing out" our land, has been the work of generations, and the building up must necessarily be the effort of years. On the ordinary farm, with its five or six year rotation, each particular tract is reached and worked only six or seven times in one generation, which should prompt us to make as much improvement as possible when opportunity offers.

Sheep are necessary on some farms in order to save much of the waste materials. Sheep will eat many plants that other animals will not touch. It may not be profitable for some farmers to keep large flocks of sheep, but a dozen sheep will cost almost nothing. The same may be said of one or two pigs, which give a profit because they consume materials that would otherwise go to the manure heap, but too many sheep or pigs may make the item of labor too costly to allow of a profit.

Value of Shredded Fodder.

Ask men who have made a practice of feeding shredded foder why they do it, and they will tell you that they feed it because their cattle, horses and sheep like it so well and thrive so well upon it, and because they cannot afford to let it go to waste and feed hay which could be sold for two or three times as much as the prepared fodder costs. When the farmer computes the cost of cutting and shredding his fodder it looks high, but he must remember that, although it does cost him from $2.50 to $3.50 per ton, it takes the place of hay which has a market value from two to three times that amount. Men who have made a practice of feeding shredded fodder state that it costs from $3 to $5 an acre to prepare it, and that an acre of average corn will yield from one and one-half to two and one-half tons of dry fodder. They say further that a ton of fodder has as much or perhaps more feed value than a ton of average hay. Corn used for shredding is bound and shocked when the grains are well dented and glazed over, but before the stalk has shown many signs of ripening. When thoroughly dry it is run through the husker and shredded and stowed away in the mow.—Iowa Agriculturist.

Double Yolked Eggs.

Many poultry dealers are proud that their hens produce double-yolked eggs, and I have known numerous cases in my experience of hens laying eggs with three yolks. The habit, however, is one to be discouraged in every possible way, says a writer in London Farmer and Stockbreeder, for it is not an indication of productiveness, but rather of disease. It is caused either by some sudden disturbance from the ordinary conditions of life, as a severe fright, or else it is due to weakness of the egg organs—the natural process of formation not being gone through properly and regularly. In almost every case this condition is brought about by overfeeding—a too rapid development of the yolks causing more than one to leave the ovary at a time to enter the oviduct. A hen which once gets into this habit will always be liable to illness, which usually takes the form of loss of power in the legs, even if an actual rupture does not occur internally. Such a hen should therefore be put at once on short rations with a view to checking for the time being the development of eggs. It is not the hen which lays a double-yolked egg occasionally that is a profitable hen. What the poultry farmer should aim at is a higher general standard in egg production—a better average size and more regular laying. Some hens only lay once every two or three days. These are the "unprofitables," and they are often the birds which are addicted to the "double yolk" evil.

Great Demand for Poultry.

The Dominion Department of Agriculture has received communications from British dealers who desire to purchase Canadian poultry. One of the dealers, Mr. James Blackburn of Manchester, Eng., is at present in Canada negotiating for the shipment of poultry. For four years the Department of Agriculture has exported the chickens fatted at the illustration stations to Mr. Blackburn. The dealings have been perfectly satisfactory, and the prices obtained for the chickens have been profitable. Mr. Blackburn said that he would like to handle 3,000 cases of chickens per week.

Mr. Hare, chief of the Dominion Poultry Division, states that prices offer substantial inducements to Canadian exporting firms to ship poultry to Great Britain. The poultry should be forwarded in a steamship equipped with cold storage. The railway and steamship companies will inform shippers when suitable steamships will leave St. John or Halifax. Even on small consignments of poultry the freight charges will not be over one cent per pound.

The chickens fatted at the illustration stations have been sold in Toronto, Montreal, St. John, N.B., Halifax, N.S., Sydney, C.B., and Charlottetown, P.E.I., and also to dealers in other smaller cities. The price obtained for fatted chickens in Toronto was 11c per pound, in Montreal 13c per pound, and in the cities in the Maritime Provinces, with the exception of Charlottetown, 11c per pound. The chickens were sold in Charlottetown at 10c per pound.

The fatted chickens sold to the merchants gave perfect satisfaction, and it would be to the interest of farmers to fatten their chickens before they are marketed. The department could have sold several times as many fatted chickens if an extra number could have been bought from the farmers in the vicinity of the fattening stations. A Charlottetown merchant stated: "We have a reply from the party to whom we shipped the last lot, and he speaks of them as being very fine, and expressed surprise that we could produce such chickens in this country." Almost any farmer in this country can produce fatted chickens equal to the Government chickens at little extra expense for labor and feed.

Senior Fruit Inspector Alex. McNeill is still attending the fall fairs, giving his interesting and instructive demonstrations of the proper packing and marking of apples and pears for the export trade. He was at Brantford on October 2nd, at Burford on October 7th, and on the 15th he will be in attendance at the Simcoe Model Fair.

Advertise in The Times

Equitable Gold Mining Co.

R. C. LANE, President. F. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 525 feet of tunnels, and at least 600 feet of cross-cuts, up rises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deal, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 285-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

THE PETERBOROUGH BROKERAGE CO.
FISCAL AGENTS

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 16th from 5 cents to 10 cents per share. This company owns 6 claims, 600 x 1500 each. A 70 foot shaft on the Martha claim shows a vein of $20.12 ore 5 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.82 to $19,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay them $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address.

DRS. KENNEDY & KERGAN

The Leading Specialists of America. 25 Years in Detroit. Bank Security.

Nine out of every ten men have been guilty of transgression against nature in their youth. Nature never excuses, no matter how young, thoughtless or ignorant he may be. The punishment and suffering corresponds with the crime. The only escape from its ruinous results is proper scientific treatment to counteract its effects. The DRAINS, either by nightly losses, or secretly through the urine, must be stopped; the NERVES must be built up and invigorated, the blood must be purified, the SEXUAL ORGANS must be vitalized and developed, the BRAIN must be nourished. Our New Method Treatment provides all these requirements. Under its influence the brain becomes active, the blood purified so that all pimples, blotches and ulcers disappear; the nerves become strong as steel, so that nervousness, bashfulness and despondency disappear; the eyes become bright, the face full and clear, energy returns to the body, and the moral, physical and sexual systems are invigorated; all drains cease—no more vital waste from the system. The various organs become natural and manly. We invite all the afflicted to call and consult us confidentially and free of charge. Cures Guaranteed or no Pay. We treat and cure: Varicocele, Blood Diseases, Stricture, Gleet, Emissions, Urinary Drains, Spermatorrhoea, Unnatural Discharges, Kidney and Bladder Diseases.

CONSULTATION FREE. BOOKS FREE.

IS THERE CERTAINTY IN MINING

The Idaho Richmond Gold Mines Company says Yes

AND HERE IS THE PROOF

1st—By having a property located in a camp that has produced over sixty million dollars worth of gold.
2nd—By having a property that has produced over one hundred and fifty thousand dollars to the former owners.
3rd—By having over two thousand feet of development work done on the property in the way of tunnels and drifts.
4th—By having four different ledges on the property, varying in width from three feet to thirty feet, besides several smaller ones all rich in free gold.
5th—By having now on the dumps are estimated to be worth over twenty thousand dollars, and all taken from development work.
6th—By having large amount of stoping ground opened up for the taking out of large quantities of ore.
7th—By being able to lease a mill that is located within two thousand feet of the property for the treatment of the ore, which will be done as soon as a small amount of the stock is sold to help defray the expenses of getting ready.

There is no promoter or gift stock, and there is yet over six hundred thousand shares in the Treasury.

We can prove to your satisfaction that we have a mine, and it will pay you to write for information, if you are looking for an investment that will pay you good returns.

THE BANNIE MINE

ONE OF THE BEST AND SAFEST INVESTMENTS EVER OFFERED THE CANADIAN PUBLIC.

The Bannie Gold Mining & Milling Company

Offers 20,000 shares of its treasury stock at

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O.

The Prescott National Bank,
Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise.

KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th ecountry. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Prest.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

Address all communications to Robert Kidd, Fiscal Agent, Peterborough, or to W. J. WILSEY, Prescott, Arizona.

MEDICINAL QUALITIES.

Asparagus is very cooling and easily digested.

Cabbage, cauliflower, Brussels sprouts and broccoli are cooling, nutritive, laxative and purifying to the blood, and also act as a tonic, but should not be eaten too freely by delicate persons.

Celery is delicious cooked, and good for rheumatic and gouty people.

Lettuces are very wholesome. They are slightly narcotic, and lull and calm the mind.

Spinach is particularly good for rheumatism and gout, and also in kidney diseases.

Onions are good for chest ailments and colds, but do not agree with all.

Watercresses are excellent tonic, stomachic and cooling.

Beetroot is very cooling and highly nutritous, owing to the amount of sugar it contains.

Parsley is cooling and purifying.

Turnip tops are invaluable when young and tender.

Green nettle shoots, if gathered in Spring and cooked as spinach, form a most delicate and wholesome blood-purifying vegetable.

Potatoes, parsnips, carrots, turnips and artichokes are highly nutritous, but not so digestible as some vegetables. Potatoes are the most nourishing and are fattenning for nervous people.

Tomatoes are health-giving and purifying, either eaten raw or cooked.

Chili, cayenne, horse-radish and mustard should be used sparingly. They give a zest to the appetite, and are valuable stomachics. Radishes are the same, but are indigestible, and should not be eaten by delicate people.

WISE MAXIMS

There are no elevators in the house of success.

The "bad boy" often makes the best man.

A man can be too confiding in others, but never too confident in himself.

A college education is a good thing, but many a graduate finds himself over trained.

Clothes don't make the man, but good clothes have got many a man a good job.

A bad man with good manners often outdoes a good man with bad manners.

If you have $25 and want a job it is better to spend $20 for clothes, $4 for shoes and the rest for a shave and a hair-cut and a clean collar, and walk to the place than go with the money in the pockets of a dingy suit.

The world depends on its school-children.

A town which has no school should be abolished.

The world is only saved by the breath of the school-children.

Even for the rebuilding of the Temple the instruction of the children must not be interrupted.

If you interrupt your studies for one day it will take you two to make up for what you have lost.

THOUGHTS OF A QUEEN

The woman who forgives unfaithfulness has ceased to love; true love does not know forgiveness.

Animals move freely in their element; man is often out of his element because he is the slave of habit.

If your wife deceives you it's your own fault.

Mistrust a man who doesn't believe in domestic happiness.

There is nothing in a man that two smart women can't worm out of him.

You, I, all of us, will throw the first stone on a woman who does what a man of honor is freely permitted to do.

A woman that is misunderstood is one who doesn't understand other women.

When a man sets out to destroy things he goes about it like a steer or bear; woman, in the same mood, imitates the gnawing mouse or the spring of a serpent.

FROM THE GOSPELS

By their fruits ye shall know them.

Be ye therefore wise as serpents and as harmless as doves.

The tree is known by its fruit.

Sufficient unto the day is the evil thereof.

Neither cast ye your pearls before swine.

Love your enemies, bless them that curse you, do good to them that hate you, and pray for them that despitefully use you and persecute you.

Ye cannot serve God and Mammon.

Where your treasure is there will your heart be also.

Judge not.

Whatsoever ye would that men should do to you do ye even so to them.

Many varieties of colored marbles are found on the mountains surrounding Carrara, in Italy. Two varieties of blue, dove-colored marble, known as "Bardiglio" and "Pavonnaro," are well known in the United States, the latter especially being largely used and commanding a high price.

The Salvation Army in Chicago will try something new. Its members will produce plays. Major Winchell, of Peoria, says: "I have written 'Jonah and the Whale' in six acts." Here is a chance for realism and the play, faithfully produced, ought to delight the young.

The first paper money used in this country was issued by Pennsylvania in 1723. In the early part of that year $75,000 were issued on the credit of the colony, and a few months later $150,000 more followed.

Bargains in Pianos

There are some first class bargains to be had in some new and second hand pianos and organs, at W. G. Landreum, 190 Charlotte street, agent for Heintzman & Co., Toronto. Call and see for yourself.

AMONG THE LOST

A Lady Well Known in Peterborough on Pacific Steamer

In the list of those lost off the steamer Clallam appears the name of Mrs. S. E. Bolton, Alberta, who was on her wedding trip. A year or two ago S. Edward Bolton, of the legal firm of Jackson & Bolton, Gananoque, went to Alberta and entered upon the practice of his profession in that district. A few weeks ago friends in Gananoque received announcements of his marriage, and it is feared that it is his bride who lost her life. The despatches state that Mr. and Mrs. Bolton were returning from a honeymoon trip to California. Her husband saw her placed in the second boat and then stood back to take his lesser chances with the other men. He saw the boat swept away in the darkness and engulfed. He himself was picked up out of the sea by the Holyoke's crew an hour later.

The deceased lady had a number of friends in Peterborough, having visited this town on several occasions, the guest of her friends.

REFUSE LOAN TO RUSSIA

Paris Banks Decline to Furnish Money to Czar's Government

New York, January 15.—It was learned positively today from several trustworthy sources that Russia tried to negotiate a war loan with the Paris banks and failed. The French banks offered no encouragement whatever and intimated that it would be useless to consider the matter at this time. The three Paris banks mentioned as having declined to consider a Russian loan are the Credit Foncier, the Credit Lyonnais and the Comptoir d'Escompte.

International banking houses with close European affiliations were in constant communication today with correspondents at prominent foreign centers over the far eastern situation and the likelihood of an early declaration of war. While the trend of opinion favored an early outbreak, some usually well-informed quarters intimated that the case must not be regarded as hopeless, since no one in this country could understand the enormous pressure that was being exerted to bring about a peaceful adjustment of existing differences.

NEED NOT GIVE NAME

Newspaper Correspondent May Remain Anonymous

Mr. Justice MacMahon, at Osgoode Hall, delivered a judgment of considerable interest to newspaper publishers, when he held that an editor was not bound to reveal the identity of a writer whose contribution is called into question.

The Sutton correspondent of The Newmarket Express-Herald, in his weekly letter to that paper, made a statement which Miss Eva Marsh, of Sutton, declares reflected unfavorably upon herself. A suit against the paper followed, and yesterday Mr. T. H. Lloyd moved before Judge MacMahon for an order compelling Mr. McKay, the editor, to disclose the name of the writer. Mr. S. B. Woods appeared on behalf of the editor, and the court declared that such information was private and confidential, and need not be disclosed.

IN BRITISH TERRITORY

Immense Mineral Wealth Near Portland Channel

Ottawa, January 15.—The receipt at the Canadian Exhibition offices of several collections of minerals from the islands and mainland in the vicinity of the Portland channel, Observatory Inlet, Port Simpson, and Kitimat Arm, denotes that the country abutting on part of the territory recently in dispute between the United States and Canada is very highly mineralized. Sets of minerals from all the properties will be included in the Canadian mining exhibit at the St. Louis Exposition.

NOVEL MINER'S STRIKE

The Men Refuse to Carry Their Own Picks

Amherst, N. S., January 15.—The 300 men employed in the Chignecto coal mines in Cumberland County have gone on strike because the management refuse to send their picks into the pit for them. The management hold that each man should carry his own pick the same as is done in other collieries in Nova Scotia.

EVERYBODY READS THE TIMES

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA

—AND—

BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000.00. Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 5000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores, and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is to-day giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 100 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 600 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS.*

C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not A Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY, GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO.,

FISCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.

The Peterborough Brokerage Co., Local Agents.

WANTED—GOOD AGENTS IN EVERY CITY.

MONEY NO OBJECT

When People are seeking health or relief from any disease the price never counts.

It is a fact that not less than a million is spent every year by people seeking a satisfactory cure for Catarrh, Bronchitis, Asthma and Consumption.

Probably the best and most highly recommended preparation is Catarrhozone, which treats the local symptoms very effectually by means of medicated air supplied through a convenient hard rubber inhaler. The poisons in the blood are driven off by Ferrozone Tablets, which are taken after each meal. They promote appetite, aid digestion, and make the blood rich and pure, so that it will nourish all parts of the body.

This combined local and constitutional treatment in catarrhal diseases has met with wonderful success and can be relied upon to cure every time. The inhaler stops sneezing, coughing, droppings in the throat, and brings quick relief and cure to all the disagreeable symptoms of catarrh.

The following testimonials from well known Canadians furnish abundant proof what Catarrhozone accomplishes in stubborn cases.

Mrs. James Tweedie, of Jay Bridge, says: "For years my daughter doctored unsuccessfully for Catarrh. She had droppings in the throat, hawkings, nausea, and could not sleep at night. The first day's use of Catarrhozone benefitted and ultimately cured my daughter so that Catarrh has never returned. I can recommend Catarrhozone as a grand remedy for Catarrh."

Thousands of strong letters could be given like the above if necessary, but all that is required to prove the merit of Catarrhozone is a fair trial. It is sure as death to cure and if it fails your money will be refunded. Catarrhozone cured lots of cases worse than yours and can do it again.

Complete outfit costs $1.00. Small size 25c. Sold by druggists, or N. C. Polson & Co., Kingston, Ont

Henderson Gets Six Months

At the Police Court yesterday morning, Thos. Henderson was sent to Central prison for six months on a vagrancy charge. A man charged with insanity was remanded to gaol for one week.

The 57th Colors

As Miss Barlee is going out of town, contributions to the fund for the purchase of colors for the 57th Regiment may be sent to Mrs. James F. Dennistoun, President of the Committee.

The Late Dr. Fraser

The funeral of the late Dr. Duncan Fraser will take place from his residence at 2 o'clock this afternoon to Lakefield Cemetery. The funeral will be under the auspices of Clementi Lodge, A.F. & A.M.

A Pleasant Affair

On Thursday evening after choir practice the members of the George street choir assembled in the bible class room where $5 in gold was presented to the four members who attended most faithfully and regularly during the year. Of those who shared in the pleasing function were Messrs Charles Thornton and Walter McGuire, with a record of 148 out of a possible 151 services and practices; Miss Edna Hill, 129, Miss Detcher, 126, Miss E Chasty, 126, and Mr. Bert Turner, 125, were next up, and within the limit. Many others came close to the minimum, showing a very good average attendance for the choir at large. At the conclusion of the presentation refreshments were served.

—There was a large number of skaters at the rink last night.

A SERIOUS CHARGE

BALLOT STUFFING SAID TO HAVE BEEN INDULGED IN

The Duty of the Liberal Leaders Under Such a Charge

The description of the Liberal Convention recently held in the Opera House, as given in the local Tory organ of January 14, is a distinct challenge to the Liberal organizers. It can be read as nothing else. It is usual in political campaigns, we are aware, for each party paper to bestow abuse upon the other with a somewhat liberal hand, but there will be few amongst the electors to whose attention the Tory organ's savage attack may be brought who will not say —"This language is libellous; no sensitive and honest man will lie under such an imputation." Mr. Hall, for whom we have every regard, will see how necessary it is that his selection should not bear the ear-mark of fraud at the very beginning of the contest. To go into a campaign with a taint of dishonesty and fraud is practically to plead guilty to it in the minds of most people. One quotation is enough to show the meaning of our contemporary's challenge: "These gentlemen cannot refrain from ballot-box stuffing, even in their own meetings. Probably indeed the same men performed the operation with ballots from the same printing office, as stuffed the boxes at the election of the Provincial Secretary. Such is the New Liberalism."

No smiling or other of the usual put-offs will do in such a case as this. The good name of Peterborough is at stake. What will be done about it?

HIGH CLASS CONCERT

Under Auspices Peterborough Lawn Bowling Club

A high class entertainment was presented in the Opera House last night under the auspices of the local Lawn Bowling Club. The best talent had been secured and the selections were well rendered. Miss Georgie Taylor showed excellent skill in her violin solos, all of which were encored. Miss Mabel Leonard was also well received in the several dramatic readings presented. The songs rendered by Mrs. Bertha Cushing-Child were most excellent and were heartily enjoyed by all. The following is the programme as rendered:

Violin solo ... ..."Rhapsodie Hongroise"
Miss Georgie Turner
Dramatic reading..."The Countess Savia"
Miss Mabel Leonard.
Aria ...."Amour Viens Aider"
Mrs. Bertha Cushing-Child.
Violin solo ... ..."Romance"
Miss Georgie Turner
Reading (with violin obligato) ... .
"Why Scheffer did not Play."
Miss Mabel Leonard.
Songs "May Morning"...... ... .
"What the Chimney Sang ....
Mrs. Bertha Cushing-Child.
Violin solo .. ...Barcarole and Pizzicatti"
Miss Turner
Costume reading—Scene from "London Assurance"
Miss Leonard.
Song (by request).....'The Lost Chord"
Mrs. Childs.
"God Save the King."

MURRAY ST. BAPTIST CHURCH

Annual Meeting of the Congregation and Election of Officers

The annual meeting in connection with the Murray street Baptist church was held on Thursday evening, when reports from from the various departments of the church work were received. Each report was of a favorable nature and showed the affairs of the church to be in a flourishing state. Rev. J. Bastow occupied the chair.

The financial statement showed total receipts of $3020.72 and payments of $31.36 less. Amount paid on building fund $553.66, amount owing, $1551.10.

The following officers were elected:

Deacons—Messrs W. Aldridge and G. Lee.

Treasurer—Mr. T. F. Matthews.

Assistant Clerk—Mr. Bastow.

Clerk—Mr. A. Martin.

Finance Committee—Messrs. George Cochrane, W. Aldridge, R. S. Merrell, C. E. Routley and H. Webb.

Representative on Charity Board—Mr. E. B. Edwards.

Representative on Nicholls Hospital Board—Mr. W. Aldridge.

A committee was appointed to investigate the merits of the new Baptist Hymnal and to bring in a report at the next quarterly business meeting regarding the advisability of adopting it as the church hymnal.

On motion, the officers elected by the Sunday school, are as follows:

Superintendent—Mr. E. B. Edwards.

Assistant Superintendent—Mrs. Bastow.

Secretary-Treasurer—Miss P. Barnard.

Librarian—Mr. A. J. Raddon.

Assistant Librarian—Miss Smith.

Organist—Miss Aldridge.

Assistant Organist—Miss Bryant.

Executive Committee—Messrs. Lee, Edwards, Raddon, Mrs. Bastow, Miss Nichol's and the secretary.

NOT MEDICINE

But Scientific Food

People who do not study the subject sometimes get the idea that Grape-Nuts is a medicine, whereas it is a pure cereal food made upon scientific principles and contains no medicine whatever.

Stomach trouble must be treated through taking away the bad food and using proper food, for almost all stomach trouble come from the use of improper food and science says that the only way to cure it is to take away the cause and use good food in its place. "I am a brain worker and resorted to the habit of drinking strong black coffee for lunch to 'tone me up' as I expressed it, and the result was that although I ate a great deal of food, I grew thinner and browner until my friends told me I really looked like an over-roasted coffee bean myself. Then I began the use of Grape-Nuts food and gave up coffee for I found that Grape-Nuts gave me all the toning up that was necessary, and there was no bad reaction from this food as there is from coffee. I am stronger, better and healthier in every way and my brain is much clearer and more active since I began the use of Grape-Nuts. The yellow look has almost left me, and my friends assure me that I am actually growing fat.

"I first learned of Grape-Nuts through a lady friend who used it regularly for breakfast for her two little girls. I had known them only as puny, sickly little children and was surprised at the change in them for now they are a pair of the strongest, healthiest girls I ever saw. What surprised me most was that the change had been brought about by a 'patent medicine' as I had been inclined to call Grape-Nuts.

"My friend pointed out my mistake and induced me to take a saucer of the food. The crisp, nutty flavor surprised and pleased me and I resolved to use it myself with the wonderful results I have told you of." Name given by Postum Co., Battle Creek, Mich.

Grape-Nuts is made of the pure cereals alone and quickly corrects all of the ills that arise from the use of improper food, for Grape-Nuts is a natural food prepared in the most scientific way.

Look in each package for a copy of the famous little book, "The Road to Wellville."

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. J. H. Brandon, Fenelon Falls, was in town yesterday.

—Mr. Jas. McCliggott, Reeve of Douro, was in town yesterday and gave The Times a call.

—Mrs. Jack Richards, of Smith's Falls, is visiting her parents, Mr. and Mrs. Hugh Darke, Rubidge street.

—The Misses Barlee leave tomorrow for Montreal, where they will spend the balance of the winter months.

—Rev. W. L. Armitage leaves on the 2.05 G.T.R. train this afternoon for Picton where he will assume the office of Vicar of Mary Magdalene's church. It is needless to say he carries with him the hearty good wishes of the people of Peterborough, regardless of denomination or sect.

On Wednesday, Mrs. Alex. Gibson, of town, attended the wedding at Beamsville of Miss Francis Gibson, daughter of Senator William Gibson, and Mr. John Jennings of Toronto Junction. The Hamilton Herald says: "Mrs Alexander Gibson, of Peterborough, wore black lace over white tafetta, big black feather hat."

Special Service

There will be special service at St. John's church tomorrow evening at 7 p.m. which should be of special interest to citizens generally. The Mayor and Council have accepted an invitation to be present. The Board of Education is also expected. All citizens who take an interest in public affairs should be present. The subject will be, "Christian Citizenship."

Y. W. C. A. Notes

The regular weekly gospel service will be held at 4.15 p.m on Sunday and will be addressed this week by Mrs. (Dr.) Fife. Mrs Rehill will sing. All young women are most heartily invited to be present.

On the evening of January 26th, all members of the Association are asked to meet at 7 o'clock at the Association rooms for tea, after which a social evening will be held. The members are requested to bear this date in mind and to be present if possible.

During the month of February, cooking classes will be held in the Association rooms. Miss Jessie Hills, a graduate of the Technical School, Toronto, will be the teacher in charge. Miss Hills comes to this Association very highly recommended and her work will prove most interesting and helpful. She will give lessons in Plain, Household, and Superior cooking, and her course in each branch is unusually complete. All those wishing to avail themselves of this opportunity to attend up to date cooking classes are asked to leave their names at once with the General Secretary, 411 George street

INCIDENTS OF THE DAY

Newsy Paragraphs Picked by By Reporter on Their Rounds

—Conservative convention today.

—The Conservatives of East Victoria met yesterday and elected Col. Sam Hughes as their standard bearer.

—The annual meeting of the Little Lake Cemetery Company will take place on Monday in the Council Chamber.

—After the regular practice of St. Paul's choir on Thursday evening the gentlemen entertained the ladies to light refreshments and an enjoyable social time was enjoyed.

—The proceeds of St. Peter's bazaar held recently have amounted to $1,450 and all the returns are not in at present. In the list of donations published in the papers it was mentioned that a beautiful lamp was sent by a friend. The friend was Mr Wm. Collins of Ward Five.

—Children running out of school without their hats or coats on a cold day may be good for drill practice, but some of the parents think it is too provocative of chills, colds and the grip to be either safe or pleasant. What do you think?

—The Times is requested, on behalf of the ladies who have charge of raising funds for the purchase of colors for the 57th Regiment, to acknowledge with thanks a contribution of $10 from Mr. A. P. Choate, town.

BACK TO PALESTINE

Movement to Aid Jewish Plans to Go to Holy Land

London, January 16.—Leading British and Continental Jews have formed a Jewish Emigrants' Information Society which is expected to affect the whole question of the Hebrew populations of Europe. The direction of the society's affairs is in the hands of a strong executive, including such men as Leopold de Rothschild, N. L. Cohen, F. D. Mocatta, C. G. Montefiore, and several representative Jews in the British Colonies. The organization will place before the Jews of Europe exhaustive information as to countries, particularly the colonies of Great Britain, which offer the best prospects to Jewish settlers. It will also undertake to assist intending emigrants not only to reach their new homes, but also to establish themselves therein. In the early stages of the enterprise no effort will be made to encourage the emigration of any individual family that does not give promise of complete self-maintenance. It is hoped thus to build up the places chosen with homeseekers of a stable, prosperous Jewish class, capable in the future of offering a species of asylum to their weaker brethren. The promoters of the movement take a long view of the problem and expect results on a vast scale only after the lapse of years. They do not aim to deflect the race from the path of Zionism, but hold that too many sound practical measures for the relief of the oppressed Jews of Europe cannot be evolved while the larger scheme is crystallizing.

$3000 Forfeit

The above will cheerfully be paid in lawful money of the United States, by the undersigned, proprietors of Doctor Pierce's Golden Medical Discovery, if they cannot show the original signature of the individual volunteering the testimonial below, and also of every testimonial among the thousands which they are constantly publishing attesting the superior curative properties of their several medicines, and thus proving the genuineness and reliability of all the multitude of testimonials volunteered by grateful people, in their behalf.

WORLD'S DISPENSARY MEDICAL ASSOCIATION, Proprietors, Buffalo, N. Y.

THE REASON.—There is no medicine equal to Doctor Pierce's Golden Medical Discovery, for purifying the blood. It carries off the poisons which contaminate the life fluid. It increases the activity of the blood-making glands and gives the body an increased supply of pure, body-building blood. It builds up the body with sound, healthy flesh instead of flabby fat, promotes the appetite, feeds the nerves, and so gives to weak nervous people vitality and vigor.

"This is to certify that I have used Dr. Pierce's Golden Medical Discovery and think it's the grandest medicine in the world," writes Mrs. V. M. Young, of Weir, West Va. "I took down sick six months ago and called in our physician and he gave me medicine but I grew worse. He said I had dyspepsia in its worst form. I decided to try your medicine and began to improve. I used five bottles, two of the 'Golden Medical Discovery' and three of 'Favorite Prescription,' and now I am doing my own housework. A number of my lady friends also are using Dr. Pierce's medicine and they recommend it highly. May God bless and prosper you in your grand work."

To gain knowledge of your own body—in sickness and health—send for the People's Common Sense Medical Adviser. A book of 1008 pages. Send 31 cents in stamps for paper-covered, or, 50 stamps for cloth-bound copy. Address Dr. R. V. Pierce, 663 Main Street, Buffalo, N. Y.

MEDICAL EXAMINER

Of the United States Treasury Recommends Pe-ru-na.

Dr. Llewellyn Jordan, Medical Examiner United States Treasury.

Other Prominent Physicians Use and Endorse Pe-ru-na.

DR. LLEWELLYN Jordan, Medical Examiner of the U. S. Treasury Department, graduate of Columbia College, and who served three years at West Point, has the following to say of Peruna:

"Allow me to express my gratitude to you for the benefit derived from your wonderful remedy. One short month has brought forth a vast change and I now consider myself a well man after months of suffering. Fellow sufferers, Peruna will cure you."

A constantly increasing number of physicians prescribe Peruna in their practice. It has proven its merits so thoroughly that even the doctors have overcome their prejudice against so-called patent medicines and recommend it to their patients.

Peruna occupies a unique position in medical science. It is the only internal systemic catarrh remedy known to the medical profession to-day. Catarrh, as everyone will admit, is the cause of one-half the disease which afflicts mankind. Catarrh and catarrhal diseases afflict one-half of the people of United States.

Robert R. Roberts, M. D., Washington, D. C., writes:

"Through my own experience as well as that of many of my friends and acquaintances who have been cured or relieved of catarrh by the use of Hartman's Peruna, I can confidently recommend it to those suffering from such disorders, and have no hesitation in prescribing it to my patients."—Robert R. Roberts.

Dr. R. Robbins, Muskogee, I. T., writes:

"Peruna is the best medicine I know of for coughs and to strengthen a weak stomach and to give appetite. Besides prescribing it for catarrh, I have ordered it for weak and debilitated people, and have not had a patient but said it helped him. It is an excellent medicine and it fits so many cases.

"I have a large practice, and have a chance to prescribe your Peruna. I hope you may live long to do good to the sick and the suffering."

Dr. M. C. Gee, writes from 513 Jones St., San Francisco, Cal.:

"Peruna has performed so many wonderful cures in San Francisco that I am convinced that it is a valuable remedy. I have frequently advised its use for women, as I find it insures regular and painless menstruation, cures leucorrhoea and ovarian troubles, and builds up the entire system. I also consider it one of the finest catarrh remedies I know of."—M. C. Gee, M. D.

Catarrh is a systemic disease curable only by systemic treatment. A remedy that cures catarrh must aim directly at the depressed nerve centers. This is what Peruna does.

Peruna immediately invigorates the nerve-centers which give vitality to the mucous membranes. Then catarrh disappears. Then catarrh is permanently cured.

If you do not derive prompt and satisfactory results from the use of Peruna write at once to Dr. Hartman, giving a full statement of your case, and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

SATURDAY'S MEETING OF LIBERAL CONSERVATIVES

W. B. Northup, M.P. and Jno. Kendry, M.P., Address the Meeting--Mr. Kendry Denies Certain Street Rumors--He will Accept the Nomination

> "I deny that I ever said that if a certain gentleman came out as the Liberal standard bearer in the next Dominion election, I would give him my support. It has been reported that I lean towards the Reform member of the Local House. That is not true; I am a Conservative out and out, and no man is more loyal to Conservatism than I."

The above is the public denial of Mr. Jas. Kendry, M.P., to the street rumor that he would not contest the West Riding of Peterborough against Mr. R. R. Hall, should that gentleman be the choice of the Liberal party as standard bearer in the next Dominion election campaign. Mr. Kendry gave utterance to the above quotation at the Liberal Conservatives' annual meeting, held in the Opera House Saturday afternoon. Prior to the meeting the member for West Peterborough expressed his astonishment that such a rumor had been circulated, and could not understand how it could have originated. He thought his past record sufficient guarantee that in all matters of politics he is a Conservative in the true sense of the word, as unwavering today, after eight years' experience in the House of Commons at Ottawa, as he was when he first entered the political arena, in his honest conviction that the Conservative policy is, and always has been, in the interests of Canada.

The meeting Saturday was not a convention, as many people erroneously thought, but a gathering of Conservatives to elect officers and organize for the campaign. About 50 men were present, and whilst the enthusiasm of a bumper convention was lacking, the work before the assembly was transacted in an earnest and business-like manner, followed by speeches from Mr. Northrup and Mr. Kendry. The meeting did not nominate a candidate, but Mr. Kendry practically committed himself to accept the nomination when the occasion arises and his acquiescence in the wishes of so many friends, does not seem likely to meet with any opposition, so far as could be learned on Saturday.

ELECTION OF OFFICERS.

The meeting opened at 2.30 with Mr. T. B. Bradburn presiding, and W. P. Northrup, M.P., James Kendry, M.P., J. W. Garvin and E. J. Toker, acting secretary, seated on the platform.

Mr. T. B. Bradburn, after explaining that this was no convention, but merely a meeting to elect officers of the association, called for nominations for president.

Mr. Kendry here rose and was enthusiastically received. He said it afforded him the greatest pleasure to nominate a gentleman who had proved the best president the Conservative Association in Peterborough had ever known. I allude to Mr. T. B. Bradburn, to whom I owe my election in past campaigns, and whom I have always found to thoroughly attend to all the details of the association.

The meeting voted unanimously in favor of Mr. Bradburn

The constitution was then read, amended in some clauses, and adopted. A vice-president and five delegates from each polling subdivision will conduct the campaign locally, and attend the convention to be held in Peterborough. The annual meeting will be called by the president.

The following vice-presidents were then elected;—

Of the Association—Lt.-Col. J. W. Miller.
South Monaghan—Jas. Fisher.
North Monaghan—Geo. Bennett.
Smith—R. M. Scott.
Ennismore—Paul Costello.
Harvey—Jas. Weir.
Galway and Cavendish—Left in the hands of the Executive.
Lakefield—Mr. Lillicrap.
Ward One, Town—Henry Best.
Ward Two, Town—H. LeBrun.
Ward Three, Town—W. S. Robinson.
Ward Four, Town—Chas. Dunn.
Ward Five, Town—R. A. Peck.
Secretary-Treasurer—J. W. Garvin.
Assistant Secretary-Treasurer—R. B. Layfield.

CONFIDENCE IN WHITNEY.

Moved by Dr. McNulty, seconded by G. W. Bennett, and resolved,—That the Liberal Conservatives of the West Riding of the County of Peterborough for the Legislative Assembly of Ontario in association assembled, desire to express their confidence in their leader, J. P. Whitney, Esquire, M.P.P., and to congratulate him on the able manner in which he has led the Opposition and so strenuously advocated the rights of the people for honest, clean and good government. The meeting desires to express its abhorrence of the desperate and unscrupulous tactics pursued by Mr. Ross and his followers in order to retain power contrary to the wishes of a large majority of the Electorate. This meeting hereby pledges its support to our honored leader, Mr. Whitney, in his endeavors to displace from office a government which has not only lost its usefulness to the Province, but the confidence of the people at large.

This resolution was unanimously adopted.

LOYALTY TO PARTY.

Moved by Erasmus Green, seconded by Geo. Fitzgerald, and resolved,—That the Liberal Conservative Association of the West Riding of the County of Peterborough, in meeting assembled, desire to express, and do hereby express, their unwavering loyalty and adhesion to the principals and policy of the Liberal Conservative party, under whose guidance the Dominion has enjoyed so large a measure of prosperity. The meeting takes this opportunity of congratulating our esteemed leader, Robert L. Borden, Esquire, M.P., on the able and efficient manner in which he has led the party, and this meeting hereby pledges its support to the policy advocated by Mr. Borden and the Liberal Conservatives of Canada, and pledges its undivided support to the Liberal Conservative nominee of West Peterborough for the Dominion House of Commons.

This resolution was also unanimously adopted.

NO NOMINEE YET.

Mr W. S. Robinson here expressed his opinion that a candidate should be put in the field at as early a date as possible, in view of the reputation of the Liberal nominee. He thought the convention should be called say early in the month of February.

Mr. Garvin thought it better to leave the date of the convention in the hands of the executive, as the election may not take place for two years. The government, he said, are getting a little bit scared to go to the country, and the probability is that they will delay such proceedings as long as possible. We already have a member, and we are not through with him yet, and will not be for some time to come.

Mr. Garvin's suggestion was adopted, and the convention will be called by the executive.

W. B. NORTHRUP, M.P.

Here addressed the meeting. He was pleased he said, to be present at a Conservative Association meeting in a riding like that of West Peterborough, which perhaps has difficulties of its own more than any other riding he knows of. Then, it was a pleasure to speak in support of his old friend, Mr. Kendry, than whom there is no man more popular in the House of Commons, nor more esteemed. Mr. Kendry has taken to Ottawa the same shrewdness and tact as has made him so successful in commercial circles, and the riding has no cause to blush for him in any respec. Mr. Northrup then went on to say that he hoped to come to Peterborough at no distant date, when the country's affairs are administered by a government which will keep its promises, especially in the way of protection. The Conservatives since 1867 built the Intercolonial Railway, extended the canal system and opened up the great North-West; they assisted the C.P.R. in its great transcontinental line, and enlarged the canals to meet the competition of the Americans. The present government promised to complete the Trent Valley Canal, but have not done so yet. Since 1897 they have had a revenue of sixty millions, millions of which has been wasted in every conceivable kind of way, and today this government has not the faintest idea whether the outlet of the T.V.C. shall be at Trenton or Port Hope. You can't expect much from such a government as that.

After expressing confidence in Mr. Borden shortly crossing from the left to the right of the Speaker of the House of Commons, with a representative in his train from Peterborough, Mr. Northrup argued that there are many reasons for turning out of office the present administration, which, he said, have neither kept their promises nor conducted the affairs of the Dominion with ability. He also questioned whether the honor of Canada has stood higher in the eyes of the Empire the last seven years than before. Sir Wilfred started out to destroy protection, with Mr. Sifton and Mr. Feilding as free-traders. Have they done so? They gave as much free-trade and protection to satisfy both sides, and to please outsiders have driven away manufacturers who might have prospered in the country. While trade has increased by $19,000,000 exports have fallen off to the amount of $2,000,000, and we have imported $23,000,000 of goods which would have been manufactured at home. The Conservatives lay down this principle, "We protect the British subjects at home first." The Laurier administration have increased the national debt and expenditure, and the only one respect in which they have been consistent is that of breaking promises. He scored the government for their lack of business methods in the Drummond County, Yukon and Crow's Nest Pass railway deals, and their failure to establish a fast line service across the Atlantic, for which the Conservatives had offered $750,000 a year.

Continuing, the speaker next took up "The Honor of Canada," and said he was afraid our escutcheon is not as clean today as seven years ago. On October 3rd, when colonial troops from all quarters of the globe were actually in London, prepared to go to South Africa, Canada had not offered a single man nor a single gun. Sir Wilfred Laurier on the 4th said Canada was not prepared to send troops, but on coming back from Chicago, where he had been laying the corner stone of the new post office he found that public opinion insisted that they send out either men or the government, and he then sent the troops on C.O.D., followed shortly by emergency rations. And if one thing more than another went to show our loyalty to the Mother Country, it must have been that contribution of mixed dog biscuit and shot hay.

Mr. Northrup next took the government to task for not securing from the Old Country a preferential duty on grain and cattle, which would have meant increased prosperity for the Canadian farmer, and an influx of people into this country from the south to take advantage of that preference. The Conservative party proposed that scheme in 1896. He eulogized Mr. Chamberlain's policy as one worthy of consideration. Sir Wilfred Laurier's speech in London in 1896 was convincingly in favor of a preferential tariff. And coming into power, however, and returning to London in 1897, he replied to the Duke of Devonshire that Canada gave preference in gratitude and wanted nothing in return, as the people were out and out protectionists. We sell to the Mother Land sixty-eight millions more than we get from them, and the Laurier government up to this day prefers the American shilling to the English dollar.

In conclusion, Mr. Northrup assured the meeting that if Canada has a change of Dominion government, the people need not have a shadow of anxiety as to the loyalty of the Conservative party to the Mother Country; the followers of that grand old leader, Sir John A. Macdonald could be nothing else but loyal He hoped the candidate will be Mr Kendry, who has never yet carried the Conservative standard to defeat.

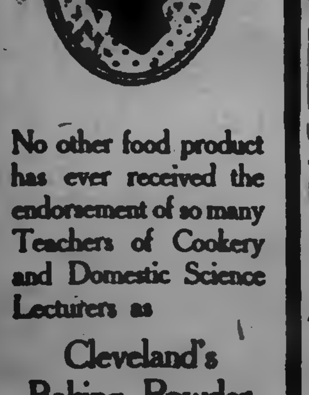
Mr. Northrup resumed his seat amidst prolonged applause.

JAS. KENDRY, M.P.

Was enthusiastically received on rising to speak. He trusted that when the Conservatives come together in convention, they will select their candidate properly. He hoped when that time came to offer himself again to West Peterborough. (Cheers). He alluded to Mr. Northrup as an old friend of his in the House of Commons, and would be pleased to have him give a night in the Opera House here when the campaign is on. He emphatically denied having said he would not accept the nomination should a certain gentleman be selected as the Liberal's standard bearer. It has been reported that he (Mr. Kendry) leans toward the Reform party in the Local House, "That is not so. I am a Conservative, and no man is more loyal to the Conservative cause than I." Mr. Kendry then went on to say that during his many years' residence in Peterborough he had been actively associated with the building up of the town. While he had been absent a considerable portion of the past year or two, for business reasons, he still held many interests at stake in Peterborough. The Laurier administration has, he said, nearly ruined the whole woolen industry in Canada by their reduction of the tariff: there is 15 per cent. less machinery running in our woolen mills today than there was seven years ago. He would never give a preference to England to the injury of Canada; we want a preference which will build up our country, and not rob it of some of its industries. Sir Wilfred Laurier gave his measure of preference for nothing, instead of bargaining for something in return. In woolen, England is stronger than any other country, mainly owing to the cheapness of labor; we in Canada pay 50 per cent. more in wages than the English mills, and nearly 90 per cent. of the woolen goods on our markets today are coming from the old Country; similar conditions will prevail shortly in the iron industry, unless the tariff is raised to where it should be for the protection of Canada and Canadians In conclusion, the member pledged himself to, as long as he has a seat in the House of Commons, to look after the interests of Canadians first, whether such protection be necessary against England or any other country. "I have always," he said, "tried to legislate in the best interests of the Town and County of Peterborough and the country at large.

Mr. Kendry resumed his seat amidst enthusiastic applause.

Three cheers were then given for the King, Mr. Northrup, Mr. Kendry and President T. B. Bradburn, after which the meeting adjourned.



No other food product has ever received the endorsement of so many Teachers of Cookery and Domestic Science Lecturers as

Cleveland's Baking Powder

FURS SMUGGLED

Prominent New Yorkers Lose Goods Bought in Canada

New York, Jan. 15.—Several prominent persons in New York have petitioned the authorities in Washington to permit them to pay duty upon a lot of smuggled furs and retain possession of the goods.

Recently the arrest of a man at Tupper Lake in the Adirondacks, who was caught transferring furs from a local express car to a car on the New York Central, bound for this city, put the Government into possession of facts on which a large number of seizures were made here.

A Montreal fur house had been selling furs to New Yorkers to be delivered duties paid. The transactions were all made in Montreal, the furs being bought there by persons traveling. The purchasers were told that the house had a large trade in New York and made its deliveries here and that the prices asked included all delivery charges.

ULTIMATUM TO THE POPE

Rome, Jan. 15—The French Government has presented the Vatican with a note in the nature of an ultimatum, regarding the appointment of bishops to five vacant French sees, substantially saying that either the Pope must approve the selections of the French Government or they will be announced officially without the approbation of the Holy See. In addition, the Papal Nuncio will be asked to leave Paris, and the clergy will be forbidden to collect Peter's pence in the churches, but the Concordat will not be denounced.

The rumor that the Pope has decided to approve the appointments is incorrect. The Vatican hopes to be able to continue the negotiations.

TOWN OFFICIALS AT CHURCH

Members of the Local Civic Bodies Listen to a Sermon on Citizenship

While the attendance of civic officials at St. John's church last night was fairly large, there were many who failed to accept the invitation of the rector to be present on this the second of his annual sermons delivered to the Town Council, Board of Health, Board of Trade and Board of Education. The rector prefaced his sermon by congratulating the Town upon securing the services of such men as His Worship, Aldermen and the other civic representatives recently elected to office. Believe me, he said, there are some citizens in Peterborough who recognize the debt of gratitude due those men who with so much loss of time have been, and are, serving the people of this town. Last year he drew attention to the fact that all work of a public character is God's work; this year he would dwell upon the somewhat lower ground of citizenship. The term citizenship, however, has throughout the world's history always been coupled with dignity; it implies privileges and responsibilities for a citizen such as a share in the government of a town or city. There are some people in this town, the rev. gentleman said, who seem to aim only at such measures as will increase the population: but, after all, population is not everything—China, for instance, cannot show a very high standard of citizenship for all its teeming millions—bulk sometimes becomes unwieldy; we should aim at a high moral status of fellow citizenship. As to religious citizenship, by a very grievous loss inflicted in the past we are split into fragments but still there is hope for the future; there is a very rapidly growing increase in citizenship between the different units of Christendom, and a growing and active cooperation between the clergy and lay readers of this town, representing 18,000 of fellow citizens. But I want to sound a note of warning: the road to this most desirable unity does not lie along the path of undenominationalism, which, no matter how popular with people, is a delusion and, as described by the late Wm. Gladstone, "a rootless tree." The only true path to unity is that of loyalty to the one branch of the church and religion as it has been given to us.

After characterizing the Board of Trade as a splendid body, and urging the unity of civic bodies in recognizing the nature and claims of our citizenship, the rev. gentleman urged a right use of the franchise by every citizen. The state asks each citizen to record by means of the ballot, his own free and independent opinion, and the man who does not record a vote on these principles is making an incorrect use of his citizen's franchise. Our duty in these matters is certainly thoughtfulness and honesty, and I regret that necessity imposes upon me the necessity of using the last word. As Britons, he then went on to say, we come of a nation of fighters, but let us use those fighting qualities fairly on public questions; our British instinct should teach us to fight fairly and with fair weapons which everyone can see. We should avoid going back to a rule sustained by money or its equivalent. Men do not get into this sort of thing all at once, but are led into it step by step, without thinking perhaps, and because the electorate are thoughtless about such things. When we say this thing has got to stop, it will stop. The speaker then added, "we are on the eve of happier days" and he spoke in glowing terms of The Globe's editorial on "The First Duties of the Liberal Party." "The man who penned those lines," he said, "is nothing but a moral hero, and it is for us all to support such utterances and such men." I believe it is our duty to disassociate ourselves from any political party we belong to simply because we were born to it; to study things, and support what we think is best for the country and the men whose characters we deem fittest for the honor reposed in them.

In conclusion, Mr. Davidson named several past and present citizens who stand honored as public benefactors of the town, and urged a proper observance of the Lord's Day as a day of rest.

A PLEA FOR PROTECTION

Mr. Chamberlain Says a Case is Laid Out for Reform

London, Jan. 15—Mr. Joseph Chamberlain presided at the first meeting of the tariff commission, which assembled here this afternoon. Mr. Chamberlain in a speech, drew a parallel from what the United States and Germany had accomplished under protective tariffs, and denied that any tariff could be framed here which, as its opponents alleged, would make the rich richer and the poor poorer. The United States under protection, had reached prosperity unequalled in the world, in no other country was wealth so evenly distributed, while there was no country in the world where such a large proportion of the population was on the verge of hunger and distress as in Great Britain. Mr. Chamberlain said the object of the commission was not to formulate tariff laws, but to investigate and inquire with open mind. All that had thus far been decided was that the policy adopted so many years ago required reform.

Des Moines, Iowa, Jan. 15— Governor Cummins, in his inaugural address yesterday, gave the "Iowa idea" a new turn and now stands for free trade with Canadian agricultural products and for reciprocity with all the world. The Governor declares he does not believe in "standing pat"; he does not believe in "let well enough alone," applied to any State or nation. "When any society ceases to grow better it has begun to grow worse," he declared. He argued that the policy of "standing pat" on the tariff question was losing the markets of the world to the United States, and declared that the time had come for Iowa to raise the flag of reciprocity. He urged the people of the State to let the nation know that they reiterated the demand for reciprocity they made in the Iowa platform of last year. The Governor told the farmers of Iowa that they would be gainers by the admission of the agricultural products of Canada into this country, for by so doing, he declared, a treaty could be entered into which for years to come would "make us practically masters of the imports into that Dominion."

The Governor's address provoked much comment.

EVERYBODY READS THE TIMES.

JAPAN SENDS AN ULTIMATUM AND BRITAIN GIVES NOTICE TO RUSSIA

Black Sea Fleet of Russia is Refused Passage Through the Dardinelles

Every Preparation is Being Made for War

WAR FEVER IN BRITAIN

The Gun Factories are Working Day and Night

Tokio January 18.—Japanese officials do not call the reply to Russia an ultimatum, but it amounts to that, Russia cannot evade its terms without provoking war. The moment the harbor of Vladivistock is frozen up Japan may be expected to adopt measures for bringing matters to a climax.

PREPARING FOR WAR.

Washington, January 18.—State Department advices today from Japan indicate an extraordinary activity in the preparations for war. The Japanese Government is reported to be striving desperately to find some possible means of settlement, but the State Department learns that while professing a desire for peace there is no sign of a disposition on the part of Russia to yield to the Japanese proposals. Chances of an early breach are in the possibility of the immediate occupation of Corean points by Japanese forces and the presence in the Red Sea simultaneously of Russian and Japanese warships.

ADVISES PEOPLE TO RISE.

Seoul, January 18.—A leading native newspaper ascribes the deplorable condition of Corea to the presence of foreigners. It advises the people to rise and expel them. It declares that the foreigners have come to murder them, and all patriotic Coreans ought to get their axes ready before it is too late.

SEOUL IS AS TINDER.

London, January 18.—A despatch to the Daily Mail from Seoul, says that the city is now like an armed camp. The various legation guards do not fraternize. "The situation is very dangerous. A single shot would be enough to start fighting. M. Pavloff, the Russian Minister, is rather irritated by the attitude of the United States. He compares Great Britain, the United States and Japan to Kipling's "Stalky & Co." He is protecting the demagogue Yi Yong, who is causing serious trouble.

THIS IS FOR FUTURE.

A despatch to the Telegraph from Tokio says that Japan has placed a contract in England for a 16,000-ton battleship. The despatch adds that Baron Komura, the Japanese Foreign Minister, visited Baron De Rosen, the Russian Minister, after having delivered the Japanese note, and insisted upon Japan's demands.

CHINA IS WATCHING.

The Shanghai correspondent of the Daily Mail reports the gradual and extensive movement of Chinese troops toward Shan Hai Kwan, in Chi Li Province probably with the view of securing the harbour of Ching Wan Tao, on the gulf of Liao Tung, and the coal mines thereabouts, against Russian seizure

RUSSIAN ARMY READY.

Paris January 18.—Prince Louis Napoleon has informed a friend that he expects to be called to Russia immediately, adding that war is expected by all. "In case of mobilization," said the Prince "my command would be one of the first to start. The whole of the Russian army is ready. The army does not desire war, but considers that it is inevitable. It is due to the Czar alone that hostilities have not already broken out,"

Prince Louis Napoleon is a major-general in the Russian military service, and commands the cavalry division of the Caucasus at Tiflis.

ANOTHER WAR SIGN.

Singapore, January 18.—The Japanese steamer Tama Maru, bound for London, was stopped here, having received urgent instructions to unload and immediately return to Japan.

ARMS FACTORY FOR JAPAN

London, January 18.—A despatch to the Telegraph from Brussels says that a Belgian syndicate, of which King Leopold is one of the principal promoters, has been formed to establish an arms factory in Japan. Most of the big Belgian industrial concerns are interested in the syndicate, the capital of which is $25,000,000.

CANNOT PASS DARDANELLES.

London, January 18.—The British Government has notified Japan that any attempt of the Russian Black Sea fleet to pass the Dardanelles will be checked by decisive action.

NOT PEACEFUL.

London January 18.—The correspondent of the Times at Tokio says that in spite of the continuance of the negotiations, the steps taken by Japan suggest that a peaceful issue is not expected. The general expectation is that an imperial ordinance will be issued shortly, appointing Consuls to the Manchurian ports opened under the treaty with China.

WU TO FRONT IN CHINA.

London, January 18.—The correspondent of the Times at Pekin says; China, desiring to strengthen her foreign board, in the present crisis, today appointed Wu Ting Fang, formerly Minister at Washington, one of its Ministers. He exchanges posts with Kuchashsin, an amiable gentleman, whose appointment to the Ministry of Foreign Affairs, though in accordance with time-honored custom, is criticized because of his complete ignorance of foreign affairs. Wu's appointment will be received with general satisfaction.

THIS LOOKS OMINOUS

London, January 18.—After months of short time, the Royal Small Arms factory at Enfield is working at high pressure. Swords, bayonets and new Enfield rifles are being manufactured with the utmost despatch.

AMERICAN SETTLERS IN THE NORTH-WEST

They are Rapidly Converted Into Good Canadian Citizens

TO STOP THE MOVEMENT

Stay-at-home Associations Now being Formed in Many States

Montreal, January 18.—"All this talk of the Americanizing of the West owing to the influx of settlers from the South of the border must not be regarded seriously. The United States farmer, when he decides to come to Canada, not only makes a first rate settler, but in time develops into a good British subject and a Canadian citizen."

These were the words of Mr. R. E. R. Rogers, of Winnipeg, to a press representative at the Windsor today. Mr. Rogers is a resident director of one of the large colonization companies at present operating in the North-West, and his views on matters pertaining to the settlement of that vast country are practical.

When asked of the outlook for the coming season, Mr. Rogers said that the prospects were exceptionally bright. A large number of farmers were coming across the border to take up land in Saskatchewan, Assiniboia, and Alberta, and before the season was over some thousands of new settlers would be added to the population of the North-West. The United States farmer, in the opinion of Mr. Rogers, made the best settler in the world. As a rule, he was a man who had sold his land in the United States for $50 or $60 an acre, and then bought land in the Canadian North-West for $8 to $10. In this way he had plenty of ready cash to work his farm, and as time went on he prospered.

The modus operandi of a colonization company is as follows; Men are sent down into some of the States, particularly North and South Dakota, Minnesota, Indiana, Wisconsin and Iowa, who make a personal canvass of the farmers in various localities. In many instances the leading men of the district are brought up to Winnipeg and shown the country, and in nearly every case where this course is adopted a settler for the West is obtained. "What the West wants is people," said Mr. Rogers "that vast country is crying out for the husbandman and tiller of the soil."

Mr. Rogers predicts that the next few years will see a great movement of immigration from the United States to Canada. The present stage is merely a preliminary. Considerable alarm was already felt in States where the exodus had been great, and many banking and business men were forming stay-at-home associations to endeavor or to stop that north-ward movement. "They can do nothing," said Mr. Rogers. "The North-West is merely coming into her own, and all the stay-at-home associations in the world will not prevent the United States farmer settling in Canada, if he can become more prosperous in the land of his adoption."

When asked concerning the feeling in the West regarding the acquisition of large tracts of land by syndicates for the purpose of money-making, Mr. Rogers said that course might have its disadvantages, but really it was the only way to advertise and bring before intending settlers the advantages offered by the West. A man with land to sell will get out and hustle to promote settlement.

THE CANADIAN MILITIA.

The Army and Navy Gazette says; "There is virtue in the new system of the Canadian Militia. It provides the right machinery for utilizing the spirit gained in the schools. There is is no reason why such an organization should not be provided in England."

LADY CAMPBELL BURIED.

Lady Campbell, the widow of Sir Alex Campbell, Canada's first Postmaster-General since Confederation, was buried yesterday at Kensal Green Cemetery. Very many handsome wreaths from friends in Canada were laid on the casket.

RISE AND DOWNFALL OF RUSSIA PREDICTED

Paper by Rev Frank Weston Showed Careful Study of Eastern Question

DESTROY INDIAN EMPIRE

It is Aim of the Bear to Destroy British Prestige, A Situation Full of Intricacy

Montreal, January 18.—The rise and ultimate downfall of Russia was predicted in an address by Rev. F. S. Weston, at the Westmount Baptist church, last evening, followed by a discussion.

The lecturer drew attention to the fact that it is England that Russia feared in the Far East—England that checked Russia's advance on Constantinople, and England that blocked her way into India. For a century past Great Britain had disputed Russia's moves, and it was Russia's poverty that had hitherto been England's best protection. That protection was, however, being rapidly removed; Russia was progressing, she was financially growing, and though her national debt might have grown, her exchequer had also grown in greater proportion. The Bible had forecast all the events which today are developing, just as it foretold all the future of the downfall of Babylon, Greece and Rome. Not only did the Bible outline the general course of human governments, but it also dealt with the single and individual countries.

By the triumphs of war, the achievements of diplomacy and vast commercial enterprise Russia had built up an empire over half of Europe and nigh the whole of northern Asia, an area covering 8,325,393 square miles, or about one-seventh of the whole earth. The point of special interest at this moment was the advance of Russia towards China. Her far reaching diplomacy had already secured the alliance of France. Turkey was at her dictation, and other countries were being enrolled as allies. Persistently carrying out a plan conceived more than 40 years ago, she had quietly occupied every position in Asia, which would eventually enable her to annex the 400 millions of China, then the 300 millions of India, and then the eight millions of Persia. Napoleon predicted that in one hundred years the world would be either Cossack or republican. The hundred years has still a decade to run, but if Russia is permitted to retain Manchuria, the Cossack would ere ten years rule the world. Manchuria is but the stepping stone to China and China once captured, the balance of power was determined. The late Dean Stanley spoke of it as a remarkable fact that Russia is the only modern nation named in the Bible. She is named in Ezekiel xxxviii. The revised edition, referring to Rosh and Biblical authorities, and historians agree that Rosh was the ancient name for Russia. Conquest in Asia had brought the two greatest powers in the world face to face, and the question now was which, Great Britain or Russia is to have the supremacy in Asia.

Russia intends to destroy the Indian Empire, and oust Great Britain from Asia, which would be a menace to the whole Saxon world. No country has prospered so rapidly as Russia, and to-day she is recognized as one of the leading factors in the history of the world. In the Book of Ezekiel this state of affairs was foretold 2,500 years ago. In conclusion Mr. Weston quoted the latter part of Ezekiel 38 and expressed his conviction that Russia would be overthrown by the Almighty, while endeavoring to overrun Palestine, when at the height of her power, as outlined in that prophecy.

A large number of the eighty members of the Baptist Men's Union present took part in the very interesting discussion which followed. Several expressed their belief that Russia could never wrest India from the British Empire.

LABOR'S TROUBLES

The Great Livery Strike Again Opens in Chicago

Chicago, January 16.—The strike of livery drivers began anew today. After a truce of fifteen days, following the Iroquois Theatre fire, ninety-five per cent. of the sixteen hundred drivers of carriages and hearses are said to be out and once more the hack undertakers waggons were put into service in lieu of hearses at funerals, while mourners were obliged to resort again to the street cars in journeying to the cemeteries.

Failure of employers and employes to agree on a wage scale was the cause of the resumption of the strike.

A Bad Fire

Halifax, N.S., January 17.—Men worked at yesterday on the 2,100 foot level of the Joggins Mine, and it is confidently expected that within a very few days the fire in the mine will be all out. 2,100 foot level an auger hole was bored through the ceiling material yesterday afternoon into the pit below. A thermometer was inserted for nearly an hour and it registered only 75 degrees, showing that the quantity of fire in the pit must be small. Men are doubled up, but there is no night work in the pit.

—Lindsay Post:—On Saturday Mr. Chas. McMahon, of Kinmount, brought in some good samples of the silver, lead and molybdenite ores to be found in his vicinity. A Mr. Crouch, of Toronto, recently bought some claims up there.

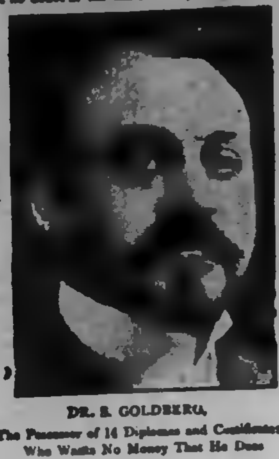
CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free —Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has both the method and the ability to do as he says Dr Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.



DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg 208 Woodward Ave., Room
Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

JAPAN

Should war really break out between Russia and Japan, the world will look on a little as the Israelites and Philistine hosts did when the stripling David stepped forth to combat the giant Goliath. The disproportion between the two countries is so enormous that it is difficult to imagine that the smaller could for any length of time succeed in standing up against the larger. There is one respect, however, in which the comparison between the Jewish youth and Japan does not hold. The former relied on a very primitive weapon; the Japanese are nothing if not up to date. A correspondent of the London Times telegraphs that "the preparations of Japan, in contrast with the policy of Great Britain, are more complete, thorough and detailed than the world probably has ever seen." This is saying a great deal, and the fact is significant. It means that Japan is prepared, if necessary, to make everything in a struggle for existence and natural possibilities of expansion.

Writers who are intimately acquainted with Japan seem to be persuaded that if the struggle is to come she will acquit herself very well in it. The first advantage she possesses is internal tranquility and perfect unanimity on the part of her people who shrink from no sacrifices whatever to sustain the government in the hour of need. The population of the country is 45,000,000. Its geographical area is greater than is commonly supposed. Including Formosa and the Pescadores, it possesses an aggregate area of 162,000 square miles, a third more than the British Isles, and about three-quarters as much as the Province of Ontario, or, say, about six times as much as the Province of New Brunswick. The population is increasing at the rate of about one million per annum. A recent writer states that "relatively Japan may be said to be one of the richest countries of the world, surpassing every other, except perhaps France, in the rigid economies of life, and in the proportion of the savings to the earnings of the people." He adds that, "should occasion rise to test their patriotism, the aggregate of offerings to the Government from the toilers of the country would astonish the world."

WEALTH IN DAIRYING

The reports of the dairymen, at their annual meetings, are of the most gratifying character. They indicate that the wealth of this province largely lies in the development of the butter and cheese business. Manitoba and the great North-West constitute the future granary of Canada, and the farmers of the eastern provinces are most wise in giving their attention to the sources of revenue in which the farmers of the far west cannot become competitors, at least for many years to come.

The old land—and by that is meant England—was until recently talked of as the market for Canadian products. It is a wonderful market, to say the least of it, inasmuch as it has been sought by other countries for the sale of their surplus products, and it has given evidence of a consumption that is simply prodigious. But Britain is no longer contemplated as the only market and its fifty millions of people as the only consumers of a growing contribution. "We are," said the president of the Western Dairymen's Association the other day, "on the highway to the populous Asiatic countries with their thousand millions, and they will, in the course of time, be our customers of dairy products, possibly of cheese and butter, and certainly of other things. This Canada is a great and wonderful country. How great and how wonderful none of us can yet possibly realize, but one thing we know, that this peninsula is a garden."

In the territory covered by the Western Dairymen's Association there are 216 cheese factories, and last season they produced 34,000 tons of cheese, which realized $5,000,000. Adding to this the value of butter made in creameries and in private dairies, the milk sold to dairies and to private consumers, and the values of the season produced amounts to $10,000,000.

PROTECTING THE PEOPLE

Chicago has become very particular about the theatres now that so many lives have been lost in the Iroquois, and under circumstances which do not permit of palliation. The new ordinance of the city council provides for conditions which will involve great expense. Every theatre must have fire proof passageways on each side of it, and a brick wall, the same thickness as the rest of the building, dividing the stage from the auditorium. The openings between them shall be closed by fire-proof doors and steel curtains, this curtain being lowered before and after the performance and between the acts.

The exits are to be marked by large letters during the day and red lights at night, and the red lights are not to be used for any other purpose. The stage floor is to be constructed of wood, but, like all scenery, and curtains, it must have a coating of fire-proof paint. All the material in the building shall be, so far as possible, fire-proof, and in addition two firemen shall be on duty continuously and constantly while the theatre is in use. There shall also be two systems of fire protection—the automatic sprinkler (at the ceiling of the auditorium and of each room), and the hydrants or stand pipes, which shall be in connection at all times with a plentiful supply of water.

There is nothing said about the schools, the churches, and the halls, to which people resort in considerable number. Life is in danger in them quite as much as in the theatres, and public opinion will make it necessary that no precaution, looking to an easy and rapid removal of the people in case of fire, shall be omitted.

EDITORIAL COMMENT

Luckily for Russia and Japan, the weather is cold, and the ultimatums will keep without spoiling.

If Japan and Russia delay much longer the war will be fought before they have had a chance to get their ultimatums exchanged.

TWO VALUABLE MINES

The Augusta Metal Mining Company and the Black Queen Gold Mining Company

We call the attention of our readers to the proposition of the Standard Mining Investment Company, to be found on another page. Here are two propositions that are absolutely safe and sure to be profitable. In September last, two of the best known and most reputable experts, Mr. Harry A. Lee and Mr. J. W. Finch, made a report for the Directors of the Augusta Metal Mining Co. and Black Queen Gold Mining Co. Mr. Lee is the ex-Commissioner of Mines of Colorado, which position he held for years. Both stand exceedingly well in honesty, competency and knowledge of the mining business, and are used and employed by the largest and most experienced mine owners in the western country.

The report of these experts shows that the property is exceedingly rich. In the concluding sentence of their report they say;

"In conclusion, allow us to congratulate you upon the ability and judgment displayed in acquiring and assembling properties of such promise as the Augusta is demonstrated to be and as the Black Queen promises to be. We take pleasure in assuring you that in our best judgment and belief the property shows such value on its present showing as to merit the expenditure of sufficient money, at the proper stages, to give it the thorough equipment and development suggested."

The Standard Mining Investment Company 603 Exchange Building, Denver, Colo., are the fiscal agents of the company, while Mr. Roland Kidd is the local fiscal agent. In this connection we would say that a mistake was made in the first few issues of our paper, by which the stock was quoted at 5c. and 15c. a share respectively for the Augusta Co. and the Black Queen Co. This should have been 7c. in each case.

Kidney Diseases

Every Year Thousands Suffer and Die from Kidney Disease, That Never Knew the Exact Nature of their ailment.

Among the Most Easily Noted Symptoms are Pain in the Back, Frequent Desire to Urinate, Constant Headache Sleeplessness, and Nervousness.

When these signals of danger are unheeded, and proper precaution is not taken to avert more serious results, the very worst form of kidney trouble will develop, namely, Bright's Disease, which is almost incurable.

To obtain quick relief and a sure cure you must at once commence to take Ferrozone. It is a treatment for kidney and bladder troubles of undoubted merit and is prescribed now by all doctors and physicians who are abreast of their profession. Hospitals, Sanitariums, and all public health institutions rely on Ferrozone in all derangements of the kidneys, and claim that it effects more cures of chronic cases than any other remedy.

The action of Ferrozone is very mild and efficient and can be depended upon to give satisfactory results in every case. It brings about a healthy condition of all the organs of the body, causes the kidneys to eliminate all poisonous products and wastes of the body. It purifies and enriches the blood, reconstructs wasted tissues, excites healthy appetite and promotes good digestion. By the regular use of Ferrozone nutrition is improved, and strength to ward off disease is established and maintained.

No remedy for the alleviation and cure of kidney disease can possibly equal or surpass Ferrozone. This fact is conceded by all those who have used it, and a trial will convince you of its merits. Don't be misled into accepting a cheap, unworthy substitute, but insist on having the genuine Ferrozone. It is the very best that money, brains, skill and scientific research can produce, and that is the sort of remedy you want. Price 50c. per box, or three boxes for $1.25, at druggists, or N. C. Polson & Co., Kingston, Ont.

LABOR'S TROUBLES

The Great Livery Strike Again Opens in Chicago

Chicago, January 16.—The strike of livery drivers began anew today. After a truce of fifteen days, following the Iroquois Theatre fire, ninety-five per cent. of the sixteen hundred drivers of carriages and hearses are said to be out and once more the back undertakers waggons were put into service in lieu of hearses at funerals, while mourners were obliged to resort again to the street cars in journeying to the cemeteries.

Failure of employers and employes to agree on a wage scale was the cause of the resumption of the strike.

FREE TRADE WITH U. S.

Governor Cummings Gives New Turn to the Iowa Idea

Des Moines, Iowa, Jan. 15— Governor Cummins, in his inaugural address yesterday, gave the "Iowa idea" a new turn and now stands for free trade with Canadian agricultural products and for reciprocity with all the world. The Governor declares he does not believe in "standing pat"; he does not believe in "let well enough alone," applied to any State or nation. "When any society ceases to grow better it has begun to grow worse," he declared. He argued that the policy of "standing pat" on the tariff question was losing the markets of the world to the United States and declared that the time had come for Iowa to raise the flag of reciprocity. He urged the people of the State to let the nation know that they reiterated the demand for reciprocity they made in the Iowa platform of last year. The Governor told the farmers of Iowa that they would be gainers by the admission of the agricultural products of Canada into this country, for by so doing, he declared, a treaty could be entered into which for years to come would "make us practically masters of the imports into that Dominion."

The Governor asked: "Which would you prefer to do, lose the market which would be created by our vast imports into Canada or meet Canada in competition in things which you produce? I assert confidentially that in a sharp struggle with Illinois, Wisconsin, Minnesota, the Dakotas, Nebraska, Kansas and Missouri, you would never be able to discern the influence of Canada in corn, oats, barley, hay, cattle, horses, hogs, butter and eggs."

The Governor's address provoked much comment.

Dry Placer Miner, formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. W invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 200 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine—Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trantwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 60 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trantwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

'Henry Fielding's Dream'

By CORTLAND MYERS.

bringing their own sufferings upon themselves."

"I am glad to hear to say that," said Henry, "and it is just that spirit which I have seen lately which has changed my ideas somewhat, and is changing my life. I am looking at the ministers differently, and at the Church people, too, with new and better thoughts. I have been thinking in these last days that perhaps I ought to bear at least half of the blame for my own absence from the church, and the other men are in the same position. They have misjudged and made sweeping condemnation concerning the Church and the rich, and justified themselves in almost every way."

"It is more likely true," said Grace, "that both are in the wrong. Do you know what I think?" she continued.

"No," answered he. "I want to know; tell me."

"Well, it is that you can do a wonderful thing in this world now for Christ and your fellow men, if you were a Christian, and went from the Church right among these men with the very spirit of Christ. That is the great need. I cannot do half what you can, and I don't really believe that Mr. Dowling can. They want to see Christ in the labor union, and you ought to be his representative, and show them how He would belong to the union, and what he would say and do."

Henry was almost stunned for an instant at her frankness and her familiarity in talking religion to him. He did not realize that it was her life, and that it was the intent of Christianity to live it and talk it everywhere.

He stammered out in reply that he supposed that she was right.

They were now at her home, and had almost forgotten the rain and the distance.

The parting was touched with something more than mere politeness, and Grace, ventured to say, as he turned away, that he would be welcome any time in her home.

As he walked away, he said half aloud:

"Well, there is one exception at least. The world is not all cold and selfish. There is Christianity on earth, and it may be harder for a rich person to be in the Kingdom of Christ than the poor. I think that is what the Bible says.'

The pressure of conviction was settling down upon him with tremendous weight, and Henry Fielding was not far from the Kingdom himself.

The next morning about nine o'clock Elsie was startled by a sharp ring of the bell. She hastened to open the door, to find some one farthest from her thought.

A telegram was not an ordinary event in her life. This one was the first since she came to the city.

She could hardly wait to sign the messenger's book before she opened it, and when he disappeared she could scarcely muster the courage. "It must be something important. It is for Henry, but it certainly is for me, too. Can anything be the matter at home?" And a countless number of thought-flashes crowded into her mind.

In a moment she stood with the open message in her hand.

This was not only the first telegram, but never before had that expression taken possession of her face. It was the mingling of wonder and surprise and anxiety and grief.

It read: "Come home, at once. Your mother is very ill. Signed, Robert Matthews," an uncle of theirs, who lived near their old home.

Elsie stood with that yellow bit of paper in her hand as one transfixed, and read it and re-read it and wondered if it told all the truth, or if there was more to be said that the message could not carry.

These are the hours when queenliness and character are tested.

She had to cry. That was natural, and even womanly, but Elsie Fielding was not the one to give loose rein to imagination or sorrow. Her second thoughts came quickly.

Blessed be they and the heart which opens for their reception.

"What must I do?" she said, not "what must I feel?"

In a moment she had thrown on her hat and her wrap, and was ready to go to the factory to tell Henry.

Steps were rapid, but not light.

He was summoned to the office on her arrival, and knew that something important had brought her, because this was the first time she had called him from his work.

She waited with the telegram in hand, but ready to pave the way by saying as he came toward her:

"Henry, I am sorry I had to come, but this is not very good news. Yet probably it is not as we may think. This just came to the house," and she passed it to him.

But she could not wait to tell him, and perhaps make it easier.

"It says mother is ill, and they want us to come."

While she was telling the story, he was reading it, and then stood holding it for a moment without saying a word.

When Henry was tested he could not be hastened, and when his decision was made it was usually the best.

"I hope she is not very seriously ill," he said, with a sigh following it, and walked directly to the superintendent's desk.

"Mr. Whitney," he said, "my sister has just brought this message to me, which says my mother in Vermont is very ill, and they want us to come immediately. I must go right away, and I know you will have no objections."

"Certainly," said he, rather coldly. "This is a call which must be answered. I hope you will not find it as serious as it now seems," and he had already turned away before the last sentence was finished.

Their mother had not lost any of their love by their absence. Each week the home letter was on its way, and occasionally more than once a week some word or token of love was sent.

They had received her letter only two days before this, and then she was apparently as well as usual.

"What could be the matter?" was the oft-repeated and oftener thought question.

Henry told Elsie to hurry home and get all ready and he would go to the depot or some ticket office and find out when the first and best train went.

He discovered that it left at twelve o'clock, and gave them only about two hours to make preparation.

"But we can do it," said he, as he partially ran down the street and toward their home.

No time was lost, and at five minutes before the hour they were on the train, and had scarcely taken time to think of the object of their journey. At least, not any time to talk about it.

Now they had the afternoon, and it was crowded with wonder and increasing anxiety.

They knew about their mother's trial with their brother Will, and her deep sorrow over his life.

He had grown wild and even dissipated. They feared she had not told them the darkest side of it.

That was the real condition. She had not.

Out of her love for them, her mother's heart had encircled all of her own trouble, and she had lived on hope that her counsel and prayer would prevail, but each day had increased his appetite for strong drink, and almost each night of his life he came home intoxicated.

She never gave him up, nor did she ever threaten.

She only pleaded with him, and prayed to God.

Never a night had she rested until he was in his room, and then she would kneel at his bedside and pray for her boy that he might be saved.

Sometimes he was too stupid to know that she was there — even though she held his hand, and her hot tears were falling upon it.

At other times it angered him, and he had even cursed her while she prayed.

That had almost taken her life, but it never triumphed over her love and faith.

Last night he had come home at midnight in sadder condition and meaner disposition than ever before.

The light was in his room. The bed was open for him as usual. His mother was waiting. As sweetly as an angel, she spoke to him, but received no reply.

He was intoxicated almost to insanity. It was temporary insanity.

(To be continued.)

Germany's Rise.

The most significant fact in the world-politics of the hour is the rise of Germany as a great naval power, says The Literary Digest. Of this we are assured on the authority of the ablest contemporary writers who deal with international affairs in the current European periodicals. Students of the subject were long inclined to doubt the ability of the Berlin Government to realize its ambitions in the direction of sea power. No doubts are entertained at present. France, the second naval power, will yield that position to Germany by the year 1916, perhaps by the year 1910, we are informed. The following from The National Review (London) represents expert though anonymous opinion:—"The German fleet is at present being yearly increased by two first-class battleships, one armored cruiser and six destroyers, while at the same time additional ships are to be constructed to replace those which become obsolete. This is business, and not haphazard and panic building like our own. Twenty-five years from the date of the laying down of each battleship on the list, a new Ersatzbau, or supplementary ship, has to be laid down to take the old vessel's place. It follows that in 1905 Germany will dispose of fourteen battleships of modern design, and in 1908 of at least twenty, and perhaps twenty-five, with a proportion of armored cruisers and destroyers. Owing to the fact that the programme is determined long beforehand for a term of years, ships are built more cheaply than in any other country. The shipbuilders and armor-plate makers know exactly what orders to expect, and can make arrangements accordingly, while the steadiness and regularity of the demand enable them to keep their plants occupied."

The mobilization of the fleet, under the German system, we read further, is "rapid in the extreme." "Germany counts much upon the rapidity of her action at the outset, upon striking heavy blows before the antagonist is ready—in a word, upon using the weapon which surprise offers to the well-prepared." Here is a statement of what the immediate present holds in store:—"The German fleet at the close of this year will number eight modern battleships of the first-class, with two modern armored cruisers, which are for many purposes little inferior to battleships, eight older battleships of inferior power, but recently rebuilt and brought up to date in many respects, and twenty-four destroyers. The new ships in this fleet are admirably designed, heavily armed, and well officered and manned. The shooting is excellent, for last summer before the Kaiser the flagship fired eight rounds in a minute from a six-inch gun, and every shot hit the target. This is quite as good as the practice of the very best of our ships, and is undoubtedly a fine performance. In coaling a German battleship holds the world's record, having taken on fuel at the rate of 200 tons an hour, though it is true that the total quantity shipped was less than is usually embarked in the case of British battleships, and, therefore, the strain on the crew was less severe. It is then obvious that the German navy, so far as can be judged by the mathematical tests usually applied, has attained a very high degree of efficiency."

More Cannibalism.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.66 to $60 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $62.66 and $79.08 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1876, and am now the manager and superintendent of the Imperial mine in that district.

(Signed) CAPTAIN A. M. PAUL.

The PETERBOROUGH BROKERAGE CO., Fiscal Agts.
PETERBOROUGH, ONTARIO.

Equitable Gold Mining Co.

R. C. LANE, President. **S. F. NORTON**, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,350 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 635 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,850 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 28th, 1897, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $135,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 305-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

THE PETERBOROUGH BROKERAGE CO.
FISCAL AGENTS

APPEARANCE

Is such an important feature on the table It makes a heap of difference to the pleasure of the meal whether you have a good or a poor looking Sugar on the table

St. Lawrence Extra Granulated Sugar

is the whitest and best looking Sugar to be had, and besides, it has the advantage of being the best quality and greatest strength.

For the Ladies.

Knives.

The loosening of the handles of knives is due to the fact that the knives have been tossed into a pan of hot water, together with the forks and spoons, and, in consequence, the cement has melted away. Knives, when brought from the table, should be scraped against the edge of a plate to remove as much soil as possible and the blades should then rest in a jug, not a pan, of hot water, into which a little bit of soda has been melted, care being taken that the water does not reach the handle, where it joins the blade.

Bookish Women.

Bookishness is an unreliable test of ability. I have known bookish women who were profuse readers and delighted in study, but were not of much use for anything else, and I have known other women who took books rather hard, but amply made up for that disability by their closeness of observation and mental energy. As between persons who read to save themselves the trouble of thinking, and persons who observe and think, but find reading laborious, the latter are likely to be best worth while. But reading, observation and thought ought to work well together and to make for practical efficiency. A mind that is capable of Greek and analytical geometry is usually capable also, under proper training, of omelets, good coffee and household administration.—E. S. Martin, in Harper's Bazar.

Hindu English.

Lady Curzon, who was Miss Leiter of Chicago, gets a lot of fun out of her life in India. Among other fads, it is said that she makes a point of collecting any amusing attempts made by Hindus to write English that may come under her notice, and has many ludicrous specimens in her scrapbook. Recently she got from Bombay a letter that two brothers sent out to their patrons on the death of their father, who had been the head of the firm The letter ran: "Gentlemen,—We have the pleasure to inform you that our respected father departed this life on the 10th inst. His business will be conducted by his beloved sons, whose names are given below. The opium market is quiet, and mal. 1,500 rupees per chest. O death, where is thy sting? O grave, where is thy victory? We remain, etc."—Leslie's Weekly.

Care of House Plants.

The advent of colder weather means increased fire heat, the latter also meaning an increased aridity or dryness of the atmosphere. The latter condition will probably induce a visit from insect pests, unless precautions are taken to prevent their appearance. Green fly and red spider are most to be feared, especially the latter, as their appearance is not so easily detected as that of the aphis, or green fly.

Copious sprinkling and syringing with cold water is the best preventive for the attacks of the so-called spider. Salvias, fuchsias, roses and carnations are first favorites with this little pest. When first attacked, the leaves of these plants present a whitish, dusty-looking appearance, especially on the underneath side, and the leaves will soon commence dropping twice every day. Tobacco water is the best remedy for green fly, although tobacco leaf stems, or even a cigar thoroughly dried and rubbed into a fine powder and sprinkled on the plants infested with green fly will generally rid the plant of them. The latter application is best made after the plants have been recently sprinkled or syringed, as the tobacco dust adheres better when the foliage of the plant is moist.—William Hunt, Guelph, Ont.

Keep the Windows Open.

You would not think of drinking stale or poisoned water, would you? You know that if you were to be shut in an air-tight compartment death would result. Of all the necessities of life, you can live longer without any of them than air. Impure air and darkened apartments are the cause of an untold number of deaths annually. You know that on a sunless day, with a close atmosphere, you are out of sorts at the best, if you are lucky enough to escape physical ailments, while you are mentally depressed. But once let the sun shine brightly, and clear the atmosphere, how different how much better you feel in every way.

Cold weather is coming, and when you are tempted to close up the house as tight as it can be made, remember these things, and don't do it, especially at night. Keep the windows in the sleeping apartments open enough to at least give you sufficient fresh air. A cold room does not indicate that it is healthy, far from it. A sleeper will soon breathe up all the fresh air in a room, and if there is not a constant supply of fresh air, he simply breathes over and over again the poison thrown off by his lungs. And the breathing of this vitiated air only tends to lower the temperature and vitality of the system, so that it is not as capable of withstanding the rigors of winter. Fresh air is heating to the body; in fact, upon it depends the combustion of the fuel in the body and by which we are kept alive, which we should always bear in mind.

Even with open windows during the night, bed chambers and bed clothing should be thoroughly aired each morning, and allowed all the sunlight possible. During sleep, not only do the lungs throw off more poison than during the day, but it is especially so with the body in its relaxed condition and when the pores are all open. During sleep the body should have plenty of covering; better to have too much than not enough, both to induce deep slumber and to keep the skin moist and the pores open that they may have the opportunity to rid the system of poison. Bear in mind that death would follow the closing of the pores.

Fresh air in cold weather will cost money, as more fuel will be required, but it will be economy, for if it does not save sickness and doctor bills, and which it most likely will do, you will feel better and the stronger for it.—Cooking Club.

He Got the Applause.

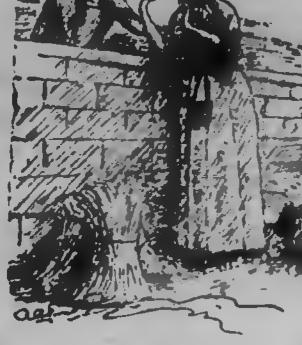
Senator Depew was talking about the mishaps and contretemps of actors.

"I'll never forget," he said, "the stately 'super,' in powdered wig and silk stockings, who stalked, chin in the air, upon the stage to answer the Earl's question, 'Who is there?' The 'super' should have said, 'The boy, my Lord,' but what he did say was, 'The Lord, my boy.'

"Then there was another 'super,' unlike the former one—a 'super' self-possessed and ambitious. This chap, after years of stage life, had not yet got beyond a part that consisted of only a meaningless line or two. He was hungry for applause, and at last he determined, at all hazards, to get applause. So one night, after he had said his usual solitary sentence of 'the carriage waits,' he stalked to the centre of the stage, elbowing the star to one side, and, looking up at the gallery and striking himself on the chest, exclaimed in a loud voice:

'And permit me to add, sir, that he who raises his hand against a woman, save in the cause of kindness, is unworthy of the name of gentleman.'

"That brought down the house, but the poor 'super' lost his place on account of it."



Jonathan—Come live with me and be my love.

The Lady—I'll be a sister to you.

Valpy's Dinners.

I have more than once referred to Mr. L. R. Valpy as a friend of Howell and Rossetti, and an extensive purchaser of the latter's works, writes "Sigma" in his reminiscences in "Blackwood." Mr. Valpy was by profession a Lincoln's Inn Fields family lawyer of good position and repute; but though a strenuous worker in his vocation, his heart was divided between two curiously antagonistic predilections—the "austere" and the "sensuous," his religious tendencies being sternly Calvinistic, and his artistic sympathies chiefly identified with the school of Rossetti and Burne-Jones. This singular contrast of proclivities led not infrequently to scenes and situations of a distinctly comical nature. Many a time have I met in his dining-room, hung with a superb line of Rossetti's red-chalk studies, a solemn assemblage of Exeter Hall lawyers and Low Church clergymen, who looked upon their host's cherished drawings either as autotype reproductions or the work of some inspired madman! Two instances of this Philistinism I particularly remember. The hero of one of them was an eminent commercial solicitor, who, after inspecting some newly-acquired treasure contemptuously for half a minute, turned on his heel with the comment that "faces of that kind were usually symptomatic of scrofula!" The other offender, a gormandizing clergyman, was even more flagrant. Uplifting his eyes from his empty plate during a change of courses, he happened to catch sight for the first time of three new purchases from Rossetti's studio. "Queer-looking affairs those, Valpy," he remarked with a pitying sneer; "where did you pick them up?" "They are the work of one Rossetti," replied Valpy with simmering irony. "Rossetti, Rossetti? Never heard of him," rejoined the appalling guest. Then glancing at an idealized study of his hostess, which formed the center of the three drawings he added, "And who, may I ask, is that ill-looking woman over the mantelpiece?" "That, sir," replied Valpy with what Dizzy used to call "a superb groan"—"that, sir, is my wife!" Yet, strange to say, Valpy persisted to the last in entertaining these uncongenial guests, who never failed to drive him nearly frantic with their outrageous comments. Occasionally, however, in his bachelor days he would invite one or two artists, and perhaps myself or some other more sympathetic friend, to what he called a quiet dinner, but which really was almost Spartan in its provender. I suppose he imagined that artists were too ethereal to care for the succulent fare which he set before parsons and lawyers, a theory wherein he was, of course, grievously mistaken. I well recollect dining with him once to meet Rossetti and Samuel Palmer, when the menu actually consisted of nothing more luxurious than thin pea-soup, cold boiled beef (as the waiters say, "bow in cut"), and a "roly-poly" pudding! Samuel Palmer rose superior to this fare, and was cheery and charming throughout the evening; but it was otherwise with poor Rossetti who, without being a gourmand, was constitutionally unable to appreciate plain diet. His normal melancholy deepened into positive gloom, and I cannot recollect his uttering a syllable during the whole of dinner, at which he sat like one of the figures at the banquet in Holman Hunt's picture of Isabella and the Pot of Basil. Valpy seemed quite unconscious of offense, and to see him persistently plying Rossetti with "roly-poly," which the poet-painter as persistently refused in ever more deeply accentuated tones of weary dejection, was irresistibly comic.

Whenever a woman who is carrying a fat baby meets a man leading around a little dog, she always looks indignant at him.

When a woman tells a man he ought to be ashamed of himself for doing something half of the time it means that she would have been ashamed of him if he hadn't.

Nature never did betray the heart that loved her.—Wordsworth.

There are truths which are not for all men, nor for all times.—Voltaire.

A day for toil, an hour for sport, but for a friend a life is too short.—Emerson.

SEWING HINTS.

Always use double thread for gathering.

Always use as fine a thread and needle as the garment will allow.

When threading your needle make the knot on the end broken from the reel.

The rule for frilling is one and a quarter the length of the edge to be trimmed.

In facing a sleeve, turn it, and place the facing inside the sleeve before sewing it on.

Gathers should always be set on the right side, but never with a needle; use a large pin.

When sewing on a button place the knot on the right side of the cloth directly under the button.

In sewing a seam, put the stitches closely together, but lightly, into the cloth, being careful not to pull the thread tight, as this causes the seam to pucker.

Sunday consultations at the Paris hospitals were not well attended by the working classes, the workingman preferring to lose a day's work rather than a few of his hours of idleness on Sunday.

TO THE AFFLICTED

The following testimonial may be read with interest to sufferers from skin eruptions or eczema:

January 29th, 1902

Dear Sirs,—I notice your advt. in a paper about your wonderful eczema cure and I feel it my duty to tell you, that I was induced to try it as I had been afflicted with skin trouble in my hands for 14 years. I have tried several doctors and they done me no good, I only used one box of Dr. Clarke's Sure Cure for Eczema. It has made a complete cure. I recommend it to all suffering from skin disease. My hand was so bad that the nails used to come off. You can use my name if you wish.

Yours truly,
MR. JOHN WOOD,
Peake Station, P.E.I.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or boxes for $1.00.

Peter D. McFayden, Riverdale, P. E. I. writes: "I am very busy, but just drop a line to say I highly recommend your catarrh cure. It has done grand work for me. I am so much better."

Dr. Clarke's Sure Cure for Catarrh is also one of the best remedies on the market. We are daily in receipt of letters telling how much they have done for the afflicted. Miss Sarah Hill, 412, Front Street, Traverse City, Mich., writes "I have been wonderfully helped by the use of your catarrh cure; send me another dollar's worth."

Dr. Clarke's Sure Cure for Catarrh and Clarke's Sure Cure for Eczema, same price. $100 will be paid for any case that it will not permanently cure.

SINFUL HABITS IN YOUTH

MAKE NERVOUS, WEAK, DISEASED MEN.

THE RESULT of ignorance and folly in youth, overexertion of mind and body induced by lust and exposure are constantly wrecking the lives and future happiness of thousands of promising young men. Some fade and wither at an early age, at the blossom of manhood, while others are forced to drag out a weary, fruitless and melancholy existence. Others reach matrimony but find no solace or comfort there. The victims are found in all stations of life—the farm, the office, the workshop, the pulpit, the trades and the professions. Nervous Debility and Seminal Weakness are guaranteed cured by our New Method Treatment or No Pay. You run no risk. 25 years in Detroit. Bank security.

CURED WHEN ALL ELSE FAILED. No names used without written consent.

"I am 33 years of age and married. When young I led a gay life. Early indiscretions and later excesses made trouble for me. I became weak and nervous. My kidneys became affected and I feared Bright's Disease. Married Life was unsatisfactory and my home unhappy. I tried everything—all failed till I took treatment from Drs. Kennedy & Kergan. Their New Method built me up mentally, physically and sexually. I feel and act like a man in every respect. They treated me six years ago. They are honest, skillful and responsible financially, so why patronize Quacks and Fakirs when you can be cured by reliable doctors."—W. A. Belton.

NEW YORK-GRASS VALLEY GOLD MINING CO.

Now producing and shortly to go on a Dividend Paying Basis

Offers the best opportunity for immediate investment of any Mining Stock in the Market. The Company is now installing additional stamps to work in their mill, which will be in operation this week, when the Capacity of the present plant will be increased to upwards of

100 TONS PER DAY

GOLD BAR

6 1-2 inches long, 2 7-8 inches wide and 1 3-8 inches deep

The above Gold Bar, weighing 168 ounces, recently sent to the San Francisco Mint represents a ten day's run of the New York Grass Valley Mill, and is valued at about $2800.00.

We hold an option on a limited amount of the stock which we can offer for a very short time longer at

30 Cents per Share This is an **Exceptional Opportunity**

To secure a first class stock, and one that will not be available for any length of time, as on the declaration of the first dividend, which is due this month it will be impossible to secure it at anything like present prices.

We anticipate 75 cents to $1.00 per share within six months.

We advise the immediate purchase of New York Grass Valley stock for large and handsome dividends.

We are the authorized agents of this Company, and you will find it greatly to your advantage to deal directly with us.

Write for full particulars KAYE, DEWOLF & CO., Brokers and Financial Agents, 39-41 Cortland Street, N. Y. C.

IS THERE CERTAINTY IN MINING

The Idaho Richmond Gold Mines Company says Yes

AND HERE IS THE PROOF

1st—By having a property located in a camp that has produced over sixty million dollars worth of gold.
2nd—By having a property that has produced over one hundred and fifty thousand dollars to the former owners.
3rd—By having over two thousand feet of development work done on the property in the way of tunnels and drifts.
4th—By having four different ledges on the property, varying in width from three feet to thirty feet, besides several smaller ones all rich in free gold.
5th—By having now on the dumps are estimated to be worth over twenty thousand dollars, and all taken from development work.
6th—By having large amount of stoping ground opened up for the taking out of large quantities of ore.
7th—By being able to ease a mill that is located within two thousand feet of the property for the treatment of the ore, which will be done as soon as a small amount of the stock is sold to help defray the expenses of getting ready.

There is no promoter or gift stock, and there is yet over six hundred thousand shares in the Treasury.

We can prove to your satisfaction that we have a mine, and it will pay you to write for information, if you are looking for an investment that will pay you good returns.

PETERBOROUGH BROKERAGE CO.

THE
STONY PASS MINING CO.

OF SILVERTON, COLORADO

Has opened an office in
China Hall Block, Peterborough

where investors are invited to call and inspect samples of ore taken from the mines of the Company. There never was a better investment offered the people of Peterborough.

ROBERT HARRISON
Manager.

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 6 claims, 600 x 1500 each. A 70 foot shaft on the Martha claim shows a vein of $80.82 ore 5 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.83 to $19,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay then $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address,

W. D. WALRATH,
NOTTINGHAM BUILDING, - SYRACUSE, N.Y.

THE BANNIE MINE

ONE OF THE BEST AND SAFEST INVESTMENTS EVER OFFERED THE CANADIAN PUBLIC. . . .

The Bannie Gold Mining & Milling Company

Offers 20,000 shares of its treasury stock at

60 CENTS PER SHARE FOR 60 DAYS ONLY.

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th ecountry. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 21, 1903.

Gentlemen— * * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

Address all communications to Robert Kidd, Fiscal Agent, Peterborough, or to W. J. WILSEY, Prescott, Arizona.

A FORTUNE AWAITS YOU

INVEST NOW IN THE

North Carolina Gold Fields

BUY

Rodman Mining & Milling Co's Stock

AT 50 CENTS PER SHARE

DIVIDENDS IN SIGHT

Three developed mines with more than $500,000.00 worth of ore on the dumps and an inexhaustible supply in the mines, assaying as high as $100.00 per ton, with an actual mill test of seven tons running

$24.65 PER TON IN GOLD

One mill completed ready for operation and another being built. One and one-half miles from the main line of the Southern Railroad, cheap labor, cheap fuel. Plenty of water and a climate allowing operations 365 days per annum, are a few of the advantages that go to make this one of the most valuable mining properties today in the country.

Send for free copy of the "Gold Nugget" and learn something about the North Carolina Gold Fields that produced all the gold in this country before '49 and that are today attracting the attention of the world.

Peterborough.

A Groom's Voluntary.

Sir Frederick Bridge, the English musician, is a good story teller, according to T.A.T., and has a fund of amusing personal experiences to draw upon. One of the great musician's best stories is about a provincial church organist, who was once a pupil of his. This young man was appointed to an important church in the Midlands. In course of time he married. During his absence his voluntaries were much missed by the congregation. They had always been appreciated, and their renewal was looked forward to. "Imagine," says Sir Frederick Bridge, "the intense amusement of the people when the newly-married organist gave as his first voluntary, upon his return, Handel's 'Waft Her, Angels, to the Skies.'"

To Build Cruisers.

As a result of the recent naval manoeuvres the British authorities are considering the advisability of building some "dogging" cruisers, to pursue battleship fleets of the enemy and pounce on those which are forced to fall behind. The Bacchante and the Aboukir "dogged" Lord Charles Beresford's fleet in this way almost to the Azores. The flagship Majestic had something the matter with her engines. She was frequently compelled to slow down. Then the big, heavily armed cruisers of the pursuing fleet would swoop down on her. It was necessary to slow down the entire squadron several times for her protection.

"Another point of much interest is that of speed in battleships," writes a British naval authority. "Those who have been engaged in the manoeuvres would have done much better with a few knots more in hand. There are experienced flag officers who say that high speed in battleships is not essential. Yet if gun powder and protection go before it, speed is, in nine cases out of ten, the only thing that can enable a strong fleet to bring a weak one to action. It is the factor that enforces victory and will enable the British fleet to carry on its old policy of seeking out the enemy to destroy him wherever he may be found."

The Wrong Man.

They had been married only a few months, and the wife stood by the side of her husband looking into one of the department store windows. A handsome tailor-made dress took her fancy, and she left her husband to examine it more closely. Then she went back to him, still talking.

"You never look at anything I want to look at any more," she complained. "You don't care how I dress. You don't care for me any more. Why, you haven't kissed me for two weeks."

"Indeed, I am sorry, but it is not my fault," said the man.

Turning, the lady looked at him and gasped. She had taken the arm of the wrong man.—Philadelphia Ledger.

A Baloon Trip.

There is nothing exciting about a balloon voyage. You take your place in a shallow wicker basket; decide to take a picture of the crowd as you leave the earth; hear the order "let go," and before you can press the button the crowd has evaporated—sunk out of sight—and the rest is a moving picture show, with no sense of motion, the air delightfully cool and absolute silence. Presently a voice, apparently from another balloon a long way off, asks how you like the journey. You have exactly the same trouble with your hearing you had while in the caisson, but from an opposite cause—there pressure, here rarefaction. In this case, too, the act of swallowing brings relief. A balloon trip is for all the world like sitting in a dentist's chair and taking a whiff of gas, followed by a pleasant dream. But, of course, instead of taking gas, gas is taking you. Photography under these conditions is a very simple matter—pointing the lens over the edge of the basket, waiting until the desired object comes into view, and the snapshot is taken.—W. N. Jennings, in Booklovers' Magazine.

A Quiet Village.

It seems hardly credible, says The London Telegraph, that not more than thirty minutes from all the noise and bustle of Paris there lies a village that is so quiet, so peaceful and so old-fashioned that one would imagine one's self at least one hundred miles away from the gay capital. Here at this village, La Frette by name, and about fifteen minutes' walk from Cormeilles, preparations for midday and evening repasts have to be made very early in the morning, for no such thing as a good shop is anywhere near, and the walk to Cormeilles is one which one considers twice before taking, for it is up steep and rough roads. So daily butcher, baker and greengrocer pass this quaint little place, and the villagers gather round the various tradesmen and make their purchases for the day. They also buy their clothes in this way, and may often be seen trying on bonnets, dresses and boots in the middle of the street. From a scenic point of view, all artists have agreed that there is no place to equal La Frette between Paris and Havre. To the left of the village is the park of Maisons Laffitte, and facing the park is Sartrouville, while opposite lies the forest of St. Germain, in all its green splendor. To the right is Herblay, quite an important place, whose church is visible for miles along the Seine. La Frette itself has the quaintest villagers possible. Many of them speak worse French than those of the Midi, and it is an event indeed when one takes a journey up to the capital. They are thriftiest of the thrifty. Only a short time ago one of the peasants gave his daughter no less a sum than 250,000 francs on her wedding day, and another is to receive the same amount on her approaching marriage. And yet this man, who must be worth 4,000,000 or 5,000,000 francs at least, lives in a patched up old house and digs in the fields from early morning till late at night.

Be Regular in Milking.

The cow is a creature of habit, and therefore the time and manner of milking should vary as little as possible from day to day. The yield of milk will sometimes vary by reason of matters of such small moment that we fail to reckon them. From our results a change in milkers showed a small average loss in yield. Some cows were not affected at all, while others gave a slightly reduced yield. This will depend, however, upon the ability of the milker. Carlyle found no appreciable difference in the frequent changing of milkers. Tracy found by a good milker following a careless one an increase with five cows of 244 pounds of milk in two weeks.

Cows fed at milking time are apt to hold their milk when the customary feed is withheld. This may occur even when the animals have access to abundant pasture. This is so noticeable with some of the station cows that it is advisable to give them a little grain through the summer season to induce them to give down their milk. Emery notes that a cow that gave over seven pounds of milk gave only two pounds when her customary feed was withheld at milking time.

Allowing cows to miss a milking has a tendency to dry them up, and is liable to cause an injury to the udder, some cows being affected much more than others in this respect.—(Bulletin No. 106, Kentucky Agricultural College.)

There are some first class bargains to be had in some new and second hand pianos and organs, at W. G. Landreth's, 170 Charlotte street, agent for Heintzman & Co., Toronto. Call and see for yourself.

BACK TO PALESTINE

Movement to Aid Jewish Plans to Go to Holy Land

London, January 16.—Leading British and Continental Jews have formed a Jewish Emigrants' Information Society which is expected to affect the whole question of the Hebrew populations of Europe. The direction of the society's affairs is in the hands of a strong executive, including such men as Leopold de Rothschild, N. L. Cohen, F. D. Mocatta, C. G. Montefiore, and several representative Jews in the British Colonies. The organization will place before the Jews of Europe exhaustive information as to countries, particularly the colonies of Great Britain, which offer the best prospects to Jewish settlers. It will also undertake to assist intending emigrants not only to reach their new homes but also to establish themselves therein. In the early stages of the enterprise no effort will be made to encourage the emigration of any individual family that does not give promise of complete self-maintenance. It is hoped thus to build up the places chosen with homeseekers of a stable, prosperous Jewish class, capable in the future of offering a species of asylum to their weaker brethren. The promoters of the movement take a long view of the problem and expect results on a vast scale only after the lapse of years. They do not aim to deflect the race from the path of Zionism, but hold that too many sound practical measures for the relief of the oppressed Jews of Europe cannot be evoked while the larger scheme is crystallizing.

TO THE AFFLICTED.

Dear Reader,—Are you a sufferer from any of the following ills: Lack of ambition, nervous exhaustion, ideas easily confused, irritability of temper, impairment of memory, despondency, general debility, liver not right, kidneys out of order, rheumatism, dyspepsia or indigestion, dizzy or fainting spells? Does your heart palpitate? Do you have smothering or sinking sensations, pimples, or eruptions of the skin, etc, etc.

If you are troubled as above, you can be cured by the use of Dr. Clarke's Wonderful Little Red Pills. A trial order of three boxes for $1.00 will convince anyone that these pills are truly wonderful. We are daily in receipt of letters bearing the highest testimony. We have not space to tell you all about them here, but will answer any enquiries as to their merits. Mrs. John Macdonald, Durham, N.S., writes us, "After taking two boxes of Dr. Clarke's Little Red Pills for indigestion, which I had been troubled with for a number of years I am now perfectly well. I followed the directions carefully.

To every one sending for a trial order and finding good results we ask to observe our special offer enclosed with every box. It is of special interest to every one.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or 3 boxes for $1.00.

Dr. Clarke's Sure Cure for Catarrh and Dr. Clarke's Sure Cure for Eczema, same price. $500 will be paid for any case that it will not permanently cure.

PLUNGED DOWN THE SHAFT

Foolish Action of Shoe Workers Causes Eight Deaths

St. Louis, Mo., January 16—A crowd of employees pressing against the elevator gate last night on the sixth floor of the Brown Shoe Company, at 11th street and Washington avenue, caused the gate to give way, and ten persons were plunged down the shaft. Six were taken out dead, and the other four seriously injured, were hurried to the city hospital, where two died later.

One of the injured died soon after reaching the hospital, without regaining consciousness.

The employes were waiting for the elevator to take them down. The elevator was at the seventh floor when those on the sixth floor, eager to be into the cage, began to push forward, breaking the gate, and sending ten persons down the shaft.

James Johnson, the elevator operator, was arrested. Johnson said the elevator gate did not break, but that it had been raised by employes and that suddenly those in the rear pushed those in front down the well. Factory Superintendent Fray corroborated Johnson's story.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000.00. Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 1000 feet in addition to other claims approximating a total acreage of 200 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $15 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate
to your heart's content,
and quickly, then let us
hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 100 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 600 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*

C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not A Gamble
but a
Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO.,

LOCAL AGENTS, 578-80-81 Wilcox Bldg., LOS ANGELES, CAL.

The Peterborough Brokerage Co., Local Agents.

WANTED—GOOD AGENTS IN EVERY CITY.

Slowly Dying

Thousands are Slowly dying from catarrh, but don't know their danger

A CASE IN POINT

Mr. Ulric Berault, a young gentleman who lived for years in Sweetsburg, Quebec, inherited Catarrh from his mother. The disease spread through his system till he was a physical wreck.

"As a child," said Mr. Berault, "I was prone to an ulceration of the mucous lining of the throat and nasal passages.

"I grew pale and emaciated, lost all desire for food, and got into such a dreadful condition that my friends said that Catarrh was fairly eating me up.

Every organ of my body seemed affected and the doctor said it was the first stage of consumption. He advised Catarrhozone, and I inhaled it ten minutes at a time every few hours, and was rewarded in a few days by a wonderful improvement.

Catarrhozone pleased me and the doctor so well that I used it continually, and took Ferrozone Tablets after each meal to build up my strength. In about three weeks I was quite recovered, and the doctor says no remedy but Catarrhozone could work such a miracle.

"Every one in town knows I was just about dead with Catarrh, and my cure is an evidence of what Catarrhozone can do. It is a pleasure to recommend Catarrhozone."

(Signed) Ulric Barault."

Catarrhozone beyond question is the proper remedy for catarrhal and bronchial troubles. The medicated air goes all through the air passages of the head, throat and lungs. It kills the germs, heals the sore spots, allays irritation and keeps the breath pure.

Headache, tired feelings across the eyes, nausea, all these well-known disagreeable symptoms are overcome by the medicated air of Catarrhozone.

Ferrozone Tablets which are used in conjunction with Catarrhozone Inhaler drive all the poisonous secretions of catarrh from the blood. One taken after each meal creates new appetite and digestion, strengthens the stomach, revitalizes and invigorates the entire system.

Catarrhozone is quite unsurpassed as a cure for Catarrh in any part of the system. It is highly recommended for Bronchitis and Asthma.

Complete outfit, sufficient for two months' treatment, price $1.00; trial size 25 cts. Druggists or N. C. Polson & Co., Kingston, Ont size 25c. By mail brom N. C. Polson

Mr. Gardner Remembered

On Friday last the members of the Albany Club presented Mr. and Mrs. Peter Gardner, whose wedding took place a few days ago, with a couple of elegant easy chairs.

A Presentation

After the regular practice on Friday evening the members of the 57th Band presented Mr. Eugene Gibbs, who is about to leave town, with a handsome clock. The presentation was made by Mr. Crowe, and a suitable reply was made by Mr. Gibbs. Refreshments were served and the band members spent an enjoyable time together.

NEW TERM
AT THE
Peterboro' Business College
—BEGINS—
Monday, January 4, 1903
Day and Night Classes.

It is desirable that all who purpose entering the school should do so on the above date.

WM PRINGLE,
Opposite Post Office, Principal

AN EXPLANATION NEEDED

At the Conservative organization meeting on Saturday Mr. Kendry described in grandiloquent terms how the President of the Conservative Association had, by his indefatigable efforts, rolled up for him the magnificent majority of four hundred, but he said nothing whatever how, under the same management, the still more magnificent majority of eleven hundred had been rolled up for Mr. Stratton.

Laid at Rest

The funeral of the late Dr. Duncan Fraser took place on Saturday to the Lakefield cemetery, a large number attending. The funeral was conducted by the Masonic brethren, several being present from Peterborough.

By-Law Passed

A bylaw to grant the Sugar Company a fixed assessment of $10,000 for twenty years, was submitted to the ratepayers of the Township of North Monaghan on Friday last, and carried by a good majority.

Saturday's Market

There was a very small attendance at the market on Saturday morning, chiefly owing to bad roads. The chief prices on the market were as follows:—Butter, 21 to 22c.; chickens, 60 to 80c. per pair; turkeys, $1.25 to $1.90; and geese, $1 to $1.25.

A New Industry

Mr. M. J. McDermott, of Ingersoll, who has been visiting Mr. A. J. Clark in town, is contemplating the establishment of a cooperage in Peterborough. There is a great and growing demand for barrels of all kinds in this district, and a large business would be secured. Last fall it was next to impossible to secure apple barrels for fruit growers.

Masculine Readiness

A well known Peterborough man has a wife who is decidedly nervous, and often in the small hours of the morning imagines she "hears things." One morning last week she thought she smelt gas. Bravery came to her mysteriously. After smelling about for some minutes, she rushed upstairs, called her husband, then shook him, and at last roused him and said;

"John, there's a leak in the gas-pipe in the kitchen. We'll all die if it's not fixed!"

He had heard the same kind of story before, so he sleepily asked;

"Is it leaking much now?"

"Not much," replied the lady.

And then he turned over with this soothing advice;

"Put a bucket under it and come to bed."

Come with the Crowd

To Port Hope To-night And See The Seniors and Port Hope Play. It Will be a Close Game. Train Leaves at 6 30

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mrs. Fred Hall has returned to her home in Toronto.

—Mrs. (Dr.) Hunter, Gilmour street, is visiting friends in Toronto.

—Mr. J. W. Ridpath, of the Lakefield News, was in town on Saturday, and paid The Times a fraternal visit.

—Mr. R. C. Strickland, of Lakefield, was down on Saturday to the convention.

—Miss Virgie Fee left Saturday morning for Toronto, where she will remain for a few weeks.

—Alderman Plouffe and daughter, of Ottawa, are guests of Mr. M. McFadden for a few days.

—Rev. W. L. Armitage left for Picton on Saturday to take charge of Mary Magdeline's church in that town.

—Mr. Bruce Hutchison, who has been in the North-West with a surveying party on the Grand Trunk Pacific proposed line, has returned.

—Mail and Empire;—Mrs. W. Claude Fox, of Brunswick avenue, was the hostess yesterday of a delightful informal tea given in honor of Mrs. J. R. Stratton, of Peterborough, and her sister, Mrs. Hunter, also of Peterborough. The pretty rooms were made most attractive with many cut flowers, smilax, palms and ferns, and the lights all softly shaded. Pink carnations were used in the drawing-room, while the tea-room was done in crimson. Mrs. Fox, in a soft brocaded mull over rose silk, with diamond ornaments, was assisted in receiving by the guest of honor. Mrs. Stratton donned a handsome cream gown with collar and trimmings of point lace. The polished table was tastily done with crimson carnations and smilax, and crimson carnations and smilax, and crimson-shaded lights, even the various tempting delicacies were in crimson.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporters on Their Rounds

—No police court Saturday.

—Mr. Glidden's orchestra will play at the Albany rooms tonight.

—Don't forget the cheap excursion to Port Hope today to the hockey match.

—The snow is blocking many of the leading highways in the country.

—We expect the City Fathers will turn over a new leaf and take well to heart the lesson given them by the Rector of St. John's yesterday.

Are You Coming to give the Boys a Hand Out at Port Hope To-Night?

—After being out of the Times for a few months, Gough Bros. have resumed advertising in this great family journal. The consequence was that traffic was almost stopped on the street in front of the big store Saturday morning.

—The Minden Echo says;—Over 30 young men from this locality who have been lumbering in the woods north of Minden, came home on Sunday last, having been two days getting down from Dorset, the roads were so heavy. We understand most of the lumber men have been compelled to stop cutting logs in the woods owing to the depth of snow and the way in which the small trees are bent down and tangled with the weight of snow on them that it is very difficult to get through the woods.

EVERYBODY READS THE TIMES.

BREACH OF GAME ACT

Two Men Heavily Fined for Selling Venison and Other Skins

Two cases of breach of the Game Act came up for trial before County Police Magistrate Edmison. Both the charges were laid by Mr. H. K. Smith, of Belleville, and Game Warden for all this district. Both defendants hail from the far north townships of this county.

Nelson Windover was charged with having in his possession some venison. He admitted the charge, stating that he had sold portions of two animals. For this offence he was fined $30 and costs, in all amounting to $33.10.

The second case was against Stephen Nicholls, the charge being that of having in his possession and unlawfully disposing of two otter skins. He admitted the charge, and was fined $30 and costs, amounting in all to $33.10.

OBITUARY

Death of Mrs. Joseph Thorne on Saturday Night

There passed away on Saturday night, at the residence of her son-in-law, W. H. Wilson, 27 Cedar street, Mrs. Joseph Thorne, after a lingering illness of about two years. Deceased was born in the Township of Cavan, County of Durham, sixty nine years ago. Her husband predeceased her by sixteen years. She leaves to mourn her loss a family of six daughters and three sons, as follows:—Mrs. Jos. Hazlip, of Cavan; Mrs. John Nesbitt, of N. W. T.; Mrs. M. Garner, of Township of Hope; Mrs. W. J. Hammill, of Lindsay; Mrs. W. H. Wilson, of town; George and Thomas, of Cavan, and John, of Lindsay. The late Mrs. Jos. Armstrong was also a daughter.

The funeral will take place today from her late place of residence, 27 Cedar street, to the Grand Trunk station, from which place the body will be conveyed on 11.40 a.m. train to Millbrook, and interred in the Front church cemetery, Cavan.

Local Sporting News.

The Hockey Club will run an excursion to Port Hope tonight. The train will leave the G.T.R. station about 6.30 and return soon after the game. A large crowd should accompany the boys and give them every encouragement, as the Port Hope team are determined to give them a hard go.

The following players will represent the team:—

Goal—Mercer.
Point—Howell.
Cover point—Cavanah.
Rover—H. Armstrong.
Centre—Whitcroft.
Right wing—R. Armstrong.
Left wing—Graham.

The local juniors will play Port Hope juniors here tonight.

Belleville plays in Picton tonight.

The Test of Respectability.

The New York "Evening Post" points out the fact that Carlyle's favorite definition of respectability, a "gigman," seems obsolete in the light of modern developments. In place of the old standard "he keeps a gig," we have substituted "he has a steam yacht." Most amusingly was this latter-day measure of wealth brought out in the letters from Paris of the promoter in search of an underwriter. Question arose as to the financial responsibility of one ready subscriber (apparently without ready cash), and the astute American applied himself to the task of rating the fellow. But how did he go to work? Did he go to the banks, the agencies, the Bourse? No, he simply observed the man's manner of life. When he discovered that the backward underwriter kept a yacht, his doubts were instantly relieved, and he cabled the joyful news to New York. Evidently, we say, in the lexicons of today we must look to see the entry: "Gigman; modern, yachtsman."

Privileged.

The Honorable Colonel William J. Bryan appears to believe that the constitutional provision regarding free speech was inserted for his especial benefit.

Fired.

"I understand Blankley was ejected from Jones's house, where he went to pay a visit."

"Yes, he was an old flame of Mrs. Jones, and Jones put him out."

Leon Hayard, better known as "Napoleon Hayard, Emperor of Hawkers," is dead, and all the Paris "camelots" are in mourning, for their sovereign was a charitable man and never turned a deaf ear to an appeal for help. On August 18 last he was knocked down by an automobile, and he died the other day from the results of the injuries he then received. It was Hayard who supplied all Paris "camelots" with their wares; he was both an inventor and an editor. Lampoons and cartoons, songs and satires on the topic of the moment were his specialty—the "last will and testament" of dead celebrities, songs on Boulanger, Kruger, King Edward and the Humberts. Everything gave him a text, and his knowledge of the fads of the public was unerring. Besides he supplied "applause" and "cheers" at public meetings. On one occasion a debate had been organized, and both candidates came to Hayard for the support of his "camelots." Hayard booked both orders, and paid his men twice the usual fee. When the meeting took place they cheered the ministerial candidate for the first hour and his opponent for the second!

First Citizen—We shall have to have those resolutions of thanks about the new library of ours done all over again. Second Citizen—What's the matter? First Citizen—Why, by a clerical error the name of the Lord was placed before that of Andrew Carnegie.

Mr. Jones—That young Snodgrass seems like one of the family. His Only Daughter—How so, papa? "Why, he looks scared when your mother's anywhere near."—Exchange.

Explained.

Hostess—Of course the dinner is given for Miss Purdy, but I can't let you take her in because you never will take the trouble to be agreeable except for a pretty woman.

Reggy Westend—Whom do I take in, then?

Hostess—Mrs. Farris.

Reggy Westend—But she's uglier than Miss Purdy.

Hostess—I know that, but she's married and used to being neglected.

If Japan and Russia delay much longer the war will be fought before they have had a chance to get their ultimatums exchanged.

Luckily for Russia and Japan, the weather is cold, and the ultimatums will keep without spoiling.

BARGAIN BABIES.

If babies were for sale the most inveterate bargain-hunting woman in the world would not look for a bargain baby. She would want the best baby that could be bought, regardless of price.

Every woman naturally craves a healthy, handsome child, and her craving can be gratified if she will but remember that the child's health is her own gift, and to give health she must have it to give.

Mothers whose babies have been weak and puny have nursed in strength their first strong child after using Dr. Pierce's Favorite Prescription. It is the best preparative for maternity, encouraging the appetite, quieting the nerves and inducing refreshing sleep. It gives the mother strength to give her child, and makes the baby's advent practically painless.

"My wife had been sick nearly all her life," says Mr. E. E. Fricke, of Petersburg, Menard Co., Illinois, Box 367, "and after trying everything I could think of I made up my mind to try 'Favorite Prescription.' I got six bottles, which my wife took, a tablespoonful three times a day, until the baby came. She felt better after taking the first bottle, and when baby was born he weighed nine and a half pounds. To-day he is six months old and weighs twenty-two pounds. He is as good a child as any one could wish. The doctor says he is as healthy as any baby could be, and also says the use of your 'Favorite Prescription' was the cause of such a healthy baby."

Dr. Pierce's Pleasant Pellets are the best and safest laxative for the use of delicate women.

TO THE AFFLICTED

The following testimonial may be read with interest to sufferers from skin eruptions or eczema:

January 28th, 1903

Dear Sirs,—I notice your advt. in a paper about your wonderful eczema cure and I feel it my duty to tell you, that I was induced to try it as I had been afflicted with skin trouble in my hands for 14 years. I have tried several doctors and they done me no good. I only used one box of Dr. Clarke's Sure Cure for Eczema. It has made a complete cure. I recommend it to all suffering from skin disease. My hand was so bad that the nails used to come off. You can use my name if you wish.

Yours truly,
MR. JOHN WOOD,
Peakes Station, P.E.I.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or boxes for $1.00.

Peter D. McFayden, Riverdale, P. E. I writes: "I am very busy, but just drop a line to say I highly recommend your catarrh cure. It has done grand work for me. I am so much better."

Dr. Clarke's Sure Cure for Catarrh is also one of the best remedies on the market. We are daily in receipt of letters telling how much they have done for the afflicted. Miss Sarah Hill 412, Front Street, Traverse City, Mich., writes "I have been wonderfully helped by the use of your catarrh cure; send me another dollar's worth."

Dr. Clarke's Sure Cure for Catarrh and Clarke's Sure Cure for Eczema, same pr $100 will be paid for any case that it w not permanently cure.

OVER 100,000 HOMELESS NO MEANS OF SUPPORT

For the Winter--Flour in Small Quantities Given to the Destitute People

Boston, January 19.—The latest reports to the American Board from the relief centers in Macedonia show that there are now 100,000 persons who are homeless and without means of support for the winter. Between 52,000 and 53,000 are in Monastir district. The Turkish Government is affording some relief, and funds are coming from America and England. Flour in small quantities is given to the destitute. Another political outbreak in the spring is feared.

JUSTICE IN SOME OF CLAIMS MADE BY RUSSIA

The British Point of View in Some of the Details of the Eastern Trouble

London, January 19.—"If the Czar were only such an autocrat as the newspapers generally depict him," is the sigh of many a governing Briton this morning. Things being as they are, however, more importance is attached to China's new treaties of commerce with America and Japan. It is safe to assume that the British Foreign Office is co-operating with the State Department in this dramatic development with which the week closes. The new treaties exactly represent the British desire for an open trade door to all nations in Manchuria, as against Russia's claim to treat Manchuria as her own absolute port. Russian pride might resent "open door" concessions on the peremptory demand of Japan alone, but Englishmen at least fail to see how Russia can legitimately feel offended when the powers generally take security for rights which Russia repeatedly, if somewhat vaguely, has declared her willingness to respect.

Russia's expected reply that she cannot fulfil her promises until she has reduced Manchuria to order, are met by an assertion that there is no Manchurian disorder apart from Russian action. Thus, despite some ominous signs there are hopes that this development may assist the Czar and the Russian peace party and put the question of "Open Door" in China generally, including Manchuria, outside the particular quarrel between Russia and Japan.

Obviously, however, these hopes depend upon that always uncertain factor, China herself. Is she capable of enough backbone and straight dealing to give affect to these treaties?

The Corean question is infinitely more difficult to thinking Englishmen, because they see clearly a certain justice in Russia's claim, that, having made enormous sacrifices to carry a railway and her civilization to ice free water with the compliance of Great Britain, she cannot be expected to allow Japan to neutralize the value of Port Arthur by a Japanese occupation of Corea, and as one writer puts it;—"interpose a Japanese Dardanelles between the cold water and the warm water port." It is the recognition of this Russian point of view that leads responsible English Liberals to deplore the emphatic and sometimes violent anti-Russian attitude of certain ministerial circles here.

Some Liberals suggest that it is not too late even now to establish a joint guarantee by the powers of the neutrality of Corea with a recognition of Japanese and Russian commercial spheres of influence.

The Chamberlain Tariff Commission this week started on its career with a flourish of trumpets greater than attend royal commissions. Some indication of the public interest it revealed in the fact that one hundred pressmen attended the opening proceedings in the flower-bedecked hall. Mr. Chamberlain himself was eager to make it clear that the commissioners, who number nearly sixty, fairly represent every important British trade with the colonies. The spokesmen, moreover, were chosen without the slightest regard to their political views or party fealty. The sole purpose is to receive and weigh evidence and impartially prepare a moderate, scientific tariff, which shall firstly defend British industries from unfair competition. That is presumably, "dumping" from America and elsewhere; secondly, provide the British Ministry with material for the negotiation of commercial treaties with foreign countries, and, thirdly, encourage trade with the Empire.

Of course, Mr. Chamberlain's enemies declare that the commission is a caucus affair, a mere device for furthering protection principles.

Mr. Chamberlain has a League that fights every by-election with tremendous zeal and sometimes, as at Norwich last week, suffers heavy defeat, but his plan clearly is to leave Mr. Balfour in office to work out army and navy reforms and befriend the beer interest with compensation legislation while he and his Commission quietly elaborate a tariff for submission to the country one, or, perhaps, two years hence.

TROUBLE IN SERVIA

A Cabinet Crisis is Greatly Feared in Servia

Vienna, January 19.—Trustworthy diplomats here say that the situation in Servia is threatening and that a dynastic and cabinet crisis is feared. The War and Foreign Ministers are about to resign and the finance portfolio is now vacant. It is probable that the new premier will be Nikola Pasics, a radical leader and regicide sympathizer. The various ministers of foreign countries, now on leave of absence, are not likely to return, even if the regicides should be dismissed. Austria and Russia are discussing what action they ought to take should intervention be necessary.

LITTLE LAKE CEMETERY CO.

ANNUAL MEETING AND ELECTION OF OFFICERS

Reports Presented the Affairs of the Company in Good Shape

At the annual meeting yesterday afternoon of the Directors and Shareholders of the Little Lake Cemtery Company the reports of the Directors, the Superintendent and the statement of receipts and expenditures were presented. Following is the

DIRECTORS' REPORT:

To the Shareholders of the Little Lake Cemetery:

The Directors present the following report for the year 1903;—

Three years ago a purchase was made by the company of about a half acre of ground on Crescent street, adjoining the cemetery, with the purpose, amongst others, at a future time, of erecting thereon a dwelling house for the use of their superintendent, and an office in which to transact the company's business. Last spring your directors, after an examination of the old dwelling house and office in the cemetery, decided that the former had become unfit for habitation, and that it was necessary to provide other premises, with an office more suitable for the management of the company's affairs.

Your directors, therefore, concluded to erect a new dwelling and office on the lot purchased outside and near the cemetery gate. A contract, therefore, was made during the past summer, and this has been carried out in all respects in a thoroughly substantial manner. The company has an excellent office, with a fire-proof vault in it, in which to preserve its books and records, and a superintendent's residence, comfortable and convenient in every respect, and one which will relieve from further expense in this respect for a long period of time.

Your directors have also during the past season put down another concrete sidewalk, four feet wide, with a water-table of the same material, extending from the gate to Lake avenue, about three hundred and twenty-five feet parallel to the one placed north of it two years ago, as the former was not sufficient, on many occasions, for the convenience of many visiting the cemetery. In your director's opinion, this, with the widening and grading of the driveway, has greatly improved the approach to the cemetery.

The expenditure for these improvements has not been, and could not be expected to be, met by the income for the past year, and it will probably require the surplus income for two more years to wholly discharge the liability.

The company, however, has not, by reason of these undertakings, neglected the general care and improvement of its grounds and have continued to apply their best efforts to enhancing the natural beauty of the cemetery.

A detailed statement of receipts and expenditures is shown in the Secretary's Auditors' and Superintendent's reports which will be submitted for your consideration.

All of which is respectfully submitted.

W. H. MOORE,
President.

SUPERINTENDENT'S REPORT

To the President, Directors and Shareholders of the Little Lake Cemetery Company:

Gentlemen,—I beg to submit the following report of improvements made in your Cemetery during the year 1903.

The cedar hedge on the south side of entrance driveway was taken up and carried back six feet making room for a concrete walk, four feet wide, with watertable of same material, 18 inches wide, running from the gates to the top of the hill, at a cost of $261.00. The roadway for the same distance was graveled and graded, much improving the appearance of the approach to the Cemetery.

The section known as the single grave section has been graded, the graves levelled and the slabs and headstones put level with the adjoining soil. This was a much needed improvement and could only be dealt with in this way. It was a block wholly neglected by the relatives of those buried there, and presented a very bad appearance indeed with neglected graves and broken headstones. It is now one of the best plots in the Cemetery.

The block known as free graves has been plowed and a crop put on to rot the sod so that with a very small amount of labor in the spring it can be put in good condition and seeded down. A quantity of top soil has been placed on ranges 17, 18, 19, 20 and 21 of Section B and levelled giving it a much improved appearance.

Owing to the dangerous condition of the windmill tower, it was taken down and such parts as could be used for other purposes stowed away.

A concrete walk 4 feet wide, leading from the front door of the new dwelling to the street has been laid and the grounds graded. A few more inexpensive improvements can be made in the spring, which will add very much to its appearance.

In September I visited the city of Rochester to attend the Convention of the Association of American Cemetery Superintendents. I very much appreciated the kindness of the Board in giving me time to attend it. The knowledge I gained from association with the superintendents of many of the largest Cemeteries in the United States and Canada will, I am sure, repay the time spent.

A report of our meetings in book form has been forwarded to me, copies of which I have placed in the hands of your President and Secretary, the perusal of which, I am sure, you will find very instructive.

I append my financial statement.

Respectfully submitted,
FRANK WISE,
Superintendent

SUPERINTENDENT'S STATEMENT

Receipts

For the year ending Dec. 31st, 1903.

Sale of Lots	$1553 25
Sale of Graves	106 00
Digging Graves	630 75
Vault fees	10 50
Sodding Graves	45 25
Watering flowers and extra care of Lots	594 06
Removing bodies	24 00
Building foundations	68 63
Trust funds for perpetual care of Lots	300 00
Miscellaneous work and other sources	224 47
Old stove sold	3 25
	$3440 15

Uncollected or Still Due.

Sale of Lots	$ 196 50
Sale of Lots	7 50
Digging Graves, etc	478 06
Building foundations	164 96
	$836 00

Expenditure for Labor at Cemetery.

Superintendent's salary	$ 600 00
Workmens wages	1586 31
Team and horse hire	88 50
	$2274 81
Balance of income over labor expenditure	1162 00

All of which is respectfully submitted.

FRANK WISE
Superintendent

FINANCIAL STATEMENT.

Statement of Receipts and Expenditures for the year 1903, which was duly certified to by the Auditors—

Receipts.

	1903	1902
Sale of lots and graves	$1669 25	$1508 64
General receipts	1680 90	1827 50
Trust payments	300 00	
Debenture interest	421 70	411 03
Balance on hand, (1st Jan., 1903)	913 84	407 12
Due bank (1st. Jan. 1904)	2235 65	
Interest from Bank		11 60
	$7021 34	$4666 80

Expenditure

	1903	1902

Auditors salary	20 00	20 00
Wages	1686 31	1384 96
Horse and team work	88 50	73 46
Repairs, supplies, etc.	466 [illegible]	414 02
Flowers, trees and seed	67 95	21 60
Printing, stationery and postage	100 00	60 61
Water	37 50	63 50
Insurance	17 50	30 00
Telephone	25 00	15 00
Interest on overdraft	62 36	1 40
Office and residence	3447 00	
Lots repurchased	66 00	
Miscellaneous	16 10	31 50
Debentures		517 31
Balance in Bank		913 84
	$7021 34	$4666 80

NO. OF INTERMENTS.

During the year there were 165 interments in the cemetery the religious denominations were represented as follows:—

Church of England	55
Methodist	53
Presbyterian	40
Baptist	8
Other denominations	9

OFFICERS ELECTED.

The following officers were re-elected for the ensuing year:

President—W. H. Moore.

Secretary-Treasurer—E. A. Peck.

Directors—James Stevenson, C. Stapleton, R. M. Dennistoun, E. H. D. Hall, Dr. Geo. Burnham, B. Shortly, T. A. S. Hay and J. J. Lundy.

Advisory Board—W. H. Moore, James Stevenson, C. Stapleton, B. Shortly and T. A. S. Hay.

DEAD IN A CLOTHES CLOSET

Ogdensburg, January 19— The body of Fred Fawcett, who has been missing since January 2, was found in a closet in his rooms in the Judson Bank building here yesterday. Coroner Brown was notified, and after viewing the body said it appears as though death resulted from natural causes. An inquest will be held later. Fawcett was 50 years of age, and a pressman by occupation.

THEY WERE WISE

Rome, January 19 - Prince Takingyuki, telegraphing from on board the Japanese warship Nissin, says that when the Nissin and Kasaga were being escorted through the Mediterranean by nine British warships they were approached by two Russian torpedo boats, and that when the latter saw the powerful escort they left in haste for the harbor of Syracuse.

It is asserted that Great Britain is concentrating fifty-two warships in the Mediterranean.

IRISH SESSION IN THE BRITISH HOUSE

Two Measures are Promised Dealing with Land Question

A CATHOLIC UNIVERSITY

Is Also Among the Probabilities--An Agreement Has Been Reached

Dublin, January 19.— Current political developments in England, especially the probable coalition of the Duke of Devonshire's followers with the reunited Liberals, establish the fact that the coming session of the House of Commons will be largely occupied with Irish measures. The Government does not want to make the fiscal question an issue in Parliament. Irish legislation will secure its own retention in office and the Irish vote will help to shelve the other questions on which Conservatives are divided.

TWO MEASURES PROMISED.

Two Irish measures are specifically promised—a bill to amend the Land Act so as to carry out its original main aim of mitigating poverty in the congested districts of the west, and a bill requiring local authorities to build cottages for agricultural laborers and give them small allotments of land. A third measure establishing equality in Irish University education and creating a new college in Dublin University as well equipped as Trinity college, is privately promised. No "de jure" right or authority in the new college will be granted to the bishops. Two of them will be nominated on the governing body at the start along with other governors, who will be laymen. After a certain number of years the control of the college will rest with its own graduates. The endowment will be large and handsome buildings its own graduates. Large and handsome buildings will be erected and a liberal sum allowed for maintenance.

AGREEMENT ON EDUCATION.

On good authority a press correspondent learns that the Catholic hierarchy by an unanimous resolution, has approved the Government plan, subject to arrangement of details that will settle the question finally in a manner entirely satisfactory to the Catholics. The Government has not openly announced its intention of passing such a bill, but has given such ample private promise that should it fail to execute them, the Irish party would do everything in its power to eject it from office. As for Home Rule, the Nationalists continue to rank it above all else and while striving to obtain the reforms mentioned above, will leave no stone unturned to achieve Irish autonomy.

MR. S. KIMPEL

Suffered Terribly from Dyspepsia. Was Almost Forced to Give Up Work.

Mr. S. Kimpel, Listowel, Ont., says —"Your Paine's Celery Compound is a most wonderful medicine, and I wish all dyspeptic sufferers to know the good it has done for me. I suffered so badly for one year from the worst form of dyspepsia, that I almost had to give up work. I doctored and used many kinds of medicine, but found no relief or cure until I got hold of Paine's Celery Compound. Your medicine possesses such curing powers, that in my case, two bottles set me all right, so that can work as well as ever, sleep well, and enjoy my food. I feel deeply grateful for such a medicine, and at every chance I recommend it to others. No doctor can cure as quick as your Paine's Celery Compound."

PAINE'S Celery Compound Cured Him.

Medical advice free to all who desire it. Address "Consulting Physician," the Wells & Richardson Co., Limited, 200 Mountain St., Montreal, P.Q.

EVERYBODY READS THE TIMES

A BIG STRIKE

One Hundred Weavers Go on Strike at Sherbrooke

Sherbrooke, Que., January 19.— Nearly one hundred weavers in the Paton mill have gone out on strike owing to a disagreement with the boss weaver. The weavers say they will not return to work so long as he is employed, and the company are equally emphatic in saying that he will remain. Should a settlement not be reached, the whole factory will be closed today until such time as weavers have been secured to take the places of the strikers.

WOLVES ATE FIVE CHILDREN

They Also Injured Seven More Before They Were Killed

Madrid, January 18.—Word reached here this morning of a harrowing incident in the town of Toregano, Province of Segovia, yesterday.

Four wolves driven from the hills by hunger entered a school in the village and devoured five children and injured seven others. Villagers finally killed the wolves.

BOER COLONY IN U. S.

Arrangements About Complete for Its Establishment

St. Paul, Minn., January 19 — Arrangements are almost completed for establishing a Boer colony in Montana. It is expected that the immigration of the Boers will commence early in the spring. The arrangements are in charge of General Joubert and Captain W. S. O'Donnell. The idea of establishing a colony in Mexico was given up some weeks ago on account of the prevalence of yellow fever in that section. President James J. Hill of the Great Northern is largely responsible for the selection on Montana.

HUMAN HAND FOUND

Thought to Have Been Cut Off by Ghouls, After Rings

Chicago, January 19— A human hand and some money and jewelry have been found in the debris of the Iroquois theater. The hand was that of a man and apparently had been severed from the wrist in an attempt to get possession of rings. As nobody was found from which a hand had been taken, the supposition is that the body may have been consumed by the fire.

The police found $30 in bills encased in a chamois skin bag, and also a five-carat opal among the fragments of broken glass and charred wood.

A NEW PACIFIC SERVICE

A New Steamer Service Promised by the C. P. R.

Victoria B.C., January 19— As a result of negotiations between the Board of Trade and the officials of the C. P. R. arising out of the disaster to the steamer Clallam, an important decision was reached with reference to the Victoria Sound steamship service, which decision will also involve Vancouver during the summer months. The Princess Beatrice, a splendid staunch wave, built here by the C. P. R., during the summer, goes on the Sound route, but with the coming of summer Capt. Troup promises a triangular service between Victoria, Vancouver and Seattle.

WILL NOT APPLY FOR INCORPORATION AS CITY

SO DECIDED THE COMMITTEE OF THE WHOLE COUNCIL LAST NIGHT

Exemption for the Dickson Co. or the Canadian Ultimator Co., and no Fixed Assessment for the Colonial Weaving Co.—All Three By-laws Voted Down.

The Town Council met in Committee of the Whole last night to further consider the draft of the Town's Application for Legislation, as advertised. The clauses not dealt with at last Thursday's meeting were disposed of.

The first clause taken up was that of the proposal to apply for incorporation as a city.

Ald. Best said it would be better for Peterborough to develop into a city naturally. As soon as our population grows sufficiently large Peterborough can be declared a city by proclamation.

Ald Clinkscale agreed with Ald. Best. If any one could show him the benefits to be derived from being incorporated as a city he would not object to the proposition. He thought it better to be a good live town than a poor city.

Ald. Best moved, seconded by Ald. Clinkscale,—That no action be taken in this question.—Carried.

A BLOW TO EXEMPTION.

Clause 13, to ratify and confirm the bylaws passed by the Ashburnham Council, exempting the property of the Dickson Co. and the Ultimator Co.; and clause 5, to ratify and confirm a bylaw fixing the assessment of the Colonial Weaving Company at $4,000 for ten years, next came up for discussion.

The question of whether these three bylaws should be treated in a lump, or each independent of the other, was here raised.

Ald. Best took strong exception to the Dickson Co.'s bylaw. It was, he said, contrary to public opinion in Ashburnham. The voice of a majority of the villagers could be secured against the measure even today. Besides, if we exempt this company, Mr. A. McDonald would have a perfect right to demand the same treatment. His property is assessed for $10,000.

Ald. Rush could not see it in that light. In 1902 the Dickson Co. were about to remove from Peterborough to Lakefield, and only consented to locate in Ashburnham on a distinct understanding that their property should be exempted, excepting school tax, should such a measure be ratified by the legislature.

Ald Best claimed that the Ashburnham Council had passed that bylaw under a great deal of pressure at the eleventh hour, after the vote had been taken in favor of union. According to Reeve Adam's own admission, the Dickson Co. had been promised exemption in 1902, then why was the consummation of the agreement delayed to just prior to the amalgamation of the two corporations? Besides, it was an improper measure.

Ald. Adams—"The company had not site upon which to build in 1902, and, as I explained last meeting, I did not know till October of 1903 that the legislature had extended the authority of municipalities to grant exemption till September, 1904; this power, according to the assessment act, expired in September 1903, and our Council could not act until certain of what action the legislature would take in the matter. The bylaw was passed by a two-third vote of the Council.

Ald McWilliam supported Ald. Best. Should we give this exemption to the Dickson Co., practically an established industry in Peterborough, we shall be establishing a precedent contrary to the agreed policy of the Council; and will have to treat all similar comers the same way. Last year's Council took the ground to encourage new industries, but not those already established here, and I do not think any company can ask for exemption with less justice in their demand than the Dickson Co.

Ald Johnston remarked that Mr. Snook had assured he and Ald. Mason that should the town adopt a similar policy with all the bylaws, he could not complain.

Ald. McWilliams—"But the two others are not the same as the Dickson Co.; they are new industries, while the Dickson Co is an old one.

Mayor Roger could not see why the fact of the Dickson Co. being an old industry should bar them from exemption the town renewed the assessment privileges of the Lock Works and the Stanley Piano Co. But this is a question of keeping faith with Ashburnham, and I can't see how you are going to put the action of the Ashburnham and Peterborough Councils in 1903 on a different basis. The consummation of union was not established until January 1st 1904, and at the time amalgamation was agreed upon by the two Councils, they both pledged themselves to carry on their own business until the end of the year in the usual way.

Ald. McWilliams—"Should you carry out the terms of Ashburnham's Ultimator bylaw and the Town's agreement with the Weaving Co. it cannot be said we have broken faith with Ashburnham in rejecting the Dickson Co.'s bylaw."

Ald. Adams—"If you turn down the Ashburnham bylaws and not the other, you are breaking faith with Ashburnham in a manner never contemplated. Treat all three on the same basis.

At this juncture, Ald. Adams moved, seconded by Ald. Rush,—That all three bylaws be voted on together.—Carried.

Ald Adams then moved that legislation be applied for on all three bylaws. This was voted down, which means, certainly, that some of the Aldermen did not anticipate that no application will be made for legislation ratifying the previously approved of fixed assessment to the Colonial Weaving Co., and exemption to the Dickson and Ultimator Companies. In fact, one Alderman remarked on the side, "I'm not satisfied to throw down the Colonial Weaving Co."

TOWN TRUSTS POWERS.

It was decided to ask for legislation curtailing somewhat the powers of the Town Trust, so that they cannot lease for over five years or sell any of the Town property without the consent of the Council. That portion of the clause providing for alterations in the number, term of office and manner of appointment, is left in the hands of the Legal committee.

Ald. McWilliams idea is to reduce the number of the Commissioners to three, one retiring each year, and the appointments to be made by the Council.

The present Town Trust Commission consists of five members, who hold their office until death necessitates new appointments by the Council. The first Board of Town Trust was appointed under a special act of legislation in 1861, of which Mr. Jas Stevenson is the only surviving member.

The Committee of the Whole will recommend their action, as recorded above, to the Council in session. In the meantime Town Solicitor E. H. D. Hall will prepare and forward his bill to the legislature, as outlined by the committee, so as to have the application before the House in time to secure legislation this session. This will not prevent, however, amendments being made, should the

NO COMPROMISE EXPECTED ON AT LEAST TWO POINTS

If Russia Attempts to Greatly Increase Her Naval Force War will Break Out

London, January 19.—In what it claims as an authorative statement, The Daily Graphic this morning announces that the negotiations relative to the Far East have arrived at a stage leaving two points upon which neither Russia nor Japan is inclined to yield, and as to which no means of a compromise has yet been found. While both of these points concern Manchuria, their adjustment would not in the slightest modify the legal status quo or change the administrative situation in Manchuria, but Japan insists "that they are embodied in a treaty between Japan and Russia, while Russia, as a matter of amour propre refuses to accept such dictation at the hands of Japan. Much, however, is hoped from the Czar's influence."

ONLY A FEW HOURS.

The statement adds; "Of course, any attempt of Russia to increase very largely her naval forces in the Far East by moving her Black Sea or Baltic fleets would make war a question of only a few hours."

At the Japanese legation last night, it was said that no fresh news had been received and the situation remained unchanged.

POWER OF LABOR IN PARLIAMENT

A Labor Leader in London Discusses Affairs In Canada

London, January 18.—"Those knowing how labor representation works in Australia and Canada," said a prominent labor leader here, "recognize that at the forthcoming election, whenever it takes place, upon whatsoever issue, a labor candidate will have a direct influence on the balance of power, and did they work together under an acknowledged leader they would be still a more potent influence in Parliamentary life."

Asked how labor M.P.'s managed to meet expenses incidental to Parliamentary work, he replied; "The most common source of private revenue is derived from salaried officers connected with trade unions. Only four labor members do not draw salaries from that source.

ENGLISH FARMERS ARE NOT SATISFIED

Two Shilling Duty on Foreign Corn will Not Do They Say

London, January 18.—J. W. Lowther, M.P., speaking at Carlisle, said the farmers of Norfolk and Suffolk, where most of the corn in England is grown, scouted the idea of laying down a single acre more because of a duty of two shillings on foreign corn. They had said nothing under seven shillings and sixpence or ten shillings would satisfy them. They were to substitute colonial meat and corn for the foreign. They would have to compete with colonial corn instead, with Australian beef, with New Zealand mutton, with Canadian beef and mutton, instead of as now with Argentine and American. "Suppose they did shut out foreign corn and meat, how were the agriculturists of England to benefit?

Local Sporting News.

The local juniors wil play Port Hope juniors tonight. A close and exciting game is expected.

The Seniors, accompanied by about 40 supporters journeyed to Port Hope last night by special train, and defeated the hockey team of that place by a score of 10—1.

Belleville defeated Picton last night at the latter place by a score of 4—3. The half time score was 2—2.

CHINA AND RUSSIA

Wu's Appointment is Regarded as Anti Russian

Pekin, January 19— Wu Ting Fang's appointment as vice-president of the Foreign Office, is accepted as a sign that the Chinese rulers are disposed to face the future in a spirit of progress. Wu's influence is expected to militate against all Russia's designs in China and to foster the principle of opening the gates of trade to the civilized world. An illustration of China's awakening is contained in the refusal of Cheng Ta Jen to allow Americans to sell the shares of the Hankow-Canton Railway. This means that China is beginning to realize the political value of the presence in the country of interests belonging to citizens of those non-aggressive nations which are yet strong enough to resist the encroachments of powers less scrupulous.

by practically all the leading Teachers of Cookery, who *must* produce the finest cookery, means something.

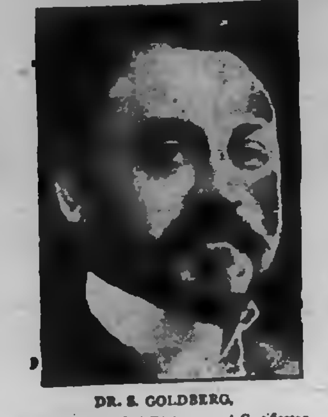
CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has



DR. S. GOLDBERG,
The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says. Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realises that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room [illegible], Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

TIMES PRINTING COMPANY.

Publishers and Proprietors. Peterborough, Ont.

PETERBOROUGH, JANUARY 19, 1904

U. S. TRADE WITH CANADA

The Detroit Free Press thus tells of what the border states of the union are doing for Canada:—

"From a local, state and national point of view, one of the most interesting features of the statement just given out by the Detroit Board of Commerce covers the export trade of this customs district. The aggregate of its foreign sales has trebled in the last decade, the grand total of domestic merchandise shipped during 1903 being $22,603,761. The most significant and important fact shown in the itemization of these figures is that the total value of the exports from the Detroit district to the Dominion of Canada is over twothirds of the above-mentioned aggregate. To these immediate neighbors we sold more than twice as much as to the rest of the British possessions on this continent, England, Scotland, Ireland, British Australasia, British South Africa, Germany, Netherlands, Belgium, Denmark, Japan, China and the Philippine Islands. Something like this ratio obtains in all the lake districts and in all there has been a gratifying advance in export trade.

"Seventy per cent. of what we are selling abroad of our own products goes to Canada, and yet it seems almost an impossibility even in the border states to arouse the aggressive sentiment that should be doing all possible to hold and expand this magnificent trade. The people most interested have not brought sufficient pressure upon their representatives in Congress and have not until late sought to sufficiently enlighten the country as to the desirability of this business which is right at our doors. That this nation needs reciprocity with Canada is no longer open to argument, and it is just as clearly established that the Dominion would be benefited. The whole danger lies in delay and procrastination. The old treaty was abrogated in anger. The new one should herald peace and good will between those whose interests are made inseparable by proximity. It is hazardous to abide the outcome of the fight that Chamberlain is making in England or the result of an election in Canada that cannot long be deferred. Now is the time and opportunity for a reciprocity treaty."

HOW CHICAGO PEOPLE DIE

There is an average of 80 deaths a day in the city of Chicago, of which more than four are deaths by violence. Add to this a murder every third day in the year. Chicago has a population of 2,000,000 people, and when you figure out a death in every fifteen minutes day after day, week after week, month after month, one is seriously reminded that we have no abiding city here. Pneumonia is classed as the great agency of death among acute diseases. Consumption dogs the footsteps of man as an avenging angel of death. In counting four deaths by violence every day in the year, this does not include the number of suicides, of which there were 459 during the year 1903—five deaths a day by violence, or one in every five hours. For the twelve months ending December 1, 1903, the coroner of Chicago and his deputies investigated 6,653 deaths which were classed as irregular. On the average three men commit suicide to one woman. People are more apt to commit suicide between the ages of 30 and 40 years than at any other period of life. In a list of nationalities in the suicides' list of last year there were 157 Americans 98 Germans, 14 Irish, 12 English, 11 Canadians and 2 Scotch. Poisoning was the favorite method of suicides in shuffling off this mortal coil, the majority resorting to carbolic acid, which produces the most painful death. Very foolish young women, who become despondent because of disappointment in love, usually select the carbolic acid route, torturing themselves to death. Alcoholism sent [illegible] out of the world, while only two died of starvation. There is a large colored population in Chicago, yet it only furnished eight suicides last year.

JAPAN AWAITS THE DAY

Some years have passed since the Mikado of Japan returned to his people from his victorious campaign against the Chinese. Never, in the history of the world, has a conqueror passed through his own dominions with a heart as heavy as that which beat in the breast of Japan's ruler. His people had gathered to honor him; but they were sharers in his grief; and as he went on his way to the palace, every head was bowed, as a sign that the nation felt its humiliation. TThe cause for this remarkable demonstration was in Russia's insistence that Japan should not retain the fruits of victory. At the time the Czar notified the Mikado he must withdraw from Korea, and the integrity of the Chinese Empire must be preserved, his army was far superior to that of the Jap. No wonder the people of Japan were humiliated! No wonder they deliberately prepared for the revenge which may soon be wrecked upon the despoiler! The war cloud in the Far East grows darker. A determined nation awaits the day when that cloud shall be riven by the bolts of the war god.

EDITORIAL COMMENT

The Conservative party is said to be looking for young men as candidates in the Dominion elections. A young man can take without wincing the blow that would almost kill father.

With the echoes of the Spanish and Boer wars in our ears, with England slaughtering the forces of the mad mullah with Jacques Lebaudy subjugating an African Empire, with the United States killing of Filipinos in lots of 300, with Colombia assembling an army near the borders of Panama, with Russia and Japan at each other's throat, not to speak of the perpetual war cloud hanging over the Balkans, it is to be hoped that the arbitration conference at Washington will soon get into working order.

Bad Complexion

Has Its Cause in Impure or Impoverished Blood

To have a soft, smooth skin, free from eruptions and unsightly blemishes, the blood must be maintained in a healthy condition.

Face powders, lotions and other toilet preparations may, for a short time cover up a multitude of wrongs in the blood, but they cannot remove these red, disfiguring pimples that are the bane of so many young ladies' lives.

Why not use Ferrozone? It is an unfailing cure for the worst kind of skin disease, the most effective of all blood purifiers, and cures bad complexion by removing its cause.

Ferrozone invigorates and purifies enfeebled blood. Makes it strong rich and red. Ferrozone puts power into the blood to nourish the body and all its organs. It is a regulator of acknowledged merit, and is quite unrivalled as a remedy for Female disorders.

Mrs. Shanly, of Pittsburg, Ont., says: "Fore five years my face was disfigured by raw, bleeding eruptions that resisted all treatment.

"Three Kingston doctors did their best for me and when they acknowledged themselves beaten, I tried Ferrozone. The first box helped me quite a little, and by the time I had used six boxes I was cured. Ferrozone is a fine remedy for womanly disorders of all kinds and I can highly recommend it." (Signed), Mary Shanly.

Growing girls, women, men, in fact everybody can derive untold benefit from Ferrozone. It is a tonic for the blood, brain and nerves and worth its price ten times over to everyone who uses it.

Three weeks' treatment contained in a box of sixty-three chocolate coated tablets, cost 50c., or three boxes for $1.25. Sold by all druggists, and N. C. Polson & Co., Kingston, Ont.

London, Jan. 18—Mr. Joseph Chamberlain presided at the first meeting of the tariff commission, which assembled here this afternoon. Mr. Chamberlain in a speech, drew a parallel from what the United States and Germany had accomplished under protective tariffs, and denied that any tariff could be framed here which, as its opponents alleged, would make the rich richer and the poor poorer. The United States

Ayer's Hair Vigor

A splendid dressing for the hair, keeping it soft and glossy. It prevents splitting at the ends, and cures dandruff. J. C. Ayer Co., Lowell, Mass.

FURS SMUGGLED

Prominent New Yorkers Lose Goods Bought in Canada

New York, Jan. 18.—Several prominent persons in New York have petitioned the authorities in Washington to permit them to pay duty upon a lot of smuggled furs and retain possession of the goods.

Recently the arrest of a man at Tupper Lake in the Adirondacks, who was caught transferring furs from a local express car to a car on the New York Central, bound for this city, put the Government into possession of facts on which a large number of seizures were made here.

A Montreal fur house had been selling furs to New Yorkers to be delivered duties paid. The transactions were all made in Montreal, the furs being bought there by persons traveling. The purchasers were told that the house had a large trade in New York and made its deliveries here and that the prices asked included all delivery charges.

DIAMOND DYES

CONTRIBUTE LARGELY TO WINTER'S PLEASURES.

DIAMOND DYES will restore to new life and usefulness last year's faded skating dresses, skirts, jackets, stockings, caps, tams, knickerbockers, trowsers and coats. Try them and save money.

LABOR'S TROUBLES

The Great Livery Strike Again Opens in Chicago

Chicago, January 16.—whe strike of livery drivers began anew today. After a truce of fifteen days, following the Iroquois Theatre fire, ninety-five per cent. of the sixteen hundred drivers of carriages and hearses are said to be out and once more the back undertakers waggons were put into service in lieu of hearses at funerals, while mourners were obliged to resort again to the street cars in journeying to the cemeteries.

Failure of employers and employes to agree on a wage scale was the cause of the resumption of the strike.

ULTIMATUM TO THE POPE

Rome, Jan. 18—The French Government has presented the Vatican with a note in the nature of an ultimatum, regarding the appointment of bishops to five vacant French sees, substantially saying that either the Pope must approve the selections of the French Government or they will be announced officially without the approbation of the Holy See. In addition, the Papal Nuncio will be asked to leave Paris, and the clergy will be forbidden to collect Peter's pence in the churches, but the Concordat will not be denounced.

The rumor that the Pope has decided to approve the appointments is incorrect. The Vatican hopes to be able to continue the negotiations.

The Latest Machine Milker.

An Improved milking machine is reported to be making some progress in Australia. It is a modification of an English machine, about three hundred of which were in use in Victoria. After some months it was noticed that the cows began to shrink.

One of the dairymen, a practical mechanic, put an inspection glass in the rubber tube leading from the teats to the can, when the mystery was solved. In the English machine the four teat cups unite at the bottom into one tube, which has to carry away all the milk, and through which, at the same time, the vacuum pressure is applied to the teats. The result of this arrangement is that, when there is a full supply of milk coming from the cow, the vacuum cannot work properly. The pulsation is caused by letting a little air into the can every second, and this air rushes against the milk, causing it to surge backwards and forwards in the tube. After a little while the milk, instead of running freely into the can, is actually driven up the teat cups against the cow's teats. The final result of this peculiar action is that the milking operation is impeded, while the surging of the milk up against the teats so incommodes the cow that she holds up the rest of her milk.

The result of this discovery was that within a few weeks all of the English machines were discarded. The dairyman, however, who discovered the cause of the failure, Mr. Alexander Gillies of Terang, believing that it could be overcome, at once set to work to do so. After numberless experiments on his own herd of eighty cows, he set up, some three months ago, a machine which is claimed to be a perfect milking machine, which he has protected by patents all over Australasia and abroad. Recognizing that a pulsating vacuum was the most feasible method of extracting the milk, he was also convinced that having the one tube

PULLING UP STAKES IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.

GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.

If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.

If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1.98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough—necessity knows no law—the stock can't be moved or kept for another season.

Dry Placer Miner, formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 200 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-3c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of this stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

'Henry Fielding's Dream'

By CORTLAND MYERS.

She kneeled at his side again, and made her accustomed plea and prayer, which seemed to enrage him and make him almost a demon.

He leaped from the bed upon which his drunken form had rolled, and struck her. She fell to the floor in unconsciousness.

Instantly what he had done almost sobered him. He kneeled down and tried to lift her up, but she was the same as dead.

He thought that she was dead. His efforts to revive her were of no avail. The passing moments of fright almost drove the effect of the alcohol away.

The horror of an hour had passed by, and no change.

"Oh, my God," he cried, "I am a murderer."

Before the morning his decision had been made, and he had fled.

Her brother by chance came to the farm-house in the morning, and made the awful discovery. The blood was upon her forehead, and just a faint sign of life remained.

Imagination revealed the dark secret.

Henry and Elsie thought most everything, but little had they thought of this.

The Vermont hills, through which they passed late in the afternoon, were never so beautiful as then in their autumnal glory.

It seemed as if a great avalanche of color had swept down the mountain sides, or like the resting place of countless rainbows.

The trees were all ablaze with color, and the valleys marked with richest farms and gardens.

The golden sunset added to the wonder of nature, and the reflection of heaven upon earth, and yet these two travelers were blind to it all.

We see through our hearts more than our eyes.

Every man has his own world, and he carries it with him.

To the joyful heart, snowflakes are jewels and grass blades are diamond sceptres, but to the sad they are both only common carpet, to be trodden upon and even then to hurt the feet.

Their uncle was waiting for them at the depot.

He had the hardest task of his life in hand. He was a farmer, but sensitive in nature.

He was just the man to break the news.

He did not rush right into the dark facts, but by a gradual approach and winding pathway, he revealed the true condition.

Their anxiety tried to hasten him, but he knew the better way.

When at last it dawned upon them that their mother was dead, Elsie had to give way, and her tender heart almost broke in grief.

Henry's sorrow was just as deep, and too bitter for him to weep or speak.

Everything was stamped with sacred memories about that whole section of country, and each tree and stone of the old farm was written all over with unseen letters, but now the last remnant of attraction and interest, and even love for it all, had vanished.

Henry Fielding said afterward that he almost hated the sight of these familiar and once loved things.

The center from which radiated all the charm was gone.

There is not so much in external circumstances as we estimate. They receive their value from something else.

One of the first thoughts which flashed into Henry's mind was as usual: "Now, I must play the part of a man and a brother. This is harder for Elsie than me. She is tender and weak, and cannot bear what I can. I must get my arm around her;" and he did, both figuratively and literally.

She sobbed out the bitterest tears of her life on his shoulder.

Oh, what a kingship is that! The first thought of others.

In the Providence of God, and in the laws of the world, that is the most triumphant method of bearing sorrow and enduring suffering.

Thought of others is Heaven a remedy for self.

He went alone to wipe away his great tears, and stayed with Elsie to comfort.

They were more to each other than ever now.

Another dream of Henry's life had been blasted. His ambition for his mother, and his care of her had never come to realization, and in this awful tragedy she had left them, but there had entered into his life a new force recently, and he did not become embittered, but even told Elsie several times, "It must be for the best. Anyway, mother had better in heaven than he could ever have hoped to give her on earth, and he did not have prospects for anything for her just at present. She has a mansion now, and no mortgage on it, either."

These were days which seemed months. So many changes, so much sorrow, and events beyond realisation.

As they entered the train to return, Henry said:

"Elsie, I never want to come back again."

CHAPTER VII.

A Minister in the Union.

Ever since David Dowling had publicly asked the question: "Would Christ join a labor union?" the mail had brought to him half a dozen or more letters daily in reference to it. Most of them were from union men, thanking him for his interest and eloquent sermon. Some of them were in the spirit of criticism, and a few even went so far as to denounce him for not having the spirit of a true radical.

He walked into his study one eventful morning in his life with a number of sealed letters in one hand and an open one in the other. He paused at the table, and then moved toward the window, where he stood looking out, in deepest thought.

Many questions were forcing their way into his honest heart. "Had he gone too far in this matter? Was it a part of his duty? Had he said just right in that one sermon, and in all other things he had uttered since? What ought he to do now?" etc.

No one of these had received a very satisfactory answer, and in fact they came so fast that one crowded out the other.

He held up the open letter and began to read it over again. It was from a union man, and apparently a thoughtful man and earnest soul. It read as follows:

"Would Jesus be a trade unionist? Though no conditions are stated in the above query, they are nevertheless implied, and it is really, therefore, a hypothetical question. If present conditions are assumed to be the natural and permanent state of the world, then it seems evident to me that Jesus, as the champion of the poor and the oppressed, would advocate the formation of labor unions by workingmen to wrest from their masters a larger share of the wealth which their own toil is producing; he would under such conditions be a trade unionist.

"But we know the continuance of present conditions is impossible, such an assumption would be foolish. Jesus knew very well that change is the order of the universe. Whether we consider him as divine or human, He was more than a workman endeavoring to earn an honest living for himself and family. He was a teacher of eternal truth, a prophet of a true order of human life, an evangel of justice and brotherhood among men, a revolutionist of transcendent genius and ability, who desired the overthrow of all wrong and the establishment of what He called the "Kingdom of God" on earth as it is in heaven

"Such being his ideal, it is as impossible to imagine Jesus as a trade unionist as it is to imagine a trade union in heaven Were He among us to-day, He would view life from a standpoint too lofty; He would be undermining wrongs too deep, He would be destroying ideas too all-pervading, and inculcating a philosophy too broad and all-embracing in its humanity to have a place in a movement which has for its object the elevation of any class, no matter how large or deserving that class might be.

"Jesus was not and could not be the 'practical' man who takes off his coat and attacks specific abuses with a club. His mission was the proclamation of eternal verities. He saw clearly that, so long as men are inspired by the desire to get the better of each other in any degree whatever, the coming of His 'kingdom' is in that degree retarded. Now, then, could He have a part in a movement having for its object the supremacy of organized labor?

"Any tool for the accomplishment of a specific purpose is the best until a better is devised; the trade union is the best tool known to large numbers of men, but it by no means follows that it is the best possible, nor that the objects now sought by these organizations are the best, even for their members. Jesus, if He again walked among us, would certainly see

(To be continued.)

Notes Sent to Teacher.

These notes are declared by the Chicago "Inter Ocean" to be authentic:

Teacher—What shall I do mit Charley? Me and my man can't nothing make of him. When we want to lick der little imp he gets the bed under where we can't reach for him and must put a book on her bedroom door to hold him for his licking. Please soak him in school shust as often as you got time.

Teacher—If Louis is bad please lick him until his eyes are blue. He is very stubborn. He has a good deal of the mule in him. He takes after his father.

Teacher—I dink you are a fool. You want my boy to read when he don't no alferbits Please teach him some.

Miss Brown—You must stop teach my Lizzie fecal torture she needs yet reading and figors mit sums more as that, if I want her to do jumpin I can make her jump.

Miss—My boy tells me when I trink beer der overcoat from my stummack gets too thick. Please be so kind and intervene in my family affairs.

Dear teacher—Please excuse Fritz for staying home he had der measles to oblige his father.

Teacher—Please excuse Rachel for being away those two days her grandmother died to obliged her mother.

Teacher—You must excuse my girl for not coming to school she was sick and lade in a common dose state for three days.

The Climax of Savagery.

Never have the natives of a State been treated with more hideous cruelty than those of the Congo Free State. It is under the personal rule of King Leopold, whose idea is that it should furnish him with money for his private purse, and money he is determined to make out of it, no matter how. Amongst other devices, vast areas are farmed out to companies, in which, unless greatly maligned, he is a large shareholder. These companies collect india-rubber. The system is to force the natives to deliver a certain fixed amount. If a village does not do this, the hands of the men are cut off, the village is burnt, and the women and children given over to the tender mercies of some neighboring tribe of savages. This procedure is defended by the worthy monarch, in his reply to the English note protesting against such a regime, by the following economic doctrine:

"Natives cannot be exempted from all taxation when they benefit by the material and moral advantages introduced into their country. If they have no money, they must pay in manual labor." —London "Truth"

A Story of Pius X.

In Tombolo an amusing story is told of the present Pope and the mourners' candles. A wealthy resident of Tombolo died, and his funeral ceremonies were the most elaborate ever known in that humble village. A great many mourners were hired, whose office was to bear the lighted candles beside the catafalque in its progress to the cemetery. The candles were of the clearest wax and immense in size, having been specially brought from Venice for the occasion. The like had never been seen in Tombolo, their size exceeding even the large candles on the church altar. During the solemn procession the Don Giuseppe, now Pius X, noted how often the candles were extinguished. He could not account for it, as the day was a still one. He watched an old woman nearest to him and saw her furtively blow out the candle which her right arm could scarcely carry. "How did you come to put out that candle, Giaccoma?" he queried sternly. The crone turned a properly sorrowful face to him, replying: "My tears have put it out—they fall so freely." The excuse caught Don Giuseppe's sense of humor. "Well," said he, relighting the fine taper, "see that your tears fall to the left of you after this." The old woman's light held out to the grave, though no doubt it seemed a pity not to save as much of the candle as she could use in her home.

VARICOCELE NERVOUS DEBILITY CURED.

No Names Used Without Written Consent.

If you have transgressed against the laws of nature you must suffer. Self abuse, later excesses and private diseases have wrecked thousands of promising lives. Treat with scientific physicians and be cured. Avoid quacks. E. A. Sidney, of Toledo, says: "At the age of 14, I learned a bad habit and at 19 contracted a serious disease. I treated with a dozen doctors, who all promised to cure me. They got my money and I still had the disease. I had given up hope when a friend advised me to consult Drs. K. & K., who had cured him. Without any confidence I called on them, and Dr. Kennedy agreed to cure me or no pay. After taking the New Method Treatment for six weeks I felt like a new man. The drains ceased, wormy veins disappeared, nerves grew stronger, hair stopped falling out, urine became clear and my sexual organs vitalized. I was entirely cured by Dr. Kennedy and recommend him from the bottom of my heart."

We Treat and Cure Syphilis, Gleet, Varicocele, Emissions, Stricture, Unnatural Discharges, Seminal Weakness, Kidney and Bladder Diseases.

CONSULTATION FREE. BOOKS FREE. Call or write for Question Blank for Home Treatment. NO CURE, NO PAY.

NEW YORK-GRASS VALLEY GOLD MINING CO.

Now producing and shortly to go on a Dividend Paying Basis

Offers the best opportunity for immediate investment of any Mining Stock is the Market. The Company is now installing additional stamps to work in their mill, which will be in operation this week, when the Capacity of the present plant will be increased to upwards of

100 TONS PER DAY

$ $

GOLD BAR

6 1-2 inches long. 2 7-8 inches wide and 1 3-8 inches deep

$ $

The above Gold Bar, weighing 168 ounces, recently sent to the San Francisco mint represents a ten day's run of the New York Grass Valley Mill, and is valued at about $2800.00.

We hold an option on a limited amount of the stock which we can offer for a very short time longer at

30 Cents per Share This is an **Exceptional Opportunity**

To secure a first class stock; and one that will not be available for any length of time, as on the declaration of the first dividend, which is due this month it will be impossible to secure it at anything like present prices.

We anticipate 75 cents to $1.00 per share within six months.

We advise the immediate purchase of New York Grass Valley stock for large and handsome dividends.

We are the authorized agents of this Company, and you will find it greatly to your advantage to deal directly with us.

Write for full particulars KAYE, DEWOLF & CO., Brokers and Financial Agents, 39 41 Cortland Street, N. Y. C.

IS THERE CERTAINTY

IN MINING

The Idaho Richmond Gold Mines Company says Yes

AND HERE IS THE PROOF

1st—By having a property located in a camp that has produced over sixty million dollars worth of gold.

2nd—By having a property that has produced over one hundred and fifty thousand dollars to the former owners.

3rd—By having over two thousand feet of development work done on the property in the way of tunnels and drifts.

4th—By having four different ledges on the property, varying in width from three feet to thirty feet, besides several smaller ones all rich in free gold.

5th—By having now on the dumps are estimated to be worth over twenty thousand dollars, and all taken from development work.

6th—By having large amount of stoping ground opened up for the taking out of large quantities of ore.

7th—By being able to ease a mill that is located within two thousand feet of the property for the treatment of the ore, which will be done as soon as a small amount of the stock is sold to help defray the expenses of getting ready.

There is no promoter or gift stock, and there is yet over six hundred thousand shares in the Treasury.

We can prove to your satisfaction that we have a mine, and it will pay you to write for information, if you are looking for an investment that will pay you good returns.

Manager.

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 6 claims, 600 x 1500 each. A 70 foot shaft on the Martha claim shows a vein of $30.32 ore 3 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.32 to $13,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay them $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address.

HOW SHALL WE LIVE.

Rev. Alfred W. H. Hadder,
Sixteenth Baptist Church,
New York.

Man shall not live by bread alone but by every word that proceedeth out of the mouth of God - Matthew, iv., 4.

How shall we live? The tempter says, "By bread." Christ replies in the words of our text. Man lives by God's gifts only as God is behind them, and yet the real support is not in the gifts but in the giver. Life in its fullest sense is action from within, sustained with food from without. This is clearly illustrated by the power of steam generated within a boiler, but dependent upon water and fuel from without.

God has appointed under all ordinary circumstances that we should sustain life by the secondary means of earthly food, but placing this as the limit of God's directions we make our lives earth, earthy, and hold out little or no hope to the poor and needy of this world's goods.

The word "bread" covers a wide range of earthly supplies and is of primary interest to the people of all nations. It places an emphasis upon the saying "Self-preservation is the first law of nature." The world says, "By these things we live."

Moreover, we are not blind to the necessary anxiety about such things as the body's just claim, but rather accept the fact that food, raiment and shelter are part of God's economy of life. Christ says, "Your heavenly Father knoweth that ye have need of all these things." In the Lord's Prayer we are taught to ask, "Give us this day our daily bread," and we are justified in a material interpretation of this human request as much as in a spiritual sense. But we are wrong if we place so small a horizon about our lives and give no attention to the words of Christ, "Man shall not live by bread alone, but by every word that proceedeth out of the mouth of God." We place ourselves by the side of the Pharisees, of whom it was spoken, "Woe unto you, Pharisees; for ye tithe mint and rue and all manner of herbs, and pass over judgment and the love of God; these ye ought to have done, and not to leave the other undone."

First. We should live in love. If Paul were writing to-day he would have said, "Though I possess abundance of all things, and have not love, it profiteth me nothing." Iron in the soil is raised to a more useful sphere by the growing plant rooted in the earth; the plant then taken to nourish the body places the iron still higher and finds its largest usefulness in energy produced in the blood of man. So the seed of divine love, placed by God in the human heart, can raise it to a larger and nobler life. We need the food of culture, knowledge, affection, solitude, all of which are bread to nourish, sustain and develop our souls, for man is not wholly alive when his body is alive; for the soul lives by every word which proceeds from the mouth of God.

In a western city by the river a sick girl had been taken out of the street by a poor woman who kept a dining-room for sailors, with a kitchen behind it, and who made a little bed for the sick child under a stairway. It was thought the girl would be more comfortable in a hospital, and so she was taken there. But she missed the kind heart of the motherly old woman's love and so went back to die in the kitchen. No doubt there was surprise in heaven when these two met at God's throne, and the old woman, who had no earthly church, heard the words uttered which encircle Livingstone's tomb in Westminster Abbey, "Inasmuch as ye did it unto one of these little ones, ye did it unto me."

Second. We may also live by every kind of truth which comes from God to make us more alive. It is ignorance, narrowness, bigotry and selfishness which make us cling to the letter and reject constant new revelation. The mind needs to be nourished with new thoughts or it will return to infancy long before the body comes to its three score and ten. Truth revealed in science, truth revealed in daily experience, truth revealed in common faith in man—these are some of the words proceeding out of the mouth of God. For men's souls are only nourished and strengthened in proportion to their minds' and hearts' working. High friendships, noble loves, solemn angles in grief and death, adversity and solitude - all special agencies to feed particular souls.

Third. We may also grow strong and live by every kind of service. This was Christ's teaching and practice. "I must be about my Father's business" are His words. God's service—an exalted sense of true life, a definite path of duty, a noble example of a blessed spirit. Though the body lacked the bread of this world and came to hunger, pain, tears, sorrow, insult and rejection, yet the one thought is, "My meat is to do the will of Him that sent me."

So may we readers of to-day's sermon resist the temptation of a concentrated thought and work for earthly bread, and feed upon that bread of which if a man eat he shall hunger no more.

Bulb Growing in Ireland.

Just now, says The London Daily Chronicle, millions of bulbs are being bought and sold, or given away, and it is good to know that Great Britain, even in the absence of a protective duty, is rapidly wresting the trade away from Holland. In that country bulb culture has been an hereditary pursuit for the past three centuries at least, and until a quite recent period the importation to England was immense. Now even the rarest and consequently most expensive varieties are grown on this side of the North Sea, and not the least successful bulb farms are to be found in Ireland. The experiment, which was begun eight years ago at Rush, county Dublin, where the ground was previously devoted to potatoes, has proved entirely successful, and both climate and soil have been found almost perfect for this industry. Irish-grown bulbs have not yet reached the eccentric prices—running to three figures—which a past generation sometimes paid for a single specimen, but even at Rush you may spend twelve guineas on a root.

SEWING HINTS.

Always use double thread for gathering.

Always use as fine a thread and needle as the garment will allow.

When threading your needle make the knot on the end broken from the reel.

The rule for frilling is one and a quarter the length of the edge to be trimmed.

When sewing on a button place the knot on the right side of the cloth directly under the button.

In sewing a seam, put the stitches closely together, but lightly, into the cloth, being careful not to pull the thread tight, as this causes the seam to pucker.

Sunday consultations at the Paris hospitals were not well attended by the working classes, the workingman preferring to lose a day's work rather than a few of his hours of idleness on Sunday.

For the Ladies.

Knives.

The loosening of the handles of knives is due to the fact that the knives have been tossed into a pan of hot water, together with the forks and spoons, and, in consequence, the cement has melted away. Knives when brought from the table, should be scraped against the edge of a plate to remove as much soil as possible, and the blades should then rest in a jug, not a pan, of hot water, into which a little bit of soda has been melted, care being taken that the water does not reach the handle, where it joins the blade.

Bookish Women.

Bookishness is an unreliable test of ability. I have known bookish women who were profuse readers and delighted in study, but were not of much use for anything else, and I have known other women who took books rather hard, but amply made up for that disability by their closeness of observation and mental energy. As between persons who read to save themselves the trouble of thinking, and persons who observe and think, but find reading laborious, the latter are likely to be best worth while. But reading, observation and thought ought to work well together and to make for practical efficiency. A mind that is capable of Greek and analytical geometry is usually capable also, under proper training, of omelets, good coffee and household administration.—E. S. Martin, in Harper's Bazar.

Hindu English.

Lady Curzon, who was Miss Leiter of Chicago, gets a lot of fun out of her life in India. Among other fads, it is said that she makes a point of collecting any amusing attempts made by Hindus to write English that may come under her notice, and has many ludicrous specimens in her scrapbook. Recently she got from Bombay a letter that two brothers sent out to their patrons on the death of their father, who had been the head of the firm. The letter ran: "Gentlemen,—We have the pleasure to inform you that our respected father departed this life on the 10th inst. His business will be conducted by his beloved sons, whose names are given below. The opium market is quiet, and mal. 1,500 rupees per chest. O death, where is thy sting? O grave, where is thy victory? We remain, etc."—Leslie's Weekly.

Care of House Plants.

The advent of colder weather means increased fire heat, the latter also meaning an increased aridity or dryness of the atmosphere. The latter condition will probably induce a visit from insect pests, unless precautions are taken to prevent their appearance. Green fly and red spider are most to be feared, especially the latter, as their appearance is not so easily detected as that of the aphis, or green fly.

Copious sprinkling and syringing with cold water is the best preventive for the attacks of the so-called spider. Salvias, fuchsias, roses and carnations are first favorites with this little pest. When first attacked, the leaves of these plants present a whitish, dusty-looking appearance, especially on the underneath side, and the leaves will soon commence dropping twice every day. Tobacco water is the best remedy for green fly, although tobacco leaf stems, or even a cigar thoroughly dried and rubbed into a fine powder and sprinkled on the plants infested with green fly will generally rid the plant of them. The latter application is best made after the plants have been recently sprinkled or syringed, as the tobacco dust adheres better when the foliage of the plant is moist.—William Hunt, Guelph, Ont.

Keep the Windows Open.

You would not think of drinking stale or poisoned water, would you? You know that if you were to be shut in an air-tight compartment death would result. Of all the necessities of life, you can live longer without any of them than air. Impure air and darkened apartments are the cause of an untold number of deaths annually. You know that on a sunless day, with a close atmosphere, you are out of sorts at the best, if you are lucky enough to escape physical ailments, while you are mentally depressed. But once let the sun shine brightly, and clear the atmosphere, how different, how much better you feel in every way.

Cold weather is coming, and when you are tempted to close up the house as tight as it can be made, remember these things, and don't do it, especially at night. Keep the windows in the sleeping apartments open enough to at least give you sufficient fresh air. A cold room does not indicate that it is healthy, far from it. A sleeper will soon breathe up all the fresh air in a room, and if there is not a constant supply of fresh air, he simply breathes over and over again the poison thrown off by his lungs. And the breathing of this vitiated air only tends to lower the temperature and vitality of the system, so that it is not as capable of withstanding the rigors of winter. Fresh air is heating to the body; in fact, upon it depends the combustion of the fuel in the body and by which we are kept alive, which we should always bear in mind.

Even with open windows during the night, bed chambers and bed clothing should be thoroughly aired each morning, and allowed all the sunlight possible. During sleep, not only do the lungs throw off more poison than during the day, but it is especially so with the body in its relaxed condition and when the pores are all open. During sleep the body should have plenty of covering; better to have too much than not enough, both to induce deep slumber and to keep the skin moist and the pores open that they may have the opportunity to rid the system of poison. Bear in mind that death would follow the closing of the pores.

Fresh air in cold weather will cost money, as more fuel will be required, but it will be economy, for if it does not save sickness and doctor bills, and which it most likely will do, you will feel better and the stronger for it.—Cooking Club.

TO THE AFFLICTED

The following testimonial may be read with interest to sufferers from skin eruptions or eczema.

January 29th, 1902

Dear Sirs,—I notice your advt. in a paper about your wonderful eczema cure and I feel it my duty to tell you, that I was induced to try it as I had been afflicted with skin trouble in my hands for 14 years. I have tried several doctors and they done me no good. I only used one box of Dr. Clarke's Sure Cure for Eczema. It has made a complete cure. I recommend it to all suffering from skin disease. My hand was so bad that the nails used to come off. You can use my name if you wish.

Yours truly,
MR. JOHN WOOD,
Peakes Station, P.E.I.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or boxes for $1.00.

Peter D. McFayden, Riverdale, P. E. I. writes: "I am very busy, but just drop a line to say I highly recommend your catarrh cure. It has done grand work for me. I am so much better."

Dr. Clarke's Sure Cure for Catarrh is also one of the best remedies on the market. We are daily in receipt of letters telling how much they have done for the afflicted. Miss Sarah Hill, 412, Front Street, Traverse City, Mich., writes "I have been wonderfully helped by the use of your catarrh cure; send me another dollar's worth."

Dr. Clarke's Sure Cure for Catarrh and Clarke's Sure Cure for Eczema, same price. $500 will be paid for any case that it will not permanently cure.

EVERYBODY READS THE TIMES.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.64 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.96 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from two to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $62.64 and $79.08 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet further it will cut the present tunnel would meet a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group, is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1879, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

The PETERBOROUGH BROKERAGE CO., Fiscal Agts.

PETERBOROUGH, ONTARIO.

Equitable Gold Mining Co.

R. C. LANE, President. P. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,350 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1903, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $165,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 300-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully.

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit; Yours very truly,

R. N. FREDERICKS, Cashier

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise.

KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-31-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

The Science of Flowers.

It is to be feared that among the embellishments of life, writes Sir Edwin Arnold in The London Telegraph, flowers too often afford an example of how people will turn pleasures into toils. I noticed lately a tender little wail which arose from a lady who found herself overburdened with the too frequent task of arranging buds and blossoms for the passages and apartments of her London house. A lover of flowers, as everybody of good taste must be, she confessed to feeling something not unlike what the prisoner experiences when his day's allowance of oakum to be picked has just been served out, to see her butler climb the staircase, holding at arm's length on a vast tray the confused heap of blooms and foliage; behind him at the same time would come the parlormaid, staggering under a load of glasses and vases and what not, destined to hold the costly plunder of the morning. At first a delightful labor and always a graceful and sweet-scented one, it had come, said the fair complainant, to be a heavy and time-consuming task, growing more and more burdensome as the fashion of floral display extended, and the country every morning sent up to town such tempting wealth of roses and lilies and the rest.

It is not the fault of the flowers, of course, except because, being so fragrant, so delicate, and so beautiful, they make slaves of all who serve them. On the contrary, it would decidedly tend to shock the mind of many a fair arranger of flowers if science went to the unkind pains of explaining to her how entirely free from any wish or intention to give pleasure are those exquisite roses and all those dainty blossoms. If there were, indeed, a language of flowers, and the products of the parterre could speak, they would say, "Madam (or Miss), do not flatter yourself that one petal of us has been tinted, one bud expanded, one green leaf spread to the sunshine, or one single calyx among us has opened its wonderful apparatus of stamen and pistil to nestle in your silken tresses or to repose in not unequal rivalry above your rosy cheeks or upon your lily-white necks and bosoms. Not for you, however much the poets have lied to you, were we created, and never for you have we grown up to the glory and the grace for which we have become to-day your unwilling victims. We were made so lovely, so delicate, and variously tinted, perfumed so divinely, and loaded with little chalices of nectar distilled from earth and sky by such chemistry as your Royal Society never knew, wholly and solely to please a beetle, to attract a bee, to woo into our secret service the painted butterfly or fluttering moth.

"Your great and learned Mr. Darwin, if you will only read him, can show you why we wear these colors and display these stains and patches and lines of scarlet and gold, of purple and amber. They are simply traps and baits to lure the wandering insects, who thus become the marriage-makers of almost all our families, because the law stands that it is best for plants and trees to wed abroad instead of to wed at home."

The Japanese are perhaps the only people on the earth who have understood all this, and who do not allow the flowers to embarrass or overwhelm them. Sensitive in every nerve to the glory of line and splendor of color in nature, they economize their admiration and confine it to a profound enjoyment of a few, instead of the wholesale collections indulged in by western people. They would no more regard one of our vast bouquets or bowpots as a proper mode of arranging flowers than we should call the motley crowd of spectators in the pit of a theatre an evening party. Their leading idea, entirely opposed to ours, is to get the full delight of shape and outline of natural balance and contrast from one or two floral specimens, and by no means to mass and thereby confuse them, so that even the truest eye and most subtle nostrils become bewildered in the tumult of beauty, like the ass of Buridanus between his equal bundles of hay.

Ruskin has somewhere expressed the opinion that flowers ought never to be plucked from their stalk, but left to grow, because their chief charm is their life, which is forfeited when the blossom is broken off. But, although a flower is never so charming as where it is seen alive and fulfilling its floral purpose, that would sadly limit popular enjoyment of it. Perhaps this enjoyment is keenest among those who least comprehend the magic and the mystery of their being, and I am half afraid that the country girl who puts a flower in her hair, or the little ones who fill their small fingers with bluebells and May blossoms, have a pleasure in that glory of theirs which our Lord declared to be greater than Solomon's, untasted by mighty Darwin, when counting the seeds in a single capsule of an orchid, and showing how, but for a preventive law, that single the whole globe with orchis maculata. plant in four generations could cover

Benefit of Spraying Apple Orchards.

The experimental spraying operations carried on during the spring and summer by the Fruit Division, Ottawa, in the Woodstock and Ingersoll districts have been satisfactory beyond expectations. Mr. W. A. MacKinnon, chief of the Fruit Division, says that they furnish the best illustration of the necessity of spraying that he has ever seen. Aside from the opportunities for comparison between sprayed and unsprayed orchards, chance has provided some remarkable proofs of the value of the operations. In every case where a single tree, or part of a tree, in one of the sprayed orchards was neglected the fruit on such tree or part of tree is to-day hardly worth the trouble of picking, while on all sprayed portions scab is hardly to be found.

There are some first class bargains to be had in some new and second hand pianos and organs, at W. G. [illegible], 170 Charlotte street, agent for Heintzman & Co., Toronto. Call and see for yourself.

A Romantic Episode.

The King's visit to Paris has been marked by a singular and picturesque incident, says the "Spectator." It appears that in 1878 a chemist named Danval was accused of poisoning his wife, and that the King, then Prince of Wales, anxious to watch French procedure, attended the trial, which ended in a sentence of imprisonment for life. The Prince, who had watched the evidence for five days, was certain that justice had miscarried, and visited the convict in his cell to tell him so, and enquire if any remedy were possible. None could be found, but after twenty years' imprisonment the sentence was revised and M. Danval liberated. The kindness of the Prince in his hour of despair had made a deep impression on his mind, and when the King recently visited Paris he addressed him a letter full of gratitude for the visit paid twenty-five years before. One wonders if kings know the depth of the impression both of regard and of hatred which they can almost unconsciously make.

"What's the difference between obstinacy and firmness?" "Why, obstinacy in oneself is firmness and firmness in another is obstinacy."—Chicago "Post."

Estate agent (to laborer's son)—Here, my boy, where can I find your father? Boy—In the pig stye, sir. You'll know 'im by 'is brown 'at!—"Punch."

Barber—How will you have it cut, sir? Peppery—Both short. "Both? Hair and beard?" "No; hair and conversation."

"Who originated the remark, 'It is always the unexpected that happens?'" "I don't know," said the melancholy government attache, "but I suspect he worked in the weather bureau."—Washington "Star."

"W'y don't you put mo' hell in you' sermons, Brer Williams?" "Well, w'en I gives 'em too much er it de congregation makes sich a noise fannin' deyself, I hes ter order a recess!"—Atlanta "Constitution."

Von Quizz—What does your friend write? Verse? Novels? Tragedies? H. Kasho—Great Scott, what do you take him for? An amateur? No, sir! He writes advertisements, of course!—New Orleans "Times-Democrat."

Ascum—How are the plans for your new house coming along? Subbubs—Splendidly. My wife has finally laid out all the closets she wants, and now all the architect's got to do is to build the house around them.—Philadelphia "Press."

"Did you give that woman two good eggs for her five cents?" asked the corner-grocer of the new boy. "I did, sir." "You're discharged. You should have sold her two bad eggs, so that she'd come back to kick, and give me a chance to sell her a porterhouse steak."—Baltimore "News."

TO THE AFFLICTED.

Dear Reader,—Are you a sufferer from any of the following ills: Lack of ambition, nervous exhaustion, ideas easily confused, irritability of temper, impairment of memory, despondency, general debility, liver not right, kidneys out of order, rheumatism, dyspepsia or indigestion, dizzy or fainting spells? Does your heart palpitate? Do you have smothering or sinking sensations, pimples, or eruptions of the skin, etc, etc.

If you are troubled as above, you can be cured by the use of Dr. Clarke's Wonderful Little Red Pills. A trial order of three boxes for $1.00 will convince anyone that these pills are truly wonderful. We are daily in receipt of letters bearing the highest testimony. We have not space to tell you all about them here, but will answer any enquiries as to their merits. Mrs. John Macdonald, Durham, N.S., writes us, "After taking two boxes of Dr. Clarke's Little Red Pills for indigestion, which I had been troubled with for a number of years, I am now perfectly well. I followed the directions carefully."

To every one sending for a trial order and finding good results we ask to observe our special offer enclosed with every box. It is of special interest to every one.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years: the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or 3 boxes for $1.00.

Dr. Clarke's Sure Cure for Catarrh and Dr. Clarke's Sure Cure for Eczema, same price. $100 will be paid for any case that it w no permanently cure.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000.00. Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 5000 feet in addition to other claims approximating a total acreage of 200 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75ca Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 190 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable galena ore, the point of intersection being 600 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*

C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

Lung Trouble

Promptly relieved and permanently cured by inhaling Catarrhozone

Mrs. B[illegible] Brown of [illegible], N. S., was cured by Catarrhozone of lung trouble and catarrh after hundreds of other remedies failed

If your lungs are weak, if there is consumption in your family; if colds, catarrh and Bronchitis bother you, be sure to use Catarrhozone. It is especially adapted for these diseases and cures every t[illegible]

Mrs. Brown took cough mixtures, but they made her sick. Then she used an atomizer, but, after resorting without benefit to poultices and numerous other remedies, she tried Catarrhozone.

"I used Catarrhozone Inhaler," writes Mrs. Brown, five minutes every hour, and soon recognized that it was going to cure me. I could feel the soothing medicated air spreading through the air passages of the throat, and it touched the sore spots in the lungs that other remedies failed to reach. Catarrhozone seemed to go just where it was needed most, and soon put a stop to my cough. It restored me to perfect health, and I am convinced that no cough, cold or catarrh can exist if Catarrhozone is used."

No treatment is so clean, so pleasant, so certain to cure as Catarrhozone. By means of the Inhaler the local symptoms such as coughing, inflammation and congestion are speedily corrected. Ferrozone tablets which are taken after each meal purify and cleanse the blood of all poisons and build up and strengthen the system.

This local and constitutional treatment is always effective, and cures cases that have been given up as hopeless. Money can't buy or produce anything better, and to get cured it is absolutely necessary to use Catarrhozone.

Complete outfit costs $1; small size 25c. At druggists or N. C. Polson & Co., Kingston, Ont.

DASHES HERE AND THERE BY TIMES' REPORTERS

STATIONERY

When in need of anything in the line of commercial stationery, visiting cards, etc., leave your order at the Times job department. Workmanship unexcelled.

Police Court

Mr. Samuel Kennedy was charged by Geo. W. Wright with non-payment of wages at the police court yesterday. After hearing the evidence, the Magistrate gave judgment for $4 and $3.05 costs.

The New Industry

Mr. McDermott, who has been the guest of Mr. A. J. Clarke, London street, for the past few days, leaves for his home in Ingersoll today. Mr. McDermott is impressed with the importance of Peterborough as a manufacturing centre, and will seriously consider the advisability of starting a large cooperage factory here.

Children's Aid Society.

The officers of the Children's Aid Society acknowledge with many thanks the receipt of a cheque for $72.65 from the Alexandra Dramatic Club, this being the proceeds of the entertainment given in the Opera House on the evening of the 12th of January. The time devoted to this work and the interest manifested by the public, are much appreciated by the officers of the society.

A Victim of Diphtheria

Yesterday morning there passed away at St. Joseph's Hospital the little six-year-old daughter of Mr. and Mrs. Charles Valois, town. The child was stricken with diphtheria, to which malady she succumbed, as above. Interment took place yesterday afternoon to the Little Lake cemetery. Mr. and Mrs. Valois have the sympathy of their many friends in their sorrow.

WM PRINGLE,

[illegible] Post Office. [illegible]

DEFENDS THE PRESIDENT.

To the Editor of The Times:

Sir,—The explanation of the apparent anomoly of 400 for Kendry and 1300 for Stratton is forthcoming, as required,—at least so far as Mr. Bradburn's connection with it as President of the Liberal Conservative Association is concerned.

Although I have not seen Mr. Bradburn with regard to this affair, I know that no President in Peterborough ever held so many and persistent committee meetings as Mr. Bradburn did. He drummed us up night after night until we were sick of it. To me he expressed the opinion time and again that Garvin had a fighting chance. The result was not due to Mr. Bradburn's inactivity, certainly. Of course, disappointment often breeds illfeeling, but till some better proof than exists at present is brought forward of "Conservative treachery" the less said about it the better.

In the Gamey trial it was sworn by one of the chief witnesses that Beattie Nesbitt, E. Bristol and the one other member of Whitney's saw-off committee compromised the West Peterborough protest, greatly to their advantage. If anyone was to blame in this matter it was Whitney—not Bradburn. The rumors respecting Mr. Kendry are just as foundationless.

Yours &c.,

P. B. P.

Cereal Company's Enterprise
